National Survey of Substance Abuse Treatment Services (N-SSATS): 2010

Data on Substance Abuse Treatment Facilities

DEPARTMENT OF HEALTH AND HUMAN SERVICES
Substance Abuse and Mental Health Services Administration

Acknowledgments

This report was prepared for the Substance Abuse and Mental Health Services Administration (SAMHSA), U.S. Department of Health and Human Services (HHS), by Synectics for Management Decisions, Inc. (Synectics), Arlington, Virginia. Data collection was performed by Mathematica, Princeton, New Jersey. Work by Synectics and Mathematica was performed under Task Order HHSS283200700048I/HHSS28342001T, Reference No. 283-07-4803 (Cathie Alderks, Task Order Officer). At Synectics, Bea Blacklow, Sarbajit Sinha, Doren H. Walker, and Leigh Henderson were responsible for the content, analysis, and writing of the report.

Highlights 1

Chapter 1. Description of the National Survey of Substance Abuse Treatment Services (N-SSATS) 5

Data Collection Procedures for the 2010 N-SSATS 6

Facility Selection for the 2010 N-SSATS Report 8

Survey Response Mode 9

Data Considerations and Limitations 10

Organization of the Report 10

Terminology 11

Chapter 2. Trends in Facility Characteristics 13

Number of Facilities 13

Facility Operation 14

Primary Focus of Facility 14

Type of Care Offered 15

Facilities with Opioid Treatment Programs 15

Chapter 3. Trends in Client Characteristics 17

Facility Operation 17

Primary Focus of Facility 18

Type of Care Received 19

Clients Receiving Methadone or Buprenorphine 19

Substance Abuse Problem Treated 19

Clients under Age 18 in Treatment 19

Highlights

This report presents results from the 2010 National Survey of Substance Abuse Treatment Services (N-SSATS), an annual census of facilities providing substance abuse treatment. Conducted by the Substance Abuse and Mental Health Services Administration (SAMHSA), N-SSATS is designed to collect data on the location, characteristics, and use of alcohol and drug abuse treatment facilities and services throughout the 50 States, the District of Columbia, and other U.S. jurisdictions. Selected findings are given below.

- The N-SSATS facility response rate in 2010 was 91.4 percent. Thirty-two States or jurisdictions had response rates that equaled or surpassed the overall rate [Tables 1.1 and 6.1].
- A total of 14,060 facilities completed the survey. The 13,339 facilities eligible for this report had a one-day census of 1,175,462 clients enrolled in substance abuse treatment on March 31, 2010 [Tables 1.1 and 3.1].
- In the United States, there were 462 clients in treatment per 100,000 population aged 18 and older on March 31, 2010. The rate was highest for persons with both alcohol and drug problems (194 per 100,000 population aged 18 and older), followed by drug problems only (182 per 100,000), and alcohol problems only (86 per 100,000) [Table 6.32].

Trends in Facility and Client Characteristics 2006-2010

- The *total number* of substance abuse treatment facilities remained relatively constant between 2006 and 2010, while the number of clients in treatment increased slightly. The number of facilities responding to the 2010 survey decreased by 3 percent, from 13,771 facilities in 2006 to 13,339 facilities in 2010. The number of clients in treatment on the survey reference date increased by 4 percent, from 1,130,881 in 2006 to 1,175,462 in 2010 [Tables 2.2].
- The *operational structure* of the substance abuse treatment system (i.e., the type of entity responsible for operating the facility: private non-profit, private for-profit, or government—local, State, Federal,[1] or tribal) changed very little between 2006 and 2010 [Tables 2.2 and Figures 2 and 5].
- The *primary focus of activity* of facilities (substance abuse treatment services, mental health services, a mix of mental health and substance abuse treatment services, general health care, or other activity) changed very little between 2006 and 2010 [Tables 2.2 and 3.1 and Figure 3].

---

[1] Data for the Federal agencies specified in the survey (the Department of Veterans Affairs, the Department of Defense, the Indian Health Service, and other unspecified Federal agencies) are detailed in the tables.

- The *major types of care*—outpatient, residential (non-hospital), and hospital inpatient—changed very little from 2006 to 2010 in terms of the proportion of facilities offering each type of care or the proportion of clients in treatment in each type of care [Tables 2.3 and 3.2 and Figures 4 and 6].
- *Opioid Treatment Programs* certified by SAMHSA for the provision of medication-assisted therapy with methadone and/or buprenorphine were provided by 8 to 9 percent of all facilities between 2006 and 2010 [Table 2.3 and Figure 4].
- The proportion of *all clients receiving methadone* ranged from 23 percent to 25 percent in the period 2006 to 2010 [Table 3.2].
- The proportion of *all clients receiving buprenorphine* ranged from 0.3 percent to 2 percent in the period 2006 to 2010 [Table 3.2].
- The proportion of *clients in treatment for three broad categories of substance abuse problems*—both alcohol and drug abuse, drug abuse only, and alcohol abuse only—changed very little between 2006 and 2010. Clients in treatment for both drug and alcohol abuse made up 43 to 46 percent of all clients. Clients in treatment for drug abuse only made up 35 to 39 percent, and clients in treatment for alcohol abuse only remained fairly steady around 18 percent [Table 3.3].
- *Clients under age 18* made up between 7 and 8 percent of all clients in treatment between 2006 and 2010. The type of care (outpatient, residential [non-hospital], or hospital inpatient) received by clients under age 18 differed little from that received by adults, and was stable between 2006 and 2010 [Table 3.4].

Facility Operation—March 31, 2010[2]

- Private non-profit organizations operated 58 percent of all facilities and were treating 53 percent of all clients.
- Private for-profit organizations operated 30 percent of all facilities and were treating 32 percent of all clients.
- Local governments operated 6 percent of all facilities and were treating 6 percent of all clients.
- State governments operated 3 percent of all facilities and were treating 4 percent of all clients.
- The Federal government operated 3 percent of all facilities and was treating 4 percent of all clients.
- Tribal governments operated 1 percent of all facilities and were treating 1 percent of all clients [Tables 4.1 and 5.1].

Primary Focus of Activity—March 31, 2010[2]

- The provision of substance abuse treatment services was the primary focus of activity of 61 percent of facilities with 66 percent of all clients in treatment.
- A mix of mental health and substance abuse treatment services was the primary focus of 31 percent of facilities with 28 percent of all clients in treatment.

---

[2] Percentages may not sum to 100 percent because of rounding.

- The provision of mental health services was the primary focus of 6 percent of facilities with 4 percent of all clients in treatment.
- General health care was the primary focus of 1 percent of facilities with 1 percent of all clients in treatment.
- Activities other than those listed above were the primary focus of 1 percent of facilities with less than 1 percent of all clients in treatment [Tables 4.1 and 5.1].

Type of Care—March 31, 2010[3]

- Outpatient treatment was offered by 81 percent of all facilities, and accounted for 90 percent of all clients in treatment.
- Residential (non-hospital) treatment was offered by 26 percent of all facilities, and accounted for 9 percent of all clients in treatment.
- Hospital inpatient treatment was offered by 6 percent of all facilities and accounted for 1 percent of all clients in treatment [Tables 4.2b and 5.2b].

Client Substance Abuse Problem and Co-occurring Mental Health Disorders—March 31, 2010

- Clients in treatment for both alcohol and drug abuse made up 43 percent of all clients.
- Clients in treatment for drug abuse only made up 39 percent of all clients.
- Clients in treatment for abuse of alcohol only made up 18 percent of all clients.
- Forty-three percent of all clients in treatment had diagnosed co-occurring substance abuse and mental health disorders [Table 5.3].

Facility Size and Utilization Rates—March 31, 2010

- The median number of clients in substance abuse treatment at a facility was 43 [Table 4.4].
- Ninety-one percent of all residential (non-hospital) beds and 92 percent of all hospital inpatient beds designated for substance abuse treatment were in use [Tables 4.6 and 4.7].

Medication-Assisted Opioid Therapy—March 31, 2010

- Clients receiving methadone or buprenorphine in Opioid Treatment Programs (OTPs) accounted for 28 percent of all clients in treatment, although OTPs were available in only 1,166 (9 percent) of all substance abuse treatment facilities [Tables 2.3 and 3.2].
- Private for-profit organizations operated 53 percent of OTPs compared to 30 percent of all substance abuse treatment facilities [Tables 4.1 and 4.20].
- Of the 304,656 clients receiving medication-assisted opioid therapy in OTPs, 98 percent (298,170) received methadone. Of the 27,456 clients receiving buprenorphine, 76 percent received it in facilities that were not OTPs [Table 4.20].

---

[3] Facility percentages sum to more than 100 percent because a facility could provide more than one type of care.

- More than half (53 percent) of clients receiving methadone were in private for-profit facilities compared to 37 percent of clients receiving buprenorphine. Clients receiving buprenorphine were more likely than those receiving methadone to be in private non-profit facilities (47 percent versus 38 percent) [Table 4.20].
- Most (93 percent) of the clients receiving methadone were in facilities whose primary focus was the provision of substance abuse treatment services, while these facilities accounted for only 53 percent of buprenorphine clients. Thirty-eight percent of buprenorphine clients were treated in facilities providing a mix of substance abuse treatment and mental health services [Table 4.20].

Chapter 1

Description of the National Survey of Substance Abuse Treatment Services (N-SSATS)

This report presents tabular information and highlights from the 2010 National Survey of Substance Abuse Treatment Services (N-SSATS), conducted between March and October 2010, with a reference date of March 31, 2010. It is the 33rd in a series of national surveys begun in the 1970s. The surveys were designed to collect data on the location, characteristics, and utilization of alcohol and drug treatment facilities and services throughout the 50 States, the District of Columbia, and other U.S. jurisdictions.[4] The Center for Behavioral Health Statistics and Quality, Substance Abuse and Mental Health Services Administration (SAMHSA), U.S. Department of Health and Human Services, plans and directs N-SSATS.

N-SSATS is designed to collect information from all facilities[5] in the United States, both public and private, that provide substance abuse treatment. (Additional information on N-SSATS, its history, and changes in the survey and survey universe over time is provided in Appendix A.)

N-SSATS provides the mechanism for quantifying the dynamic character and composition of the U.S. substance abuse treatment delivery system. The objectives of N-SSATS are to collect multi-purpose data that can be used to:

- Assist SAMHSA and State and local governments in assessing the nature and extent of services provided in State-supported and other substance abuse treatment facilities and in forecasting substance abuse treatment resource requirements;
- Update SAMHSA's Inventory of Substance Abuse Treatment Services (I-SATS), which includes all known drug and alcohol abuse treatment facilities (see Appendix A);
- Analyze substance abuse treatment services trends and conduct comparative analyses for the nation, regions, and States;
- Generate the *National Directory of Drug and Alcohol Abuse Treatment Programs*, a compendium of facilities approved by State substance abuse agencies for the provision of substance abuse treatment;
- Update the information in SAMHSA's Substance Abuse Treatment Facility Locator, a searchable database of facilities approved by State substance abuse agencies for the provision of substance abuse treatment. The Treatment Facility Locator is available on the Internet at:

  http://findtreatment.samhsa.gov

---

[4] The jurisdictions include the territory of Guam, the Federated States of Micronesia, the Republic of Palau, the Commonwealth of Puerto Rico, and the Virgin Islands of the United States.

[5] In this report, entities responding to N-SSATS are referred to as "facilities." As discussed later in the report, a "facility" may be a program-level, clinic-level, or multi-site respondent.

Data Collection Procedures for the 2010 N-SSATS

Field period and reference date

The survey reference date for the 2010 N-SSATS was March 31, 2010. The field period was from March 31, 2010, through October 18, 2010.

Survey universe

The total N-SSATS facility universe was 17,204 treatment facilities. This included all 16,224 active treatment facilities on SAMHSA's I-SATS at a point 6 weeks before the survey reference date. (See Appendix A for a description of the I-SATS and N-SSATS survey coverage.) The survey universe also included 980 facilities that were added by State substance abuse agencies or otherwise discovered during the first 3 weeks of the survey.

Content

The 2010 N-SSATS questionnaire was a 13-page document with 40 numbered questions (see Appendix B). Topics included:

- Facility identification information
- Facility operating entity
- Facility focus of activity
- Type of care provided
  - Outpatient treatment services (regular outpatient treatment, intensive outpatient treatment, day treatment or partial hospitalization, detoxification, methadone/buprenorphine maintenance)
  - Residential (non-hospital) treatment services (long-term—more than 30 days, short-term—30 days or fewer, detoxification)
  - Hospital treatment services (inpatient treatment, inpatient detoxification)
- Services offered (assessment and pre-treatment services, counseling, pharmacotherapies, testing, transitional services, ancillary services)
- Clinical/therapeutic approaches
- Special programs or groups provided for specific client types
- Provision of services in sign language or in languages other than English
- Detoxification from alcohol, benzodiazepines, opiates, cocaine, methamphetamines, or other drugs, and routine use of medication during detoxification
- Client outreach (outreach to persons in the community who may need treatment, provision of a facility website)
- Licensure, certification, or accreditation agencies or organizations
- Standard operating procedures
- Payment options accepted, including use of a sliding fee scale and/or treatment at no charge
- Facility receipt of government funding

- Operation of an Opioid Treatment Program (OTP) certified by SAMHSA and offering maintenance and/or detoxification with methadone and/or buprenorphine
- Clients in treatment on March 31, 2010 (total, clients under age 18, clients receiving methadone, clients receiving buprenorphine)
- Annual admissions
- Percentage of clients in treatment on March 31, 2010, for abuse of both alcohol and drugs, alcohol abuse only, and drug abuse only
- Percentage of clients in treatment on March 31, 2010, with diagnosed co-occurring substance abuse and mental health disorders
- Number of beds designated for residential (non-hospital) and hospital inpatient substance abuse treatment on March 31, 2010

Data collection

Three data collection modes were employed, a secure web-based questionnaire, a paper questionnaire sent by mail, and a telephone interview. Initially, respondents could select either the web or paper mode to complete the survey. Six weeks before the survey reference date (March 31, 2010), letters were mailed to all facilities to alert them to expect the survey. The letters also served to update records with new address information received from the U.S. Postal Service. During the last week of March 2010, data collection packets (including the questionnaire, SAMHSA cover letter, State-specific letter of endorsement, information on completing the survey on the web, and a sheet of *Frequently Asked Questions*) were mailed to each facility. During the data collection phase, contract personnel were available to answer facilities' questions concerning the survey. Web-based support for facilities completing the questionnaire on the web was also available. Four to 5 weeks after the initial questionnaire mailing, thank you/reminder letters were sent to all facilities. Approximately 8 weeks after the initial questionnaire mailing, non-responding facilities were mailed a second questionnaire packet. About 4 to 5 weeks after the second questionnaire mailing, non-respondents received a reminder telephone call. Those facilities that had not responded within 2 to 3 weeks of the reminder call were telephoned and asked to complete the survey by computer-assisted telephone interview (CATI).

