National Survey of Substance Abuse Treatment Services (N-SSATS): 2017

Data on Substance Abuse Treatment Facilities

DEPARTMENT OF HEALTH AND HUMAN SERVICES
Substance Abuse and Mental Health Services Administration

Acknowledgments

This report was prepared for the Substance Abuse and Mental Health Services Administration (SAMHSA), U.S. Department of Health and Human Services (HHS). Work was performed under Contract No. HHSS283201600001C. The Contracting Officer's Representative (COR) at SAMHSA/CBHSQ was Cathie E. Alderks, PhD.

SAMHSA complies with applicable federal civil rights laws and does not discriminate on the basis of race, color, national origin, age, disability, or sex. *SAMHSA cumple con las leyes federales de derechos civiles aplicables y no discrimina por motivos de raza, color, nacionalidad, edad, discapacidad o sexo*.

List of Figures xiii

Highlights 1

Chapter 1. Description of the National Survey of Substance Abuse Treatment Services (N-SSATS) 5

- Data Collection Procedures for the 2017 N-SSATS 6
- Facility Selection for the 2017 N-SSATS Report 9
- Survey Response Mode 9
- Data Considerations and Limitations 10
- Organization of the Report 10
- Terminology 11

Chapter 2. Trends in Facility Characteristics 13

- Number of Facilities 13
- Facility Operation 13
- Type of Care Offered 14
- Facilities That Use Medication-Assisted Opioid Therapy 15

Chapter 3. Trends in Client Characteristics 17

- Number of Clients 17
- Facility Operation 17
- Type of Care Received 18
- Clients Receiving Medication-Assisted Opioid Therapy 19
- Substance Abuse Problem Treated 19
- Clients Under Age 18 in Treatment 20

Chapter 4. Facility Characteristics and Services 21

- Facility Operation and Type of Care 21
- Diagnosed Co-occurring Mental and Substance Abuse Disorders 22
- Facility Size 22
- Facility Capacity and Utilization Rates 24
- Services Provided 25
- Clinical/Therapeutic Approaches 26
- Programs or Groups for Specific Client Types 27

Table of Contents (continued)

Treatment Services in Sign Language for the Deaf and Hard-of-Hearing and in Languages Other Than English 28
Detoxification Services 28
Client Outreach 29
Facility Licensing, Certification, or Accreditation 29
Payment Options 30
Facility Funding 31
Facilities Using Medication-Assisted Opioid Therapy 31
Counseling Services Offered by Facilities 32
Facility Smoking Policy 32

Chapter 5. Client Characteristics 33
Facility Operation and Type of Care 33
Diagnosed Co-occurring Mental and Substance Abuse Disorders 34
Clients Under Age 18 in Treatment 34
Medication-Assisted Opioid Therapy 34

Chapter 6. State Data 37
Survey Response 37
Trends 37
Clients in Treatment per 100,000 Population Aged 18 and Older 38

List of Tables

Chapter 1

1.1 N-SSATS facilities, by status and mode of response: 2017 8

Chapter 2

2.1 Facility turnover: Number and percent, 2007–2017 42

2.2 Facility operation: Number and percent, 2007–2017 43

2.3 All facilities and facilities with opioid treatment programs (OTPs), by type of care offered: Number and percent, 2007–2017 44

2.4 Medication-assisted opioid therapy provided at facilities with opioid treatment programs (OTPs) and non-OTP facilities: Number and percent, 2007–2017 45

Chapter 3

3.1 Clients in treatment, by facility operation: Number and percent, 2007–2017 46

3.2 Clients in treatment, by type of care received, and clients receiving buprenorphine, naltrexone, or methadone: Number and percent, 2007–2017 47

3.3 Clients in treatment, by substance abuse problem and diagnosed co-occurring mental and substance abuse disorders: Number and percent, 2007–2017 48

3.4 Clients under age 18 in treatment, by type of care received, and clients under age 18 in treatment in facilities offering special programs or groups for adolescents: Number and percent, 2007–2017 49

Chapter 4

4.1a Type of care offered, by facility operation: Number, 2017 50

4.1b Type of care offered, by facility operation: Percent, 2017 51

4.2 Type of substance abuse problem treated and treatment of clients with diagnosed co-occurring mental and substance abuse disorders, by facility operation: Number and percent, March 31, 2017 52

4.3 Facility size, by type of care offered and facility operation at facilities with opioid treatment programs (OTPs): Median number of clients, March 31, 2017 53

4.4 Facility size, by type of care offered and facility operation at facilities without opioid treatment programs (non-OTPs): Median number of clients, March 31, 2017 54

List of Tables (continued)

4.5a Facility size in terms of number of clients in outpatient treatment, by facility operation: Number and percent, March 31, 2017 55

4.5b Facility size in terms of number of clients in residential (non-hospital) treatment, by facility operation: Number and percent, March 31, 2017 56

4.5c Facility size in terms of number of clients in hospital inpatient treatment, by facility operation: Number and percent, March 31, 2017 57

4.6 Facility capacity and utilization of residential (non-hospital) care, by facility operation: Number, utilization rate, and percent, March 31, 2017 58

4.7 Facility capacity and utilization of hospital inpatient care, by facility operation: Number, utilization rate, and percent, March 31, 2017 59

4.8 Services provided, by facility operation: Number and percent, 2017 60

4.9a Services provided, by type of care: Number, 2017 62

4.9b Services provided, by type of care: Percent, 2017 64

4.10 Clinical/therapeutic approaches, by frequency of use: Number and percent, 2017 66

4.11a Facilities offering special programs or groups for specific client types, by facility operation: Number, 2017 67

4.11b Facilities offering special programs or groups for specific client types, by facility operation: Percent, 2017 68

4.12a Facilities offering services in sign language for the deaf and hard-of-hearing and in languages other than English, by facility operation: Number, 2017 69

4.12b Facilities offering services in sign language for the deaf and hard-of-hearing and in languages other than English, by facility operation: Percent, 2017 70

4.13 Facilities detoxifying clients, by substance and facility operation: Number and percent, 2017 71

4.14 Facilities with client outreach, by facility operation: Number and percent, 2017 72

4.15a Facility licensing, certification, or accreditation, by facility operation: Number, 2017 73

4.15b Facility licensing, certification, or accreditation, by facility operation: Percent, 2017 74

List of Tables (continued)

4.16a Facility licensing, certification, or accreditation, by type of care offered: Number, 2017 75

4.16b Facility licensing, certification, or accreditation, by type of care offered: Percent, 2017 76

4.17a Types of payments accepted, by facility operation: Number, 2017 77

4.17b Types of payments accepted, by facility operation: Percent, 2017 78

4.18 Facility funding, by facility operation: Number and percent, 2017 79

4.19a Medication-assisted opioid therapy provided at facilities with opioid treatment programs (OTPs) and non-OTP facilities, by facility operation, Number, 2017 80

4.19b Medication-assisted opioid therapy provided at facilities with opioid treatment programs (OTPs) and non-OTP facilities, by facility operation: Percent, 2017 81

4.20a Type of care offered in facilities with opioid treatment programs (OTPs), by facility operation: Number, 2017 82

4.20b Type of care offered in facilities with opioid treatment programs (OTPs), by facility operation: Percent, 2017 83

4.21a Facility licensing, certification, or accreditation of facilities with opioid treatment programs (OTPs), by type of care offered: Number, 2017 84

4.21b Facility licensing, certification, or accreditation of facilities with opioid treatment programs (OTPs), by type of care offered: Percent, 2017 85

4.22 Facilities using counseling as part of their substance abuse treatment program, by type of care: Number and percent, 2017 86

4.23 Facility smoking policy, by facility operation: Number and percent, 2017 87

Chapter 5

5.1a Clients in treatment, by type of care received and facility operation: Number, March 31, 2017 88

5.1b Clients in treatment, by type of care received and facility operation: Row percent, March 31, 2017 89

5.1c Clients in treatment, by type of care received and facility operation: Column percent, March 31, 2017 90

List of Tables (continued)

5.2 Clients in treatment, according to substance abuse problem and diagnosed co-occurring mental and substance abuse disorders, by facility operation: Number and percent, March 31, 2017 91

5.3 Clients under age 18 in treatment, by type of care received and facility operation: Number and percent, March 31, 2017 92

5.4a Clients receiving medication-assisted opioid therapy provided at facilities with opioid treatment programs (OTPs) and non-OTP facilities, by facility operation: Number, March 31, 2017 93

5.4b Clients receiving medication-assisted opioid therapy provided at facilities with opioid treatment programs (OTPs) and non-OTP facilities, by facility operation: Percent, March 31, 2017 94

Chapter 6

6.1 N-SSATS facilities, by status, response rate, mode of response, and state or jurisdiction: 2017 95

Trends 2007–2017

6.2a Facilities and clients in treatment, by state or jurisdiction: Number, 2007–2017 97

6.2b Facilities and clients in treatment, by state or jurisdiction: Percent, 2007–2017 99

Facilities 2007–2017

6.3a Clients under age 18 in treatment, and clients under age 18 in facilities offering special programs or groups for adolescents, by state or jurisdiction: Number, 2007–2017 101

6.3b Clients under age 18 in treatment, and clients under age 18 in facilities offering special programs or groups for adolescents, by state or jurisdiction: Percent, 2007–2017 103

6.4a Facility operation, by state or jurisdiction: Number, 2017 105

6.4b Facility operation, by state or jurisdiction: Percent, 2017 107

6.5a Type of care offered, by state or jurisdiction: Number, 2017 109

6.5b Type of care offered, by state or jurisdiction: Percent, 2017 111

List of Tables (continued)

6.6a Type of assessment and pre-treatment services offered by facilities, by state or jurisdiction: Number, 2017 113

6.6b Type of assessment and pre-treatment services offered by facilities, by state or jurisdiction: Percent, 2017 115

6.7a Type of testing offered by facilities, by state or jurisdiction: Number, 2017 117

6.7b Type of testing offered by facilities, by state or jurisdiction: Percent, 2017 119

6.8 Type of transitional services offered by facilities, by state or jurisdiction: Number and percent, 2017 121

6.9a Type of pharmacotherapies offered by facilities, by state or jurisdiction: Number, 2017 123

6.9b Type of pharmacotherapies offered by facilities, by state or jurisdiction: Percent, 2017 125

6.10a Type of ancillary services offered by facilities, by state or jurisdiction: Number and percent, 2017 127

6.10b Type of ancillary services offered by facilities, by state or jurisdiction: Number and percent, 2017 129

6.10c Type of ancillary services offered by facilities, by state or jurisdiction: Number and percent, 2017 131

6.10d Type of ancillary services offered by facilities, by state or jurisdiction: Number and percent, 2017 133

6.11 Type of other services offered by facilities, by state or jurisdiction: Number and percent, 2017 135

6.12 Type of client substance abuse problem treated and treatment of clients with diagnosed co-occurring mental and substance abuse disorders, by state or jurisdiction: Number and percent, 2017 137

6.13 Facility size, by type of care offered and state or jurisdiction at facilities with opioid treatment programs (OTPs): Median number of clients, March 31, 2017 139

6.14 Facility size, by type of care offered and state or jurisdiction at facilities without opioid treatment programs (non-OTPs): Median number of clients, March 31, 2017 141

List of Tables (continued)

6.15a Facility size in terms of number of clients in outpatient treatment, by state or jurisdiction: Number and percent, March 31, 2017 143

6.15b Facility size in terms of number of clients in residential (non-hospital) treatment, by state or jurisdiction: Number and percent, March 31, 2017 145

6.15c Facility size in terms of number of clients in hospital inpatient treatment, by state or jurisdiction: Number and percent, March 31, 2017 147

6.16 Facility capacity and utilization of residential (non-hospital) and hospital inpatient care, by state or jurisdiction: Number and utilization rate, March 31, 2017 149

6.17 Type of counseling offered, by state or jurisdiction: Number and percent, 2017 151

6.18a Clinical/therapeutic approaches used always or often or sometimes, by state or jurisdiction: Number, 2017 153

6.18b Clinical/therapeutic approaches used always or often or sometimes, by state or jurisdiction: Percent, 2017 155

6.19a Facilities offering special programs or groups for specific client types, by state or jurisdiction: Number, 2017 157

6.19b Facilities offering special programs or groups for specific client types, by state or jurisdiction: Percent, 2017 159

6.20a Facilities offering services in sign language for the deaf and hard-of-hearing and in languages other than English, by state or jurisdiction: Number, 2017 161

6.20b Facilities offering services in sign language for the deaf and hard-of-hearing and in languages other than English, by state or jurisdiction: Percent, 2017 163

6.21 Facilities detoxifying clients, by substance and state or jurisdiction: Number and percent, 2017 165

6.22 Facilities with client outreach, by state or jurisdiction: Number and percent, 2017 167

6.23a Facility licensing, certification, or accreditation, by state or jurisdiction: Number, 2017 168

List of Tables (continued)

6.23b Facility licensing, certification, or accreditation, by state or jurisdiction: Percent, 2017 170

6.24a Facilities employing specific practices as part of their standard operating procedures, by state or jurisdiction: Number, 2017 172

6.24b Facilities employing specific practices as part of their standard operating procedures, by state or jurisdiction: Percent, 2017 174

6.25a Types of payments accepted by facility, by state or jurisdiction: Number, 2017 176

6.25b Types of payments accepted by facility, by state or jurisdiction: Percent, 2017 178

6.26 Facility funding, by state or jurisdiction: Number and percent, 2017 180

6.27a Medication-assisted opioid therapy provided at facilities with opioid treatment programs (OTPs) and other facilities, by state or jurisdiction: Number, 2017 181

6.27b Medication-assisted opioid therapy provided at facilities with opioid treatment programs (OTPs) and other facilities, by state or jurisdiction: Percent, 2017 183

6.28a Type of care offered in facilities with opioid treatment programs (OTPs), by state or jurisdiction: Number, 2017 185

6.28b Type of care offered in facilities with opioid treatment programs (OTPs), by state or jurisdiction: Percent, 2017 187

6.29a Facility licensing, certification, or accreditation of facilities with opioid treatment programs (OTPs), by state or jurisdiction: Number, 2017 189

6.29b Facility licensing, certification, or accreditation of facilities with opioid treatment programs (OTPs), by state or jurisdiction: Percent, 2017 191

6.30 Facility smoking policy, by state or jurisdiction: Number and percent, 2017 193

Clients 2017

6.31a Clients in treatment, according to facility operation, by state or jurisdiction: Number, March 31, 2017 195

6.31b Clients in treatment, according to facility operation, by state or jurisdiction: percent, March 31, 2017 197

List of Tables (continued)

6.32a Clients in treatment, according to type of care received, by state or jurisdiction: Number, March 31, 2017 199

6.32b Clients in treatment, according to type of care received, by state or jurisdiction: Percent, March 31, 2017 201

6.33 Clients in treatment, according to substance abuse problem and diagnosed co-occurring mental and substance abuse disorders, by state or jurisdiction: Number and percent, March 31, 2017 203

6.34 Clients in treatment, according to counseling type, by state or jurisdiction: Number and percent, March 31, 2017 205

6.35a Clients receiving medication-assisted opioid therapy provided at facilities with opioid treatment programs (OTPs) and other facilities, by state or jurisdiction: Number, March 31, 2017 207

6.35b Clients receiving medication-assisted opioid therapy provided at facilities with opioid treatment programs (OTPs) and other facilities, by state or jurisdiction: Percent, March 31, 2017 209

6.36a Clients under age 18 in treatment, according to facility operation, by state or jurisdiction: Number, March 31, 2017 211

6.36b Clients under age 18 in treatment, according to facility operation, by state or jurisdiction: Percent, March 31, 2017 213

6.37 Clients under age 18 in treatment, according to type of care received, by state or jurisdiction: Number and percent, March 31, 2017 215

6.38 Clients in treatment aged 18 and older, according to substance abuse problem, by state or jurisdiction: Number and clients per 100,000 population aged 18 and older, March 31, 2017 217

6.39 Clients receiving medication-assisted opioid therapy provided at facilities with opioid treatment programs (OTPs), by state or jurisdiction: Clients per 100,000 population, March 31, 2017 219

8 Clients in treatment per 100,000 population aged 18 and over: March 30, 2007 40

Highlights

This report presents results from the 2017 National Survey of Substance Abuse Treatment Services (N-SSATS), an annual census of facilities providing substance abuse treatment. Conducted by the Substance Abuse and Mental Health Services Administration (SAMHSA), N-SSATS is designed to collect data on the location, characteristics, and use of alcohol and drug abuse treatment facilities and services throughout the 50 states, the District of Columbia, and other jurisdictions. It is important to note that values in charts, narrative lists, and percentage distributions are calculated using actual raw numbers and rounded for presentation in this report; calculations using rounded values may produce different results.

- The N-SSATS facility response rate in 2017 was 89 percent. The response rates in 36 states or jurisdictions equaled or surpassed the overall rate [Tables 1.1 and 6.1].
- A total of 13,857 facilities completed the survey. The 13,585 facilities included in this report had a one-day census of 1,356,015 clients enrolled in substance abuse treatment on March 31, 2017 [Tables 1.1 and 3.1].[1]
- In the United States, there were 507 clients in treatment per 100,000 population aged 18 and older on March 31, 2017. The treatment rate was highest for drug abuse only (244 per 100,000 population aged 18 and older). Next were both alcohol and drug abuse (184 per 100,000) and alcohol abuse only (79 per 100,000) [Table 6.38].

Trends in Facility and Client Characteristics 2007–2017

- The number of substance abuse treatment facilities remained stable between the years 2007 and 2017. The number of eligible facilities responding to the 2017 survey was less than 1 percent lower in 2017 (13,585) than in 2007 (13,648) [Table 2.1]. The number of clients in treatment on the survey reference date (March 31) increased 19 percent from 1,135,425 in 2007 to 1,356,015 in 2017 [Table 3.1].
- The operational structure of the substance abuse treatment system (i.e., the type of entity responsible for operating the facility: private non-profit, private for-profit, or government—local, state, federal, or tribal) had some notable changes between 2007 and 2017.[2] Private non-profit facilities decreased from 58 percent of facilities in 2007 to 53 percent of facilities in 2017. Private for-profit facilities increased from 29 percent in 2007 to 36 percent in 2017 [Table 2.2 and Figure 2].
- The proportion of facilities offering outpatient care increased slightly between 2007 and 2017, while the proportions offering the two other major types of care—residential (non-hospital) and

---

[1] Facilities excluded from the report included 123 non-treatment halfway houses, 54 solo practices not approved by the state agency for inclusion, and 27 facilities that treated incarcerated clients only.

[2] Data for the federal agencies specified in the survey (the Department of Veterans Affairs, the Department of Defense, the Indian Health Service, and other unspecified federal agencies) are detailed in the tables.

hospital inpatient—declined. Between 2007 and 2017, the proportions of clients in treatment remained relatively stable among the three major types of care [Tables 2.3 and 3.2 and Figures 3 and 5].

- Opioid treatment programs certified by SAMHSA for the provision of medication-assisted therapy with methadone and/or buprenorphine increased from 8 percent of all facilities in 2007 to 10 percent in 2017 [Table 2.4].
- The proportion of all clients receiving methadone increased from 23 percent in 2007 to 28 percent in 2017 [Table 3.2].
- The proportion of all clients receiving buprenorphine in substance use facilities increased from less than 1 percent in 2007 to 8 percent 2017 [Table 3.2].
- The proportion of clients in treatment for the three broad categories of substance abuse problems—both alcohol and drug abuse, drug abuse only, and alcohol abuse only—changed between 2007 and 2017. The proportion of clients in treatment for both drug and alcohol abuse decreased from 45 to 37 percent of all clients. The proportion of clients in treatment for drug abuse only increased from 36 to 47 percent, and clients in treatment for alcohol abuse only decreased from 19 to 16 percent [Table 3.3].
- The numbers of clients under age 18 declined from 85,518 in 2007 to 62,862 in 2017. The proportion of clients under age 18 in treatment in each type of care (outpatient, residential [non-hospital], or hospital inpatient) differed slightly from the proportion overall, and was stable between 2007 and 2017 [Table 3.4 and 3.2]

Facility Operation—March 31, 2017

- Private non-profit organizations operated 53 percent of all facilities and treated 49 percent of all clients [Tables 2.2 and 3.1].
- Private for-profit organizations operated 36 percent of all facilities and treated 41 percent of all clients.
- Local governments operated 5 percent of all facilities and treated 5 percent of all clients.
- State governments operated 2 percent of all facilities and treated 2 percent of all clients.
- The federal government operated 2 percent of all facilities and treated 3 percent of all clients.
- Tribal governments operated 2 percent of all facilities and treated 1 percent of all clients.

Type of Care—March 31, 2017

- Outpatient treatment was offered by 82 percent of all facilities and was received by 91 percent of all clients in treatment [Tables 4.1b and 5.1b].
- Residential (non-hospital) treatment was offered by 23 percent of all facilities and was received by 7 percent of all clients in treatment.
- Hospital inpatient care was offered by 5 percent of all facilities and was received by 1 percent of all clients in treatment.

Diagnosed Co-Occurring Mental and Substance Abuse Disorders—March 31, 2017

Among clients in treatment, 53 percent were diagnosed with a co-occurring substance abuse and mental disorder. Only in facilities operated by the Department of Defense were less than half of clients in treatment diagnosed with co-occurring substance abuse and mental disorders (47 percent); however, facilities operated by the Department of Veterans Affairs reported the highest proportion of clients in treatment with diagnosed co-occurring substance abuse and mental disorders—74 percent—the highest among all types of facility operation [Table 5.2].

Facility Size and Utilization Rates—March 31, 2017

- Facilities with opioid treatment programs (OTPs) had a median number of 285 clients. Outpatient facilities with OTPs had a median of 305 clients, while residential (non-hospital) facilities with OTPs had a median of 30 clients. Hospital inpatient facilities with OTPs had a median of 21 clients [Table 4.3].
- The median number of outpatient clients for OTPs offering methadone or buprenorphine maintenance or naltrexone treatment varied by facility operation. The median number of clients for all outpatient facilities with OTPs was 290; for private non-profit outpatient facilities with OTPs, the median was 315; for private for-profit outpatient facilities with OTPs, the median was 290; for local/county/community government-operated outpatient facilities with OTPs, the median was 272; for state government-operated outpatient facilities with OTPs, the median was 270; for federally operated outpatient facilities with OTPs, the median was 108; and for tribal government-operated outpatient facilities with OTPs, the median was 174 [Table 4.3].
- The median number of clients at facilities without OTPs (non-OTPs) was 36. Outpatient facilities had a median of 40 clients, while residential (non-hospital) facilities had a median of 19 clients and hospital inpatient facilities had a median of 14 clients [Table 4.4].
- The median number of outpatient clients for non-OTP facilities offering buprenorphine maintenance or naltrexone treatment varied by facility operation. The median number of clients for all non-OTP facilities was 20; for private non-profit facilities, 15; for private for-profit facilities, 30; for local/county/community government-operated facilities, 15; for state government-operated facilities, 22; for federal government-operated facilities, 26; and for tribal government-operated facilities, 10.
- Of all residential (non-hospital) beds designated for substance abuse treatment, 94 percent were in use. Of all hospital inpatient beds designated for substance abuse treatment, 98 percent were in use [Tables 4.6 and 4.7].

Medication-Assisted Opioid Therapy—March 31, 2017

- OTPs were available in 1,317 facilities (10 percent of all treatment facilities) in 2017 [Table 2.3].
- Private for-profit organizations operated 60 percent of OTPs [Table 4.19b].
- Of clients who were in OTPs that dispensed methadone, 61 percent were in private for-profit facilities [Table 5.4b].

Chapter 1
Description of the National Survey of Substance Abuse Treatment Services (N-SSATS)

The 2017 National Survey of Substance Abuse Treatment Services (N-SSATS) was conducted between February and December 2017, with a reference date of March 31, 2017. It is the 40th in a series of national surveys begun in the 1970s. The surveys were designed to collect data on the location, characteristics, and use of alcohol and drug abuse treatment facilities and services throughout the 50 states, the District of Columbia, and other jurisdictions.[3] The Center for Behavioral Health Statistics and Quality, Substance Abuse and Mental Health Services Administration (SAMHSA), U.S. Department of Health and Human Services, plans and directs the N-SSATS. This report presents tabular information and highlights from the 2017 N-SSATS. It is important to note that percentages in charts, narrative lists, and percentage distributions in tables may not add to 100 percent due to rounding.

N-SSATS is designed to collect information from all facilities in the United States, both public and private, that provide substance abuse treatment.[4] (Additional information on N-SSATS, its history, and changes in the survey and survey universe over time is provided in Appendix A.) N-SSATS provides a mechanism for quantifying the dynamic characteristics and composition of the U.S. substance abuse treatment delivery system. N-SSATS collects multipurpose data that can be used to:

- assist SAMHSA and state and local governments in assessing the nature and extent of services provided in state-supported and other substance abuse treatment facilities and in forecasting substance abuse treatment resource requirements;
- update SAMHSA's Inventory of Behavioral Health Services (I-BHS), which includes all known drug and alcohol abuse treatment facilities, both public and private (see Appendix A);
- analyze substance abuse treatment services trends and conduct comparative analyses for the nation, regions, and states;
- generate the *National Directory of Drug and Alcohol Abuse Treatment Facilities*, a compendium of facilities approved by state substance abuse agencies for the provision of substance abuse treatment; and
- update the information in SAMHSA's Behavioral Health Treatment Services Locator, a searchable database of facilities that provide treatment. The Treatment Services Locator is available on the Internet at:

https://findtreatment.samhsa.gov

[3] The jurisdictions include the territory of Guam, the Federated States of Micronesia, the Commonwealth of the Northern Mariana Islands, the Commonwealth of Puerto Rico, and the Virgin Islands of the United States.

[4] In this report, entities responding to N-SSATS are referred to as "facilities." As discussed later in the report, a "facility" may be a program-level, clinic-level, or multi-site respondent.

Data Collection Procedures for the 2017 N-SSATS

Field period and reference date

The survey reference date for the 2017 N-SSATS was March 31, 2017. The field period was from March 31, 2017, through December 4, 2017.

Survey universe

The 2017 N-SSATS facility universe totaled 17,029 facilities, including all 16,816 active treatment facilities on SAMHSA's I-BHS at a point four weeks before the survey reference date, and 213 facilities that were added by state substance abuse agencies or otherwise discovered during the first five months of the survey.

Content

The 2017 N-SSATS questionnaire contained 40 numbered questions (see Appendix B for the paper version of the questionnaire). Topics included:

- facility identification information;
- operating entity;
- primary focus;
- type of care provided, i.e.
    - outpatient treatment services (regular outpatient treatment, intensive outpatient treatment, day treatment or partial hospitalization, detoxification, methadone/buprenorphine maintenance or naltrexone treatment),
    - residential (non-hospital) treatment services (long-term—more than 30 days, short-term—30 days or fewer, detoxification), and
    - hospital inpatient treatment services (inpatient treatment, inpatient detoxification);
- services offered (assessment and pre-treatment services, counseling, pharmacotherapies, testing, transitional services, ancillary services);
- clinical/therapeutic approaches;
- special programs or groups provided for specific client types;
- provision of treatment services in sign language and/or in languages other than English;
- detoxification from alcohol, benzodiazepines, opioids, cocaine, methamphetamines, or other drugs, and routine use of medication during detoxification;
- client outreach (outreach to persons in the community who may need treatment, provision of a facility website);
- licensure, certification, or accreditation agencies or organizations;
- payment options accepted, including use of a sliding fee scale and/or treatment at no charge;

- receipt of government funding;
- smoking policy;
- manner in which opioid dependence is treated, the operation of an opioid treatment program (OTP) certified by SAMHSA offering maintenance and/or detoxification, and medications used;
- number of clients in treatment on March 31, 2017 (total clients; clients by type of treatment; total clients under age 18; and clients receiving methadone, buprenorphine, or naltrexone);
- percentage of clients in treatment on March 31, 2017, for abuse of both alcohol and drugs, alcohol abuse only, and drug abuse only;
- percentage of clients in treatment on March 31, 2017, with diagnosed co-occurring mental and substance abuse disorders; and
- number of beds designated for residential (non-hospital) and hospital inpatient substance abuse treatment on March 31, 2017.

Data collection

There were three modes of data collection employed: a secure web-based questionnaire, a paper questionnaire sent by mail, and a telephone interview. About four weeks before the survey reference date of March 31, 2017, letters were mailed to all facilities to announce the survey. The letters also served to update records with new address information received from the U.S. Postal Service. During the last week of March 2017, a data collection packet (including the SAMHSA cover letter, state-specific letter of endorsement, state profile, information on completing the survey on the web, and a sheet of frequently asked questions) was mailed to each facility. To ease the burden on respondents, many of the data items that typically do not change from year to year were prefilled in the web-based questionnaire for those facilities that had completed the 2016 survey. Respondents could also request a paper questionnaire be sent to them.

During the data collection phase, contract personnel were available to answer facilities' questions concerning the survey. Support for facilities completing the questionnaire on the web was also available by e-mail. About two weeks after the initial data collection packet mailing, thank you/reminder letters were sent to all facilities. Approximately eight weeks after the initial packet mailing, non-responding facilities were mailed a second packet. About two weeks after the second packet mailing, non-respondents received a reminder telephone call. A third packet containing a hard copy questionnaire was mailed about nine weeks after the second packet mailing. Those facilities that had not completed the survey by June 12, 2017, received reminder calls and were asked to complete the survey by computer-assisted telephone interview (CATI).

Quality assurance

The web questionnaire was programmed to be self-editing; that is, respondents were prompted to complete missing responses and to confirm or correct inconsistent responses.

All mail questionnaires were reviewed manually for consistency and for missing data. Calls were made to facilities to resolve unclear responses and to obtain missing data. After data entry, automated

quality assurance reviews were conducted. The reviews incorporated the rules used in manual editing, plus consistency checks and checks for data outliers not readily identified by manual review.

Item non-response was minimized through editing and extensive follow-up. The item response rate for the 2017 N-SSATS averaged 98 percent across 270 separate items. Appendix C details item response rates and imputation procedures.

Facility status and response rate

Table 1.1 presents a summary of response rate information. There were 17,029 facilities in the survey universe. Of these facilities, 1,501 facilities (9 percent) were found to be ineligible for the survey because they had closed or did not provide substance abuse treatment or detoxification. Of the remaining 15,528 facilities, 13,857 facilities (89 percent) completed the survey and 13,585 (87 percent) were included in this report.

Response rates for Puerto Rico and the U.S. Virgin Islands declined in 2017, compared with the previous year; both territories were affected by Hurricanes Maria and Irma in September 2017. Of Puerto Rico's 151 eligible facilities in 2017, 103 responded (68 percent), compared with 142 of 158 eligible facilities (90 percent) in 2016. Of the U.S. Virgin Islands' four eligible facilities, one responded in 2017, whereas all four responded in 2016.

Table 1.1. N-SSATS facilities, by status and mode of response: 2017

	Number	*Percent*
Total facilities in universe	**17,029**	**100.0**
Closed/ineligible	1,501	8.8
Eligible	15,528	91.2
Total eligible	**15,528**	**100.0**
Non-respondents	1,671	10.8
Respondents	13,857	89.2
Excluded from report[1]	204	1.3
Roll-ups[2]	68	0.4
Included in report	13,585	87.5
Mode of response	**13,585**	**100.0**
Internet	12,529	92.2
Telephone	882	6.5
Mail	174	1.3

[1] Facilities excluded from the report included 123 non-treatment halfway houses, 54 solo practices not approved by the state agency for inclusion, and 27 facilities that treated incarcerated clients only.

[2] Facilities whose client counts were included in or "rolled into" other facilities' counts and whose facility characteristics were not reported separately.

SOURCE: Center for Behavioral Health Statistics and Quality, Substance Abuse and Mental Health Services Administration, National Survey of Substance Abuse Treatment Services (N-SSATS), 2017.

Facility Selection for the 2017 N-SSATS Report

Table 1.1. The N-SSATS questionnaire is deliberately sent to some facilities that are excluded from this report, as explained below. For this cycle, 204 of the 13,857 questionnaire respondents provided information but were deemed out of the scope of this report and excluded from the analyses presented here. The excluded facilities and reasons for exclusion fell into three categories:

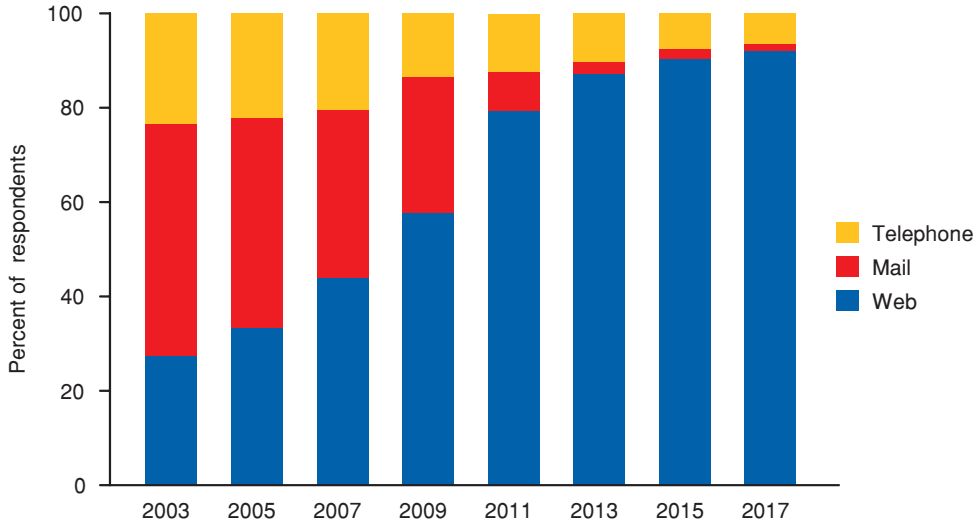
- 123 facilities were halfway houses that did not provide substance abuse treatment. These facilities were included in the survey so that they could be listed in the Directory and SAMHSA's Behavioral Health Treatment Services Locator.
- 54 facilities were solo practitioners. I-BHS and N-SSATS are designed to include facilities rather than individuals. Solo practitioners are listed and surveyed only if a state substance abuse agency explicitly requests that they be included in the survey. The excluded solo practitioners were not identified for inclusion by a state substance abuse agency.
- 27 facilities were jails, prisons, or other organizations that treated incarcerated clients exclusively.

In addition to the facilities that were excluded from the report, there were 68 facilities whose client counts were included in or "rolled into" other facilities' counts and whose facility characteristics were not reported separately. After the exclusion of 204 out-of-scope facilities and the roll-up of 68 facilities, 13,585 eligible respondent facilities remained to be included in the 2017 N-SSATS report.

Survey Response Mode

Figure 1. The proportion of facilities using the web survey to respond to N-SSATS has increased steadily since the option was introduced in 2002. The percentage of facilities responding via the web increased from 27 percent in 2003 to 92 percent in 2017. Mail response declined from 49 percent in 2003 to 1 percent in 2017. Telephone response, which represents follow-up of facilities that had not responded by mail or web, also declined, from 24 percent in 2003 to 6 percent in 2017.

Figure 1. Survey response mode: 2003–2017



SOURCE: Center for Behavioral Health Statistics and Quality, Substance Abuse and Mental Health Services Administration, National Survey of Substance Abuse Treatment Services (N-SSATS), 2003–2017.

Data Considerations and Limitations

As with any data collection effort, certain procedural considerations and data limitations must be taken into account when interpreting data from the 2017 N-SSATS. Some general issues are listed below; other considerations are detailed in Appendix A. Considerations and limitations of specific data items are discussed where the data are presented.

- N-SSATS attempts to obtain responses from all known treatment facilities, but it is a voluntary survey. There was no adjustment for the 11 percent facility non-response.
- N-SSATS is a point-prevalence survey. It provides information on the substance abuse treatment system and its clients on the reference date. Client counts reported do not represent annual totals. Rather, N-SSATS provides a "snapshot" of substance abuse treatment facilities and clients on an average day.
- Multiple responses were allowed for certain variables (e.g., services provided and specialized programs). Tabulations of these variables include the total number of facilities reporting each response.

Organization of the Report

The balance of this report is organized into the following chapters.

- Chapter 2 presents trends in facility characteristics for 2007 to 2017.
- Chapter 3 presents trends in client characteristics for 2007 to 2017.
- Chapter 4 describes key characteristics of facilities and the programs and services they provided in 2017.
- Chapter 5 describes key characteristics of clients in substance abuse treatment on March 31, 2017.
- Chapter 6 presents state-level detail for many of the tables presented in Chapters 4 and 5.
- Appendix A provides additional information on N-SSATS, its history, and changes in the survey and survey universe over time.
- Appendix B contains the 2017 N-SSATS mail survey questionnaire.
- Appendix C contains information on item response and imputation.

Terminology

The majority of tables in the report are organized by facility operation and type of care. Therefore, it is important to define these terms.

Facility operation indicates the type of entity responsible for the operation of the facility:

- private for-profit
- private non-profit
- government
  - local, county, or community
  - state
  - federal (Dept. of Veterans Affairs, Dept. of Defense, Indian Health Service, other)
  - tribal

Clients in treatment were defined as:

- hospital inpatient or residential (non-hospital) clients receiving substance abuse treatment services at the facility on March 31, 2017; and
- outpatient clients who were seen at the facility for a substance abuse treatment or detoxification service at least once during the month of March 2017, and who were still enrolled in treatment on March 31, 2017.

Type of care indicates the services the facility offers:

- outpatient
  - regular outpatient
  - intensive outpatient
  - outpatient day treatment or partial hospitalization
  - outpatient detoxification
  - outpatient methadone/buprenorphine maintenance or naltrexone treatment
- residential (non-hospital)
  - short-term (30 days or less)
  - long-term (more than 30 days)
  - detoxification
- hospital inpatient
  - inpatient detoxification
  - inpatient treatment

Chapter 2
Trends in Facility Characteristics

This chapter presents trends in facility characteristics for 2007 to 2017.

Number of Facilities

Table 2.1. The total number of substance abuse treatment facilities remained stable between 2007 and 2017. There was considerable turnover from year to year in the individual facilities responding to the survey: Between 85 and 91 percent of the facilities responding to a survey had also responded to the previous year's survey. Between 10 and 15 percent of the facilities from year-to-year closed, were no longer providing substance abuse treatment, or did not respond to the current year's survey. However, those facilities were replaced by similar facilities that had not responded in the previous year.

There was a net decrease of 814 responding facilities between 2016 and 2017, from 14,399 to 13,585 facilities. Of the facilities responding to the 2017 survey, 91 percent had also responded to the 2016 survey, and 9 percent were new to the 2017 survey or did not respond in 2016. Of the facilities that responded in 2016, 15 percent had closed, were no longer providing substance abuse treatment, or did not respond in 2017.

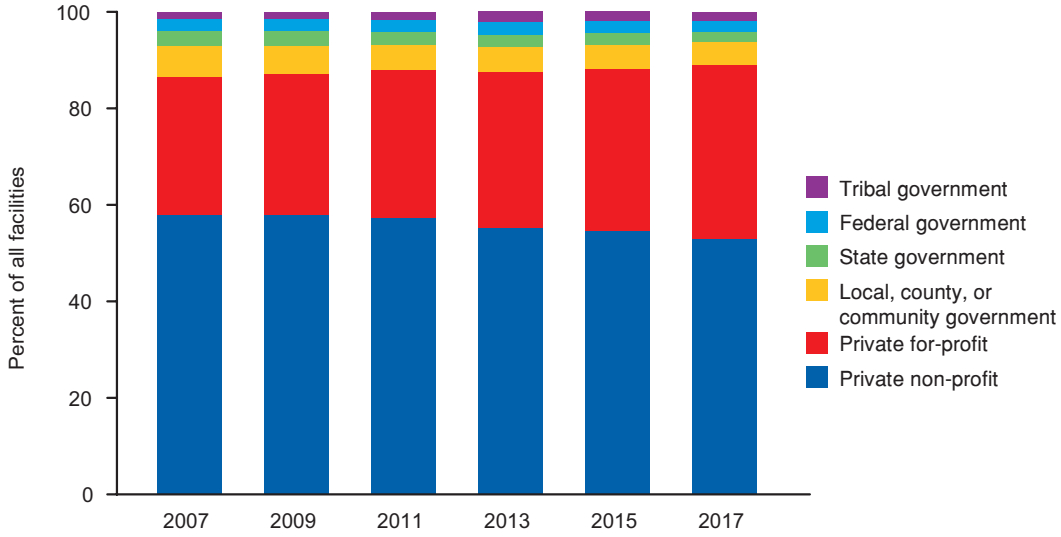
Facility Operation

Table 2.2 and Figure 2. The operational structure of the substance abuse treatment system (i.e., the types of entities responsible for operating facilities) had some notable changes between 2007 and 2017.

- Private non-profit organizations operated 58 percent of all facilities in 2007 compared with 53 percent in 2017.
- Private for-profit organizations operated 29 percent of facilities in 2007, increasing to 36 percent of facilities in 2017.
- Local, county, or community governments operated 6 percent of facilities in 2007, decreasing to 5 percent in 2017.
- State governments operated 3 percent of facilities in 2007, decreasing to 2 percent in 2017.
- The federal government operated 2 to 3 percent of facilities each year between 2007 and 2017.[5]
- Tribal governments operated 1 to 2 percent of facilities each year between 2007 and 2017.

[5] Data for the federal agencies specified in the survey (the Department of Veterans Affairs, the Department of Defense, the Indian Health Service, and other unspecified federal agencies) are detailed in the tables.

Figure 2. Facility operation: 2007–2017



SOURCE: Center for Behavioral Health Statistics and Quality, Substance Abuse and Mental Health Services Administration, National Survey of Substance Abuse Treatment Services (N-SSATS), 2007–2017.