Facility status and response rate

Table 1.1 presents a summary of response rate information. Questionnaires were mailed to a total of 17,204 facilities believed to be actively providing substance abuse treatment services. Of these facilities, 11 percent were found to be ineligible for the survey because they had closed or did not provide substance abuse treatment or detoxification. Of the remaining 15,390 facilities, 14,060 facilities (91.4 percent) completed the survey and 13,339 (86.7 percent) were eligible for this report.

Quality assurance

All mail questionnaires were reviewed manually for consistency and for missing data. Calls were made to facilities to clarify questionable responses and to obtain missing data. If facilities could not be reached during the edit callbacks, responses that were clearly in error were replaced by imputation. After data entry, automated quality assurance reviews were conducted. The reviews

Table 1.1
N-SSATS facilities, by status and mode of response: 2010

	Number	*Percent*
Total facilities in survey	**17,204**	**100.0**
Closed/ineligible	1,814	10.5
Eligible	15,390	89.5
Total eligible	**15,390**	**100.0**
Non-respondents	1,330	8.6
Respondents	14,060	91.4
Excluded from report[1]	369	2.4
Roll-ups[2]	352	2.3
Included in report	13,339	86.7
Mode of response	**13,339**	**100.0**
Mail	3,467	26.0
Internet	8,152	61.1
Telephone	1,720	12.9

[1] Facilities excluded from the report included 188 non-treatment halfway houses, 114 solo practitioners not approved by the State agency for inclusion, and 67 facilities that treated incarcerated clients only.

[2] Facilities whose client counts were included in or "rolled into" other facilities' counts and whose facility characteristics were not reported separately.

SOURCE: Center for Behavioral Health Statistics and Quality, Substance Abuse and Mental Health Services Administration, National Survey of Substance Abuse Treatment Services (N-SSATS), 2010.

incorporated the rules used in manual editing, plus consistency checks and checks for data outliers not readily identified by manual review.

The web questionnaire was programmed to be self-editing; that is, respondents were prompted to complete missing responses and to confirm or correct inconsistent responses.

Item non-response was minimized through careful editing and extensive follow-up. The item response rate for the 2010 N-SSATS averaged 98.5 percent across 192 separate items. Appendix C details item response rates and imputation procedures.

Facility Selection for the 2010 N-SSATS Report

Table 1.1. The N-SSATS questionnaire serves several purposes, as noted earlier. Three hundred sixty-nine of the 14,060 questionnaire respondents provided information but were deemed out of the scope of this report. They were excluded from the analyses presented here. The excluded facilities and reasons for exclusion fell into three categories:

- 188 facilities were halfway houses that did not provide substance abuse treatment. These facilities were included in the survey so that they could be listed in the *Directory* and the Treatment Facility Locator.
- 114 facilities were solo practitioners. I-SATS and N-SSATS are designed to include facilities rather than individuals. Solo practitioners are listed and surveyed only if the State substance

abuse agency explicitly requests that they be included in the survey. The excluded solo practitioners had not been identified for inclusion by the State substance abuse agency.

- 67 facilities were jails, prisons, or other organizations that treated incarcerated clients exclusively.

An additional 352 facilities whose client counts were included in or "rolled into" other facilities' counts and whose facility characteristics were not reported separately were excluded from facility counts in this report. However, their client counts are included.

After the exclusion of 369 out-of-scope facilities and 352 rolled-up facilities, 13,339 eligible respondent facilities were included in the 2010 N-SSATS report.

Number of respondents reporting facility and client data

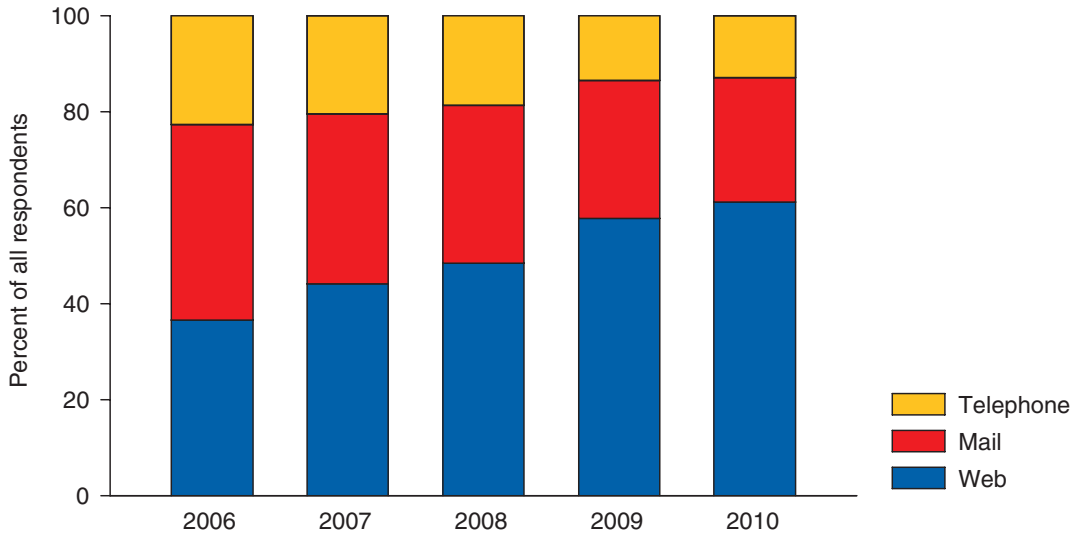
There were 13,339 eligible respondents to the 2010 N-SSATS. The breakdown of facility data and client counts reported by these respondents is summarized below.

- 11,996 facilities reported facility data and client counts for their own organizations.
- 536 facilities reported facility characteristics for themselves and provided client counts for their own facility and for 1,596 other facilities.
- 807 facilities reported facility characteristics only. Their client counts were reported by another facility.

Survey Response Mode

Figure 1. The proportion of facilities using the web survey to respond to N-SSATS has increased steadily since introduction of the option in 2002. The percentage of facilities responding via the web increased from 37 percent in 2006 to 61 percent in 2010. Mail response declined from 41 percent

Figure 1
Survey Response Mode: 2006-2010



SOURCE: Center for Behavioral Health Statistics and Quality, Substance Abuse and Mental Health Services Administration, National Survey of Substance Abuse Treatment Services (N-SSATS), 2006-2010.

in 2006 to 26 percent in 2010. Telephone response, which represents follow-up of facilities that have not responded by mail or web, also declined, from 23 percent in 2006 to 13 percent in 2010.

Data Considerations and Limitations

As with any data collection effort, certain procedural considerations and data limitations must be taken into account when interpreting data from the 2010 N-SSATS. Some general issues are listed below; other considerations are detailed in Appendix A. Considerations and limitations of specific data items are discussed where the data are presented.

- N-SSATS attempts to obtain responses from all known treatment facilities, but it is a voluntary survey. There was no adjustment for the 8.6 percent facility non-response.
- N-SSATS is a point-prevalence survey. It provides information on the substance abuse treatment system and its clients on the reference date. Client counts reported here do not represent annual totals. Rather, N-SSATS provides a "snapshot" of substance abuse treatment facilities and clients on an average day.
- Multiple responses were allowed for certain variables (e.g., services provided and specialized programs). Tabulations of these variables include the total number of facilities reporting each response.

Organization of the Report

The balance of this report is organized into the following chapters.

- Chapter 2 presents trends in facility characteristics for 2006 to 2010.
- Chapter 3 presents trends in client characteristics for 2006 to 2010.
- Chapter 4 describes key characteristics of facilities and the programs and services they provided in 2010.
- Chapter 5 describes key characteristics of clients in substance abuse treatment on March 31, 2010.
- Chapter 6 presents State-level detail for most of the tables presented in Chapters 4 and 5.
- Appendix A provides additional information on N-SSATS, its history, and changes in the survey and survey universe over time.
- Appendix B contains the 2010 N-SSATS mail survey questionnaire.
- Appendix C contains information on item response and imputation.

Terminology

The majority of tables in the report are organized by facility operation and by primary focus of the facility. Therefore, it is important to define these terms.

- *Facility operation* indicates the type of entity responsible for the operation of the facility:
  - Private for-profit
  - Private non-profit
  - Government
    - Local, county, or community
    - State
    - Federal (Dept. of Veterans Affairs, Dept. of Defense, Indian Health Service, other)
    - Tribal
- *Primary focus* indicates the services the facility primarily provides:
  - Substance abuse treatment services
  - Mental health services
  - A mix of substance abuse treatment and mental health services
  - General health care
  - Other
- *Clients in treatment* were defined as:
  - Hospital inpatient and residential (non-hospital) clients receiving substance abuse treatment services at the facility on March 31, 2010

    and
  - Outpatient clients who were seen at the facility for a substance abuse treatment or detoxification service at least once during the month of March 2010, and who were still enrolled in treatment on March 31, 2010

Chapter 2

Trends in Facility Characteristics

This chapter presents trends in facility characteristics for 2006 to 2010.

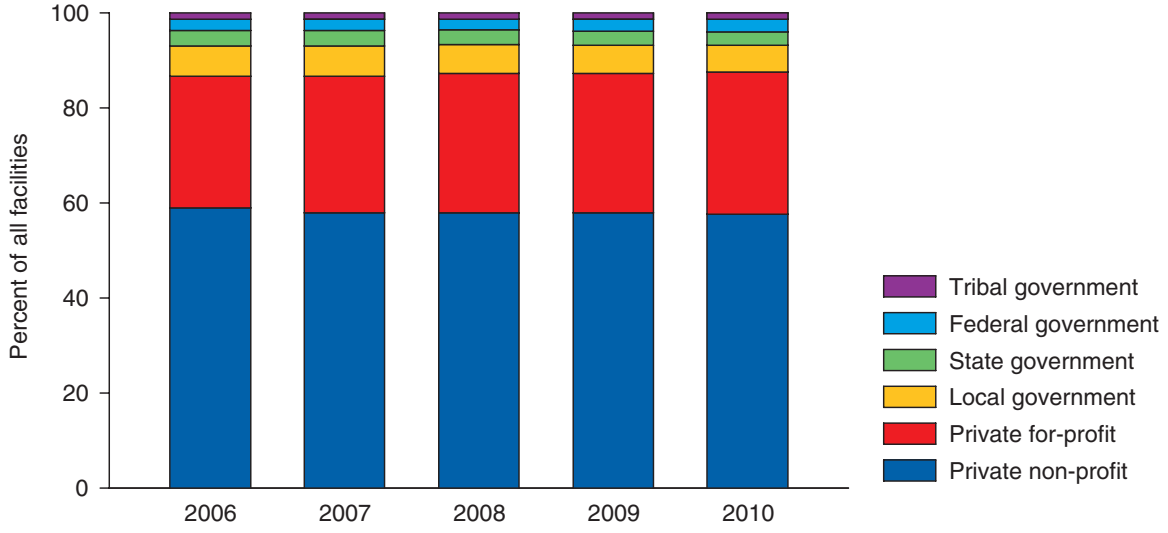
Number of Facilities

Table 2.1. The total number of substance abuse treatment facilities remained relatively constant between 2006 and 2010, although there was considerable turnover from year to year in the individual facilities responding to the survey. Every year, between 89 and 90 percent of the facilities responding to a given survey had also responded to the previous year's survey. Some 11 to 12 percent of the facilities had closed or were no longer providing substance abuse treatment but were replaced by similar numbers of new facilities.

There was a net decrease of 174 facilities between 2009 and 2010, to 13,339 facilities. Of the facilities responding to the 2010 survey, 89 percent had also responded to the 2009 survey and 11 percent were new to the 2010 survey. Twelve percent of the facilities responding in 2009 had closed or were no longer providing substance abuse treatment in 2010.

Despite the year-to-year changes in the facilities reporting, several core structural characteristics of the substance abuse treatment system remained stable from 2006 to 2010.

Figure 2
Facility Operation: 2006-2010



SOURCE: Center for Behavioral Health Statistics and Quality, Substance Abuse and Mental Health Services Administration, National Survey of Substance Abuse Treatment Services (N-SSATS), 2006-2010.

Facility Operation

Table 2.2 and Figure 2. The operational structure of the substance abuse treatment system (i.e., the type of entity responsible for operating the facility) changed very little between 2006 and 2010.

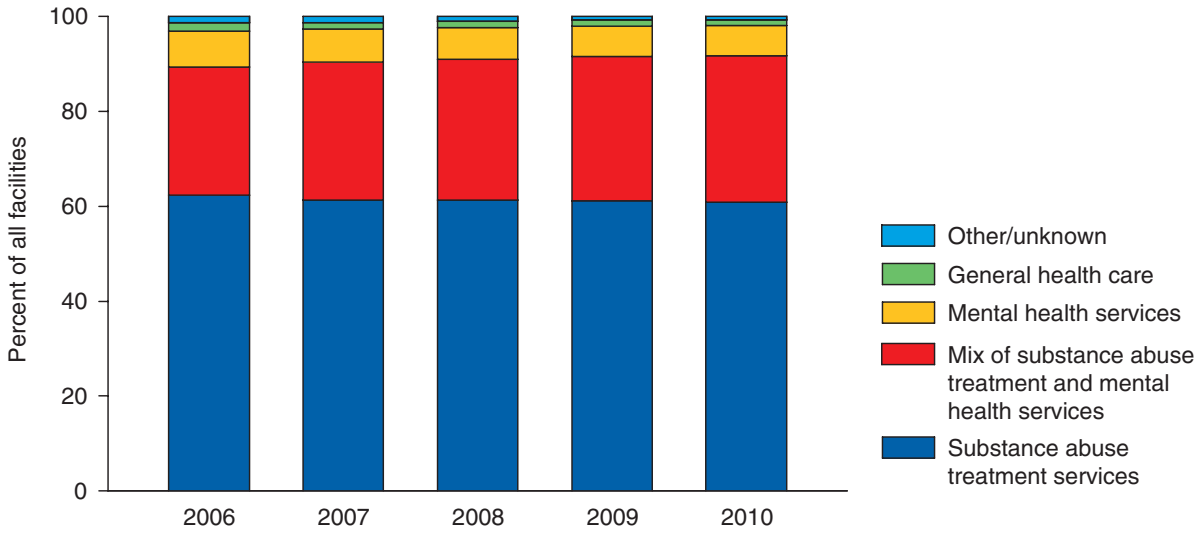
- Private non-profit organizations operated 59 percent of all facilities in 2006, compared to 58 percent in 2010.
- Private for-profit organizations operated 28 percent of facilities in 2006, increasing slightly but steadily to 30 percent of facilities in 2010.
- Local, county, or community governments operated between 6 and 7 percent of facilities each year during the 5-year period.
- State governments operated about 3 percent of facilities each year.
- The Federal government operated 2 to 3 percent of facilities each year.[6]
- Tribal governments operated 1 percent of facilities each year.