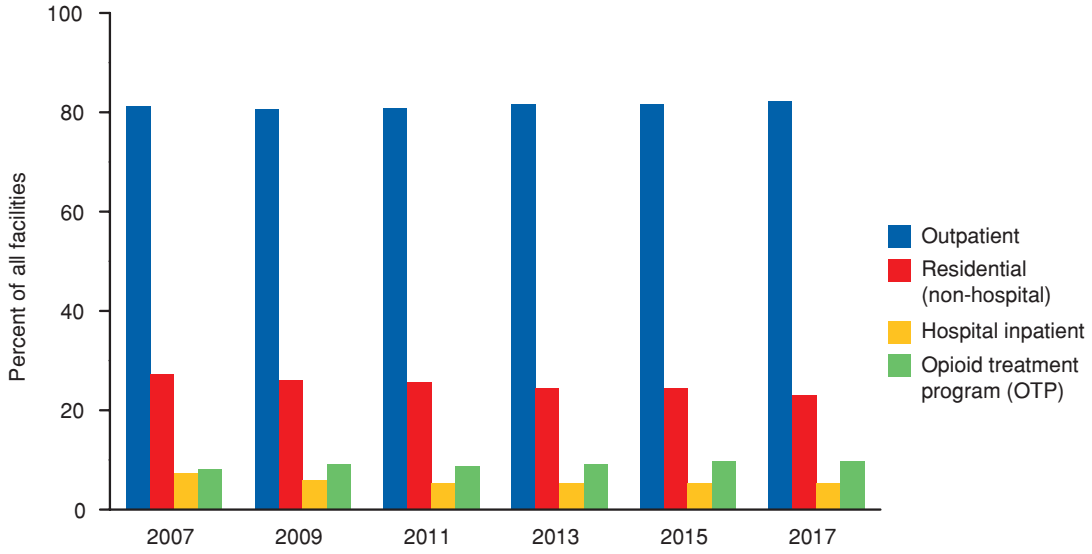
Type of Care Offered[6]

Table 2.3 and Figure 3. The proportion of facilities offering outpatient care increased slightly between 2007 and 2017, while the proportions offering the two other major types of care—residential (non-hospital) and hospital inpatient—declined between 2007 and 2017. OTPs, certified by SAMHSA, provide medication-assisted therapy with methadone, buprenorphine, and naltrexone. Facilities with OTPs can be associated with any type of care. Facilities with OTPs made up 8 to 10 percent of all facilities between 2007 and 2017 [Table 2.4].

- Outpatient treatment was provided by 81 to 82 percent of facilities during this period [Table 2.3].
- Residential (non-hospital) treatment was provided by 27 percent of facilities in 2007, decreasing to 23 percent of facilities in 2017.
- Hospital inpatient treatment was provided by 7 percent of facilities in 2007, decreasing to 5 percent of facilities in 2017.
- Outpatient treatment was provided by 90 to 93 percent of facilities with OTPs from 2007 to 2017.
- Residential (non-hospital) treatment was provided by 8 to 10 percent of facilities with OTPs from 2007 to 2017.
- Hospital inpatient treatment was provided by 7 to 12 percent of facilities with OTPs from 2007 to 2017.

[6] Facilities can offer more than one type of care.

Figure 3. Facilities by type of care offered and facilities with opioid treatment programs: 2007–2017



SOURCE: Center for Behavioral Health Statistics and Quality, Substance Abuse and Mental Health Services Administration, National Survey of Substance Abuse Treatment Services (N-SSATS), 2007–2017.

Facilities That Use Medication-Assisted Opioid Therapy

Table 2.4. Medication-assisted opioid therapy (MAT) includes the use of methadone or buprenorphine for the treatment of opioid use disorder (OUD) and the use of naltrexone for relapse prevention in OUD. Methadone for OUD is available only at the OTPs that are certified by SAMHSA's Center for Substance Abuse Treatment.[7] Buprenorphine may be prescribed by physicians or other authorized medical practitioners (physicians, physician assistants, and nurse practitioners) who have received Drug Addiction Treatment Act of 2000 (DATA 2000) specific training and received a waiver to prescribe the medication for treatment of OUD; some of these authorized medical practitioners are affiliated with facilities (either OTPs or other). All medical practitioners with prescribing privileges can prescribe injectable naltrexone.

- The proportion of OTPs providing methadone-only treatment decreased from 58 percent of all facilities with OTPs in 2007 to 32 percent of all facilities with OTPs in 2017.
- The proportion of OTPs providing only methadone and buprenorphine treatment decreased from 41 percent of all facilities with OTPs in 2007 to 39 percent in 2017. Between 2011 and 2017, the proportion of facilities with OTPs that offer methadone, buprenorphine, and injectable naltrexone increased from 10 percent to 23 percent; over the same period, the proportion of facilities offering only buprenorphine and injectable naltrexone increased from less than 1 percent to 2 percent.[8]

[7] For more information on CSAT and the certifying process, see https://www.samhsa.gov/medication-assisted-treatment/opioid-treatment-programs.

[8] The question on extended-release injectable naltrexone (for example, Vivitrol®) was first added to the N-SSATS questionnaire in 2011.

- The proportion of facilities (either OTP or non-OTP) providing any buprenorphine services increased from 14 percent of all facilities in 2007 to 29 percent of all facilities in 2017.
- The percentage of all facilities providing any extended-release injectable naltrexone treatment increased from 8 percent in 2011 to 24 percent in 2017.

Chapter 3
Trends in Client Characteristics

This chapter presents trends in client characteristics for 2007 to 2017.

Number of Clients

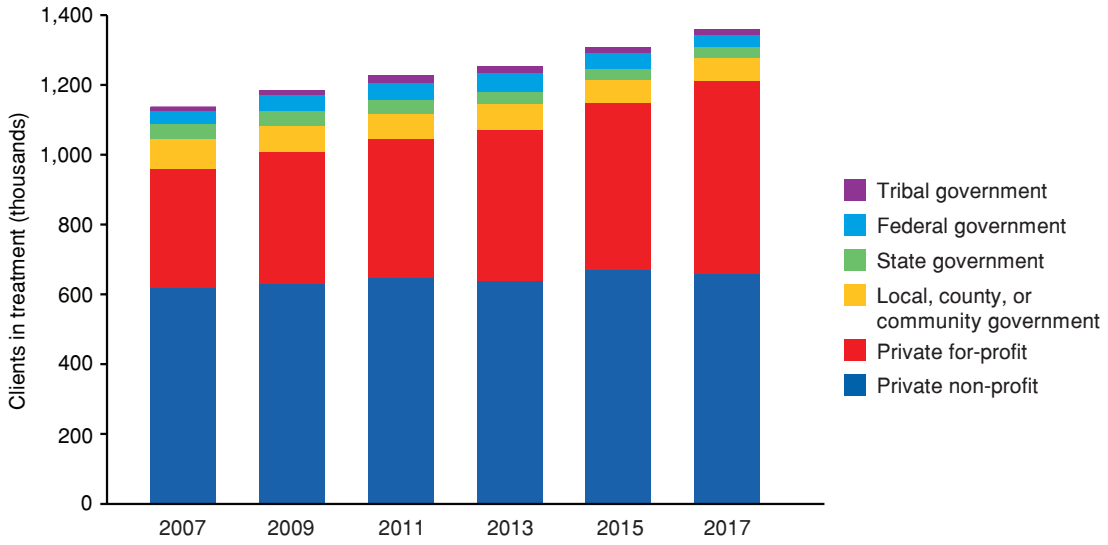
Table 3.1. The number of clients in treatment on the survey reference date increased by 19 percent, from 1,135,425 in 2007 to 1,356,015 in 2017.

Facility Operation

Table 3.1 and Figure 4. Within the categories of facility operation, the proportions of clients in treatment demonstrated some gradual changes between 2007 and 2017.

- Private non-profit facilities treated 55 percent of clients in 2007, decreasing to 49 percent in 2017. (The number of clients in private non-profit facilities increased by 6 percent, from 619,954 in 2007 to 658,896 in 2017.)
- Private for-profit facilities treated 30 percent of clients in 2007, increasing to 41 percent in 2017. (The number of clients in private for-profit facilities increased by 63 percent, from 338,031 in 2007 to 550,992 in 2017.)
- Local government-operated facilities treated 8 percent of clients in 2007, decreasing to 5 percent in 2017. (The number of clients in local government-operated facilities decreased by 23 percent, from 85,953 in 2007 to 66,577 in 2017.)

Figure 4. Clients in treatment (thousands), by facility operation: 2007–2017



SOURCE: Center for Behavioral Health Statistics and Quality, Substance Abuse and Mental Health Services Administration, National Survey of Substance Abuse Treatment Services (N-SSATS), 2007–2017.

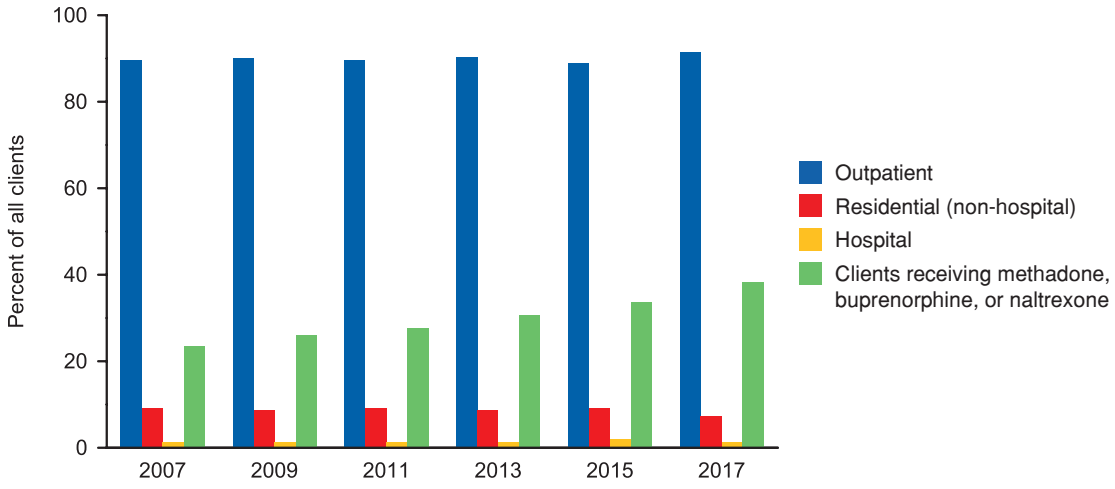
- State government-operated facilities treated 4 percent of clients in 2007, decreasing to 2 percent in 2017. (The number of clients in state government-operated facilities decreased from 41,813 in 2007 to 28,529 in 2017.)
- Federal government-operated facilities treated 3 percent of clients in both 2007 and in 2017. (The number of clients in federal government-operated facilities decreased from 38,088 in 2007 to 34,435 in 2017.)[9]
- Tribal government-operated facilities treated 1 percent of clients both in 2007 and in 2017. (The number of clients in tribal government-operated facilities increased from 11,586 in 2007 to 16,586 in 2017.)

Type of Care Received

Table 3.2 and Figure 5. The proportions of clients in treatment for the major types of care—outpatient, residential (non-hospital), and hospital inpatient—were relatively stable between 2007 and 2017.

- Clients in outpatient treatment made up 89 to 91 percent of all clients each year. (The number of outpatient clients increased from 1,016,913 in 2007 to 1,238,654 in 2017.)
- Clients in residential (non-hospital) treatment made up 7 to 9 percent of all clients each year. (The number of residential [non-hospital] clients decreased from 103,709 in 2007 to 99,881 in 2017.)
- Clients in hospital inpatient treatment made up 1 to 2 percent of all clients each year. (The number of hospital inpatient clients increased from 14,803 in 2007 to 17,480 in 2017.)

Figure 5. Clients in treatment, by type of care received: 2007–2017



SOURCE: Center for Behavioral Health Statistics and Quality, Substance Abuse and Mental Health Services Administration, National Survey of Substance Abuse Treatment Services (N-SSATS), 2007–2017.

[9] Data for the federal agencies specified in the survey (the Department of Veterans Affairs, the Department of Defense, the Indian Health Service, and other unspecified federal agencies) are detailed in the tables.

Clients Receiving Medication-Assisted Opioid Therapy

Table 3.2 and Figure 5. Clients receiving methadone, buprenorphine, or naltrexone could be in any type of care—outpatient, residential (non-hospital), or hospital inpatient. Clients could receive methadone for OUD only in OTPs certified by SAMHSA to provide medication-assisted therapy with methadone and buprenorphine. However, clients could receive buprenorphine or naltrexone in any type of facility.

- The proportion of all clients receiving methadone increased from 23 percent in 2007 to 28 percent in 2017. (The number of clients receiving methadone increased from 262,684 in 2007 to 382,867 in 2017.)
- The proportion of clients receiving buprenorphine was less than 1 percent in 2007 and increased to 8 percent in 2017. (The number of clients receiving buprenorphine increased from 3,347 in 2007 to 112,223 in 2017.)[10]
- The number of clients receiving naltrexone was 23,065 in 2017 (2 percent of clients).[11]

Substance Abuse Problem Treated

Table 3.3. The proportion of clients in treatment for the three broad categories of substance abuse problems—both alcohol and drug abuse, drug abuse alone, and alcohol abuse alone—demonstrated some changes between 2007 and 2017.

- The percentage of clients in treatment for both drug and alcohol abuse decreased from 45 percent in 2007 to 37 percent in 2017. (The number of clients in treatment for both drug and alcohol abuse was 509,919 in 2007 and 500,948 in 2017.)
- The percentage of clients in treatment for drug abuse alone increased from 36 percent in 2007 to 47 percent in 2017. (The number of clients in treatment for drug abuse alone increased from 412,400 in 2007 to 642,713 in 2017.)
- The percentage of all clients in treatment for alcohol abuse alone decreased from 19 percent in 2007 to 16 percent in 2017. (The number of clients in treatment for alcohol abuse alone increased from 211,094 in 2007 to 211,460 in 2017.)
- The percentage of clients in treatment for diagnosed co-occurring mental and substance abuse disorders increased from 37 percent in 2007 to 50 percent in 2017. (The number of clients in treatment for diagnosed co-occurring mental and substance abuse disorders increased from 416,260 in 2007 to 683,810 in 2017.)

---

[10] Individual physicians, physician assistants, and nurse practitioners can receive special authorization from the U.S. Department of Health and Human Services that allows them to prescribe buprenorphine for the treatment of opioid use disorder. These practitioners may prescribe buprenorphine to patients in an office setting or to patients at substance abuse treatment facilities. Only clients who received buprenorphine through a facility affiliated with an authorized practitioner are included in this report; it does not include clients who received buprenorphine through an independent DATA 2000-waivered practitioner.

[11] In the 2017 survey, facilities reported client counts of those receiving naltrexone for opioid use disorder. In the 2011, 2013, and 2015 surveys, the reported counts of clients receiving naltrexone were limited to those receiving extended-release injectable naltrexone (Vivitrol®). This report does not include those who received naltrexone through other sources.

Clients Under Age 18 in Treatment

Table 3.4. The proportion of all clients who were under age 18 declined from 8 percent in 2007 to 5 percent in 2017.

- Of all clients under age 18, between 87 and 89 percent were in outpatient treatment from 2007 to 2017. (The number of outpatient clients under age 18 decreased from 74,500 in 2007 to 55,613 in 2017.)
- Of all clients under age 18, between 10 and 12 percent were in residential (non-hospital) treatment from 2007 to 2017. (The number of residential [non-hospital] clients under age 18 decreased from 10,134 in 2007 to 6,539 in 2017.)
- Of all clients under age 18, between 1 and 2 percent were in hospital inpatient treatment from 2007 to 2017. (The number of hospital inpatient clients under age 18 decreased from 884 in 2007 to 710 in 2017.)
- The proportion of clients under age 18 in treatment facilities with special programs or groups for adolescents decreased from 82 percent in 2007 to 74 percent in 2017. (The number of clients under age 18 in treatment facilities with special programs or groups for adolescents decreased from 70,275 in 2007 to 46,253 in 2017.)

Chapter 4
Facility Characteristics and Services

This chapter outlines key characteristics of facilities and programs in 2017.

Facility Operation and Type of Care

Table 2.2. Facilities were asked to designate the type of entity responsible for the operation of the facility.

The proportions of all facilities by facility operation were:

- Private non-profit organizations 53 percent
- Private for-profit organizations 36 percent
- Local, county, or community governments 5 percent
- State governments 2 percent
- Federal government[12] 2 percent
- Tribal governments 2 percent

Table 4.1b. Type of care offered was made up of three broad categories (outpatient, residential [non-hospital], and hospital inpatient), each with several subcategories. A facility could offer more than one type of care. The proportions of all facilities offering the different types of care were:[13]

- Outpatient treatment 82 percent
  - Regular outpatient treatment 77 percent
  - Intensive outpatient treatment 46 percent
  - Outpatient methadone/buprenorphine maintenance or naltrexone treatment 25 percent
  - Outpatient day treatment or partial hospitalization 13 percent
  - Outpatient detoxification 10 percent
- Residential (non-hospital) treatment 23 percent
  - Long-term treatment (more than 30 days) 18 percent
  - Short-term treatment (30 days or fewer) 13 percent
  - Detoxification 7 percent
- Hospital inpatient treatment 5 percent
  - Inpatient treatment 4 percent
  - Inpatient detoxification 5 percent

[12] Data for the federal agencies specified in the survey (the Department of Veterans Affairs, the Department of Defense, the Indian Health Service, and other unspecified federal agencies) are detailed in the tables.

[13] Facility percentages sum to more than 100 percent, because a facility could provide more than one type of care.

Approximately three quarters (76 percent) of private non-profit facilities provided outpatient care and about one third (31 percent) provided residential (non-hospital) care. In contrast, 90 percent of private for-profit facilities provided outpatient care and 13 percent provided residential (non-hospital) care.

Diagnosed Co-Occurring Mental and Substance Abuse Disorders

Table 4.2. Facilities were asked to estimate the proportions of clients in treatment for both alcohol and drug abuse, for alcohol abuse only, and for drug abuse only. They were also asked to estimate the proportion of clients with diagnosed co-occurring mental and substance abuse disorders.

- On March 31, 2017, almost all facilities (92 percent) had clients in treatment for both alcohol and drug abuse, 84 percent had clients in treatment for drug abuse only, and 78 percent had clients in treatment for alcohol abuse only.
- On March 31, 2017, most facilities (92 percent) also had clients in treatment with diagnosed co-occurring mental and substance abuse disorders.

Facility Size

Facilities with OTPs

Table 4.3. Facility size is defined by the number of clients in substance abuse treatment on the survey reference date. There was a median of 285 clients in substance abuse treatment at facilities with OTPs on March 31, 2017.

The median number of clients by facility operation ranged from 174 clients in facilities with OTPs operated by tribal governments to 302 clients in private non-profit facilities with OTPs.

By type of care, the median number of clients in treatment at facilities with OTPs on March 31, 2017, was:[14]

- Outpatient treatment — 305 clients
  - Outpatient methadone/buprenorphine maintenance or naltrexone treatment — 290 clients
  - Regular outpatient care — 40 clients
  - Intensive outpatient treatment — 20 clients
  - Outpatient day treatment or partial hospitalization — 20 clients
  - Outpatient detoxification — 5 clients
- Residential (non-hospital) treatment — 30 clients
  - Long-term treatment (more than 30 days) — 28 clients
  - Short-term treatment (30 days or fewer) — 21 clients
  - Detoxification — 14 clients

[14] The median number of clients for the main categories of type of care (outpatient, residential, and hospital inpatient) can be greater than the median for any of the subcategories because a facility can provide more than one subcategory of the main types of care. The median for each category or subcategory is computed separately excluding facilities that did not have client counts with respect to that category or subcategory.

- Hospital inpatient treatment 21 clients
  - Inpatient treatment 16 clients
  - Inpatient detoxification 14 clients

Facilities without OTPs

Table 4.4. Facility size is defined by the number of clients in substance abuse treatment on the survey reference date. The median number of clients in substance abuse treatment at a facility without an OTP (a non-OTP facility) on March 31, 2017, was 36 clients.

The median number of clients in facilities without an OTP ranged, by facility operation, from 29 clients in tribal government-operated facilities to 55 clients in facilities operated by the federal government.

By type of care, the median number of clients in treatment at non-OTP facilities on March 31, 2017, was:

- Outpatient treatment 40 clients
  - Regular outpatient care 30 clients
  - Outpatient buprenorphine maintenance or naltrexone treatment 20 clients
  - Intensive outpatient treatment 15 clients
  - Outpatient day treatment or partial hospitalization 12 clients
  - Outpatient detoxification 7 clients
- Residential (non-hospital) treatment 19 clients
  - Long-term treatment (more than 30 days) 16 clients
  - Short-term treatment (30 days or fewer) 14 clients
  - Detoxification 6 clients
- Hospital inpatient treatment 14 clients
  - Inpatient treatment 13 clients
  - Inpatient detoxification 8 clients

Tables 4.5a-c. Facilities were sorted into five size groups based on the total number of clients in treatment on March 31, 2017. These five groups are: fewer than 15 clients; 15–29 clients; 30–59 clients; 60–119 clients; and 120 or more clients.