Primary Focus of Facility

Table 2.2 and Figure 3. The primary focus of activity of the facility (i.e., the services the facility primarily provides) changed very little between 2006 and 2010.

- Facilities whose main focus was substance abuse treatment services made up between 61 and 62 percent of facilities during the period 2006 to 2010.

Figure 3
Primary Focus of Facility: 2006-2010



SOURCE: Center for Behavioral Health Statistics and Quality, Substance Abuse and Mental Health Services Administration, National Survey of Substance Abuse Treatment Services (N-SSATS), 2006-2010.

[6] Data for the Federal agencies specified in the survey (the Department of Veterans Affairs, the Department of Defense, the Indian Health Service, and other unspecified Federal agencies) are detailed in the tables.

- Facilities with a primary focus of mental health services made up 6 to 8 percent of facilities each year.
- Facilities with a primary focus of general health care made up 1 to 2 percent of facilities each year.
- Facilities whose main focus was activities other than those listed above made up about 1 percent of facilities each year.

Type of Care Offered

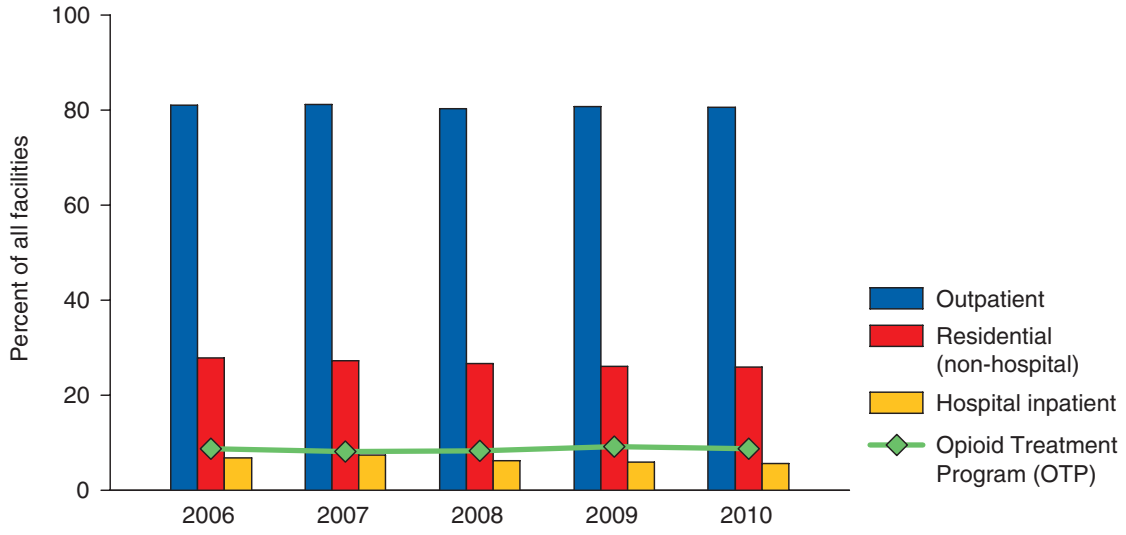
Table 2.3 and Figure 4. The proportions of facilities offering the major types of care—outpatient, residential (non-hospital), and hospital inpatient—were stable between 2006 and 2010.

- Outpatient treatment was provided by 80 to 81 percent of facilities.
- Residential (non-hospital) treatment was provided by 26 to 28 percent of facilities.
- Hospital inpatient treatment was provided by 6 to 7 percent of facilities.

Facilities with Opioid Treatment Programs

Table 2.3 and Figure 4. Opioid Treatment Programs (OTPs), certified by SAMHSA, provide medication-assisted therapy with methadone and/or buprenorphine, the only two opioid medications approved for the treatment of opioid addiction. OTPs can be associated with any type of care. They were provided by 8 to 9 percent of all facilities between 2006 and 2010.

Figure 4
Type of Care Offered and Facilities with Opioid Treatment Programs: 2006-2010



SOURCE: Center for Behavioral Health Statistics and Quality, Substance Abuse and Mental Health Services Administration, National Survey of Substance Abuse Treatment Services (N-SSATS), 2006-2010.

Chapter 3

Trends in Client Characteristics

This chapter presents trends in client characteristics for 2006 to 2010.

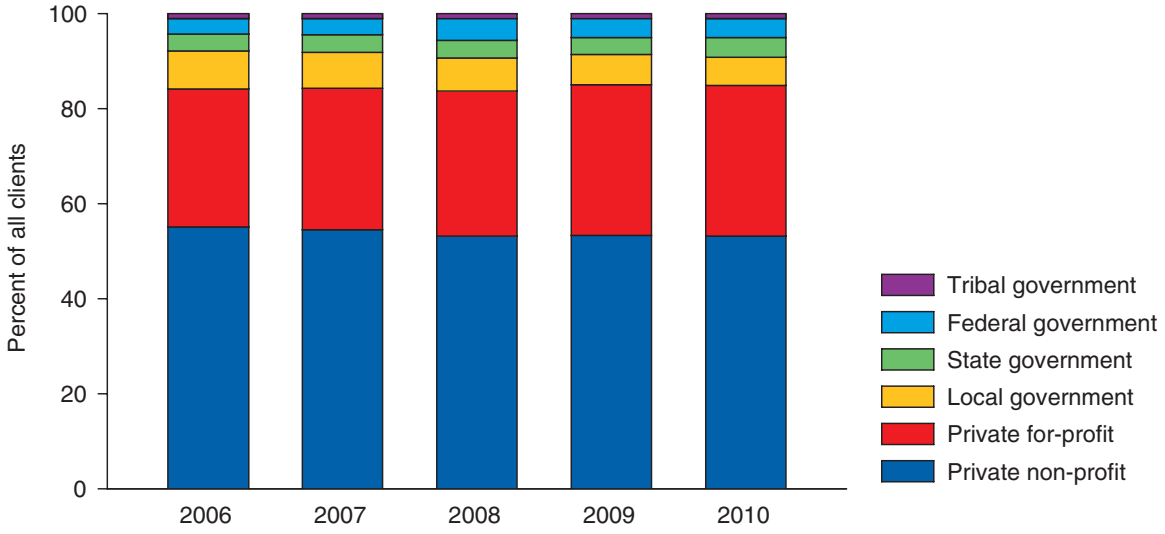
Table 3.1. The number of clients in treatment on the survey reference date increased by 4 percent from 2006 to 2010, from 1,130,881 in 2006 to 1,175,462 in 2010.

Facility Operation

Table 3.1 and Figure 5. In almost all categories of facility operation, the proportions of clients in treatment changed very little between 2006 and 2010.

- Private non-profit facilities treated 55 percent of clients in 2006 and 2007, but treated 53 percent in the years between 2008 and 2010.
- Private for-profit facilities treated 29 percent of clients in 2006, increasing to 32 percent in 2010. (The number of clients in private for-profit facilities increased by 13 percent, from 328,763 in 2006 to 372,525 in 2010.)

Figure 5
Clients in Treatment, by Facility Operation: 2006-2010



SOURCE: Center for Behavioral Health Statistics and Quality, Substance Abuse and Mental Health Services Administration, National Survey of Substance Abuse Treatment Services (N-SSATS), 2006-2010.

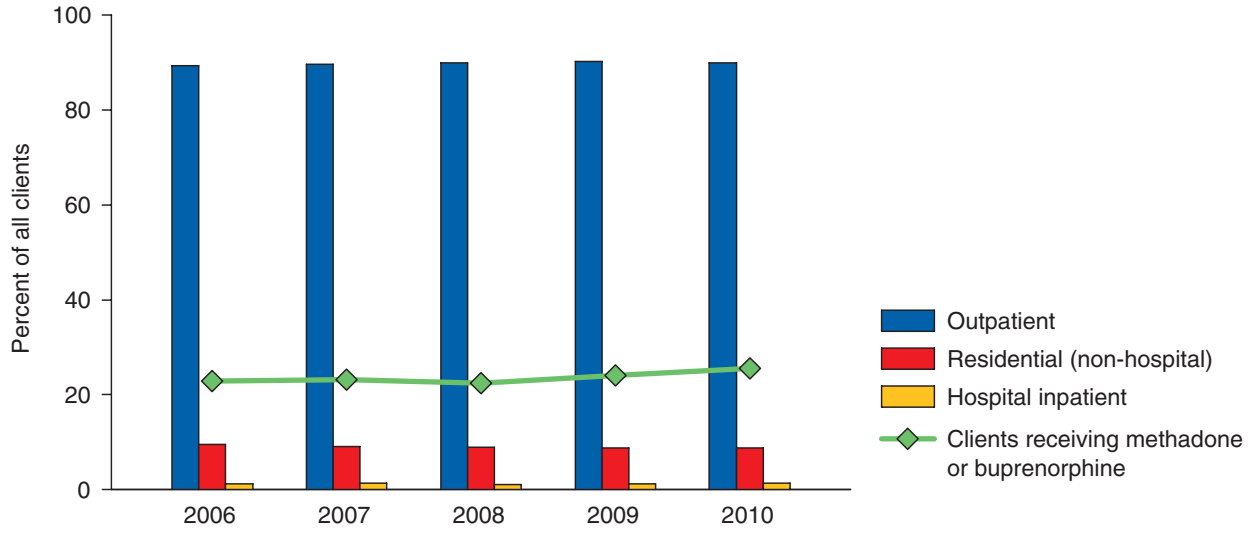
- Local government-operated facilities treated 8 percent of clients in 2006, decreasing slightly but steadily to 6 percent in 2010. (The number of clients in local government-operated facilities decreased by 21 percent, from 89,690 in 2006 to 70,963 in 2010.)
- State government-operated facilities treated 4 percent of clients in each year.
- Federal government-operated facilities treated 3 percent of clients from 2006 to 2007, but treated 5 percent in 2008, and 4 percent in 2009 and 2010.[7]
- Tribal government-operated facilities treated 1 percent of clients in each year.

Primary Focus of Facility

Table 3.1. In almost all categories of facility primary focus of activity, the proportions of clients in treatment changed very little from 2006 to 2010.

- Facilities with a primary focus of substance abuse treatment services treated 66 to 68 percent of clients each year during the 5-year period.
- Facilities with a primary focus of mental health services treated 4 to 5 percent of clients.
- Facilities with a primary focus of general health care treated 1 to 2 percent of clients.
- Facilities whose main focus was activities other than those listed above treated 1 percent or less of clients.

Figure 6
Clients in Treatment, by Type of Care Received: 2006-2010



SOURCE: Center for Behavioral Health Statistics and Quality, Substance Abuse and Mental Health Services Administration, National Survey of Substance Abuse Treatment Services (N-SSATS), 2006-2010.

[7] Data for the Federal agencies specified in the survey (the Department of Veterans Affairs, the Department of Defense, the Indian Health Service, and other unspecified Federal agencies) are detailed in the tables.

Type of Care Received

Table 3.2 and Figure 6. The proportions of clients in treatment for the major types of care—outpatient, residential (non-hospital), and hospital inpatient—were stable between 2006 and 2010.

- Clients in outpatient treatment made up 89 to 90 percent of clients in each year.
- Clients in residential (non-hospital) treatment made up 9 to 10 percent of all clients in each year.
- Clients in hospital inpatient treatment made up 1 percent of all clients in each year.

Clients Receiving Methadone or Buprenorphine

Table 3.2 and Figure 6. Clients receiving methadone or buprenorphine could be in any type of care—outpatient, residential (non-hospital), or hospital inpatient. The majority of clients received methadone in Opioid Treatment Programs (OTPs), certified by SAMHSA to provide medication-assisted therapy with methadone and/or buprenorphine. However, clients could receive buprenorphine in any type of facility.[8]

- The proportion of all clients receiving methadone was 22 to 25 percent between 2006 and 2010.
- The proportion of clients receiving buprenorphine was 1 percent or less from 2006 to 2008 but increased to 2 percent in 2009 and 2010.

Substance Abuse Problem Treated

Table 3.3. The proportion of clients in treatment for three broad categories of substance abuse problems—both alcohol and drug abuse, drug abuse only, and alcohol abuse only—changed very little between 2006 and 2010. Clients in treatment for both drug and alcohol abuse made up 43 to 46 percent of all clients from 2006 to 2010. Clients in treatment for drug abuse only ranged from 35 to 39 percent of all clients from 2006 through 2010. The proportion of clients treated for alcohol abuse only ranged from 18 to 19 percent between 2006 and 2010.

Clients under Age 18 in Treatment

Table 3.4. Clients under age 18 made up between 7 and 8 percent of all clients from 2006 through 2010.

- The types of care received by clients under age 18 were stable between 2006 and 2010.
  - From 87 to 88 percent of all clients under age 18 were in outpatient treatment.
  - From 11 to 12 percent of all clients under age 18 were in residential (non-hospital) treatment.
  - One to 2 percent of all clients under age 18 were in hospital inpatient treatment in each year.
- The proportion of clients under age 18 in treatment facilities with special programs or groups for adolescents ranged from 81 to 84 percent between 2006 and 2010.

---

[8] Individual physicians can receive special authorization from the U.S. Department of Health and Human Services that allows them to prescribe buprenorphine for the treatment of opiate addiction. These physicians may prescribe buprenorphine to patients in an office setting or to patients at substance abuse treatment facilities.

Chapter 4

Facility Characteristics and Services

This chapter outlines key characteristics of facilities and programs in 2010.

Facility Operation and Primary Focus

Table 4.1. Facilities were asked to designate the type of entity responsible for the operation of the facility. They were also asked to designate the facility's primary focus of activity.

- The proportions of all facilities by facility operation were:[9]
  - Private non-profit organizations 58 percent
  - Private for-profit organizations 30 percent
  - Local, county, or community governments 6 percent
  - State governments 3 percent
  - Federal government[10] 3 percent
  - Tribal governments 1 percent
- The proportions of all facilities by primary focus were:
  - Substance abuse treatment services 61 percent
  - Mix of substance abuse treatment and mental health services 31 percent
  - Mental health services 6 percent
  - General health care 1 percent
  - Other and unknown focus 1 percent

Type of Care Offered

Table 4.2b. Type of care offered was made up of three broad categories (outpatient, residential [non-hospital], and hospital inpatient), each with several subcategories. A facility could offer more than one type of care. The proportions of all facilities offering the different types of care were:[11]

- Outpatient treatment 81 percent
  - Regular outpatient care 74 percent
  - Intensive outpatient treatment 45 percent
  - Outpatient day treatment/partial hospitalization 13 percent
  - Outpatient detoxification 9 percent
  - Outpatient methadone/buprenorphine maintenance 9 percent

---

[9] Percentages do not sum to 100 percent because of rounding.