Table 4.5a. Outpatient facilities operated by federal and state governments reported client counts within the largest size class in greater proportion than outpatient facilities operated by other entities—30 percent had 120 or more clients in treatment on March 31, 2017, compared with 27 percent of all outpatient facilities.

Table 4.5b. Residential (non-hospital) facilities operated by tribal governments reported client counts within the smallest size class in greater proportion than residential (non-hospital) facilities operated by other entities—66 percent had fewer than 15 clients in treatment on March 31, 2017, compared with 35 percent of all residential (non-hospital) facilities.

Table 4.5c. Inpatient facilities operated by the federal government reported client counts within the smallest size class in greater proportion than among inpatient facilities operated by other entities—80 percent had fewer than 15 clients in treatment on March 31, 2017, compared with 53 percent of all inpatient facilities.

Facility Capacity and Utilization Rates

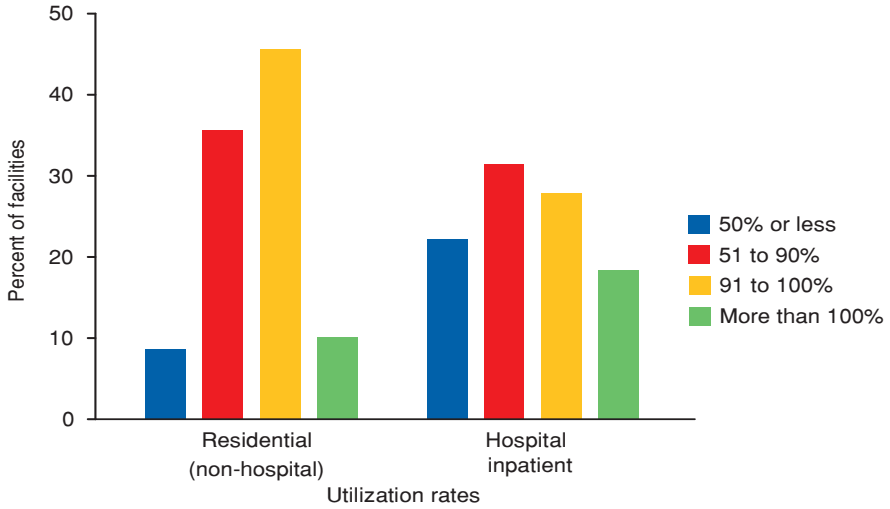
Facilities were asked to report the number of residential (non-hospital) and hospital inpatient beds designated for substance abuse treatment. Utilization rates were calculated by dividing the number of residential (non-hospital) or hospital inpatient clients by the number of residential (non-hospital) or hospital inpatient designated beds. Because substance abuse treatment clients may also occupy non-designated beds, utilization rates could be more than 100 percent.

Table 4.6. There were 2,752 facilities that reported having 91,601 residential (non-hospital) beds designated for substance abuse treatment on March 31, 2017. The utilization rate was 94 percent, and ranged from 92 percent in facilities operated by private for-profit organizations and local governments to 133 percent in facilities operated by tribal governments.[15]

Table 4.7. There were 473 facilities that reported having 12,707 hospital inpatient beds designated for substance abuse treatment on March 31, 2017. The utilization rate was 98 percent, and ranged from 78 percent in facilities operated by local governments to 110 percent in facilities operated by private for-profits.[16]

Tables 4.6–4.7 and Figure 6 show the distribution of facility-level utilization rates for residential (non-hospital) beds and for hospital inpatient beds. Facilities with hospital inpatient beds (98 percent)

Figure 6. Residential (non-hospital) and hospital inpatient utilization rates: March 31, 2017



SOURCE: Center for Behavioral Health Statistics and Quality, Substance Abuse and Mental Health Services Administration, National Survey of Substance Abuse Treatment Services (N-SSATS), 2017.

[15] Residential (non-hospital) utilization rates are based on a subset of 2,752 facilities that reported for themselves alone and that reported numbers greater than zero for both designated beds and clients.

[16] Hospital inpatient utilization rates are based on a subset of 473 facilities that reported for themselves alone and that reported numbers greater than zero for both designated beds and clients.

had generally higher utilization rates than facilities with residential (non-hospital) beds (94 percent). Of facilities with residential (non-hospital) beds, 46 percent had utilization rates of between 91 and 100 percent; 10 percent had utilization rates above 100 percent. Of facilities with hospital inpatient beds, 28 percent had utilization rates between 91 and 100 percent, while 18 percent had utilization rates above 100 percent.

Services Provided

Tables 4.8 and 4.9b. Facilities were asked about the types of services they provided. Services were grouped into the six broad categories shown below.

Assessment and pre-treatment services were offered by 99 percent of all facilities.

- Screening for substance abuse was provided by 96 percent of all facilities.
- Comprehensive substance abuse assessment or diagnosis was provided by 93 percent of all facilities.
- Screening for mental disorders was provided by 74 percent of all facilities.
- Outreach to persons in the community who may need treatment was provided by 61 percent of all facilities. By contrast, 87 percent of tribal facilities offered outreach services.
- Screening for tobacco use was provided by 66 percent of all facilities.
- Comprehensive mental health assessment or diagnosis was provided by 52 percent of all facilities.
- Interim services for clients when immediate admission was not possible were provided by 47 percent of all facilities. By contrast, 75 percent of federal government-operated facilities offered interim services.

Testing services were provided by 90 percent of all facilities.

- Drug or alcohol urine screening was provided by 86 percent of all facilities.
- Breathalyzer or other blood alcohol testing was provided by 64 percent of all facilities. By contrast, 86 percent of federal government-operated facilities provided breathalyzer or other blood alcohol testing.
- Screening tests for TB, HIV, hepatitis B and C, and STDs were provided by between 22 and 38 percent of all facilities.

At least one pharmacotherapy was provided by 58 percent of all facilities; rates were higher in federal government-operated facilities (84 percent).

- Medications for psychiatric disorders were the most frequently available pharmacotherapies, and were provided in 44 percent of all facilities.
- Buprenorphine was provided by 29 percent of all facilities.
- Non-nicotine medications for smoking cessation were provided by 21 percent of all facilities.
- Injectable naltrexone was provided by 24 percent of all facilities.

Transitional services were provided by 99 percent of all facilities.

- Discharge planning was provided by 97 percent of all facilities.
- Aftercare/continuing care was provided by 87 percent of all facilities.

Ancillary services were provided by more than 99 percent of all facilities.

- Substance abuse education was provided by 97 percent of all facilities.
- Case management services were provided by 83 percent of all facilities.
- Mental health services were provided by 68 percent of all facilities.

"Other" services were provided by 37 percent of all facilities.[17]

- Treatment for other non-substance addiction disorders was provided by 29 percent of all facilities.
- Treatment for gambling disorders was provided by 24 percent of all facilities.
- Treatment for Internet use disorder was provided by 13 percent of all facilities.

Clinical/Therapeutic Approaches

Table 4.10. Facilities were asked to indicate if they used any of 15 specific clinical/therapeutic approaches.

Two approaches were each used "always or often" by nearly all facilities:

- Substance abuse counseling was used "always or often" by 94 percent of facilities.
- Relapse prevention was used "always or often" by 87 percent of facilities.

By treatment approach, the proportion of facilities that used the approaches at least sometimes ("always or often" or "sometimes") were:

• Substance abuse counseling	99 percent
• Relapse prevention	96 percent
• Cognitive-behavioral therapy	94 percent
• Motivational interviewing	93 percent
• Anger management	83 percent
• Brief intervention	82 percent
• Trauma-related counseling	79 percent
• 12-step facilitation	73 percent
• Contingency management/motivational incentives	56 percent
• Dialectical behavior therapy	54 percent
• Rational emotive behavioral therapy	46 percent

[17] Other services consist of treatment for gambling disorder, Internet use disorder, or any other non-substance abuse addiction disorder.

- Matrix model 43 percent
- Computerized substance abuse treatment 15 percent
- Community reinforcement plus vouchers 12 percent

Some approaches were "rarely" or "never" used by more than half of all facilities:

- Rational emotive behavioral therapy was "rarely" or "never" used by 51 percent of facilities, and it was unfamiliar to an additional 4 percent of facilities.
- The matrix model was "rarely" or "never" used by 47 percent of facilities, and it was unfamiliar to an additional 9 percent of facilities.
- Community reinforcement plus vouchers were "rarely" or "never" used by 80 percent of facilities, and it was unfamiliar to an additional 8 percent of facilities.
- Computerized substance abuse treatment was "rarely" or "never" used by 82 percent of facilities, and it was unfamiliar to an additional 3 percent of facilities.

Programs or Groups for Specific Client Types

Table 4.11b. Facilities were asked about the provision of treatment programs or groups specifically tailored for the client types listed below. Overall, 83 percent of facilities offered at least one specifically tailored program or group. The proportions of facilities providing specifically tailored programs or groups were:

- Clients with co-occurring mental and substance abuse disorders 49 percent
- Adult women 48 percent
- Adult men 46 percent
- Clients who have experienced trauma 38 percent
- Criminal justice clients (other than DUI/DWI)[18] 35 percent
- Young adults 29 percent
- Adolescents 26 percent
- Clients arrested for DUI or DWI 27 percent
- Clients who have experienced intimate partner violence, domestic violence 25 percent
- Clients who have experienced sexual abuse 25 percent
- Pregnant or postpartum women 22 percent
- Seniors or older adults 20 percent
- Lesbian, gay, bisexual, or transgender (LGBT) clients 19 percent
- Veterans 19 percent
- Clients with HIV or AIDS 18 percent
- Members of military families 12 percent
- Active duty military 10 percent

[18] Facilities treating incarcerated persons only were excluded from this report; see Chapter 1.

Treatment Services in Sign Language for the Deaf and Hard-of-Hearing and in Languages Other Than English

Table 4.12b. Facilities were asked about the provision of substance abuse treatment services in sign language for the deaf and hard-of-hearing. They were also asked if treatment was provided in languages other than English, if this treatment was provided by a staff counselor or by an on-call interpreter, and in what languages staff counselors provided treatment.

- Substance abuse treatment services in sign language for the deaf and hard-of-hearing were offered in 33 percent of all facilities. Facilities operated by local and state governments were most likely to offer these services (63 and 52 percent, respectively).
- Substance abuse treatment services in languages other than English were provided in 49 percent of all facilities, ranging from 29 percent of tribal and federal government-operated facilities to 73 percent of local government-operated facilities.
- Of facilities providing services in languages other than English, 27 percent used only staff counselors who spoke other languages; another 26 percent of facilities used both staff counselors and on-call interpreters.
- In facilities where staff counselors provided services in languages other than English, Spanish was the most frequently spoken language (92 percent of those facilities and 25 percent of all facilities). Services in American Indian/Alaskan Native languages were provided by 2 percent of all facilities where staff counselors provided services in languages other than English. All Indian Health Service-operated facilities and most tribal government-operated facilities where staff counselors provided services in languages other than English offered services in American Indian/Alaskan Native languages (100 and 87 percent, respectively).

Detoxification Services

Table 4.13. Facilities that provided detoxification services were asked to indicate whether or not they detoxified clients from specified substances, and whether or not medication was routinely used during detoxification. The number of facilities providing any type of substance detoxification services was 2,661 out of a total of 13,585 facilities.

Of the 2,661 facilities that offer detoxification, the proportions offering detoxification from the following specific substances were:

- Opioids 91 percent
- Alcohol 68 percent
- Benzodiazepines 62 percent
- Methamphetamines 53 percent
- Cocaine 53 percent
- Other substances 7 percent

Medications were routinely used during detoxification in 87 percent of the facilities providing detoxification services.

Client Outreach

Table 4.14. Facilities were asked if they had a website providing information about their substance abuse treatment programs.

Websites providing information about a facility's substance abuse treatment programs were maintained by 84 percent of all facilities. Website availability ranged from 55 percent among facilities operated by the federal government to 90 percent among facilities operated by private non-profit organizations.

Outreach to persons in the community who may need treatment was provided by 61 percent of all facilities, and by 87 percent of tribal government-operated facilities.

Facility Licensing, Certification, or Accreditation

Facilities were asked to report licensure, certification, or accreditation by specified agencies or organizations. These included the state substance abuse agency; state mental health department; state department of health; hospital licensing authority; the Joint Commission; CARF; NCQA; COA; HFAP; and other federal, state, or local agencies or organizations.[19]

Table 4.15b. Overall, 94 percent of all facilities reported that they were licensed, certified, or accredited by one or more agencies or organizations.

The proportions of facilities reporting that they were licensed, certified, or accredited by specified agencies or organizations were:

- State substance abuse agency — 80 percent
- State department of health — 47 percent
- State mental health department — 40 percent
- CARF — 29 percent
- Joint Commission — 20 percent
- Hospital licensing authority — 6 percent
- COA — 5 percent
- Other national organization or federal, state, or local agency — 3 percent
- NCQA — 3 percent
- HFAP — 1 percent

Table 4.16b. Facility licensing, certification, or accreditation was associated with the type of care offered.

State substance abuse agencies licensed, certified, or accredited 82 percent of facilities offering residential (non-hospital) treatment, 80 percent of facilities offering outpatient treatment, and 56 percent of facilities offering hospital inpatient treatment.

[19] CARF: Commission on Accreditation of Rehabilitation Facilities; NCQA: National Committee for Quality Assurance; COA: Council on Accreditation; and HFAP: Healthcare Facilities Accreditation Program

State mental health departments licensed, certified, or accredited 42 percent of facilities offering outpatient treatment, 41 percent of hospital inpatient facilities, and 32 percent of residential (non-hospital) facilities.

Payment Options

Table 4.17b. Facilities were asked to indicate whether or not they accepted specified types of payment or insurance for substance abuse treatment. They were also asked about the use of a sliding fee scale and if they offered treatment at no charge to clients who could not pay.

The proportions of all facilities reporting acceptance of specific payment options were:

- Cash or self-payment 90 percent
- Private health insurance 70 percent
- Medicaid 64 percent
- State-financed health insurance 47 percent
- Medicare 35 percent
- Federal military insurance 34 percent
- Access to Recovery (ATR) vouchers[20] 8 percent
- IHS/Tribal/Urban funds[21] 8 percent

Facilities operated by tribal and federal governments accepted cash or self-payment (41 and 37 percent, respectively) in lower proportions than facilities operated by any other type of entity. Private for-profit and federal government-operated facilities accepted Medicare, Medicaid, or state-financed health insurance in lower proportions than facilities operated by any other entity.

Acceptance of Access to Recovery vouchers was reported in 35 states or jurisdictions. The proportion of facilities accepting Access to Recovery vouchers ranged from 1 percent in North Carolina to 69 percent in Idaho [Table 6.25b].

ITU (IHS/Tribal/ Urban) funds (85 percent) were accepted by facilities operated by the Indian Health Service in greater proportion than facilities operated by any other entity.[21]

Use of a sliding fee scale was reported by 59 percent of all facilities, ranging from 17 percent of facilities operated by the federal government to 81 percent of facilities operated by local governments.

Treatment at no charge for persons who cannot afford to pay was offered by 44 percent of all facilities, ranging from 19 percent of private for-profit facilities to 78 percent of facilities operated by tribal governments.

[20] Access to Recovery (ATR) funds were available in CT, ID, IL, IA, MA, MI, MO, NC, OH, OR, and WA for 2017. However, the ATR vouchers were accepted for substance use treatment payment in 24 additional states. See Table 6.25a for the number of facilities accepting ATR vouchers by state.

[21] Through a contract, tribes can receive the money that the Indian Health Service (IHS) would have used to provide direct health services for tribal members. Tribes can use these funds to provide directly, or through another entity, a broad range of health services. This option was part of P.L. 93-638 and is commonly known as "638 contracting."

Facility Funding

Table 4.18. Facilities were asked if they received federal, state, or local government funds or grants to support their substance abuse treatment programs.

Overall, 53 percent of facilities reported receiving government funds to support substance abuse treatment programs. The proportions were highest in facilities operated by local or tribal governments (87 and 84 percent, respectively). Of facilities operated by private non-profit organizations, 72 percent reported receiving public funds, whereas 17 percent of facilities operated by private for-profit organizations reported receiving public funds.

Facilities Using Medication-Assisted Opioid Therapy

OTPs are certified by SAMHSA to provide medication-assisted therapy in the treatment of opioid use disorder (OUD). Currently, methadone and buprenorphine are the only opioid medications approved for the treatment of OUD. Injectable naltrexone is approved for relapse prevention in OUD. Only OTPs may use methadone for the treatment of OUD. Facilities with DATA 2000-waivered practitioners may prescribe buprenorphine. Any authorized personnel (physicians, physician assistants, etc.) may prescribe or administer injectable naltrexone.

Table 4.19a. Of all 13,585 facilities, 10 percent (1,317 facilities) had OTPs, 29 percent (3,900 facilities) offered buprenorphine for medication-assisted opioid therapy, and 24 percent (3,197 facilities) offered injectable naltrexone for medication-assisted opioid therapy.

- Methadone was provided at 97 percent of OTP facilities. Of the 1,317 facilities with OTPs, 32 percent (418 facilities) provided methadone only, and 65 percent (853 facilities) provided methadone as well as buprenorphine and/or injectable naltrexone.
- Of the 3,900 facilities offering buprenorphine, 22 percent (863 facilities) were in facilities with OTPs. The majority (3,037 facilities, or 78 percent) of facilities that offered buprenorphine as a medication-assisted opioid therapy were facilities other than OTPs.
- Among the 3,197 facilities offering injectable naltrexone, 12 percent (376 facilities) were in facilities with OTPs, and 88 percent (2,821 facilities) were in facilities that did not have OTPs.

Table 4.19b. The majority of facilities with OTPs that offered methadone only were private for-profit facilities (63 percent). In contrast, private non-profit facilities comprised the largest share of facilities with OTPs that offered methadone and injectable naltrexone (86 percent).

- Of all facilities that offered buprenorphine, 89 percent were either private non-profit or private for-profit facilities (47 and 42 percent, respectively). Federal government and local government-operated facilities each accounted for 4 percent of facilities that offered buprenorphine.
- Of all facilities that offered injectable naltrexone, 86 percent were either private non-profit or private for-profit facilities (51 percent and 36 percent, respectively), 5 percent were operated by the federal government, and 5 percent were operated by local government.

Tables 4.1b and 4.19b. Private for-profit organizations operated 60 percent of facilities with OTPs, but operated only 36 percent of all substance abuse treatment facilities.

Table 4.20b. Most facilities with OTPs offered outpatient treatment (92 percent). Of facilities with OTPs, 90 percent offered outpatient methadone/buprenorphine maintenance or injectable naltrexone treatment, and 47 percent offered outpatient detoxification.

Tables 4.16b and 4.21b. A greater proportion of facilities with OTPs, as compared with all facilities combined, were licensed, certified, or accredited by a state department of health (64 vs. 47 percent), the Joint Commission (26 vs. 20 percent), CARF (68 vs. 29 percent), or state substance abuse agencies (91 vs. 80 percent).

Counseling Services Offered by Facilities

Table 4.22. Individual counseling (99 percent of facilities) was the most frequent form of counseling reported. Next were group counseling (95 percent), family counseling (85 percent), and marital/couples counseling (66 percent).

Facility Smoking Policy

Table 4.23. Of the 13,517 facilities that responded to the question about smoking policies, 57 percent permitted smoking in designated outdoor areas, whereas 35 percent of facilities did not permit smoking anywhere outside or within any building.

Chapter 5
Client Characteristics

This chapter describes key characteristics of the 1,356,015 clients in substance abuse treatment on March 31, 2017. Clients in treatment were defined as: 1) hospital inpatient and residential (non-hospital) clients receiving substance abuse treatment services on March 31, 2017, and 2) outpatient clients who were seen at the facility for substance abuse treatment or detoxification service at least once during the month of March 2017, and who were still enrolled in treatment on March 31, 2017.

Facility Operation and Type of Care

Table 5.1c. Facilities were asked to designate the type of entity responsible for the operation of the facility.

The proportions of clients in treatment on March 31, 2017, by facility operation were:

- Private non-profit organizations — 49 percent
- Private for-profit organizations — 41 percent
- Local, county, or community government — 5 percent
- Federal government[22] — 3 percent
- State government — 2 percent
- Tribal government — 1 percent

Tables 5.1a-c. Facilities were asked how many clients in treatment on March 31, 2017, received specified subcategories of type of care within three broad categories.

On March 31, 2017, the proportions of clients receiving different types of care were:

- Outpatient treatment — 91 percent
  - Regular outpatient treatment — 44 percent
  - Outpatient methadone/buprenorphine maintenance or naltrexone treatment — 35 percent
  - Intensive outpatient treatment — 10 percent
  - Outpatient day treatment/partial hospitalization — 2 percent
  - Outpatient detoxification — 1 percent
- Residential (non-hospital) treatment — 7 percent
  - Long-term treatment (more than 30 days) — 4 percent
  - Short-term treatment (30 days or fewer) — 2 percent
  - Detoxification — 1 percent

[22] Data for the federal agencies specified in the survey (the Department of Veterans Affairs, the Department of Defense, the Indian Health Service, and other unspecified federal agencies) are detailed in the tables.

- Hospital inpatient treatment 1 percent
  - Inpatient treatment 1 percent
  - Inpatient detoxification 1 percent

Table 5.1c. Overall, a greater proportion of outpatient clients were in facilities operated by private non-profit organizations relative to private for-profit organizations (47 percent and 42 percent, respectively). However, the majority of clients in outpatient methadone/buprenorphine maintenance or naltrexone treatment (61 percent) were in facilities operated by private for-profit organizations.

Diagnosed Co-Occurring Mental and Substance Abuse Disorders

Table 5.2. Facilities were asked to estimate the proportions of clients in treatment on March 31, 2017, by substance abuse problem treated (alcohol abuse only, drug abuse only, or both alcohol and drug abuse).

On March 31, 2017, 37 percent of clients were in treatment for both alcohol and drug abuse, 47 percent were in treatment for drug abuse only, and 16 percent were in treatment for alcohol abuse only.

By facility operation, the highest proportion of clients in treatment for abuse of both alcohol and drugs was in tribal government-operated facilities (56 percent). For abuse of drugs only, the highest proportion of clients was in private for-profit facilities (59 percent); for abuse of alcohol only, the highest proportion was in federal government-operated facilities (34 percent).

Clients Under Age 18 in Treatment

Table 5.3. Facilities were asked how many clients in treatment on March 31, 2017, were under age 18.

There were 62,862 clients under age 18 in substance abuse treatment on March 31, 2017, accounting for 5 percent of the total 1,356,015 clients in treatment on that date.

Of the 62,862 clients under age 18, the majority (55,613 clients, or 88 percent) were in outpatient treatment, while 6,539 clients (10 percent) were in residential (non-hospital) treatment, and 710 clients (1 percent) were in hospital inpatient treatment.

Medication-Assisted Opioid Therapy

Tables 5.4a-b. Facilities were asked how many clients in treatment on March 31, 2017, received medication-assisted opioid therapy (MAT) drugs for detoxification or maintenance purposes. MAT includes the use of methadone and buprenorphine for the treatment of opioid use disorder (OUD), and the use of naltrexone for relapse prevention in OUD. Methadone is available only at OTP facilities that are certified by SAMHSA's Center for Substance Abuse Treatment. Buprenorphine may be prescribed by practitioners who have received DATA 2000-specific training and received a waiver to prescribe the medication for treatment of OUD; some of these practitioners are affiliated

with facilities (either OTPs or other). All physicians or approved medical personnel with prescribing privileges can prescribe naltrexone.[23]

- Of the total 1,356,015 clients in treatment, 413,930 (31 percent) received MAT in OTP facilities.
- There were 382,867 clients receiving methadone in OTP facilities. Of the clients receiving methadone, 234,844 clients (61 percent) were provided treatment at private for-profit OTPs and 126,797 clients (33 percent) were provided treatment at private non-profit OTPs.
- There were 27,665 clients receiving buprenorphine in OTP facilities and 84,558 clients receiving buprenorphine in non-OTP facilities.
    - Of the clients receiving buprenorphine in OTPs, 16,597 clients (60 percent) were provided treatment at private for-profit OTPs and 8,161 clients (29 percent) were provided treatment at private non-profit OTPs.
    - Of the clients receiving buprenorphine in non-OTP facilities, 49,668 clients (59 percent) were provided treatment at private for-profit non-OTPs and 26,876 clients (32 percent) were provided treatment at private non-profit non-OTPs.
- There were 3,398 clients receiving naltrexone in OTP facilities for OUD and 19,667 clients receiving naltrexone in non-OTP facilities.
    - Of the clients receiving naltrexone in OTPs, 2,105 clients (62 percent) were provided treatment at private non-profit OTPs and 883 clients (26 percent) were provided treatment at private for-profit OTPs.
    - Of the clients receiving naltrexone in non-OTP facilities, 9,651 clients (49 percent) were provided treatment at private non-profit non-OTPs and 7,413 clients (38 percent) were provided treatment at private for-profit non-OTPs.

[23] Only clients who received buprenorphine through a facility affiliated with an authorized practitioner are included in this report; it does not include clients who received buprenorphine through an independent DATA 2000-waivered practitioner. This report also does not include clients who received naltrexone through other sources.

Chapter 6
State Data

This chapter breaks down data presented in earlier chapters by state or jurisdiction. The Chapter 6 tables correspond thematically to many of the tables presented in Chapters 4 and 5. Note that facilities operated by federal agencies are included in the states in which the facilities are located, although these facilities may have clients from other states.

Table 6.1 details the 2017 N-SSATS response rate.

Tables 6.2a-b present data on facilities and clients in treatment by state or jurisdiction for 2007 to 2017.

Tables 6.3a through 6.30 present facility data for 2017.

Tables 6.31a through 6.37 present client data for 2017.

Tables 6.38 and 6.39 present the number of clients aged 18 or older in treatment—according to substance abuse problem and receiving medication-assisted opioid therapy, respectively—per 100,000 population, by state or jurisdiction.

Survey Response

Table 6.1. The overall response rate for the survey was 89 percent. Response rates in 36 states or jurisdictions equaled or surpassed the overall rate.

Trends

Tables 6.2a-b. California and New York had the largest numbers of both facilities and clients in treatment for every odd year from 2007 through 2017.[24] On March 31, 2017, California had 10 percent of all facilities and 9 percent of all clients, and New York had 6 percent of all facilities and 8 percent of all clients.

In terms of total numbers of facilities in every odd year from 2007 through 2017, Illinois and Florida ranked among third and fourth. Michigan, Pennsylvania, Texas, and Washington have also consistently ranked within the top ten.

In terms of total numbers of clients in every odd year from 2009 through 2017, Florida and Pennsylvania have ranked as third or fourth. Illinois, Massachusetts, Maryland, and Michigan have also consistently ranked within the top ten.

[24] Since 2013, the full N-SSATS questionnaire has alternated with an abbreviated version, fielded in even-numbered years, that does not collect client counts. Therefore, this report draws only on client counts collected in odd-numbered years between 2007 and 2017.

Clients in Treatment per 100,000 Population Aged 18 and Older

Table 6.38 and Figures 7–8. For the United States, there were 507 clients in treatment per 100,000 population aged 18 and over on March 31, 2017. The rate was highest for clients in drug abuse only (244 per 100,000 population), followed by both alcohol and drug abuse (184 per 100,000 population) and alcohol abuse only (79 per 100,000 population). Figure 7 maps the rates of clients in treatment by state by quartile in 2017. Figure 8 maps the rates of clients in treatment by state by quartile in 2007. It has been included in this section for comparison.

[1] Numbers of facilities sum to more than the total and percentages sum to more than 100, because a facility could provide more than one type of care.

[2] Only those facilities that have opioid treatment programs certified by the Substance Abuse and Mental Health Services Administration are included.

NOTES: Survey reference dates were March 31 for 2009, 2011, 2015, and 2017; March 30 for 2007; and March 29 for 2013. See Appendix A for changes in the survey base, methods, and instruments that affect analysis of trends over time. Methadone is available only at OTP facilities that are certified by SAMHSA's Center for Substance Abuse Treatment. Buprenorphine may be prescribed by medical practitioners who have received DATA 2000-specific training and received a waiver to prescribe the medication for treatment of opioid use disorder. Naltrexone may be prescribed by any medical practitioner with prescribing privileges. This report does not include clients who were prescribed buprenorphine through an independent DATA 2000-waivered medical practitioner or naltrexone through an independent practitioner not affiliated with a substance abuse treatment facility.

n/a Not applicable; - - Quantity is zero.

Injectable naltrexone = extended-release injectable naltrexone; MAT = medication-assisted therapy.

[1] The numbers in this category will not sum to the number of all facilities with OTPs because naltrexone only is not included due to the differences in the question asked over the time period. In 2007, eight OTP facilities offered naltrexone only and in 2017, one OTP facility offered injectable naltrexone only. In 2007, the questionnaire did not allow OTP facilities to specify if they offered injectable naltrexone—they were only given the broad category of naltrexone.

NOTES: Survey reference dates were March 31 for 2009, 2011, 2015, and 2017; March 30 for 2007; and March 29 for 2013. See Appendix A for changes in the survey base, methods, and instruments that affect analysis of trends over time. Methadone is available only at OTP facilities that are certified by SAMHSA's Center for Substance Abuse Treatment. Buprenorphine may be prescribed by physicians, physician assistants, and nurse practitioners who have received DATA 2000-specific training and received a waiver to prescribe the medication for treatment of opioid use disorder. Naltrexone may be prescribed by any medical practitioner with prescribing privileges. This report does not include clients who received or were prescribed buprenorphine through an independent DATA 2000-waivered medical practitioner or naltrexone through an independent practitioner not affiliated with a substance abuse treatment facility. Percentages may not sum to 100 percent because of rounding.

n/a Not applicable.

NOTES: Survey reference dates were March 31 for 2009, 2011, 2015, and 2017; March 30 for 2007; and March 29 for 2013. See Appendix A for changes in the survey base, methods, and instruments that affect analysis of trends over time. Methadone is available only at OTP facilities that are certified by SAMHSA's Center for Substance Abuse Treatment. Buprenorphine may be prescribed by medical practitioners who have received DATA 2000-specific training and received a waiver to prescribe the medication for treatment of opioid use disorder. Naltrexone may be prescribed by any medical practitioner with prescribing privileges. This report does not include clients who were prescribed buprenorphine through an independent DATA 2000-waivered medical practitioner or naltrexone through an independent practitioner not affiliated with a substance abuse treatment facility.

CARF = Commission on Accreditation of Rehabilitation Facilities; COA = Council on Accreditation; HFAP = Healthcare Facilities Accreditation Program; NCQA = National Committee for Quality Assurance.

[1] Number of facilities sums to more than the total column, because a facility could report more than one licensing, certification, or accreditation organization.

[2] Number of facilities sums to more than the total, because a facility could offer more than one type of care.

NOTES: Methadone is available only at OTP facilities that are certified by SAMHSA's Center for Substance Abuse Treatment. Buprenorphine may be prescribed by physicians, physician assistants, and nurse practitioners who have received DATA 2000-specific training and received a waiver to prescribe the medication for treatment of opioid use disorder. Naltrexone may be prescribed by any medical practitioner with prescribing privileges. This report does not include clients who received or were prescribed buprenorphine through an independent DATA 2000-waivered medical practitioner or naltrexone through an independent practitioner not affiliated with a substance abuse treatment facility.

[1] Facilities that have opioid treatment programs certified by the Substance Abuse and Mental Health Services Administration.

[2] Percentages sum to more than 100 percent, because a facility could provide more than one type of care.

NOTES: Methadone is available only at OTP facilities that are certified by SAMHSA's Center for Substance Abuse Treatment. Buprenorphine may be prescribed by physicians, physician assistants, and nurse practitioners who have received DATA 2000-specific training and received a waiver to prescribe the medication for treatment of opioid use disorder. Naltrexone may be prescribed by any medical practitioner with prescribing privileges. This report does not include clients who received or were prescribed buprenorphine through an independent DATA 2000-waivered medical practitioner or naltrexone through an independent practitioner not affiliated with a substance abuse treatment facility.

[1] Facilities operated by federal agencies are included in the states in which the facilities are located.

[2] A facility was ineligible if it had closed or was not providing substance abuse treatment or detoxification.

[3] Response rate calculated as total respondents divided by total eligible.

[4] Of 13,857 total respondents, this report excludes 204 facilities deemed out of scope for this report (123 non-treatment halfway houses, 54 solo practices not approved by the state agency for inclusion, and 27 facilities that treated incarcerated clients only). See Chapter 1 for details.

[5] Mode of response for the 13,585 facilities included in the report.

[6] Other jurisdictions include Guam, the Federated States of Micronesia, the Commonwealth of the Northern Mariana Islands, the Republic of Marshall Islands, the Republic of Palau, and the Virgin Islands of the United States.

NOTE: Percentages may not sum to 100 percent because of rounding.

- - Quantity is zero.

[1] Facilities operated by federal agencies are included in the states in which the facilities are located.

[2] Number of facilities sum to more than the total column, because a facility could provide more than one type of care.

[3] Other jurisdictions include Guam, the Federated States of Micronesia, the Commonwealth of the Northern Mariana Islands, and the U.S. Virgin Islands.

NOTES: Methadone is available only at OTP facilities that are certified by SAMHSA's Center for Substance Abuse Treatment. Buprenorphine may be prescribed by physicians, physician assistants, and nurse practitioners who have received DATA 2000-specific training and received a waiver to prescribe the medication for treatment of opioid use disorder. Naltrexone may be prescribed by any medical practitioner with prescribing privileges. This report does not include clients who received or were prescribed buprenorphine through an independent DATA 2000-waivered medical practitioner or naltrexone through an independent practitioner not affiliated with a substance abuse treatment facility.

SOURCE: Center for Behavioral Health Statistics and Quality, Substance Abuse and Mental Health Services Administration, National Survey of Substance Abuse Treatment Services (N-SSATS), 2017.

[1] Facilities operated by federal agencies are included in the states in which the facilities are located.

[2] Percentages sum to more than 100 percent, because a facility could provide more than one type of care.

[3] Other jurisdictions include Guam, the Federated States of Micronesia, the Commonwealth of the Northern Mariana Islands, and the U.S. Virgin Islands.

NOTES: Methadone is available only at OTP facilities that are certified by SAMHSA's Center for Substance Abuse Treatment. Buprenorphine may be prescribed by physicians, physician assistants, and nurse practitioners who have received DATA 2000-specific training and received a waiver to prescribe the medication for treatment of opioid use disorder. Naltrexone may be prescribed by any medical practitioner with prescribing privileges. This report does not include clients who received or were prescribed buprenorphine through an independent DATA 2000-waivered medical practitioner or naltrexone through an independent practitioner not affiliated with a substance abuse treatment facility.

[1] Facilities operated by federal agencies are included in the states in which the facilities are located.

[2] Percentages sum to more than 100 percent, because a facility could offer more than one assessment and pre-treatment service.

[3] Other jurisdictions include Guam, the Federated States of Micronesia, the Commonwealth of the Northern Mariana Islands, and the Virgin Islands of the United States.

- - Quantity is zero.

[1] Facilities operated by federal agencies are included in the states in which the facilities are located.

[2] Number of facilities sums to more than the total column, because a facility could offer more than one pharmacotherapy.

[3] Methadone is available only at OTP facilities that are certified by SAMHSA's Center for Substance Abuse Treatment.

[4] Other jurisdictions include Guam, the Federated States of Micronesia, the Commonwealth of the Northern Mariana Islands, and the Virgin Islands of the United States.

- - Quantity is zero.

[1] Facilities operated by federal agencies are included in the states in which the facilities are located.

[2] Of 1,317 OTP facilities, 19 facilities (1 percent) whose client counts were reported by another facility were not asked to respond to these questions. Of the remaining 1,298 OTP facilities, 13 facilities (1 percent) that included client counts for other facilities were excluded from tabulations for this table, and thus, tabulations are based on 1,285 OTP facilities that reported client counts for their facility alone.

[3] Other jurisdictions include Guam, the Federated States of Micronesia, the Commonwealth of the Northern Mariana Islands, and the Virgin Islands of the United States.

NOTES: Methadone is available only at OTP facilities that are certified by SAMHSA's Center for Substance Abuse Treatment. Buprenorphine may be prescribed by medical practitioners who have received DATA 2000-specific training and received a waiver to prescribe the medication for treatment of opioid use disorder. Naltrexone may be prescribed by any medical practitioner with prescribing privileges. This report does not include clients who were prescribed buprenorphine through an independent DATA 2000-waivered medical practitioner or naltrexone through an independent practitioner not affiliated with a substance abuse treatment facility.

- - Quantity is zero.

[1] Facilities operated by federal agencies are included in the states in which the facilities are located.

[2] For facilities offering residential (non-hospital) services, the number of designated beds, overall utilization rate, and designated beds per facility are based on 2,752 facilities (91,601 designated beds and 86,046 clients) that reported offering residential (non-hospital) services and reported both designated beds and clients for their facility alone.

[3] For facilities offering hospital inpatient services, the number of designated beds, overall utilization rate, and designated beds per facility are based on 473 facilities (12,707 designated beds and 12,495 clients) that reported offering hospital inpatient services and reported both designated beds and clients for their facility alone.

[4] Utilization rates may be more than 100 percent, because the substance abuse treatment clients may also occupy non-designated beds.

[5] Other jurisdictions include Guam, the Federated States of Micronesia, the Commonwealth of the Northern Mariana Islands, and the Virgin Islands of the United States.

SOURCE: Center for Behavioral Health Statistics and Quality, Substance Abuse and Mental Health Services Administration, National Survey of Substance Abuse Treatment Services (N-SSATS), 2017.

[1] Facilities operated by federal agencies are included in the states in which the facilities are located.

[2] Number of facilities sums to more than the total column, and percentages sum to more than 100 percent, because a facility could offer more than one counseling type.

[3] Other jurisdictions include Guam, the Federated States of Micronesia, the Commonwealth of the Northern Mariana Islands, and the Virgin Islands of the United States.

- - Quantity is zero.

[1] Facilities operated by federal agencies are included in the states in which the facilities are located.

[2] Number of facilities sums to more than the total column, because a facility could use more than one clinical/therapeutic approach.

[3] This question used a Likert scale response: "Always or often," "Sometimes," "Rarely," "Never," and "Not familiar with this approach." This table combines responses of "Always or often" and "Sometimes."

[4] Other jurisdictions include Guam, the Federated States of Micronesia, the Commonwealth of the Northern Mariana Islands, and the Virgin Islands of the United States.

SOURCE: Center for Behavioral Health Statistics and Quality, Substance Abuse and Mental Health Services Administration, National Survey of Substance Abuse Treatment Services (N-SSATS), 2017.

Table 6.18b. Clinical/therapeutic approaches used always or often or sometimes, by state or jurisdiction: Percent, 2017

State or jurisdiction[1]	No. of facilities	Percent[2 3]														
		Clinical/therapeutic approaches used "always or often" or "sometimes"														
		Substance abuse counseling	Relapse prevention	Cognitive-behavioral therapy	Motivational interviewing	Anger management	Brief intervention	12-step facilitation	Trauma-related counseling	Contingency management	Rational emotive behavioral therapy	Matrix model	Computerized substance abuse treatment	Community reinforcement plus vouchers	Dialectical behavior therapy	Other treatment approaches

- - Quantity is zero.

LGBT = Lesbian, gay, bisexual, or transgender; DUI/DWI = Driving under the influence/driving while impaired.

[1] Facilities operated by federal agencies are included in the states in which the facilities are located.

[2] Number of facilities sums to more than the total column, because a facility could offer special programs or groups for more than one client type.

[3] Other jurisdictions include Guam, the Federated States of Micronesia, the Commonwealth of the Northern Mariana Islands, and the Virgin Islands of the United States.

SOURCE: Center for Behavioral Health Statistics and Quality, Substance Abuse and Mental Health Services Administration, National Survey of Substance Abuse Treatment Services (N-SSATS), 2017.

Table 6.19b. Facilities offering special programs or groups for specific client types, by state or jurisdiction: Percent, 2017

State or jurisdiction[1]	No. of facilities	Percent[2]																			
			Client type																		
		Any program or group	Clients with co-occurring disorders	Adult women	DUI/ DWI clients	Adolescents	Adult men	Criminal justice clients	Clients who have experienced trauma	Pregnant or postpartum women	Clients with HIV or AIDS	Veterans	Seniors or older adults	LGBT	Active duty military	Members of military families	Young adults	Clients who have experienced sexual abuse	Clients who have experienced intimate partner or domestic violence	Other	No program or group offered

- - Quantity is zero.

[1] Facilities operated by federal agencies are included in the states in which the facilities are located.

[2] Number of facilities based on facilities where languages services are provided by staff counselors only and by both staff counselors and on-call interpreters.

[3] Facilities that offered services in any language other than English but did not have a valid response to language provider were classified as providing services by an on-call interpreter only.

[4] Other jurisdictions include Guam, the Federated States of Micronesia, the Commonwealth of the Northern Mariana Islands, and the Virgin Islands of the United States.

[1] Facilities operated by federal agencies are included in the states in which the facilities are located.

[2] Number of facilities sums to more than the total column, and percentages sum to more than 100 percent, because a facility could provide detoxification for more than one substance.

[3] Of 13,585 facilities, 2,661 facilities (20 percent) offered detoxification services.