[10] Data for the Federal agencies specified in the survey (the Department of Veterans Affairs, the Department of Defense, the Indian Health Service, and other unspecified Federal agencies) are detailed in the tables.

[11] Facility percentages sum to more than 100 percent because a facility could provide more than one type of care.

- Residential (non-hospital) treatment — 26 percent
  - Long-term treatment (more than 30 days) — 21 percent
  - Short-term care (30 days or fewer) — 13 percent
  - Detoxification — 7 percent
- Hospital inpatient treatment — 6 percent
  - Detoxification — 5 percent
  - Treatment — 4 percent

Almost three quarters (74 percent) of private non-profit facilities provided outpatient care and more than one third (34 percent) provided residential (non-hospital) care. In contrast, 92 percent of private for-profit facilities provided outpatient care and 12 percent provided residential (non-hospital) care.

Client Substance Abuse Problem and Co-occurring Mental Health Disorders

Table 4.3. Facilities were asked to estimate the proportions of clients in treatment for both alcohol and drug abuse, for alcohol abuse only, and for drug abuse only. They were also asked to estimate the proportion of clients with diagnosed co-occurring substance abuse and mental health disorders.

- Almost all facilities (92 percent) had clients in treatment for both alcohol and drug abuse on March 31, 2010. Eighty-two percent had clients in treatment for drug abuse only, and 79 percent had clients in treatment for alcohol abuse only.
- Most facilities (89 percent) also had clients in treatment with co-occurring substance abuse and mental health disorders on March 31, 2010.

Facility Size

Table 4.4. Facility size is defined by the number of clients in substance abuse treatment. The median number of clients in substance abuse treatment at a facility on March 31, 2010, was 43 clients.

- The median number of clients ranged from 35 in facilities operated by tribal governments to 67 in facilities operated by the Federal government.
- The median number of clients ranged from 24 clients in facilities with a primary focus of mental health services to 46 in those with a primary focus of providing substance abuse treatment services.
- By type of care, the median[12] number of clients in treatment on March 31, 2010, was:
  - Outpatient treatment — 50 clients
    - Regular outpatient care — 35 clients
    - Intensive outpatient treatment — 17 clients
    - Outpatient day treatment/partial hospitalization — 12 clients
    - Outpatient detoxification — 8 clients
    - Outpatient methadone/buprenorphine maintenance — 235 clients

[12] The median number of clients for the main categories of type of care (outpatient, residential, and hospital inpatient) can be greater than the median for any of the subcategories because a facility can provide more than one subcategory of the main types of care.

- Residential (non-hospital) treatment — 20 clients
  - Long-term treatment (more than 30 days) — 17 clients
  - Short-term care (30 days or fewer) — 14 clients
  - Detoxification — 6 clients
- Hospital inpatient treatment — 12 clients
  - Treatment — 11 clients
  - Detoxification — 6 clients

Table 4.5. Facilities were sorted into five size groups based on the total number of clients in treatment on March 31, 2010. The smallest facilities were defined as having fewer than 15 clients and the largest as having 120 clients or more.

- Facilities operated by the Federal government were generally larger than facilities operated by other entities—34 percent had 120 clients or more in treatment on March 31, 2010, compared to 22 percent of all facilities.
- Facilities whose primary focus was the provision of mental health services tended to be smaller than facilities with other foci of activity—40 percent had fewer than 15 clients in treatment on March 31, 2010, compared to 19 percent of all facilities.

Facility Capacity and Utilization Rates

Facilities were asked to report the number of residential (non-hospital) and hospital inpatient beds designated for substance abuse treatment. Utilization rates were calculated by dividing the number of residential (non-hospital) or hospital inpatient clients by the number of residential (non-hospital) or hospital inpatient designated beds. Because substance abuse treatment clients may also occupy non-designated beds, utilization rates could be more than 100 percent.

- *Table 4.6.* Some 3,194 facilities reported having 109,406 residential (non-hospital) beds designated for substance abuse treatment on March 31, 2010. The utilization rate[13] was 91 percent, and ranged from 85 percent in private for-profit facilities to 96 percent in facilities operated by local, county, or community governments.
- *Table 4.7.* Some 726 facilities reported having 12,551 hospital inpatient beds designated for substance abuse treatment on March 31, 2010. The utilization rate[14] was 92 percent, and ranged from 79 percent in facilities operated by Federal or local governments to 241 percent in facilities operated by tribal governments. By facility focus, utilization rates ranged from 85 percent in facilities primarily focused on substance abuse treatment services to 106 percent in facilities focused on a mix of mental health and substance abuse treatment services.
- *Tables 4.6 and 4.7 and Figure 7* show the distribution of facility-level utilization rates for residential (non-hospital) beds and for hospital inpatient beds. Facilities with residential (non-hospital) beds had generally higher utilization rates than facilities with hospital inpatient beds.

---

[13] Residential (non-hospital) utilization rates are based on a subset of 3,046 facilities that reported for themselves alone and that reported numbers greater than zero for both designated beds and clients.

[14] Hospital inpatient utilization rates are based on a subset of 490 facilities that reported for themselves alone and that reported numbers greater than zero for both designated beds and clients.

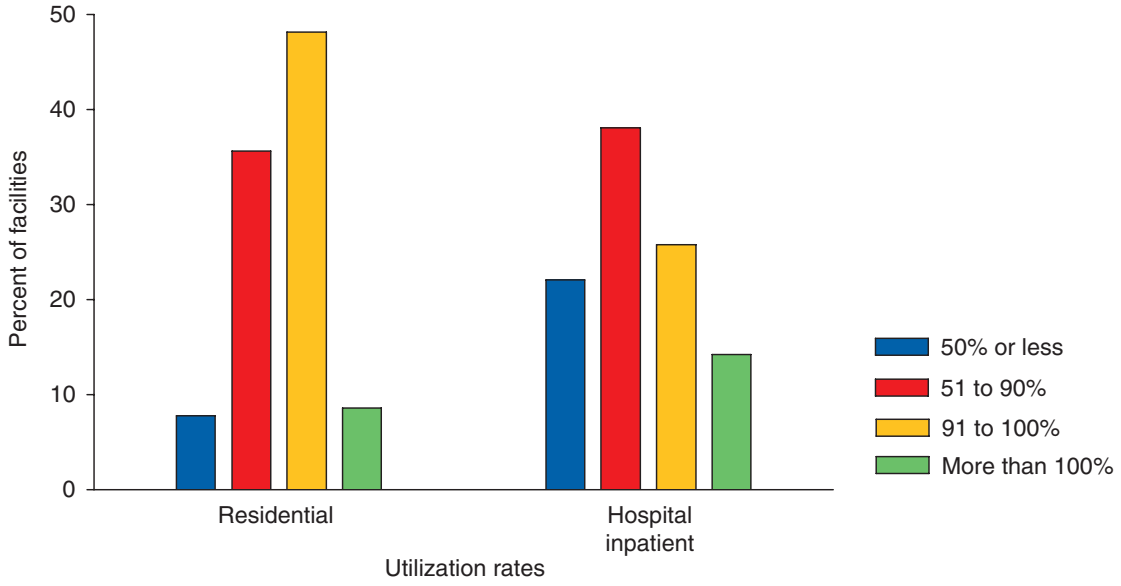
Forty-eight percent of facilities with residential (non-hospital) beds had utilization rates of 91 to 100 percent, while 26 percent of facilities with hospital inpatient beds had utilization rates in that range.

Services Provided

Tables 4.8 and 4.9. Facilities were asked about the types of services they provided. Services were grouped into the six broad categories shown below.

- *Assessment and pre-treatment services* were offered by 98 percent of all facilities.
  - Screening for substance abuse was provided by 93 percent of all facilities.
  - Comprehensive substance abuse assessment or diagnosis was provided by 90 percent of all facilities.
  - Screening for mental health disorders was provided by 63 percent of all facilities; rates were higher in facilities primarily focused on mental health services (94 percent), facilities with a mixed focus of substance abuse treatment and mental health services (91 percent), and facilities primarily focused on general health care (89 percent).
  - Comprehensive mental health assessment or diagnosis was provided by 43 percent of all facilities; rates were higher in facilities primarily focused on mental health services (90 percent) and facilities with a mixed focus of substance abuse treatment and mental health services (77 percent).
  - Outreach to persons in the community who may need treatment was provided by 52 percent of all facilities but by 79 percent of tribal government-operated facilities.

Figure 7
Residential (Non-Hospital) and Hospital Inpatient Utilization Rates: March 31, 2010



SOURCE: Center for Behavioral Health Statistics and Quality, Substance Abuse and Mental Health Services Administration, National Survey of Substance Abuse Treatment Services (N-SSATS), 2010.

- Interim services for clients when immediate admission was not possible were provided by 40 percent of all facilities but by 74 percent of Federal government facilities.

- *Testing services* were provided by 88 percent of all facilities.
  - Drug or alcohol urine screening was provided by 84 percent of all facilities.
  - Breathalyzer or other blood alcohol testing was provided by 60 percent of all facilities but by 80 percent of Federal government-operated facilities.
  - Testing for each of TB, HIV, hepatitis B and C, and STDs was provided by between 20 and 34 percent of all facilities but by 85 to 86 percent of facilities with a primary focus of general health care.
- *Transitional services* were provided by 96 percent of all facilities.
  - Discharge planning was provided by 93 percent of all facilities.
  - Aftercare/continuing care was provided by 81 percent of all facilities.
- *Pharmacotherapies* were provided by 49 percent of all facilities; rates were higher in facilities primarily focused on general health care (88 percent) and by Federal government-operated facilities (84 percent).
  - Medications for psychiatric disorders were the most frequently available pharmacotherapies—in 35 percent of all facilities and in 79 percent of facilities primarily focused on general health care.
- *Ancillary services* were provided by 99 percent of all facilities.
  - Substance abuse education was provided by 95 percent of all facilities.
  - Case management services were provided by 77 percent of all facilities.
  - Mental health services were provided by 57 percent of all facilities; rates were higher in facilities with a primary focus of mental health services (97 percent), facilities providing a mixed focus of substance abuse treatment and mental health services (92 percent), and facilities with a primary focus of general health care (89 percent).

Clinical/Therapeutic Approaches

Table 4.10. Facilities were asked to indicate whether they used any of 12 specific clinical/therapeutic approaches.

- Two approaches were each used always or often by nearly all facilities:
  - Substance abuse counseling was used always or often by 95 percent of facilities.
  - Relapse prevention was used always or often by 85 percent of facilities.
- A number of approaches were used at least sometimes (always, often, or sometimes) by more than half of facilities:
  - Cognitive-behavioral therapy was used at least sometimes by 92 percent of facilities.
  - Motivational interviewing was used at least sometimes by 87 percent of facilities.
  - Anger management was used at least sometimes by 84 percent of facilities.
  - Brief intervention was used at least sometimes by 82 percent of facilities.
  - 12-step facilitation was used at least sometimes by 80 percent of facilities.
  - Trauma-related counseling was used at least sometimes by 67 percent of facilities.

- Contingency management/motivational incentives were used at least sometimes by 58 percent of facilities.

- Some approaches were used rarely or never, or were unfamiliar to the respondent, for more than half of all facilities:
  - Rational emotive behavioral therapy was used rarely or never by 37 percent of facilities, and it was unfamiliar to an additional 14 percent of facilities.
  - The matrix model was used rarely or never by 38 percent of facilities, and it was unfamiliar to an additional 24 percent of facilities.
  - Community reinforcement plus vouchers was used rarely or never by 55 percent of facilities, and it was unfamiliar to an additional 32 percent of facilities.

Programs or Groups for Specific Client Types

Table 4.11b. Facilities were asked about the provision of treatment programs or groups specially designed for specific types of client. Overall, 80 percent of facilities offered at least one special program or group to serve a specific client type.

- The proportions of facilities providing special programs or groups were:

■ Clients with co-occurring mental health and substance abuse disorders	37 percent
■ Adult women	32 percent
■ Adolescents	29 percent
■ Persons arrested for DUI or DWI	29 percent
■ Other criminal justice clients[15]	27 percent
■ Adult men	25 percent
■ Pregnant or postpartum women	13 percent
■ Persons with HIV or AIDS	9 percent
■ Seniors or older adults	7 percent
■ Lesbian, gay, bisexual, or transgender (LGBT) clients	6 percent

Services in Sign Language for the Hearing Impaired and in Languages Other than English

Table 4.12b. Facilities were asked about the provision of substance abuse treatment services in sign language for the hearing impaired. They were also asked if treatment was provided in languages other than English, if this treatment was provided by a staff counselor or by an on-call interpreter, and in what languages staff counselors provided treatment.

- Substance abuse treatment services in sign language for the hearing impaired were offered in 28 percent of all facilities. Facilities operated by local and State governments were most likely to offer these services (47 and 39 percent, respectively). Facilities with a primary focus of mental health services or a mixed focus of substance abuse treatment and mental health services (39 and 34 percent, respectively) were the most likely to offer services in sign language.

- Substance abuse treatment services in languages other than English were provided in 42 percent of all facilities, ranging from 20 percent of Federal government-operated facilities to 52 percent of local government-operated facilities.

---

[15] Facilities treating incarcerated persons only were excluded from this report; see Chapter 1.

- Forty-three percent of facilities providing services in languages other than English used staff counselors who spoke other languages; another 23 percent of facilities used both staff counselors and on-call interpreters.
- In those facilities where staff counselors provided services in languages other than English, Spanish was the most frequently spoken language (at 94 percent of facilities), although other languages were spoken at 24 percent of facilities. Services in American Indian/Alaska Native languages were provided by 3 percent of these facilities overall but by 95 percent of those operated by tribal governments, and by 100 percent of those operated by the Indian Health Service.

Detoxification Services

Table 4.13. Facilities that provided detoxification services were asked to indicate whether they detoxified clients from specified substances, and whether medication was routinely used during detoxification.

- The proportions of facilities providing detoxification from specific substances were:
  - Opiates 84 percent
  - Alcohol 68 percent
  - Benzodiazepines 60 percent
  - Cocaine 55 percent
  - Methamphetamines 54 percent
  - Other substances 13 percent
- Medications were routinely used during detoxification in 77 percent of the facilities providing detoxification services.

Client Outreach

Tables 4.14 and 4.9. Facilities were asked whether they had a website providing information about their substance abuse treatment programs.

- Websites providing information about a facility's substance abuse treatment programs were maintained by 76 percent of all facilities. Website availability ranged from 44 percent among facilities operated by tribal governments or the Federal government to 84 percent among private non-profit facilities.
- Outreach to persons in the community who may need treatment was provided by 52 percent of all facilities but by 79 percent of tribal government-operated facilities.

Facility Licensing, Certification, or Accreditation

Facilities were asked to report licensure, certification, or accreditation by specified agencies or organizations. These included the State substance abuse agency, State mental health department, State department of health, hospital licensing authority, the Joint Commission, CARF, NCQA, COA, and other State or local agency or organization.[16]

---

[16] Joint Commission: formerly JCAHO (Joint Commission on Accreditation of Healthcare Organizations); CARF: formerly Commission on Accreditation of Rehabilitation Facilities; NCQA: National Committee for Quality Assurance; and COA: Council on Accreditation.

- *Table 4.15b.* Overall, 95 percent of all facilities reported that they were licensed, certified, or accredited by one or more agencies or organizations. The proportions of facilities reporting the specified agencies or organizations were:
  - State substance abuse agency 82 percent
  - State department of health 41 percent
  - State mental health department 35 percent
  - Hospital licensing authority 7 percent
  - Joint Commission 19 percent
  - CARF 22 percent
  - COA 5 percent
  - NCQA 3 percent
  - Another State or local agency or other organization 8 percent
- *Table 4.16b.* Facility licensing, certification, or accreditation was associated with the type of care offered.
  - The State substance abuse agency licensed, certified, or accredited 82 percent each of facilities offering outpatient treatment and residential (non-hospital) treatment but only 58 percent of facilities offering hospital inpatient treatment.
  - The State mental health department licensed, certified, or accredited 45 percent of hospital inpatient facilities but only 37 percent of outpatient facilities and 28 percent of residential (non-hospital) facilities.
  - Facilities offering hospital inpatient treatment were more likely than facilities offering other types of care to report licensure, certification, or accreditation by the following:
    - State department of health 68 percent
    - Hospital licensing authority 56 percent
    - Joint Commission 79 percent
    - CARF 15 percent
    - NCQA 11 percent

Facility Standard Operating Procedures

Table 4.17b. Facilities were asked to indicate whether they followed specified practices as part of their standard operating procedure. All the standard practices listed were used by two-thirds or more of all facilities.

- The proportions of facilities reporting use of the specified standard practices were:
  - Required continuing education for staff 97 percent
  - Regularly scheduled case review with a supervisor 95 percent
  - Periodic client satisfaction surveys 91 percent
  - Periodic drug testing of clients 86 percent
  - Periodic utilization reviews 85 percent
  - Case review by an appointed quality review committee 71 percent
  - Outcome follow-up after discharge 67 percent

Payment Options

Table 4.18b. Facilities were asked to indicate whether they accepted specified types of payment or insurance for substance abuse treatment. They were also asked about use of a sliding fee scale and if they offered treatment at no charge to clients who could not pay.

- The proportions of all facilities reporting acceptance of specific payment options were:
  - Cash or self-payment 90 percent
  - Private health insurance 63 percent
  - Medicaid 55 percent
  - State-financed health insurance 39 percent
  - Medicare 32 percent
  - Federal military insurance 32 percent
- Facilities operated by Federal and tribal governments were least likely to accept cash or self-payment (42 and 43 percent, respectively). Private for-profit and Federal government-operated facilities were less likely to accept Medicare, Medicaid, or State-financed health insurance than were facilities operated by private non-profits and State, local, or tribal governments.
- Acceptance of Access to Recovery vouchers was reported in 14 States. The proportion of facilities accepting Access to Recovery vouchers ranged from 7 percent in Florida to 54 percent in Idaho [Table 6.19b].[17]
- Use of a sliding fee scale was reported by 62 percent of all facilities, ranging from 16 percent of facilities operated by the Federal government to 81 percent of facilities operated by local governments.
- Treatment at no charge for persons who cannot afford to pay was offered by 50 percent of all facilities, ranging from 21 percent of private for-profit facilities to 80 percent of facilities operated by tribal governments.

Facility Funding

Table 4.19. Facilities were asked if they received Federal, State, or local government funds or grants to support their substance abuse treatment programs.

- Overall, 60 percent of facilities reported receiving government funds to support substance abuse treatment programs. The proportions were highest in facilities operated by local or tribal governments (87 and 89 percent, respectively). Seventy-four percent of programs operated by private non-profit organizations reported receiving public funds compared to 22 percent of facilities operated by private for-profit organizations.

---

[17] Access to Recovery vouchers were available only in AK, AZ, CA, CO, CT, DC, FL, HI, IA, ID, IL, IN, LA, MI, MO, MT, NJ, NM, OH, OK, RI, TN, TX, WA, WI, and WY. See table 6.19a for number of facilities accepting ATR vouchers by State.

Facilities with Opioid Treatment Programs (OTPs)

Opioid Treatment Programs (OTPs) are certified by SAMHSA to provide medication-assisted therapy in the treatment of opioid addiction. Currently, methadone and buprenorphine are the only opioid medications approved for the treatment of opioid addiction.

- *Tables 2.3, 3.2, and 4.20*. Clients receiving methadone or buprenorphine in OTPs accounted for 26 percent of all clients in treatment on March 31, 2010, although OTPs were available in only 1,166 (9 percent) of all substance abuse treatment facilities.
- *Tables 4.1 and 4.20.* Private for-profit organizations operated 53 percent of OTPs but only 30 percent of all substance abuse treatment facilities.
- *Table 4.20.* Of the 304,656 clients receiving medication-assisted opioid therapy in OTPs, 98 percent (298,170) received methadone. Of the 27,456 clients receiving buprenorphine, only 24 percent (6,486 clients) received it in facilities with OTPs.
  - More than half (53 percent) of clients receiving methadone were in private for-profit facilities compared to 41 percent of clients receiving buprenorphine in an OTP facility. Most (93 percent) of the clients receiving methadone were in facilities whose primary focus was the provision of substance abuse treatment services.
  - Clients receiving buprenorphine in an OTP facility were more likely than clients receiving methadone to be in Federal government-operated facilities (14 vs. 1 percent).
  - Facilities whose primary focus was the provision of substance abuse treatment services accounted for 70 percent of buprenorphine clients in OTP facilities. Twenty-five percent of buprenorphine clients in OTP facilities were treated in facilities providing a mix of substance abuse treatment and mental health services.
- *Table 4.21b*. Most facilities with OTPs offered outpatient treatment (93 percent). Eighty-nine percent offered outpatient methadone/buprenorphine maintenance and 49 percent offered detoxification.
- *Table 4.22b*. OTPs were more likely than all facilities combined [Table 4.16b] to be licensed, certified, or accredited by a State department of health (60 vs. 41 percent), the Joint Commission (30 vs. 19 percent), or CARF (65 vs. 22 percent).

Counseling Offered by Facilities

- *Table 4.23*. Individual counseling was the most frequently reported form of counseling, by 98 percent of facilities, and marital/couples counseling was reported least frequently, by 60 percent of facilities.

Chapter 5

Client Characteristics

This chapter describes key characteristics of the 1,175,462 clients in substance abuse treatment on March 31, 2010. *Clients in treatment* were defined as: 1) hospital inpatient and residential (non-hospital) clients receiving substance abuse treatment services on March 31, 2010, and 2) outpatient clients who were seen at the facility for a substance abuse treatment or detoxification service at least once during the month of March 2010, and who were still enrolled in treatment on March 31, 2010.

Facility Operation and Primary Focus

Table 5.1. Facilities were asked to designate the type of entity responsible for the operation of the facility. They were also asked to designate the facility's primary focus of activity.

- The proportions of clients in treatment on March 31, 2010, by facility operation were:
  - Private non-profit organizations — 53 percent
  - Private for-profit organizations — 32 percent
  - Local, county, or community governments — 6 percent
  - Federal government[18] — 4 percent
  - State governments — 4 percent
  - Tribal governments — 1 percent
- The proportions of clients in treatment on March 31, 2010, by facility primary focus of activity were:[19]
  - Substance abuse treatment services — 66 percent
  - Mix of substance abuse treatment and mental health services — 28 percent
  - Mental health services — 4 percent
  - General health care — 1 percent
  - Other and unknown focus — < 1 percent

[18] Data for the Federal agencies specified in the survey (the Department of Veterans Affairs, the Department of Defense, the Indian Health Service, and other unspecified Federal agencies) are detailed in the tables.

[19] Percentages do not sum to 100 percent because of rounding.

Type of Care

Tables 5.2a, 5.2b, and 5.2c. Facilities were asked how many clients in treatment on March 31, 2010, received specified subcategories of type of care within three broad categories.

- On March 31, 2010, the proportions of clients receiving different types of care were:
  - Outpatient treatment — 90 percent
    - Regular outpatient care — 50 percent
    - Outpatient methadone/buprenorphine maintenance — 25 percent
    - Intensive outpatient treatment — 12 percent
    - Outpatient treatment/day hospitalization — 2 percent
    - Outpatient detoxification — 1 percent
  - Residential (non-hospital) treatment — 9 percent
    - Long-term treatment (more than 30 days) — 6 percent
    - Short-term treatment (30 days or fewer) — 2 percent
    - Detoxification — 1 percent
  - Hospital inpatient treatment — 1 percent
- As shown previously [Table 5.1] the majority of clients (53 percent) were in facilities operated by private non-profit organizations. The majority of clients in most of the individual types of care were also in private non-profit facilities. However, the majority of clients in outpatient methadone/buprenorphine maintenance (54 percent) and in outpatient detoxification (53 percent) were in facilities operated by private for-profit organizations.
- More than three-quarters (76 percent) of clients in residential (non-hospital) treatment were in facilities operated by private non-profit organizations.

Substance Abuse Problem and Co-occurring Mental Health Disorders

Table 5.3. Facilities were asked to estimate the proportions of clients in treatment on March 31, 2010, by substance abuse problem treated (alcohol abuse only, drug abuse only, or both alcohol and drug abuse).

- On March 31, 2010, 43 percent of all clients were in treatment for both alcohol and drug abuse, 39 percent were in treatment for drug abuse only, and 18 percent were in treatment for alcohol abuse only.
  - By facility operation, the highest proportion of clients in treatment for abuse of both alcohol and drugs was in local government-operated facilities (51 percent). For abuse of drugs only, the highest proportion of clients was in private for-profit facilities (52 percent); for abuse of alcohol only, the highest proportion was in tribal-operated facilities (32 percent).
  - At facilities with a primary focus of substance abuse treatment services, 39 percent of clients were in treatment for abuse of both alcohol and drugs. Facilities with other foci of services reported very similar proportions of clients in treatment for abuse of both alcohol and drugs (49 to 52 percent).

Facilities were asked to estimate the proportion of clients in treatment with diagnosed co-occurring substance abuse and mental health disorders.

- On March 31, 2010, 43 percent of clients who were in treatment had a diagnosed co-occurring substance abuse and mental health disorder.
  - The highest proportions of clients with co-occurring substance abuse and mental health disorders were in Federal government-operated facilities (62 percent) and in facilities with a primary focus of mental health services (71 percent).

Clients under Age 18

Table 5.4. Facilities were asked how many clients in treatment on March 31, 2010 were under age 18.

- There were 81,863 clients under age 18 in substance abuse treatment on March 31, 2010, some 7 percent of the total 1,175,462 clients in treatment on that date.
- Clients under age 18 in substance abuse treatment on March 31, 2010, were more likely to be in private non-profit facilities than the general client population (66 vs. 53 percent, respectively) [Table 5.1]. Private for-profit facilities accounted for 32 percent of all clients in treatment but only 20 percent of clients under age 18.
- Fifty-six percent of clients under age 18 were in facilities with a primary focus of substance abuse treatment, compared to 66 percent of all clients [Table 5.1]. More than one third (38 percent) of clients under age 18 were in facilities whose primary focus was provision of a mix of substance abuse treatment and mental health services compared to 28 percent of the total client population.
- *Table 5.5*. The proportion of adolescents receiving each type of care was similar to the total treatment population [Table 5.2b]. Most (87 percent) were in outpatient treatment, 11 percent were in residential (non-hospital) treatment, and 2 percent were in hospital inpatient treatment.

Chapter 6

State Data

This chapter presents facility data by State and jurisdiction for March 31, 2010. Facilities operated by Federal agencies are included in the States in which the facilities are located, although these facilities may have clients from other States.

Table 6.1 details the 2010 N-SSATS response rate.

Tables 6.2 to 6.3 present data on treatment facility and client trends for 2006 to 2010.

- *Tables 6.4 to 6.23* present facility data for 2010.
- *Tables 6.24 to 6.31* present client data for 2010.

Table 6.32 presents the number of clients in treatment per 100,000 population aged 18 and over, according to substance abuse problem treated, by State or jurisdiction.

Survey Response

Table 6.1. The overall response rate for the survey was 91.4 percent. Thirty-two States or jurisdictions had response rates that equaled or surpassed the overall rate.

Trends

Tables 6.2a-b. California and New York had the largest numbers of both facilities and clients in treatment in every year from 2006 through 2010. On March 31, 2010, California had 12 percent of all facilities and 11 percent of all clients. New York had 7 percent of all facilities and 11 percent of all clients.

Florida and Illinois ranked 3rd or 4th in the total number of facilities from 2006 through 2010. Florida was 3rd or 4th for number of clients, but the number of clients in Illinois has been decreasing in recent years.

A core group of States (Michigan, Ohio, Pennsylvania, and Washington) generally ranked 5th to 10th in both the numbers of facilities and of clients from 2006 to 2010. Texas and Colorado are part of this group based on the number of facilities, and Maryland and Massachusetts are part of it based on the numbers of clients.

Clients in Treatment per 100,000 Population Aged 18 and Older

Table 6.32 and Figure 8. For the United States, there were 462 clients in treatment per 100,000 population aged 18 and over on March 31, 2010. The rate was highest for persons with both alcohol and drug abuse (194 per 100,000 population), followed by drug abuse only (182 per 100,000 population), and alcohol abuse only (86 per 100,000 population). *Figure 8* maps the rates of clients in treatment by State by quartile of rates—there are 12 or 13 States in each quartile.

Figure 8
Clients in Treatment per 100,000 Population Aged 18 and Over: March 31, 2010

[1] Facilities operated by Federal agencies are included in the States in which the facilities are located.

[2] A facility was ineligible if it had closed or was not providing substance abuse treatment or detoxification.