[4] Other jurisdictions include Guam, the Federated States of Micronesia, the Commonwealth of the Northern Mariana Islands, and the Virgin Islands of the United States.

CARF = Commission on Accreditation of Rehabilitation Facilities; COA = Council on Accreditation; HFAP = Healthcare Facilities Accreditation Program; NCQA = National Committee for Quality Assurance.

[1] Facilities operated by federal agencies are included in the states in which the facilities are located.

[2] Percentages sum to more than 100 percent, because a facility could report more than one licensing, certification, or accreditation organization.

[3] Other jurisdictions include Guam, the Federated States of Micronesia, the Commonwealth of the Northern Mariana Islands, and the Virgin Islands of the United States.

- - Quantity is zero; *n/a* Not applicable: state has not had an ATR voucher program.

[1] Facilities operated by federal agencies are included in the states in which the facilities are located.

[2] Percentages sum to more than 100 percent, because a facility could accept more than one payment option.

[3] Access to Recovery (ATR) funds were available in CT, ID, IL, IA, MA, MI, MO, NC, OH, OR, and WA for 2017. However, the ATR vouchers were accepted for substance use treatment payment in 24 additional states.

[4] Other jurisdictions include Guam, the Federated States of Micronesia, the Commonwealth of the Northern Mariana Islands, and the Virgin Islands of the United States.

- - Quantity is zero; ‡ No facilities in this category.

[1] Facilities operated by federal agencies are included in the states in which the facilities are located.

[2] Facilities that have opioid treatment programs certified by the Substance Abuse and Mental Health Services Administration.

[3] Percentages sum to more than 100 percent, because a facility could provide more than one type of care.

[4] Other jurisdictions include Guam, the Federated States of Micronesia, the Commonwealth of the Northern Mariana Islands, and the Virgin Islands of the United States.

NOTES: Methadone is available only at OTP facilities that are certified by SAMHSA's Center for Substance Abuse Treatment. Buprenorphine may be prescribed by medical practitioners who have received DATA 2000-specific training and received a waiver to prescribe the medication for treatment of opioid use disorder. Naltrexone may be prescribed by any medical practitioner with prescribing privileges. This report does not include clients who were prescribed buprenorphine through an independent DATA 2000-waivered medical practitioner or naltrexone through an independent practitioner not affiliated with a substance abuse treatment facility.

- - Quantity is zero; ‡ No facilities in this category.

CARF = Commission on Accreditation of Rehabilitation Facilities; COA = Council on Accreditation; HFAP = Healthcare Facilities Accreditation Program; NCQA = National Committee for Quality

[1] Facilities operated by federal agencies are included in the states in which the facilities are located.

[2] Facilities that have opioid treatment programs certified by the Substance Abuse and Mental Health Services Administration.

[3] Percentages sum to more than 100 percent, because a facility could report more than one licensing, certification, or accreditation organization.

[4] Other jurisdictions include Guam, the Federated States of Micronesia, the Commonwealth of the Northern Mariana Islands, and the Virgin Islands of the United States.

[1] Facilities operated by federal agencies are included in the states in which the facilities are located.

[2] Of 13,585 facilities, 68 facilities (<0.5 percent) did not respond to the question. Percentages are based on the remaining 13,517 facilities.

[3] Other jurisdictions include Guam, the Federated States of Micronesia, the Commonwealth of the Northern Mariana Islands, and the Virgin Islands of the United States.

NOTE: Percentages may not sum to 100 percent because of rounding.

[1] Facilities operated by federal agencies are included in the states in which the facilities are located.

[2] Other jurisdictions include Guam, the Federated States of Micronesia, the Commonwealth of the Northern Mariana Islands, and the Virgin Islands of the United States.

NOTES: Methadone is available only at OTP facilities that are certified by SAMHSA's Center for Substance Abuse Treatment. Buprenorphine may be prescribed by physicians, physician assistants, and nurse practitioners who have received DATA 2000 specific training and received a waiver to prescribe the medication for treatment of opioid use disorder. These tables include only clients who receive or are prescribed buprenorphine through physicians, physician assistants, and nurse practitioners affiliated with a substance abuse treatment facility, they do not include clients who receive or are prescribed buprenorphine through an independent DATA 2000 waivered physician, physician assistant, and nurse practitioner.

[1] Facilities operated by federal agencies are included in the states in which the facilities are located.

[2] Other jurisdictions include Guam, the Federated States of Micronesia, the Commonwealth of the Northern Mariana Islands, and the Virgin Islands of the United States.

NOTES: Percentages may not sum to 100 percent because of rounding. Methadone is available only at OTP facilities that are certified by SAMHSA's Center for Substance Abuse Treatment. Buprenorphine may be prescribed by medical practitioners who have received DATA 2000-specific training and received a waiver to prescribe the medication for treatment of opioid use disorder. Naltrexone may be prescribed by any medical practitioner with prescribing privileges. This report does not include clients who were prescribed buprenorphine through an independent DATA 2000-waivered medical practitioner or naltrexone through an independent practitioner not affiliated with a substance abuse treatment facility.

[1] Facilities operated by federal agencies are included in the states in which the facilities are located.

[2] Of 1,356,015 clients, 894 clients (<0.07 percent) reported by the 276 facilities that did not respond to the substance abuse problem question (question 32) were excluded.

[3] Of 1,356,015 clients, 934 clients (<0.07 percent) reported by the 278 facilities that did not respond to the co-occurring disorders question (question 33) and 72,901 clients (5 percent) reported by the 1,049 facilities that responded to the co-occurring disorders question but reported no clients with a mental health disorder were excluded.

[4] Other jurisdictions include Guam, the Federated States of Micronesia, the Commonwealth of the Northern Mariana Islands, and the Virgin Islands of the United States.

NOTE: Numbers and percentages may not sum to totals because of rounding.

[1] Facilities operated by federal agencies are included in the states in which the facilities are located.

[2] Numbers of clients sum to more than the total column, and percentages sum to more than 100 percent, because clients could receive more than one type of counseling.

[3] Other jurisdictions include Guam, the Federated States of Micronesia, the Commonwealth of the Northern Mariana Islands, and the Virgin Islands of the United States.

- - Quantity is zero.

MAT = medication-assisted therapy.

[1] Facilities operated by federal agencies are included in the states in which the facilities are located.

[2] Includes clients receiving methadone, buprenorphine, or naltrexone.

[3] Includes clients receiving buprenorphine or naltrexone.

[4] Other jurisdictions include Guam, the Federated States of Micronesia, the Commonwealth of the Northern Mariana Islands, and the Virgin Islands of the United States.

NOTES: Methadone is available only at OTP facilities that are certified by SAMHSA's Center for Substance Abuse Treatment. Buprenorphine may be prescribed by medical practitioners who have received DATA 2000-specific training and received a waiver to prescribe the medication for treatment of opioid use disorder. Naltrexone may be prescribed by any medical practitioner with prescribing privileges. This report does not include clients who were prescribed buprenorphine through an independent DATA 2000-waivered medical practitioner or naltrexone through an independent practitioner not affiliated with a substance abuse treatment facility.

MAT = medication-assisted therapy.

[1] Facilities operated by federal agencies are included in the states in which the facilities are located.

[2] Includes clients receiving methadone, buprenorphine, or naltrexone.

[3] Includes clients receiving buprenorphine or naltrexone.

[4] Other jurisdictions include Guam, the Federated States of Micronesia, the Commonwealth of the Northern Mariana Islands, and the Virgin Islands of the United States.

NOTES: Methadone is available only at OTP facilities that are certified by SAMHSA's Center for Substance Abuse Treatment. Buprenorphine may be prescribed by medical practitioners who have received DATA 2000-specific training and received a waiver to prescribe the medication for treatment of opioid use disorder. Naltrexone may be prescribed by any medical practitioner with prescribing privileges. This report does not include clients who were prescribed buprenorphine through an independent DATA 2000-waivered medical practitioner or naltrexone through an independent practitioner not affiliated with a substance abuse treatment facility. Percentages may not sum to 100 percent due to rounding.

- - Quantity is zero; † Less than 1 per 100,000; ‡ No facilities in this category.

MAT = medication-assisted therapy.

[1] Facilities operated by federal agencies are included in the states in which the facilities are located.

[2] Includes clients receiving methadone, buprenorphine, or naltrexone.

[3] Other jurisdictions include Guam, the Federated States of Micronesia, the Commonwealth of the Northern Mariana Islands, and the Virgin Islands of the United States.

NOTES: Methadone is available only at OTP facilities that are certified by SAMHSA's Center for Substance Abuse Treatment. Buprenorphine may be prescribed by physicians, physician assistants, and nurse practitioners who have received DATA 2000-specific training and received a waiver to prescribe the medication for treatment of opioid use disorder. Naltrexone may be prescribed by any medical practitioner with prescribing privileges. This report does not include clients who received or were prescribed buprenorphine through an independent DATA 2000-waivered medical practitioner or naltrexone through an independent practitioner not affiliated with a substance abuse treatment facility.

Appendix A
N-SSATS Background

Survey History

N-SSATS has evolved from national survey efforts begun in the 1970s by the National Institute on Drug Abuse (NIDA) to measure the scope and use of drug abuse treatment services in the United States. The sixth of these surveys, conducted in 1976, introduced the data elements and format that have formed the core of subsequent surveys. These include organizational focus, service orientation, services available, clients in treatment by type of care, and hospital inpatient/residential capacity. The 1976 survey, called the National Drug Abuse Treatment Utilization Survey, was repeated in 1977 and 1978.

In 1979, the National Institute on Alcohol Abuse and Alcoholism (NIAAA) became a co-sponsor of the survey, alcoholism treatment facilities were added, and the study was re-named the National Drug and Alcoholism Treatment Utilization Survey. This survey was repeated in 1980 and 1982. In 1984, a one-page version called the National Alcoholism and Drug Abuse Program Inventory was used. In 1987, the full version of the survey was re-instated and re-named the National Drug and Alcoholism Treatment Unit Survey (NDATUS). NDATUS was conducted annually from 1989 to 1993.

In 1992, with the creation of SAMHSA, responsibility for conducting the survey shifted to SAMHSA's Office of Applied Studies (now the Center for Behavioral Health Statistics and Quality). The survey was re-designed, and it was conducted annually as the Uniform Facility Data Set (UFDS) survey from 1995 to 1998. During these years, the survey was conducted by mail with telephone follow-up of non-respondents. The 1999 survey year was a transition year during which the survey was re-designed and an abbreviated telephone survey of treatment facilities was conducted. In 2000, a re-designed full mail survey was re-instated with telephone follow-up; it was re-named the National Survey of Substance Abuse Treatment Services (N-SSATS). The reference date for the annual survey had always been the end of September or beginning of October. After the 2000 survey, the reference date was changed to the end of March, and no survey was conducted during 2001.

In 2000, the use of an Internet-based questionnaire was tested; beginning in 2002, all facilities were offered the opportunity to respond via the Internet.

Since 2013, the full N-SSATS questionnaire (with client counts) has alternated with an abbreviated version of the questionnaire. The full questionnaire, fielded in odd-numbered years, collects data on programs and clients; in alternate (even-numbered) years, an abbreviated N-SSATS questionnaire collects the program information needed to update the substance abuse section of the Behavioral Health Treatment Services Locator and collects information on other facility-related topics.

N-SSATS in the Context of the Behavioral Health Services Information System (BHSIS)

N-SSATS is one of the components of SAMHSA's Behavioral Health Services Information System (BHSIS). The core of BHSIS is the Inventory of Behavioral Health Services (I-BHS), a continuously updated, comprehensive listing of all known substance abuse treatment facilities and mental health treatment facilities. The other substance abuse component of BHSIS is the Treatment Episode Data Set (TEDS), a client-level database of admissions to and discharges from substance abuse treatment. Together, the components provide national- and state-level information on the numbers and characteristics of individuals admitted to alcohol and drug treatment programs and describe the facilities that deliver care to those individuals.

I-BHS is the list frame for N-SSATS. Facilities in I-BHS fall into two general categories and are distinguished by the relationship of the facility to its state substance abuse agency. These categories are described below.

Treatment facilities approved by state substance abuse agencies

The largest group of facilities (14,084 in 2017) includes facilities that are licensed, certified, or otherwise approved by the state substance abuse agency to provide substance abuse treatment. State BHSIS representatives maintain this segment of I-BHS by reporting new facilities, closures, and address changes to SAMHSA. Some facilities are not licensed, certified, or otherwise approved by the state agency. Some private for-profit facilities fall into this category. The approved facility group also includes programs operated by federal agencies—the Department of Veterans Affairs (VA), the Department of Defense, the Indian Health Service—and opioid treatment programs certified by SAMHSA. I-BHS records for federally operated facilities are updated annually through lists provided by these agencies.

Treatment facilities not approved by state substance abuse agencies

This group of facilities (2,945 in 2017) represents the SAMHSA effort since the mid-1990s to make I-BHS as comprehensive as possible by including treatment facilities that state substance abuse agencies, for a variety of reasons, do not fund, license, or certify. Many of these facilities are private for-profit, small group practices, or hospital-based programs. Most of them are identified through periodic screening of alternative source databases. (See *Special efforts to improve survey coverage*.) State substance abuse agencies are given the opportunity to review these facilities and to add them to the state agency-approved list, if appropriate.

Survey Coverage

The use of I-BHS as the list frame for N-SSATS imposes certain constraints related to the unit of response and the scope of facilities included. In addition, the expansion of I-BHS in recent years to provide a more complete enumeration of substance abuse treatment facilities means that year-to-year comparisons of the numbers of facilities reporting to N-SSATS must be interpreted with caution.

Unit of response

N-SSATS is designed to collect data from each physical location where treatment services are provided. Accordingly, SAMHSA requests that state substance abuse agencies use the point of

delivery of service (i.e., physical location) as the defining factor for a facility. Because of the different state administrative systems, however, there are some inconsistencies in implementation. For example, in some states, multiple treatment programs (e.g., detoxification, residential, and outpatient) at the same address and under the same management have separate state licenses. These are treated as separate by the state substance abuse agency, and are given separate I-BHS ID numbers. In other states, multiple sites are included as a single entity under a parent or administrative unit. In many of these cases, individual sites can report services data in N-SSATS, but client data are available only at a higher administrative level. Beginning in 1995, efforts have been made to identify facility networks and to eliminate duplicate reporting by networks. For most facilities, reporting levels remain consistent from year to year. However, beginning in 1998, an emphasis was placed on collecting minimum information from all physical locations, and this resulted in an increase in the number of facilities.

Special efforts to improve survey coverage

The great majority of treatment facilities in I-BHS are administratively monitored by state substance abuse agencies. Therefore, the scope of facilities included in I-BHS is affected by differences in state systems of licensure, certification, accreditation, and the disbursement of public funds. For example, some state substance abuse agencies regulate private facilities and individual practitioners while others do not. In some states, hospital-based substance abuse treatment facilities are not licensed through the state substance abuse agency.

To address these differences, SAMHSA conducted a large-scale effort during 1995 and 1996 to identify substance abuse treatment facilities that, for a variety of reasons, were not on the inventory. About 15 source lists were examined, and facilities not on the inventory were contacted to ascertain whether or not they provided substance abuse treatment. As expected, this yielded a number of hospital-based and small private facilities that were not on the inventory. (These facilities were surveyed in 1995 and 1996, but they were not included in the published results of the survey until 1997.) Analysis of the results of this effort led to similar but more targeted updates before subsequent surveys. Potential new facilities are identified using data from the American Business Index, the annual American Hospital Association survey, and SAMHSA's National Mental Health Services Survey, the source lists that yielded the most new facilities in 1995 and 1996. Survey participants, who are asked to report all of the treatment facilities in their administrative networks, also identify additional facilities during the survey itself. All newly identified facilities are initially included as not approved by the state substance abuse agency. State substance abuse agencies are given the opportunity to review these facilities and to add them to the state agency-approved list, if appropriate.

Expansion of survey coverage to include all sites within networks at which treatment was provided yielded a net increase of about 2,600 facilities between 1997 and 1998. These additions were not necessarily new facilities, but were facilities not previously included in the survey as separate sites. Between 2007 and 2017, the number of facilities eligible for inclusion in this report varied between 13,339 and 14,399. The total number is deceptive, however. There was significant turnover as facilities closed and others opened (see Table 2.1).

Data collection

Until 1996, state substance abuse agencies distributed and collected the facility survey forms. Beginning in 1996, data collection was centralized; since that time, SAMHSA has mailed survey forms directly to and collected forms directly from the facilities and has conducted follow-up telephone interviews with the facility director or his/her designee. In 2000, SAMHSA introduced an online trial web version of the questionnaire for a few facilities in addition to the hard copy questionnaire. The web version of the questionnaire was fully implemented in 2002. The proportion of facilities using the web survey to respond to N-SSATS has increased steadily since its full inception in 2002.

Non-response

Beginning in 1992, SAMHSA expanded efforts to obtain information from non-responding facilities. A representative sample of non-respondents was contacted and administered an abbreviated version of the survey instrument via telephone. In 1993 and later years, this effort was extended to all non-responding facilities. In 1997, a series of measures was introduced to enhance the survey response rate. These included advance notification and improved methods for updating address and contact information. Between 2004 and 2016, use of these methods and intensive telephone follow-up resulted in an annual follow-up rate (i.e., facilities in the sample either completed the survey or were determined to be closed or otherwise ineligible) of 92 to 96 percent. In 2017, the final response rate, counting survey-eligible facilities, was 89 percent.

Exclusions

In 1997, facilities offering only DUI/DWI programs were excluded; these facilities were reinstated in 1998.

Facilities operated by the Bureau of Prisons (BOP) were excluded from the 1997 survey and subsequent surveys because SAMHSA conducted a separate survey of correctional facilities.[25] During that survey, it was discovered that jails, prisons, and other organizations treating incarcerated persons only were poorly enumerated on the inventory. Beginning in 1999, these facilities were identified during the survey and excluded from analyses and public use data files.

I-BHS and N-SSATS are designed to include specialty substance abuse treatment facilities rather than individuals. Solo practitioners are listed on I-BHS and surveyed in N-SSATS only if the state substance abuse agency explicitly requests that they be included.

Beginning in 2000, halfway houses that did not provide substance abuse treatment were included on the inventory and in N-SSATS so that they could be listed in the National Directory of Drug and Alcohol Abuse Treatment Facilities (formerly the National Directory of Drug and Alcohol Abuse Treatment Programs) and on the Behavioral Health Treatment Services Locator (https://findtreatment.samhsa.gov). These facilities are excluded from analyses and public use data files.

Drug and Alcohol Services Information System Series: S-9. DHHS Publication No. (SMA) 00-3380. Rockville, MD, 2000.

Changes in Survey Content

Table A.1 shows the major content areas for the survey from 1998 to 2017. Since 1992, SAMHSA has made adjustments each year to the survey design, both to minimize non-response and to include areas of emerging interest. For example, questions on the number of clients in treatment receiving buprenorphine were added in 2004. Questions about clinical/therapeutic methods, standard practices, and Access to Recovery grants were added in 2007. Questions about facility smoking policy were added in 2011; questions about outpatient facility operating capacity were modified in 2012; questions about injectable naltrexone (Vivitrol®) as a pharmacotherapy were added in 2011; questions about work activity and means to accomplish them, as well as the question asking for client counts of those prescribed extended-release injectable naltrexone (Vivitrol®), were added in 2013; and in 2017 the questions asking for client counts of those prescribed Vivitrol® were changed to request client counts of those receiving naltrexone for opioid use disorder.

There have also been changes within content areas. For example, in response to concerns about over-reporting of programs or groups for specific client types, the survey question was revised in 2003 to distinguish between those facilities that accepted specific client types and those facilities that offered specially designed programs or groups for that client type. As a result, the number and proportion of facilities offering programs or groups for each of the specified client types decreased. Surveys from 2003 and later are believed to more accurately represent the number and proportions of facilities providing programs or groups for the specified client types. In addition, over time more categories have been added to the specific client types (e.g., persons who have experienced trauma, active duty military, and members of military families in 2012 and young adults, persons who have experienced sexual abuse, and persons who have experienced intimate partner violence, domestic violence in 2013). Because of the increase in client types, the question was split in 2013. The portion asking if specific client types were served was limited to adolescents, adult women, and adult men. In addition, programs or groups were described as "specifically tailored." In 2014, the first part of the question was revised again to collect another level of detail (i.e., the age range of males and females served, if any). The client types of adolescents, adult women, and adult men were added back to the second part of the question.

Since 2013, the full N-SSATS questionnaire (with client counts) has alternated with an abbreviated version of the questionnaire. This abbreviated questionnaire, first introduced in 2014, collects the facility, program, and services information that are needed to update the Behavioral Health Treatment Services Locator. It omits Section B, which includes the client counts. Other changes to the 2014 questionnaire included reinstatement of the "primary focus" question, which had been dropped from the 2013 questionnaire; in addition, the question asking if a facility operates an opioid treatment program (OTP) was revised: The informational bullets describing OTPs were reworded, and the response categories were more explicit about whether or not the facility operates an OTP, as well as whether or not methadone and/or buprenorphine are used. In 2015, the OTP question was again revised to ask facilities how they treat opioid addiction; the response categories were even more specific about how they used, or did not use, methadone, buprenorphine, or extended-release injectable naltrexone (Vivitrol®) and whether or not the facility was a federally certified OTP. In 2017, reference to Vivitrol® was deleted, and the question referred simply to naltrexone.

SOURCE: Center for Behavioral Health Statistics and Quality, Substance Abuse and Mental Health Services Administration, Uniform Facility Data Set (UFDS), 1998-1999; National Survey of Substance Abuse Treatment Services (N-SSATS), 2000, 2002-2017.

Appendix B
2017 N-SSATS Questionnaire

This appendix contains the hard copy version of the 2017 N-SSATS questionnaire. Facilities also had the option of responding to the questionnaire on the Internet. For those facilities that had not completed the survey after extensive follow-up efforts (see Chapter 1), the questionnaire was administered by computer-assisted telephone interview (CATI).

Of the responding eligible treatment facilities included in this report, 92 percent completed the questionnaire on the Internet, 6 percent completed it by CATI, and 1 percent completed it by mail [Table 1.1 and Figure 1].[26]

Text versions of the Internet and CATI surveys are not included here because they are computer programs that contain complex skip patterns, are difficult to read, and are extremely long in text format.

[26] Percentages may not sum to 100 percent because of rounding.

National Survey of Substance Abuse Treatment Services (N-SSATS)

March 31, 2017

Substance Abuse and Mental Health Services Administration (SAMHSA)

PLEASE REVIEW THE FACILITY INFORMATION PRINTED ABOVE.
CROSS OUT ERRORS AND ENTER CORRECT OR MISSING INFORMATION.

CHECK ONE

- ☐ Information is complete and correct, no changes needed
- ☐ All missing or incorrect information has been corrected

PLEASE READ THIS ENTIRE PAGE BEFORE COMPLETING THE QUESTIONNAIRE

Would you prefer to complete this questionnaire online? See the pink flyer enclosed in your survey packet for the Internet address and your unique user ID and password. You can log on and off the website as often as needed to complete the questionnaire. When you log on again, the program will take you to the next unanswered question. If you need more information, call the N-SSATS helpline at 1-888-324-8337.

INSTRUCTIONS

- Most of the questions in this survey ask about "this facility." By "this facility" we mean the specific treatment facility or program whose name and location are printed on the front cover. If you have any questions about how the term "this facility" applies to your facility, please call 1-888-324-8337.
- Please answer ONLY for the specific facility or program whose name and location are printed on the front cover, unless otherwise specified in the questionnaire.
- If the questionnaire has not been completed online, return the completed questionnaire in the envelope provided. Please keep a copy for your records.
- For additional information about this survey and definitions of some of the terms used, please visit our website at **https://info.nssats.com**.
- If you have any questions or need additional blank surveys, contact:

MATHEMATICA POLICY RESEARCH
1-888-324-8337
NSSATSWeb@mathematica-mpr.com

IMPORTANT INFORMATION

* **Asterisked questions**. Information from asterisked (*) questions may be published in SAMHSA's online Behavioral Health Treatment Services Locator (found at **https://findtreatment.samhsa.gov**), in SAMHSA's *National Directory of Drug and Alcohol Abuse Treatment Programs*, and other publicly-available listings, unless you designate otherwise in question 39, page 12 of this questionnaire.

Mapping feature in online Locator. Complete and accurate name and address information is needed for the online Locator so it can correctly map the facility location.

Eligibility for online Locator and *Directory*. Only facilities designated as eligible by their state substance abuse office and that complete this questionnaire will be listed as substance abuse facilities in the online Locator and *Directory*. Your state N-SSATS representative can tell you if your facility is eligible to be listed in the online Locator and *Directory*. For the name and telephone number of your state representative, call the N-SSATS helpline at 1-888-324-8337.

SECTION A: FACILITY CHARACTERISTICS

Section A asks about characteristics of individual facilities and should be completed for this facility only, that is, the treatment facility or program at the location listed on the front cover.

***1. Which of the following substance abuse services are offered by this facility at this location, that is, the location listed on the front cover?**

MARK "YES" OR "NO" FOR EACH

	YES	NO
1. **Intake, assessment, or referral**	1 ☐	0 ☐
2. **Detoxification**	1 ☐	0 ☐
3. **Substance abuse treatment** *(services that focus on initiating and maintaining an individual's recovery from substance abuse and on averting relapse)*	1 ☐	0 ☐
4. **Any other substance abuse services**	1 ☐	0 ☐

1a. To which of the following clients does this facility, at this location, offer mental health treatment services *(interventions such as therapy or psychotropic medication that treat a person's mental health problem or condition, reduce symptoms, and improve behavioral functioning and outcomes)*?

MARK ALL THAT APPLY

1 ☐ Substance abuse clients
2 ☐ Clients other than substance abuse clients
3 ☐ No clients are offered mental health treatment services

2. Did you answer "yes" to detoxification in option 2 of question 1 above?

1 ☐ Yes
0 ☐ No → **SKIP TO Q.3 (TOP OF NEXT COLUMN)**

***2a. Does this facility detoxify clients from . . .**

MARK "YES" OR "NO" FOR EACH

	YES	NO
1. Alcohol	1 ☐	0 ☐
2. Benzodiazepines	1 ☐	0 ☐
3. Cocaine	1 ☐	0 ☐
4. Methamphetamines	1 ☐	0 ☐
5. Opioids	1 ☐	0 ☐
6. Other *(Specify:_____)*	1 ☐	0 ☐

***2b. Does this facility routinely use medications during detoxification?**

1 ☐ Yes
0 ☐ No
→ **SKIP TO Q.4 (NEXT COLUMN)**

3. Did you answer "yes" to substance abuse treatment in option 3 of question 1?

1 ☐ Yes
0 ☐ No → **SKIP TO Q.35 (PAGE 12)**

4. Is this facility a jail, prison, or other organization that provides treatment exclusively for incarcerated persons or juvenile detainees?

1 ☐ Yes → **SKIP TO Q.40 (PAGE 12)**
0 ☐ No

5. Is this facility a solo practice, meaning, an office with only one independent practitioner or counselor?

1 ☐ Yes
0 ☐ No

***6. What is the primary focus of this facility at this location, that is, the location listed on the front cover?**

MARK ONE ONLY

1 ☐ Substance abuse treatment services
2 ☐ Mental health services
3 ☐ Mix of mental health and substance abuse treatment services *(neither is primary)*
4 ☐ General health care
5 ☐ Other *(Specify:_____)*

***7. Is this facility operated by . . .**

MARK ONE ONLY

1 ☐ A private for-profit organization
2 ☐ A private non-profit organization
→ **SKIP TO Q.8 (BELOW)**

3 ☐ State government
4 ☐ Local, county, or community government
5 ☐ Tribal government
→ **SKIP TO Q.9 (BELOW)**

6 ☐ Federal Government

***7a. Which Federal Government agency?**

MARK ONE ONLY

1 ☐ Department of Veterans Affairs
2 ☐ Department of Defense
3 ☐ Indian Health Service
4 ☐ Other *(Specify:_____)*
→ **SKIP TO Q.9 (BELOW)**

8. Is this facility affiliated with a religious organization?

1 ☐ Yes
0 ☐ No

***9. Is this facility a hospital or located in or operated by a hospital?**

1 ☐ Yes → **GO TO Q.9a (TOP OF NEXT PAGE)**
0 ☐ No → **SKIP TO Q.10 (NEXT PAGE)**

***9a. What type of hospital?**

MARK ONE ONLY

1 ☐ General hospital *(including VA hospital)*

2 ☐ Psychiatric hospital

3 ☐ Other specialty hospital, for example, alcoholism, maternity, etc.

(Specify:_____)

***10. What telephone number(s) should a potential client call to schedule an intake appointment?**

1. (_____) _____ - _____ ext._____

2. (_____) _____ - _____ ext._____

***11. Which of the following services are provided by this facility at this location, that is, the location listed on the front cover?**

MARK ALL THAT APPLY

Assessment and Pre-Treatment Services

1 ☐ Screening for substance abuse

2 ☐ Screening for mental health disorders

3 ☐ Comprehensive substance abuse assessment or diagnosis

4 ☐ Comprehensive mental health assessment or diagnosis *(for example, psychological or psychiatric evaluation and testing)*

5 ☐ Screening for tobacco use

6 ☐ Outreach to persons in the community who may need treatment

7 ☐ Interim services for clients when immediate admission is not possible

8 ☐ We do not offer any of these assessment and pre-treatment services

Testing *(Include tests performed at this location, even if specimen is sent to an outside source for chemical analysis.)*

9 ☐ Breathalyzer or other blood alcohol testing

10 ☐ Drug or alcohol urine screening

11 ☐ Screening for Hepatitis B

12 ☐ Screening for Hepatitis C

13 ☐ HIV testing

14 ☐ STD testing

15 ☐ TB screening

16 ☐ We do not offer any of these testing services

Transitional Services

17 ☐ Discharge planning

18 ☐ Aftercare/continuing care

19 ☐ We do not offer any of these transitional services

Ancillary Services

20 ☐ Case management services

21 ☐ Social skills development

22 ☐ Mentoring/peer support

23 ☐ Child care for clients' children

24 ☐ Assistance with obtaining social services *(for example, Medicaid, WIC, SSI, SSDI)*

25 ☐ Employment counseling or training for clients

26 ☐ Assistance in locating housing for clients

27 ☐ Domestic violence—family or partner violence services *(physical, sexual, and emotional abuse)*

28 ☐ Early intervention for HIV

29 ☐ HIV or AIDS education, counseling, or support

30 ☐ Hepatitis education, counseling, or support

31 ☐ Health education other than HIV/AIDS or hepatitis

32 ☐ Substance abuse education

33 ☐ Transportation assistance to treatment

34 ☐ Mental health services

35 ☐ Acupuncture

36 ☐ Residential beds for clients' children

37 ☐ Self-help groups *(for example, AA, NA, SMART Recovery)*

38 ☐ Smoking/tobacco cessation counseling

39 ☐ We do not offer any of these ancillary services

Other Services

40 ☐ Treatment for gambling disorder

41 ☐ Treatment for Internet use disorder

42 ☐ Treatment for other addiction disorder *(non-substance abuse)*

43 ☐ We do not offer any of these other services

Pharmacotherapies

44 ☐ Disulfiram *(Antabuse®)*

45 ☐ Naltrexone *(oral)*

46 ☐ Naltrexone *(extended-release, injectable, for example, Vivitrol®)*

47 ☐ Acamprosate *(Campral®)*

48 ☐ Nicotine replacement

49 ☐ Non-nicotine smoking/tobacco cessation medications *(for example, bupropion, varenicline)*

50 ☐ Medications for psychiatric disorders

51 ☐ Methadone

52 ☐ Buprenorphine with naloxone *(Suboxone®)*

53 ☐ Buprenorphine without naloxone

54 ☐ Buprenorphine sub-dermal implant *(Probuphine®)*

55 ☐ We do not offer any of these pharmacotherapy services

***12. Facilities may treat a range of substance abuse disorders. The next series of questions focus only on how this facility treats opioid use disorder.**

How does this facility treat opioid use disorder?

MARK ALL THAT APPLY

1 ☐ This facility does not treat opioid addiction.

2 ☐ This facility uses methadone or buprenorphine for pain management, emergency cases, or research purposes. It is NOT a federally-certified Opioid Treatment Program (OTP).

3 ☐ This facility treats opioid addiction, but it does not use methadone, buprenorphine, **and/or** naltrexone to treat opioid addiction, nor does it accept clients using those medications to treat opioid addiction.

4 ☐ This facility accepts clients who are on methadone, buprenorphine **and/or** naltrexone maintenance or treatment, but these medications originate from or are prescribed by another entity. *(The medications may or may not be stored/delivered/monitored onsite.)*

→ **SKIP TO Q.13 (BELOW)**

5 ☐ This facility prescribes and/or administers buprenorphine **and/or** naltrexone. This facility is NOT a federally-certified Opioid Treatment Program (OTP). Buprenorphine use is authorized through a DATA 2000 waivered physician, physician assistant, or nurse practitioner. Naltrexone use is authorized through any medical staff who have prescribing privileges.

6 ☐ This facility administers and/or dispenses methadone, buprenorphine **and/or** naltrexone as a federally-certified Opioid Treatment Program (OTP). A DATA 2000 waivered physician may or may not also be onsite. *(While most OTPs use methadone, some only use buprenorphine.)*

***12a. Does this facility serve only opioid use disorder clients?**

1 ☐ Yes

0 ☐ No

***12b. Which of the following medication services does this program provide?**

MARK ALL THAT APPLY

1 ☐ Maintenance services with methadone or buprenorphine

2 ☐ Maintenance services with medically-supervised withdrawal after a pre-determined time

3 ☐ Detoxification services with methadone or buprenorphine

4 ☐ Relapse prevention with naltrexone

***13. For each type of counseling listed below, please indicate approximately what percent of the substance abuse clients at this facility receive that type of counseling as part of their substance abuse treatment program.**

	MARK ONE BOX FOR EACH TYPE OF COUNSELING				
TYPE OF COUNSELING	NOT OFFERED	RECEIVED BY 25% OR LESS OF CLIENTS	RECEIVED BY 26% TO 50% OF CLIENTS	RECEIVED BY 51% TO 75% OF CLIENTS	RECEIVED BY MORE THAN 75% OF CLIENTS
1. Individual counseling	1 ☐	2 ☐	3 ☐	4 ☐	5 ☐
2. Group counseling	1 ☐	2 ☐	3 ☐	4 ☐	5 ☐
3. Family counseling	1 ☐	2 ☐	3 ☐	4 ☐	5 ☐
4. Marital/couples counseling	1 ☐	2 ☐	3 ☐	4 ☐	5 ☐

***14. For each type of clinical/therapeutic approach listed below, please mark the box that best describes how often that approach is used at this facility.**

- *For definitions of these approaches, go to: https://info.nssats.com*

CLINICAL/THERAPEUTIC APPROACHES	MARK ONE FREQUENCY FOR EACH APPROACH				
	NEVER	RARELY	SOMETIMES	ALWAYS OR OFTEN	NOT FAMILIAR WITH THIS APPROACH
1. Substance abuse counseling	1 ☐	2 ☐	3 ☐	4 ☐	5 ☐
2. 12-step facilitation	1 ☐	2 ☐	3 ☐	4 ☐	5 ☐
3. Brief intervention	1 ☐	2 ☐	3 ☐	4 ☐	5 ☐
4. Cognitive behavioral therapy	1 ☐	2 ☐	3 ☐	4 ☐	5 ☐
5. Dialectical behavior therapy	1 ☐	2 ☐	3 ☐	4 ☐	5 ☐
6. Contingency management/motivational incentives	1 ☐	2 ☐	3 ☐	4 ☐	5 ☐
7. Motivational interviewing	1 ☐	2 ☐	3 ☐	4 ☐	5 ☐
8. Trauma-related counseling	1 ☐	2 ☐	3 ☐	4 ☐	5 ☐
9. Anger management	1 ☐	2 ☐	3 ☐	4 ☐	5 ☐
10. Matrix Model	1 ☐	2 ☐	3 ☐	4 ☐	5 ☐
11. Community reinforcement plus vouchers	1 ☐	2 ☐	3 ☐	4 ☐	5 ☐
12. Rational emotive behavioral therapy *(REBT)*	1 ☐	2 ☐	3 ☐	4 ☐	5 ☐
13. Relapse prevention	1 ☐	2 ☐	3 ☐	4 ☐	5 ☐
14. Computerized substance abuse treatment/ telemedicine *(including Internet, Web, mobile, and desktop programs)*	1 ☐	2 ☐	3 ☐	4 ☐	5 ☐
15. Other treatment approach *(Specify: _____)*	1 ☐	2 ☐	3 ☐	4 ☐	

15. Are any of the following practices part of this facility's standard operating procedures?

MARK ALL THAT APPLY

1 ☐ Required continuing education for staff

2 ☐ Periodic drug testing of clients

3 ☐ Regularly scheduled case review with a supervisor

4 ☐ Case review by an appointed quality review committee

5 ☐ Outcome follow-up after discharge

6 ☐ Periodic utilization review

7 ☐ Periodic client satisfaction surveys conducted by the facility

8 ☐ None of these practices are part of the standard operating procedures

***16. Does this facility, at this location, offer a specially designed program or group intended exclusively for DUI/DWI or other drunk driver offenders?**

1 ☐ Yes

0 ☐ No → **SKIP TO Q.17 (BELOW)**

***16a. Does this facility serve only DUI/DWI clients?**

1 ☐ Yes

0 ☐ No

***17. Does this facility provide substance abuse treatment services in sign language at this location for the deaf and hard of hearing *(for example, American Sign Language, Signed English, or Cued Speech)*?**

- *Mark "yes" if either a staff counselor or an on-call interpreter provides this service.*

1 ☐ Yes

0 ☐ No

***18. Does this facility provide substance abuse treatment services in a language other than English at this location?**

1 ☐ Yes

0 ☐ No → **SKIP TO Q.19 (TOP OF NEXT PAGE)**

18a. At this facility, who provides substance abuse treatment services in a language other than English?

MARK ONE ONLY

1 ☐ Staff counselor who speaks a language other than English

2 ☐ On-call interpreter *(in person or by phone)* brought in when needed → **SKIP TO Q.19 (TOP OF NEXT PAGE)**

3 ☐ BOTH staff counselor and on-call interpreter

***18a1. Do staff counselors provide substance abuse treatment in Spanish at this facility?**

1 ☐ Yes

0 ☐ No → **SKIP TO Q.18b (NEXT COLUMN)**

18a2. Do staff counselors at this facility provide substance abuse treatment in any other languages?

1 ☐ Yes → **GO TO Q.18b (TOP OF NEXT COLUMN)**

0 ☐ No → **SKIP TO Q.19 (TOP OF NEXT PAGE)**

***18b. In what other languages do staff counselors provide substance abuse treatment at this facility?**

- *Do not count languages provided only by on-call interpreters.*

MARK ALL THAT APPLY

American Indian or Alaska Native:

1 ☐ Hopi

2 ☐ Lakota

3 ☐ Navajo

4 ☐ Ojibwa

5 ☐ Yupik

6 ☐ Other American Indian or Alaska Native language

(Specify:_____)

Other Languages:

7 ☐ Arabic

8 ☐ Any Chinese language

9 ☐ Creole

10 ☐ Farsi

11 ☐ French

12 ☐ German

13 ☐ Greek

14 ☐ Hebrew

15 ☐ Hindi

16 ☐ Hmong

17 ☐ Italian

18 ☐ Japanese

19 ☐ Korean

20 ☐ Polish

21 ☐ Portuguese

22 ☐ Russian

23 ☐ Tagalog

24 ☐ Vietnamese

25 ☐ Any other language

(Specify:_____)

***19. Individuals seeking substance abuse treatment can vary by age, gender or other characteristics. Which categories of individuals listed below are served by this facility, at this location?**

- **Indicate only the highest or lowest age the facility would accept. *Do not indicate* the highest or lowest age currently receiving services in the facility.**

TYPE OF CLIENT	MARK "YES" OR "NO" FOR EACH CATEGORY SERVED BY THIS FACILITY		IF SERVED, WHAT IS THE LOWEST AGE SERVED		IF SERVED, WHAT IS THE HIGHEST AGE SERVED	
1. Female	1 ☐ Yes	0 ☐ No	|__|__| YEARS	0 ☐ No minimum age	|__|__| YEARS	0 ☐ No maximum age
2. Male	1 ☐ Yes	0 ☐ No	|__|__| YEARS	0 ☐ No minimum age	|__|__| YEARS	0 ☐ No maximum age

***19a. Many facilities have clients in one or more of the following categories. For which client categories does this facility at this location offer a substance abuse treatment program or group specifically tailored for clients in that category? If this facility treats clients in any of these categories but does not have a specifically tailored program or group for them, do not mark the box for that category.**

MARK ALL THAT APPLY

1 ☐ Adolescents
2 ☐ Young adults
3 ☐ Adult women
4 ☐ Pregnant/postpartum women
5 ☐ Adult men
6 ☐ Seniors or older adults
7 ☐ Lesbian, gay, bisexual, transgender *(LGBT)* clients
8 ☐ Veterans
9 ☐ Active duty military
10 ☐ Members of military families
11 ☐ Criminal justice clients *(other than DUI/DWI)*
12 ☐ Clients with co-occurring mental and substance abuse disorders
13 ☐ Clients with HIV or AIDS
14 ☐ Clients who have experienced sexual abuse
15 ☐ Clients who have experienced intimate partner violence, domestic violence
16 ☐ Clients who have experienced trauma
17 ☐ Specifically tailored programs or groups for any other types of clients
(Specify:_____)
18 ☐ No specifically tailored programs or groups are offered

***20. Does this facility offer HOSPITAL INPATIENT substance abuse services at this location, that is, the location listed on the front cover?**

1 ☐ Yes
0 ☐ No → **SKIP TO Q.21 (BELOW)**

***20a. Which of the following HOSPITAL INPATIENT services are offered at this facility?**

MARK "YES" OR "NO" FOR EACH

	YES	NO
1. Hospital inpatient detoxification ..... (Similar to ASAM Levels IV-D and III.7-D, *medically managed or monitored inpatient detoxification)*	1 ☐	0 ☐
2. Hospital inpatient treatment ..... (Similar to ASAM Levels IV and III.7, *medically managed or monitored intensive inpatient treatment)*	1 ☐	0 ☐

NOTE: ASAM is the American Society of Addiction Medicine.
For more information on ASAM please go to https://info.nssats.com.