[3] Response rate calculated as *Total respondents* divided by *Total eligible respondents.*

[4] Excludes 369 facilities deemed out of scope for this report (188 non-treatment halfway houses, 114 solo practitioners not approved by the State agency for inclusion, and 67 facilities that treated incarcerated clients only). Also excludes 352 facilities whose client counts were included in or "rolled into" other facilities' counts and whose facility characteristics were not reported separately. See Chapter 1 for details.

[5] For the 13,339 facilities included in the report.

- - Quantity is zero.

[1] Survey reference dates were: March 31, 2006, March 30, 2007, and March 31, 2008-2010. See Appendix A for changes in the survey base, methods, and instruments that affect analysis of trends over time.

[2] Facilities operated by Federal agencies are included in the States in which the facilities are located.

[3] Excludes clients in facilities that did not respond to the question about clients under age 18 (in 2006, 3,471 total clients reported by 156 facilities; in 2007, 550 total clients reported by 34 facilities; in 2008, 911 total clients reported by 9 facilities; and in 2009, 346 total clients reported by 5 facilities; in 2010, all facilities responded to the question about clients under 18).

- - Quantity is zero.

‡ No facilities in this category.

[1] Facilities operated by Federal agencies are included in the States in which the facilities are located.

[2] Number of facilities sums to more than the *Total* column and percentages sum to more than 100 percent because a facility could treat more than one client substance abuse problem.

[3] Of 13,339 facilities, 807 facilities (6.1 percent) whose client counts were reported by another facility were not asked to respond to these questions, Percentages are based on the remaining 12,532 facilities.

[4] Fed. of Micronesia did not respond to this question.

- - Quantity is zero.

Wyoming	254	271	93.7	12	239	253	94.5	21	2	15	18	83.3	9

[1] Facilities operated by Federal agencies are included in the States in which the facilities are located.

[2] Of the 3,452 facilities reporting that residential (non-hospital) services were offered, 135 facilities (4.0 percent) whose client counts were reported by another facility were not asked to respond to this question. Of the remaining 3,317 facilities,123 facilities (3.6 percent) reported for themselves and other facilities. The rest, 3,194 facilities reported 102,827 designated beds. However, the utilization rate and designated beds per facility are based on the 3,046 facilities that reported both designated beds and clients. Of the 3,194 facilities that reported designated beds, 42 facilities were excluded from the utilization rate tabulations because they did not respond to this question, and 106 facilities were excluded because the number of designated beds was reported as zero.

[3] Of the 748 facilities reporting that hospital inpatient services were offered, 13 facilities (1.7 percent) whose client counts were reported by another facility were not asked to respond to this question, and 9 facilities (1.2 percent) reported for themselves and other facilities. The remaining 726 facilities reported 12,494 designated beds. However, the utilization rate and designated beds per facility are based on the 490 facilities that reported both designated beds and clients. Of the 726 facilities that reported designated beds, 53 facilities were excluded from the utilization rate tabulations because they did not respond to this question, and 183 facilities were excluded because the number of designated beds was reported as zero.

[4] Because substance abuse treatment clients may also occupy non-designated beds, utilization rates may be more than 100 percent.

- - Quantity is zero.

[1] Facilities operated by Federal agencies are included in the States in which the facilities are located.

[2] Number of facilities sums to more than the *Total* column because a facility could use more than one clinical/therapeutic approach.

[3] This question used a Likert scale response: *Always or Often, Sometimes, Never or Rarely, Not familiar with this approach.* This table combines responses of *Always or Often* and *Sometimes.*

- - Quantity is zero.

[1] Facilities operated by Federal agencies are included in the States in which the facilities are located.

[2] Percentages sum to more than 100 percent because a facility could offer services in more than one language.

[3] Percent of facilities based on facilities where languages services are provided by staff counselors only and by both staff counselors and on-call interpreters.

- - Quantity is zero.

[1] Facilities operated by Federal agencies are included in the States in which the facilities are located.

[2] Number of facilities sums to more than the *Total* column and percentages sum to more than 100 percent because a facility could provide detoxification for more than one substance abuse problem.

[3] Of 13,339 facilities, 2,501 facilities (19 percent) offered detoxification services.

- - Quantity is zero.

[1] Facilities operated by Federal agencies are included in the States in which the facilities are located.

[2] Counseling types sum to more than the *Total* column and percentages sum to more than 100 percent because clients could receive more than one type of counseling.

- - Quantity is zero.

[1] Facilities operated by Federal agencies are included in the States in which the facilities are located.

[2] Of the 1,175,462 total clients, 81,863 were under age 18 and are excluded from this tabulation. Also excluded are 20,536 clients in jurisdictions outside of the 50 States and the District of Columbia, and 2,661 clients in facilities that did not respond to the question about client substance problem treated. The categories for exclusion are not mutually exclusive.

Appendix A

N-SSATS Background

Survey History

N-SSATS has evolved from national survey efforts begun in the 1970s by the National Institute on Drug Abuse (NIDA) to measure the scope and use of drug abuse treatment services in the United States. The sixth of these surveys, conducted in 1976, introduced the data elements and format that have formed the core of subsequent surveys. These include organizational focus, service orientation, services available, clients in treatment by type of care, and hospital inpatient/residential capacity. The 1976 survey, called the National Drug Abuse Treatment Utilization Survey, was repeated in 1977 and 1978.

In 1979, the National Institute on Alcohol Abuse and Alcoholism (NIAAA) became a cosponsor of the survey, alcoholism treatment facilities were added, and the study was renamed the National Drug and Alcoholism Treatment Utilization Survey. This survey was repeated in 1980 and 1982. In 1984, a one-page version called the National Alcoholism and Drug Abuse Program Inventory was used. In 1987, the full version of the survey was reinstated and renamed the National Drug and Alcoholism Treatment Unit Survey (NDATUS). NDATUS was conducted annually from 1989 to 1993.

In 1992, with the creation of SAMHSA, responsibility for conducting the survey shifted to SAMHSA's Office of Applied Studies (now the Center for Behavioral Health Statistics and Quality). The survey was redesigned, and it was conducted annually as the Uniform Facility Data Set (UFDS) survey from 1995 to 1998. During these years, the survey was conducted by mail with telephone follow-up of non-respondents. The 1999 survey year was a transition year during which the survey was redesigned and an abbreviated telephone survey of treatment facilities was conducted. In 2000, a redesigned full mail survey was reinstated with telephone follow-up; it was renamed the National Survey of Substance Abuse Treatment Services (N-SSATS). The reference date for the annual survey had always been the end of September or beginning of October. After the 2000 survey, the reference date was changed to the end of March, and no survey was conducted during 2001.

In 2000, the use of an Internet-based questionnaire was tested, and beginning in 2002, all facilities were offered the opportunity to respond via the Internet.

N-SSATS in the Context of the Drug and Alcohol Services Information System (DASIS)

N-SSATS is one of the three components of SAMHSA's Drug and Alcohol Services Information System (DASIS). The core of DASIS is the Inventory of Substance Abuse Treatment Services (I-SATS), a continuously updated, comprehensive listing of all known substance abuse treatment facilities. The other component of DASIS is the Treatment Episode Data Set (TEDS), a client-level database of admissions to substance abuse treatment. Together, the components provide national- and State-level information on the numbers and characteristics of individuals admitted to alcohol and drug treatment programs and describe the facilities that deliver care to those individuals.

I-SATS is the list frame for N-SSATS. Facilities in I-SATS fall into two general categories and are distinguished by the relationship of the facility to its State substance abuse agency. These categories are described below.

Treatment facilities approved by State substance abuse agencies

The largest group of facilities (10,924 in 2010) includes facilities that are licensed, certified, or otherwise approved by the State substance abuse agency to provide substance abuse treatment. State DASIS representatives maintain this segment of I-SATS by reporting new facilities, closures, and address changes to SAMHSA. Some facilities are not licensed, certified, or otherwise approved by the State agency. Some private for-profit facilities fall into this category. The approved facility group also includes programs operated by Federal agencies, the Department of Veterans Affairs (VA), the Department of Defense, and the Indian Health Service. I-SATS records for Federally-operated facilities are updated annually through lists provided by these agencies.

Treatment facilities not approved by State substance abuse agencies

This group of facilities (2,415 in 2010) represents the SAMHSA effort since the mid-1990s to make I-SATS as comprehensive as possible by including treatment facilities that State substance abuse agencies, for a variety of reasons, do not fund, license, or certify. Many of these facilities are private for-profit, small group practices, or hospital-based programs. Most of them are identified through periodic screening of alternative source databases. (See *Special efforts to improve survey coverage* below.) State substance abuse agencies are given the opportunity to review these facilities and to add them to the State agency-approved list, if appropriate.

Survey Coverage

The use of I-SATS as the list frame for N-SSATS imposes certain constraints related to the unit of response and the scope of facilities included. In addition, the expansion of I-SATS in recent years to provide a more complete enumeration of substance abuse treatment facilities means that year-to-year comparisons of the numbers of facilities reporting to N-SSATS must be interpreted with caution.

Unit of response

N-SSATS is designed to collect data from each physical location where treatment services are provided. Accordingly, SAMHSA requests that State substance abuse agencies use the point of delivery of service (i.e., physical location) as the defining factor for a facility. It also requests that facilities be included in I-SATS, N-SSATS, and TEDS at the same administrative level so that record linkage among the three data sets is valid. Because of the different State administrative systems, however, there are some inconsistencies in implementation. For example, in some States, multiple treatment programs (e.g., detoxification, residential, and outpatient) at the same address and under the same management have separate State licenses. These are treated as separate by the State substance abuse agency, and are given separate I-SATS ID numbers. In other States, multiple sites are included as a single entity under a parent or administrative unit. In many of these cases, individual sites can report services data in N-SSATS, but client data are available only at a higher administrative level. Beginning in 1995, efforts have been made to identify facility networks and to eliminate duplicate reporting by networks. For most facilities, reporting level remains consistent from year to year.

However, beginning in 1998, an emphasis was placed on collecting minimum information from all physical locations, and this has resulted in an increase in the number of facilities.

Special efforts to improve survey coverage

The great majority of treatment facilities in I-SATS are administratively monitored by State substance abuse agencies. Therefore, the scope of facilities included in I-SATS is affected by differences in State systems of licensure, certification, accreditation, and the disbursement of public funds. For example, some State substance abuse agencies regulate private facilities and individual practitioners while others do not. In some States, hospital-based substance abuse treatment facilities are not licensed through the State substance abuse agency.

To address these differences, SAMHSA conducted a large-scale effort during 1995 and 1996 to identify substance abuse treatment facilities that, for a variety of reasons, were not on I-SATS. Some 15 source lists were considered, and facilities not on I-SATS were contacted to ascertain whether they provided substance abuse treatment. As expected, this yielded a number of hospital-based and small private facilities that were not on I-SATS. (These facilities were surveyed in 1995 and 1996, but they were not included in the published results of the survey until 1997.) Analysis of the results of this effort led to similar but more targeted updates before subsequent surveys. Potential new facilities are identified using data from the American Business Index, the annual American Hospital Association survey, and SAMHSA's biannual Inventory of Mental Health Organizations, the source lists that yielded the most new facilities in 1995 and 1996. Survey participants, who are asked to report all of the treatment facilities in their administrative networks, also identify additional facilities during the survey itself. All newly identified facilities are initially included as not approved by the State substance abuse agency. State substance abuse agencies are given the opportunity to review these facilities and to add them to the State agency-approved list, if appropriate.

Expansion of survey coverage to include all sites within networks at which treatment was provided yielded a net increase of about 2,600 facilities between 1997 and 1998. These additions were not necessarily new facilities, but were facilities not previously included in the survey as separate sites. The number of facilities reporting continued to increase in 1999, but at a slower pace, a net increase of 1,800 facilities. The increase between 1998 and 1999 was in large part because of the improved survey response rate (95 percent in 1999 vs. 90 percent in 1998). Between 2006 and 2010, the number of facilities remained constant, at between 13,330 and 13,800. The total number is deceptive, however. There was significant turnover as facilities closed and others opened. (See Table 2.1.)

Data collection

Until 1996, State substance abuse agencies distributed and collected the facility survey forms. Beginning in 1996, data collection was centralized; since that time, SAMHSA has mailed survey forms directly to and collected forms directly from the facilities and has conducted follow-up telephone interviews with the facility director or his/her designee.

Non-response

Beginning in 1992, SAMHSA expanded efforts to obtain information from non-responding facilities. A representative sample of non-respondents was contacted and administered an abbreviated

version of the survey instrument via telephone. In 1993 and later years, this effort was extended to all non-responding facilities. In 1997, a series of measures was introduced to enhance the survey response rate. These included advance notification and improved methods for updating address and contact information. Between 2004 and 2010, use of these methods and intensive telephone follow-up resulted in an annual follow-up rate (i.e., facilities in the sample either completed the survey or were determined to be closed or otherwise ineligible) of 92 to 96 percent. In 2010, the follow-up rate was 92.3 percent.

Exclusions

In 1997, facilities offering only DUI/DWI programs were excluded; these facilities were reinstated in 1998.

Facilities operated by the Bureau of Prisons (BOP) were excluded from the 1997 survey and subsequent surveys because SAMHSA conducted a separate survey of correctional facilities.[19] During that survey, it was discovered that jails, prisons, and other organizations treating incarcerated persons only were poorly enumerated on I-SATS. Beginning in 1999, these facilities were identified during the survey and excluded from analyses and public-use data files.

I-SATS and N-SSATS are designed to include specialty substance abuse treatment facilities rather than individuals. Solo practitioners are listed on I-SATS and surveyed in N-SSATS only if the State substance abuse agency explicitly requests that they be included.

Beginning in 2000, halfway houses that did not provide substance abuse treatment were included on I-SATS and in N-SSATS so that they could be listed in the *National Directory of Drug and Alcohol Abuse Treatment Programs* and on the Treatment Facility Locator (http://findtreatment.samhsa.gov). These facilities are excluded from analyses and public-use data files.

Changes in Survey Content

Table A.1 shows the major content areas for the survey from 1996 to 2010. Since 1992, SAMHSA has made adjustments each year to the survey design, both to minimize non-response and to include areas of emerging interest. For example, questions on the number of clients in treatment receiving buprenorphine were added in 2004. Questions about clinical/therapeutic methods, standard practices, and Access to Recovery grants were added in 2007.

There have also been changes within content areas. For example, in response to concerns about over-reporting of programs or groups for specific client types, the survey question was revised in 2003 to distinguish between those facilities that accepted specific client types and those facilities that offered specially designed programs or groups for that client type. As a result, the number and proportion of facilities offering programs or groups for each of the specified client types decreased. Surveys from 2003 and later are believed to more accurately represent the number and proportions of facilities providing programs or groups for the specified client types.

Appendix B

2010 N-SSATS Questionnaire

This Appendix contains the 2010 N-SSATS questionnaire that was mailed to all facilities. Facilities also had the option of responding to the questionnaire on the Internet. For those facilities that had not completed the survey after extensive follow-up efforts (see Chapter 1), the questionnaire was administered by computer-assisted telephone interview (CATI).

Of the responding eligible treatment facilities included in this report, 61 percent completed the questionnaire on the Internet, 26 percent completed it by mail, and 13 percent completed it by CATI [Table 1.1 and Figure 1].

Text versions of the Internet and CATI surveys are not included here because they are computer programs that contain complex skip patterns, are difficult to read, and are extremely long in text format.

SAMPLE

PLEASE REVIEW THE FACILITY INFORMATION PRINTED ABOVE.
CROSS OUT ERRORS AND ENTER CORRECT OR MISSING INFORMATION.

CHECK ONE

- ☐ Information is complete and correct, no changes needed
- ☐ All missing or incorrect information has been corrected

PREPARED BY MATHEMATICA POLICY RESEARCH

PLEASE READ THIS ENTIRE PAGE BEFORE COMPLETING THE QUESTIONNAIRE

Would you prefer to complete this questionnaire online? See the pink flyer enclosed in your questionnaire packet for the Internet address and your unique user ID and password. You can log on and off the website as often as needed to complete the questionnaire. When you log on again, the program will take you to the next unanswered question. If you need more information, call the N-SSATS helpline at 1-888-324-8337.

INSTRUCTIONS

- Most of the questions in this survey ask about "this facility." By "this facility" we mean the specific treatment facility or program whose name and location are printed on the front cover. If you have any questions about how the term "this facility" applies to your facility, please call 1-888-324-8337.
- Please answer ONLY for the specific facility or program whose name and location are printed on the front cover, unless otherwise specified in the questionnaire.
- Return the completed questionnaire in the envelope provided. Please keep a copy for your records.
- For additional information about this survey and definitions of some of the terms used, please visit our website at **http://info.nssats.com**.
- If you have any questions or need additional blank forms, contact:

MATHEMATICA POLICY RESEARCH

DRAFT

IMPORTANT INFORMATION

* **Asterisked questions**. Information from asterisked (*) questions will be published in SAMHSA's *National Directory of Drug and Alcohol Abuse Treatment Programs* and will be available online at **http://findtreatment.samhsa.gov**, SAMHSA's Substance Abuse Treatment Facility Locator.

Mapping feature in Locator. Complete and accurate name and address information is needed for the online Treatment Facility Locator so it can correctly map the facility location.

Eligibility for Directory/Locator. Only facilities designated as eligible by their state substance abuse office will be listed in the *National Directory* and online Treatment Facility Locator. Your state N-SSATS representative can tell you if your facility is eligible to be listed in the Directory/Locator. For the name and telephone number of your state representative, call the N-SSATS helpline at 1-888-324-8337.

SECTION A: FACILITY CHARACTERISTICS

Section A asks about characteristics of individual facilities and should be completed for this facility only, that is, the treatment facility or program at the location listed on the front cover.

1. Which of the following substance abuse services are offered by this facility at this location, that is, the location listed on the front cover?

MARK "YES" OR "NO" FOR EACH

	YES	NO
1. **Intake, assessment, or referral**	1 ☐	0 ☐
2. **Detoxification**	1 ☐	0 ☐
3. **Substance abuse treatment** *(services that focus on initiating and maintaining an individual's recovery from substance abuse and on averting relapse)*	1 ☐	0 ☐
4. **Any other substance abuse services**	1 ☐	0 ☐

2. Did you answer "yes" to detoxification in option 2 of question 1 above?

1 ☐ Yes

0 ☐ No → **SKIP TO Q.3 (TOP OF NEXT COLUMN)**

2a. Does this facility detoxify clients from . . .

MARK "YES" OR "NO" FOR EACH

	YES	NO
1. Alcohol	1 ☐	0 ☐
2. Benzodiazepines	1 ☐	0 ☐
3. Cocaine	1 ☐	0 ☐
4. Methamphetamines	1 ☐	0 ☐
5. Opiates	1 ☐	0 ☐
6. Other *(Specify:*_____ _____*)*	1 ☐	0 ☐

2b. Does this facility routinely use medications during detoxification?

1 ☐ Yes

0 ☐ No

→ **SKIP TO Q.4 (NEXT COLUMN)**

3. Did you answer "yes" to substance abuse treatment in option 3 of question 1?

1 ☐ Yes

0 ☐ No → **SKIP TO Q.34 (PAGE 11)**

***4. What is the primary focus of this facility at this location, that is, the location listed on the front cover?**

MARK ONE ONLY

1 ☐ Substance abuse treatment services

2 ☐ Mental health services

3 ☐ Mix of mental health and substance abuse treatment services *(neither is primary)*

4 ☐ General health care

5 ☐ Other *(Specify:*_____*)*

5. Is this facility operated by . . .

MARK ONE ONLY

1 ☐ A private for-profit organization

2 ☐ A private non-profit organization

→ **SKIP TO Q.6 (BELOW)**

3 ☐ State government

4 ☐ Local, county, or community government

5 ☐ Tribal government

→ **SKIP TO Q.8 (PAGE 2)**

6 ☐ Federal Government

5a. Which Federal Government agency?

MARK ONE ONLY

1 ☐ Department of Veterans Affairs

2 ☐ Department of Defense

3 ☐ Indian Health Service

4 ☐ Other *(Specify:*_____*)*

→ **SKIP TO Q.8 (PAGE 2)**

6. Is this facility a solo practice, meaning, an office with only one independent practitioner or counselor?

1 ☐ Yes

0 ☐ No

SAMPLE

7. Is this facility affiliated with a religious organization?

1 ☐ Yes

0 ☐ No

8. Is this facility a jail, prison, or other organization that provides treatment exclusively for incarcerated persons or juvenile detainees?

1 ☐ Yes → **SKIP TO Q.40 (PAGE 11)**

0 ☐ No

9. Is this facility located in, or operated by, a hospital?

1 ☐ Yes

0 ☐ No → **SKIP TO Q.10 (BELOW)**

9a. What type of hospital?

MARK ONE ONLY

1 ☐ General hospital *(including VA hospital)*

2 ☐ Psychiatric hospital

3 ☐ Other specialty hospital, for example, alcoholism, maternity, etc.

(Specify:_____)

***10. What telephone number(s) should a potential client call to schedule an intake appointment?**

1. (_____) _____ - _____ ext._____

2. (_____) _____ - _____ ext._____

11. Which of the following services are provided by this facility at this location, that is, the location listed on the front cover?

MARK ALL THAT APPLY

Assessment and Pre-Treatment Services

1 ☐ Screening for substance abuse

2 ☐ Screening for mental health disorders

3 ☐ Comprehensive substance abuse assessment or diagnosis

4 ☐ Comprehensive mental health assessment or diagnosis *(for example, psychological or psychiatric evaluation and testing)*

5 ☐ Outreach to persons in the community who may need treatment

6 ☐ Interim services for clients when immediate admission is not possible

Testing *(Include tests performed at this location, even if specimen is sent to an outside source for chemical analysis.)*

7 ☐ Breathalyzer or other blood alcohol testing

8 ☐ Drug or alcohol urine screening

9 ☐ Screening for Hepatitis B

10 ☐ Screening for Hepatitis C

11 ☐ HIV testing

12 ☐ STD testing

13 ☐ TB screening

Transitional Services

14 ☐ Discharge planning

15 ☐ Aftercare/continuing care

Ancillary Services

16 ☐ Case management services

17 ☐ Social skills development

18 ☐ Mentoring/peer support

19 ☐ Child care for clients' children

20 ☐ Assistance with obtaining social services (*for example, Medicaid, WIC, SSI, SSDI*)

21 ☐ Employment counseling or training for clients

22 ☐ Assistance in locating housing for clients

23 ☐ Domestic violence—family or partner violence services *(physical, sexual, and emotional abuse)*

24 ☐ Early intervention for HIV

25 ☐ HIV or AIDS education, counseling, or support

26 ☐ Hepatitis education, counseling, or support

27 ☐ Health education other than HIV/AIDS or hepatitis

28 ☐ Substance abuse education

29 ☐ Transportation assistance to treatment

30 ☐ Mental health services

31 ☐ Acupuncture

*32 ☐ Residential beds for clients' children

33 ☐ Self-help groups *(for example, AA, NA, SMART Recovery)*

34 ☐ Smoking cessation program

Pharmacotherapies

35 ☐ Antabuse®

36 ☐ Naltrexone

37 ☐ Campral®

38 ☐ Nicotine replacement

39 ☐ Smoking cessation medications (non-nicotine)

40 ☐ Medications for psychiatric disorders

41 ☐ Methadone

42 ☐ Buprenorphine – Subutex®

43 ☐ Buprenorphine – Suboxone®

SAMPLE

***12. Does this facility operate an Opioid Treatment Program (OTP) at this location?**

- *Opioid Treatment Programs are certified by SAMHSA's Center for Substance Abuse Treatment to use opioid drugs such as **methadone** in the treatment of opiate (narcotic) addiction.*

1 ☐ Yes

0 ☐ No → **SKIP TO Q.13 (BELOW)**

***12a. Are ALL of the substance abuse clients at this facility currently in the Opioid Treatment Program?**

1 ☐ Yes

0 ☐ No

***12b. Does the Opioid Treatment Program at this location provide maintenance services, detoxification services, or both?**

MARK ONE ONLY

1 ☐ Maintenance services

2 ☐ Detoxification services

3 ☐ Both

SAMPLE

13. For each type of counseling listed below, please indicate approximately what percent of the substance abuse clients at this facility receive that type of counseling as part of their substance abuse treatment program.

	MARK ONE BOX FOR EACH TYPE OF COUNSELING				
TYPE OF COUNSELING	NOT OFFERED	RECEIVED BY 25% OR LESS OF CLIENTS	RECEIVED BY 26% TO 50% OF CLIENTS	RECEIVED BY 51% TO 75% OF CLIENTS	RECEIVED BY MORE THAN 75% OF CLIENTS
1. Individual counseling.....	0 ☐	1 ☐	2 ☐	3 ☐	4 ☐
2. Group counseling.....	0 ☐	1 ☐	2 ☐	3 ☐	4 ☐
3. Family counseling	0 ☐	1 ☐	2 ☐	3 ☐	4 ☐
4. Marital/couples counseling	0 ☐	1 ☐	2 ☐	3 ☐	4 ☐

14. For each type of clinical/therapeutic approach listed below, please mark the box that best describes how often that approach is used at this facility.

- *Definitions of these approaches can be found at: http://info.nssats.com*

Clinical/Therapeutic Approaches	Mark one box for each approach			
	Not Familiar with this Approach	Never or Rarely	Sometimes	Always or Often
1. Substance abuse counseling	1 ☐	2 ☐	3 ☐	4 ☐
2. 12-step facilitation	1 ☐	2 ☐	3 ☐	4 ☐
3. Brief intervention	1 ☐	2 ☐	3 ☐	4 ☐
4. Cognitive-behavioral therapy	1 ☐	2 ☐	3 ☐	4 ☐
5. Contingency management/motivational incentives	1 ☐	2 ☐	3 ☐	4 ☐
6. Motivational interviewing	1 ☐	2 ☐	3 ☐	4 ☐
7. Trauma-related counseling	1 ☐	2 ☐	3 ☐	4 ☐
8. Anger management	1 ☐	2 ☐	3 ☐	4 ☐
9. Matrix model	1 ☐	2 ☐	3 ☐	4 ☐
10. Community reinforcement plus vouchers	1 ☐	2 ☐	3 ☐	4 ☐
11. Rational emotive behavioral therapy (REBT)	1 ☐	2 ☐	3 ☐	4 ☐
12. Relapse prevention	1 ☐	2 ☐	3 ☐	4 ☐
13. Other treatment approach *(Specify:* _____ _____*)*	1 ☐	2 ☐	3 ☐	4 ☐

DRAFT

15. Are any of the following practices part of this facility's standard operating procedures?

MARK "YES" OR "NO" FOR EACH

	YES	NO
1. Required continuing education for staff	1 ☐	0 ☐
2. Periodic drug testing of clients	1 ☐	0 ☐
3. Regularly scheduled case review with a supervisor	1 ☐	0 ☐
4. Case review by an appointed quality review committee	1 ☐	0 ☐
5. Outcome follow-up after discharge	1 ☐	0 ☐
6. Periodic utilization review	1 ☐	0 ☐
7. Periodic client satisfaction surveys conducted by the facility	1 ☐	0 ☐

***16. Does this facility, at this location, offer a specially designed program or group intended exclusively for DUI/DWI or other drunk driver offenders?**

1 ☐ Yes

0 ☐ No → **SKIP TO Q.17 (BELOW)**

***16a. Does this facility serve only DUI/DWI clients?**

1 ☐ Yes

0 ☐ No

***17. Does this facility provide substance abuse treatment services in sign language at this location for the hearing impaired *(for example, American Sign Language, Signed English, or Cued Speech)*?**

- *Mark "yes" if either a staff counselor or an on-call interpreter provides this service.*

1 ☐ Yes

0 ☐ No

***18. Does this facility provide substance abuse treatment services in a language other than English at this location?**

1 ☐ Yes

0 ☐ No → **SKIP TO Q.19 (NEXT COLUMN)**

18a. At this facility, who provides substance abuse treatment services in a language other than English?

MARK ONE ONLY

1 ☐ Staff counselor who speaks a language other than English → **GO TO Q.18b (BELOW)**

2 ☐ On-call interpreter (*in person or by phone*) brought in when needed → **SKIP TO Q.19 (NEXT COLUMN)**

3 ☐ BOTH staff counselor and on-call interpreter → **GO TO Q.18b (BELOW)**

***18b. In what other languages do staff counselors at this facility provide substance abuse treatment?**

MARK ALL THAT APPLY

American Indian or Alaska Native:

1 ☐ Hopi

2 ☐ Lakota

3 ☐ Navajo

4 ☐ Yupik

5 ☐ Other American Indian or Alaska Native language

*(Specify:*_____*)*

Other Languages:

6 ☐ Arabic

7 ☐ Any Chinese language

8 ☐ Creole

9 ☐ French

10 ☐ German

11 ☐ Hmong

12 ☐ Italian

13 ☐ Korean

14 ☐ Polish

15 ☐ Portuguese

16 ☐ Russian

0 ☐ No → **SKIP TO Q.21 (BELOW)**

***20a. Which of the following HOSPITAL INPATIENT services are offered by this facility?**

MARK "YES" OR "NO" FOR EACH

	YES	NO
1. Hospital inpatient detoxification (Similar to ASAM Levels IV-D and III.7-D, *medically managed or monitored inpatient detoxification)*	1 ☐	0 ☐
2. Hospital inpatient treatment (Similar to ASAM Levels IV and III.7, *medically managed or monitored intensive inpatient treatment)*	1 ☐	0 ☐

NOTE: ASAM is the American Society of Addiction Medicine.