***21. Does this facility offer RESIDENTIAL (non-hospital) substance abuse services at this location, that is, the location listed on the front cover?**

1 ☐ Yes → **GO TO Q.21a (TOP OF NEXT PAGE)**
0 ☐ No → **SKIP TO Q.22 (NEXT PAGE)**

***21a. Which of the following RESIDENTIAL services are offered at this facility?**

MARK "YES" OR "NO" FOR EACH

	YES	NO
1. Residential detoxification (Similar to ASAM Level III.2-D, *clinically managed residential detoxification or social detoxification)*	1 ☐	0 ☐
2. Residential short-term treatment (Similar to ASAM Level III.5, *clinically managed high-intensity residential treatment, typically 30 days or less)*	1 ☐	0 ☐
3. Residential long-term treatment (Similar to ASAM Levels III.3 and III.1, *clinically managed medium- or low-intensity residential treatment, typically more than 30 days)*	1 ☐	0 ☐

***22. Does this facility offer OUTPATIENT substance abuse services at this location, that is, the location listed on the front cover?**

1 ☐ Yes

0 ☐ No → **SKIP TO Q.23 (BELOW)**

***22a. Which of the following OUTPATIENT services are offered at this facility?**

MARK "YES" OR "NO" FOR EACH

	YES	NO
1. Outpatient detoxification (Similar to ASAM Levels I-D and II-D, *ambulatory detoxification)*	1 ☐	0 ☐
2. Outpatient methadone/buprenorphine maintenance or naltrexone treatment	1 ☐	0 ☐
3. Outpatient day treatment or partial hospitalization (Similar to ASAM Level II.5, *20 or more hours per week)*	1 ☐	0 ☐
4. Intensive outpatient treatment (Similar to ASAM Level II.1, *9 or* more *hours per week)*	1 ☐	0 ☐
5. Regular outpatient treatment (Similar to ASAM Level I, outpatient *treatment, non-intensive)*	1 ☐	0 ☐

***23. Does this facility use a sliding fee scale?**

1 ☐ Yes

0 ☐ No → **SKIP TO Q.24 (TOP OF NEXT COLUMN)**

23a. Do you want the availability of a sliding fee scale published in SAMHSA's online Locator and *Directory*?

- *The online Locator and Directory will explain that sliding fee scales are based on income and other factors.*

1 ☐ Yes

0 ☐ No

***24. Does this facility offer treatment at no charge to clients who cannot afford to pay?**

1 ☐ Yes

0 ☐ No → **SKIP TO Q.25 (BELOW)**

24a. Do you want the availability of free care for eligible clients published in SAMHSA's online Locator and *Directory*?

- *The online Locator and Directory will explain that potential clients should call the facility for information on eligibility.*

1 ☐ Yes

0 ☐ No

***25. Does this facility receive any funding or grants from the Federal Government, or state, county or local governments, to support its substance abuse treatment programs?**

- *Do not include Medicare, Medicaid, or federal military insurance. These forms of client payments are included in Q.26.*

1 ☐ Yes

0 ☐ No

d ☐ Don't know

***26. Which of the following types of client payments or insurance are accepted by this facility for substance abuse treatment?**

MARK "YES," "NO," OR "DON'T KNOW" FOR EACH

	YES	NO	DON'T KNOW
1. No payment accepted *(free treatment for ALL clients)*	1 ☐	0 ☐	d ☐
2. Cash or self-payment	1 ☐	0 ☐	d ☐
3. Medicare	1 ☐	0 ☐	d ☐
4. Medicaid	1 ☐	0 ☐	d ☐
5. State-financed health insurance plan other than Medicaid	1 ☐	0 ☐	d ☐
6. Federal military insurance *(e.g., TRICARE)*	1 ☐	0 ☐	d ☐
7. Private health insurance	1 ☐	0 ☐	d ☐
8. Access To Recovery *(ATR vouchers)*	1 ☐	0 ☐	d ☐
9. IHS/Tribal/Urban *(ITU funds)*	1 ☐	0 ☐	d ☐
10. Other	1 ☐	0 ☐	d ☐

(Specify: _____)

27. For each of the following activities, please indicate if staff members routinely use computer or electronic resources, paper only, or a combination of both to accomplish their work.

NOTE: Electronic resources include tools such as electronic health records and web portals. Please consider e-fax, pdf, or scanned documents as paper documents.

WORK ACTIVITY	MARK ONE METHOD FOR EACH ACTIVITY			
	COMPUTER/ ELECTRONIC ONLY	PAPER ONLY	BOTH ELECTRONIC AND PAPER	NA
1. Intake	1 ☐	2 ☐	3 ☐	na ☐
2. Scheduling appointments	1 ☐	2 ☐	3 ☐	na ☐
3. Assessment	1 ☐	2 ☐	3 ☐	na ☐
4. Treatment plan	1 ☐	2 ☐	3 ☐	na ☐
5. Client progress monitoring	1 ☐	2 ☐	3 ☐	na ☐
6. Discharge	1 ☐	2 ☐	3 ☐	na ☐
7. Referrals	1 ☐	2 ☐	3 ☐	na ☐
8. Issue/receive lab results	1 ☐	2 ☐	3 ☐	na ☐
9. Billing	1 ☐	2 ☐	3 ☐	na ☐
10. Outcomes management	1 ☐	2 ☐	3 ☐	na ☐
11. Medication prescribing/dispensing	1 ☐	2 ☐	3 ☐	na ☐
12. Store and maintain client health and/or treatment records	1 ☐	2 ☐	3 ☐	na ☐
13. Send client health and/or treatment information to providers or sources outside your organization	1 ☐	2 ☐	3 ☐	na ☐
14. Receive client health and/or treatment information from providers or sources outside your organization	1 ☐	2 ☐	3 ☐	na ☐

SECTION B: REPORTING CLIENT COUNTS

28. Questions 29 through 34 ask about the number of clients in treatment. If possible, report clients for this facility only. However, we realize that is not always possible. Please indicate whether the clients you report will be for . . .

MARK ONE ONLY

1 ☐ Only this facility → **SKIP TO Q.29 (TOP OF NEXT COLUMN)**

2 ☐ This facility plus others

3 ☐ Another facility will report this facility's client counts → **SKIP TO Q.35 (PAGE 12)**

28a. How many facilities will be included in your client counts?

THIS FACILITY	1
+ ADDITIONAL FACILITIES	
TOTAL FACILITIES[α]	

[α]For Section B, please include all of these facilities in the client counts that you report in questions 29 through 34.

28b. To avoid double-counting clients, we need to know which facilities are included in your counts. How will you report this information to us?

MARK ONE ONLY

1 ☐ By listing the names and location addresses of these additional facilities in the "Additional Facilities Included in Client Counts" section on page 13 of this questionnaire or attaching a sheet of paper to this questionnaire

2 ☐ Please call me for a list of the additional facilities included in these counts

HOSPITAL INPATIENT CLIENT COUNTS

29. On March 31, 2017, did any patients receive HOSPITAL INPATIENT substance abuse services at this facility?

1 ☐ Yes

0 ☐ No → **SKIP TO Q.30 (TOP OF NEXT PAGE)**

29a. On March 31, 2017, how many patients received the following HOSPITAL INPATIENT substance abuse services at this facility?

- ***COUNT*** *a patient in* ***one service only****, even if the patient received both services.*
- ***DO NOT*** *count family members, friends, or other non-treatment patients.*

ENTER A NUMBER FOR EACH (IF NONE, ENTER "0")

1. Hospital inpatient detoxification (Similar to ASAM Levels IV-D and III.7-D, *medically managed or monitored inpatient detoxification)* _____
2. Hospital inpatient treatment (Similar to ASAM Levels IV and III.7, *medically managed or monitored intensive inpatient treatment)* _____

HOSPITAL INPATIENT TOTAL BOX ☐

NOTE: ASAM is the American Society of Addiction Medicine. For more information on ASAM please go to https://info.nssats.com.

29b. How many of the patients from the HOSPITAL INPATIENT TOTAL BOX were under the age of 18?

ENTER A NUMBER (IF NONE, ENTER "0")

Number under age 18 _____

29c. How many of the patients from the HOSPITAL INPATIENT TOTAL BOX received:

- *Include patients who received these drugs for detoxification, maintenance, or relapse prevention for opioid use disorder.*

ENTER A NUMBER FOR EACH (IF NONE, ENTER "0")

1. Methadone dispensed at this facility for opioid use disorder _____
2. Buprenorphine dispensed or prescribed at this facility for opioid use disorder _____
3. Naltrexone administered at this facility for opioid use disorder _____

29d. On March 31, 2017, how many hospital inpatient beds were specifically designated for substance abuse treatment?

ENTER A NUMBER (IF NONE, ENTER "0")

Number of beds _____

RESIDENTIAL (NON-HOSPITAL) CLIENT COUNTS

30. On March 31, 2017, did any clients receive RESIDENTIAL (non-hospital) substance abuse services at this facility?

1 ☐ Yes

0 ☐ No → **SKIP TO Q.31 (NEXT COLUMN)**

30a. On March 31, 2017, how many clients received the following RESIDENTIAL substance abuse services at this facility?

- ***COUNT*** *a client in* ***one service only****, even if the client received multiple services.*
- ***DO NOT*** *count family members, friends, or other non-treatment clients.*

ENTER A NUMBER FOR EACH (IF NONE, ENTER "0")

1. Residential detoxification _____
   (Similar to ASAM Level III.2-D, *clinically managed residential detoxification or social detoxification)*
2. Residential short-term treatment _____
   (Similar to ASAM Level III.5, *clinically managed high-intensity residential treatment, typically 30 days or less)*
3. Residential long-term treatment _____
   (Similar to ASAM Levels III.3 and III.1, *clinically managed medium- or low-intensity residential treatment, typically more than 30 days)*

RESIDENTIAL TOTAL BOX ☐

30b. How many of the clients from the RESIDENTIAL TOTAL BOX were under the age of 18?

ENTER A NUMBER (IF NONE, ENTER "0")

Number under age 18 _____

30c. How many of the clients from the RESIDENTIAL TOTAL BOX received:

- *Include clients who received these drugs for detoxification, maintenance, or relapse prevention for opioid use disorder.*

ENTER A NUMBER FOR EACH (IF NONE, ENTER "0")

1. Methadone dispensed at this facility for opioid use disorder _____
2. Buprenorphine dispensed or prescribed at this facility for opioid use disorder _____
3. Naltrexone administered at this facility for opioid use disorder _____

30d. On March 31, 2017, how many residential beds were specifically designated for substance abuse treatment?

ENTER A NUMBER (IF NONE, ENTER "0")

Number of beds _____

OUTPATIENT CLIENT COUNTS

31. During the month of March 2017, did any clients receive OUTPATIENT substance abuse services at this facility?

1 ☐ Yes

0 ☐ No → **SKIP TO Q.32 (NEXT PAGE)**

31a. How many clients received each of the following OUTPATIENT substance abuse services at this facility during March 2017?

☞ ***ONLY INCLUDE*** *clients who received treatment in March* ***AND*** *were still enrolled in treatment on March 31, 2017.*

- ***COUNT*** *a client in* ***one service only****, even if the client received multiple services.*
- ***DO NOT*** *count family members, friends, or other non-treatment clients.*

ENTER A NUMBER FOR EACH (IF NONE, ENTER "0")

1. Outpatient detoxification _____
   (Similar to ASAM Levels I-D and II-D, *ambulatory detoxification)*
2. Outpatient methadone/ buprenorphine maintenance or naltrexone treatment _____
   (Count methadone/buprenorphine/ naltrexone clients on this line only)
3. Outpatient day treatment or partial hospitalization _____
   (Similar to ASAM Level II.5, *20 or more hours per week)*
4. Intensive outpatient treatment _____
   (Similar to ASAM Level II.1, *9 or more hours per week)*
5. Regular outpatient treatment _____
   (Similar to ASAM Level I, *outpatient treatment, non-intensive)*

OUTPATIENT TOTAL BOX ☐

31b. How many of the clients from the OUTPATIENT TOTAL BOX were under the age of 18?

ENTER A NUMBER (IF NONE, ENTER "0")

Number under age 18 _____

31c. How many of the clients from the OUTPATIENT TOTAL BOX received:

- *Include clients who received these drugs for detoxification, maintenance, or relapse prevention for opioid use disorder.*

ENTER A NUMBER FOR EACH (IF NONE, ENTER "0")

1. Methadone dispensed at this facility for opioid use disorder _____
2. Buprenorphine dispensed or prescribed at this facility for opioid use disorder _____
3. Naltrexone administered at this facility for opioid use disorder _____

31d. On average, during March 2017, were the outpatient substance abuse treatment services at this facility operating over, under, or at capacity?

MARK ONE ONLY

1 ☐ Well over capacity *(over 120%)*

2 ☐ Somewhat over capacity *(106 to 120%)*

3 ☐ At or about capacity *(95 to 105%)*

4 ☐ Somewhat under capacity *(80 to 94%)*

5 ☐ Well under capacity *(under 80%)*

ALL SUBSTANCE ABUSE TREATMENT SETTINGS

Including Hospital Inpatient, Residential (non-hospital) and/or Outpatient

32. This question asks you to categorize the substance abuse treatment clients at this facility into three groups: clients in treatment for (1) abuse of both alcohol and substances other than alcohol; (2) abuse only of alcohol; or (3) abuse only of substances other than alcohol.

Enter the percent of clients on March 31, 2017, who were in each of these three groups:

Clients in treatment for abuse of:

1. BOTH alcohol and substances other than alcohol _____%
2. ONLY alcohol _____%
3. ONLY substances other than alcohol _____%

TOTAL 100 %

33. Approximately what percent of the substance abuse treatment clients enrolled at this facility on March 31, 2017, had a diagnosed co-occurring mental and substance abuse disorder?

PERCENT OF CLIENTS (IF NONE, ENTER "0") %

34. Using the most recent 12-month period for which you have data, approximately how many substance abuse treatment ADMISSIONS did this facility have?

- **OUTPATIENT CLIENTS:** *Count admissions into treatment, not individual treatment visits. Consider an admission to be the initiation of a treatment program or course of treatment. Count any re-admission as an admission.*
- **IF THIS IS A MENTAL HEALTH FACILITY:** *Count all admissions in which clients received substance abuse treatment, even if substance abuse was their secondary diagnosis.*

NUMBER OF SUBSTANCE ABUSE ADMISSIONS IN A 12-MONTH PERIOD

SECTION C: GENERAL INFORMATION

***35. Does this facility operate transitional housing or a halfway house for substance abuse clients at this location, that is, the location listed on the front cover?**

1 ☐ Yes

0 ☐ No

***36. Which of the following statements BEST describes this facility's smoking policy for clients?**

MARK ONE ONLY

1 ☐ Not permitted to smoke anywhere outside or within any building

2 ☐ Permitted in designated outdoor area(s)

3 ☐ Permitted anywhere outside

4 ☐ Permitted in designated indoor area(s)

5 ☐ Permitted anywhere inside

6 ☐ Permitted anywhere without restriction

***37. Is this facility or program licensed, certified, or accredited to provide substance abuse services by any of the following organizations?**

- *Do not include personal-level credentials or general business licenses such as a food service license.*

MARK "YES," "NO," OR "DON'T KNOW" FOR EACH

	YES	NO	DON'T KNOW
1. State substance abuse agency	1 ☐	0 ☐	d ☐
2. State mental health department	1 ☐	0 ☐	d ☐
3. State department of health	1 ☐	0 ☐	d ☐
4. Hospital licensing authority	1 ☐	0 ☐	d ☐
5. The Joint Commission	1 ☐	0 ☐	d ☐
6. Commission on Accreditation of Rehabilitation Facilities *(CARF)*	1 ☐	0 ☐	d ☐
7. National Committee for Quality Assurance *(NCQA)*	1 ☐	0 ☐	d ☐
8. Council on Accreditation *(COA)*	1 ☐	0 ☐	d ☐
9. Healthcare Facilities Accreditation Program *(HFAP)*	1 ☐	0 ☐	d ☐
10. Other national organization or federal, state, or local agency	1 ☐	0 ☐	d ☐

(Specify: _____ *)*

***38. Does this facility have a website or web page with information about the facility's substance abuse treatment programs?**

1 ☐ Yes

0 ☐ No → **SKIP TO Q.39 (BELOW)**

***38a. If eligible, the website address for this facility will appear in the *Directory* and online Locator. Please provide the address exactly as it should be entered in order to reach your site.**

Web Address: _____

39. If eligible, does this facility want to be listed in the *Directory* and the online Locator? *(See inside front cover for eligibility information)*

- *The Directory will be available at http://www.samhsa.gov/data/substance-abuse-facilities-data-nssats*
- *The Locator can be found at: https://findtreatment.samhsa.gov*

1 ☐ Yes

0 ☐ No → **SKIP TO Q.40 (BELOW)**

39a. To increase public awareness of behavioral health services, SAMHSA may be sharing facility contact information with large commercially available Internet search engines, such as Google, Bing, Yahoo!, etc. Do you want your facility information shared on these Internet search engines?

- *Information to be shared would be: facility name, location address, telephone number, and website address.*

1 ☐ Yes

0 ☐ No

40. Who was primarily responsible for completing this form? *This information will only be used if we need to contact you about your responses. It will not be published.*

MARK ONE ONLY

1 ☐ Ms 2 ☐ Mrs 3 ☐ Mr 4 ☐ Dr

5 ☐ Other *(Specify:* _____*)*

ANY ADDITIONAL COMMENTS

PLEDGE TO RESPONDENTS: The information you provide will be protected to the fullest extent allowable under Section 501(n) of the Public Health Service Act (42 USC 290aa(n)). This law permits the public release of identifiable information about an establishment only with the consent of that establishment and limits the use of the information to the purposes for which it was supplied. With the explicit consent of eligible treatment facilities, information provided in response to survey questions marked with an asterisk may be published in SAMHSA's online Behavioral Health Treatment Services Locator, the *National Directory of Drug and Alcohol Abuse Treatment Programs*, and other publicly-available listings. Responses to non-asterisked questions will be published with no direct link to individual treatment facilities.

Thank you for your participation. Please return this questionnaire in the envelope provided.
If you no longer have the envelope, please mail this questionnaire to:

MATHEMATICA POLICY RESEARCH
ATTN: RECEIPT CONTROL - Project 50345
P.O. Box 2393
Princeton, NJ 08543-2393

Public Burden Statement: An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control number for this project is 0930-0106. Public reporting burden for this collection of information is estimated to average 40 minutes per respondent, per year, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to SAMHSA Reports Clearance Officer, 5600 Fishers Lane, Room 15E57-B, Rockville, Maryland 20857.

Appendix C
Item Response and Imputation for 2017 N-SSATS

This Appendix contains Table C1, a list of item response rates for questions from the N-SSATS 2017 questionnaire. Item non-response was minimized through careful editing and extensive follow-up.

The item response rate for the 2017 N-SSATS averaged 98 percent across 270 separate response categories.

Item non-response was 10 percent or more for only 11 of 270 separate response categories.

When available, client values and admissions values from up to five previous surveys were used to impute the missing counts. If historical data were not available, the average client value, stratified by state and facility operation, was used to impute the missing client counts. Missing client counts were imputed for each type of service (i.e., hospital inpatient detoxification, hospital inpatient treatment, residential [non-hospital] detoxification, etc.) and summed to the larger service type totals (total hospital inpatient clients, total residential [nonhospital] clients, and total outpatient clients), and finally to total clients.

Several facilities report client counts for themselves (parent) as well as for other facilities (children) within their family of substance abuse treatment facilities. Instead of reporting only the aggregate client count, we attempted to disaggregate and redistribute or unroll the parent facilities' total client count wherever possible to reflect the number of clients served by each facility within the family of facilities. Our procedure was to first calculate the mean client count per type of care received (hospital inpatient, outpatient, and residential) for the facilities in N-SSATS that reported only for themselves. We then used these means to determine how to distribute the clients reported by a parent facility to its children facilities based on the type of facilities and the types of clients indicated by the family of facilities. Therefore, numbers reported may be an actual number reported by the facility itself or they may be an unrolled estimate based on the unrolling procedures. All totals sum to the actual reported numbers.