***21. Does this facility offer RESIDENTIAL (non-hospital) substance abuse services at this location, that is, the location listed on the front cover?**

1 ☐ Yes

0 ☐ No → **SKIP TO Q.22 (TOP OF NEXT COLUMN)**

***21a. Which of the following RESIDENTIAL services are offered by this facility?**

MARK "YES" OR "NO" FOR EACH

	YES	NO
1. Residential detoxification (Similar to ASAM Level III.2-D, *clinically managed residential detoxification or social detoxification)*	1 ☐	0 ☐
2. Residential short-term treatment (Similar to ASAM Level III.5, *clinically managed high-intensity residential treatment, typically 30 days or less)*	1 ☐	0 ☐
3. Residential long-term treatment (Similar to ASAM Levels III.3 and III.1, *clinically managed medium- or low-intensity residential treatment, typically more than 30 days)*	1 ☐	0 ☐

***22. Does this facility offer OUTPATIENT substance abuse services at this location, that is, the location listed on the front cover?**

1 ☐ Yes

0 ☐ No → **SKIP TO Q.23 (BELOW)**

***22a. Which of the following OUTPATIENT services are offered by this facility?**

MARK "YES" OR "NO" FOR EACH

	YES	NO
1. Outpatient detoxification *(Similar to ASAM Levels I-D and II-D, ambulatory detoxification)*	1 ☐	0 ☐
2. Outpatient methadone maintenance	1 ☐	0 ☐
3. Outpatient day treatment or partial hospitalization (Similar to ASAM Level II.5, *20 or more hours per week)*	1 ☐	0 ☐
4. Intensive outpatient treatment (Similar to ASAM Level II.1, *9 or more hours per week)*	1 ☐	0 ☐
5. Regular outpatient treatment (Similar to ASAM Level I, *outpatient treatment, non-intensive)*	1 ☐	0 ☐

***23. Does this facility use a sliding fee scale?**

1 ☐ Yes

0 ☐ No → **SKIP TO Q.24 (PAGE 7)**

23a. Do you want the availability of a sliding fee scale published in SAMHSA's Directory/Locator? *(For information on Directory/Locator eligibility, see the inside front cover.)*

- *The Directory/Locator will explain that sliding fee scales are based on income and other factors.*

1 ☐ Yes

0 ☐ No

SAMPLE

***24. Does this facility offer treatment at no charge to clients who cannot afford to pay?**

1 ☐ Yes

0 ☐ No → **SKIP TO Q.25 (BELOW)**

24a. Do you want the availability of free care for eligible clients published in SAMHSA's Directory/Locator?

- *The Directory/Locator will explain that potential clients should call the facility for information on eligibility.*

1 ☐ Yes

0 ☐ No

25. Does this facility receive any funding or grants from the Federal Government, or state, county or local governments, to support its substance abuse treatment programs?

- *Do not include Medicare, Medicaid, or federal military insurance. These forms of client payments are included in Q.26 below.*

1 ☐ Yes

0 ☐ No

d ☐ Don't Know

***26. Which of the following types of client payments or insurance are accepted by this facility for substance abuse treatment?**

MARK "YES," "NO," OR "DON'T KNOW" FOR EACH

	YES	NO	DON'T KNOW
1. No payment accepted *(free treatment for ALL clients)*	1 ☐	0 ☐	d ☐
2. Cash or self-payment	1 ☐	0 ☐	d ☐
3. Medicare	1 ☐	0 ☐	d ☐
4. Medicaid	1 ☐	0 ☐	d ☐
5. A state-financed health insurance plan other than Medicaid	1 ☐	0 ☐	d ☐
6. Federal military insurance such as TRICARE or Champ VA	1 ☐	0 ☐	d ☐
7. Private health insurance	1 ☐	0 ☐	d ☐
8. Access To Recovery *(ATR)* vouchers	1 ☐	0 ☐	d ☐
9. Other	1 ☐	0 ☐	d ☐

(Specify:_____)

SECTION B: REPORTING CLIENT COUNTS

27. Questions 28 through 33 ask about the number of clients in treatment. If possible, report clients for this facility only. However, we realize that is not always possible. Please indicate whether the clients you report will be for . . .

MARK ONE ONLY

1 ☐ Only this facility → **SKIP TO Q.28 (PAGE 8)**

2 ☐ This facility plus others

3 ☐ Another facility will report this facility's client counts → **SKIP TO Q.34 (PAGE 11)**

27a. How many facilities will be included in your client counts?

THIS FACILITY	1
+ ADDITIONAL FACILITIES	
TOTAL FACILITIES	

27b. To avoid double-counting clients, we need to know which facilities are included in your counts. How will you report this information to us?

MARK ONE ONLY

1 ☐ By listing the names and location addresses of these additional facilities in the "Additional Facilities Included in Client Counts" section on page 12 of this questionnaire or attaching a sheet of paper to this questionnaire

2 ☐ Please call me for a list of the additional facilities included in these counts

SAMPLE

HOSPITAL INPATIENT CLIENT COUNTS

28. On March 31, 2010, did any patients receive HOSPITAL INPATIENT substance abuse services at this facility?

1 ☐ Yes

0 ☐ No → **SKIP TO Q.29 (NEXT COLUMN)**

28a. On March 31, 2010, how many patients received the following HOSPITAL INPATIENT substance abuse services at this facility?

- ***COUNT*** *a patient in* ***one service only****, even if the patient received both services.*
- ***DO NOT*** *count family members, friends, or other non-treatment patients.*

ENTER A NUMBER FOR EACH (IF NONE, ENTER "0")

1. Hospital inpatient detoxification _____
   (Similar to ASAM Levels IV-D and III.7-D, *medically managed or monitored inpatient detoxification)*
2. Hospital inpatient treatment _____
   (Similar to ASAM Levels IV and III.7, *medically managed or monitored intensive inpatient treatment)*

HOSPITAL INPATIENT TOTAL BOX ☐

28b. How many of the patients from the HOSPITAL INPATIENT TOTAL BOX were under the age of 18?

ENTER A NUMBER (IF NONE, ENTER "0")

Number under age 18 _____

28c. How many of the patients from the HOSPITAL INPATIENT TOTAL BOX received:

- *Include patients who received these drugs for detoxification or maintenance purposes.*

ENTER A NUMBER FOR EACH (IF NONE, ENTER "0")

1. Methadone dispensed at this facility _____
2. Buprenorphine dispensed or prescribed at this facility _____

28d. On March 31, 2010, how many hospital inpatient beds at this facility were specifically designated for substance abuse treatment?

ENTER A NUMBER (IF NONE, ENTER "0")

Number of beds _____

RESIDENTIAL (NON-HOSPITAL) CLIENT COUNTS

29. On March 31, 2010, did any clients receive RESIDENTIAL (non-hospital) substance abuse services at this facility?

1 ☐ Yes

0 ☐ No → **SKIP TO Q.30 (PAGE 9)**

29a. On March 31, 2010, how many clients received the following RESIDENTIAL substance abuse services at this facility?

- ***COUNT*** *a client in* ***one service only****, even if the client received multiple services.*
- ***DO NOT*** *count family members, friends, or other non-treatment clients.*

ENTER A NUMBER FOR EACH (IF NONE, ENTER "0")

1. Residential detoxification _____
   (Similar to ASAM Level III.2-D, *clinically managed residential detoxification or social detoxification)*
2. Residential short-term treatment _____
   (Similar to ASAM Level III.5, *clinically managed high-intensity residential treatment, typically 30 days or less)*
3. Residential long-term treatment _____
   (Similar to ASAM Levels III.3 and III.1, *clinically managed medium- or low-intensity residential treatment, typically more than 30 days)*

RESIDENTIAL TOTAL BOX ☐

SAMPLE

29b. How many of the clients from the RESIDENTIAL TOTAL BOX were under the age of 18?

ENTER A NUMBER (IF NONE, ENTER "0")

Number under age 18 _____

29c. How many of the clients from the RESIDENTIAL TOTAL BOX received:

- *Include clients who received these drugs for detoxification or maintenance purposes.*

ENTER A NUMBER FOR EACH (IF NONE, ENTER "0")

1. Methadone dispensed at this facility _____
2. Buprenorphine dispensed or prescribed at this facility _____

29d. On March 31, 2010, how many residential beds at this facility were specifically designated for substance abuse treatment?

ENTER A NUMBER (IF NONE, ENTER "0")

Number of beds _____

OUTPATIENT CLIENT COUNTS

30. During the month of March 2010, did any clients receive OUTPATIENT substance abuse services at this facility?

1 ☐ Yes

0 ☐ No → **SKIP TO Q.31 (PAGE 10)**

30a. How many clients received each of the following OUTPATIENT substance abuse services at this facility during March 2010?

- ***ONLY INCLUDE*** *clients who received treatment in March* ***AND*** *were still enrolled in treatment on March 31, 2010.*
- ***COUNT*** *a client in* ***one service only****, even if the client received multiple services.*
- ***DO NOT*** *count family members, friends, or other non-treatment clients.*

ENTER A NUMBER FOR EACH (IF NONE, ENTER "0")

1. Outpatient detoxification (Similar to ASAM Levels I-D and II-D, *ambulatory detoxification)* _____
2. Outpatient methadone maintenance *(Count methadone clients on this line only)* _____
3. Outpatient day treatment or partial hospitalization (Similar to ASAM Level II.5, *20 or more hours per week)* _____
4. Intensive outpatient treatment (Similar to ASAM Level II.1, *9 or more hours per week)* _____
5. Regular outpatient treatment (Similar to ASAM Level I, *outpatient treatment, non-intensive)* _____

OUTPATIENT TOTAL BOX ☐

SAMPLE

30b. How many of the clients from the OUTPATIENT TOTAL BOX were under the age of 18?

ENTER A NUMBER (IF NONE, ENTER "0")

Number under age 18 _____

30c. How many of the clients from the OUTPATIENT TOTAL BOX received:

- *Include clients who received these drugs for detoxification or maintenance purposes.*

ENTER A NUMBER FOR EACH (IF NONE, ENTER "0")

1. Methadone dispensed at this facility _____
2. Buprenorphine dispensed or prescribed at this facility _____

30d. OUTPATIENT CAPACITY. Without adding staff or space, what was the maximum number of clients who could have been enrolled in outpatient substance abuse treatment on March 31, 2010?

OUTPATIENT CAPACITY [ ]

Number should not be less than the total in the OUTPATIENT TOTAL BOX at the bottom of page 9.

ALL SUBSTANCE ABUSE TREATMENT SETTINGS

Including Hospital Inpatient, Residential (non-hospital) and/or Outpatient

31. Some clients are treated for both alcohol and drug abuse, while others are treated for only alcohol or only drug abuse. Approximately what percent of the substance abuse treatment clients enrolled at this facility on March 31, 2010, including hospital inpatient, residential, and/or outpatient, were being treated for . . .

1. BOTH alcohol AND drug abuse _____%
2. ONLY alcohol abuse _____%
3. ONLY drug abuse _____%

TOTAL 100 %

32. Approximately what percent of the substance abuse treatment clients enrolled at this facility on March 31, 2010, had a diagnosed co-occurring mental and substance abuse disorder?

PERCENT OF CLIENTS (IF NONE, ENTER "0") [ ] %

33. Using the most recent 12-month period for which you have data, approximately how many substance abuse treatment ADMISSIONS did this facility have?

- **OUTPATIENT CLIENTS:** *Count admissions into treatment, not individual treatment visits. Consider an admission to be the initiation of a treatment program or course of treatment. Count any re-admission as an admission.*
- **IF THIS IS A MENTAL HEALTH FACILITY:** *Count all admissions in which clients received substance abuse treatment, even if substance abuse was their secondary diagnosis.*

NUMBER OF SUBSTANCE ABUSE ADMISSIONS IN A 12-MONTH PERIOD [ ]

SAMPLE

SECTION C: GENERAL INFORMATION

Section C should be completed for this facility only.

***34. Does this facility operate a halfway house or other transitional housing for substance abuse clients at this location, that is, the location listed on the front cover?**

1 ☐ Yes

0 ☐ No

35. Is this facility or program licensed, certified, or accredited to provide substance abuse services by any of the following organizations?

- *Do not consider personal-level credentials or general business licenses such as a food service license.*

MARK "YES," "NO," OR "DON'T KNOW" FOR EACH

	YES	NO	DON'T KNOW
1. State substance abuse agency	1 ☐	0 ☐	d ☐

The information you provide will be protected to the fullest extent allowable under the Public Health Service Act, 42 USC Sec 501(n). This law permits the public release of identifiable information about an establishment only with the consent of that establishment and limits the use of the information to the purposes for which it was supplied. With the explicit consent of eligible treatment facilities, information provided in response to survey questions marked with an asterisk will be published in SAMHSA's *National Directory of Drug and Alcohol Abuse Treatment Programs* and the Substance Abuse Treatment Facility Locator. Responses to non-asterisked questions will be published only in statistical summaries so that individual treatment facilities cannot be identified.

Thank you for your participation. Please return this questionnaire in the envelope provided.
If you no longer have the envelope, please mail this questionnaire to:

MATHEMATICA POLICY RESEARCH
ATTN: RECEIPT CONTROL - Project 06667
P.O. Box 2393
Princeton, NJ 08543-2393

Public burden for this collection of information is estimated to average 40 minutes per response including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden to SAMHSA Reports Clearance Officer, Room 7-1044, 1 Choke Cherry Road, Rockville, MD 20857. An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB number for this project is 0930-0106.

Appendix C

Item Response and Imputation for N-SSATS 2010

This Appendix contains Table C.1, a list of item response rates for questions from the N-SSATS 2010 questionnaire. Item non-response was minimized through careful editing and extensive follow-up.

The item response rate for the 2010 N-SSATS averaged 98.6 percent across 192 separate response categories.

Item non-response was 10 percent or more for only 5 of 192 separate response categories.

Imputation was conducted for 3 instances of client values and 257 cases of admissions values for facilities that were missing counts for one or more service types (i.e., hospital inpatient, residential [non-hospital], or outpatient treatment, and their subcategories). An imputed value for a service type was assigned if a facility reported that it provided the service but had not provided a client or admissions count for the service.

Imputation was also conducted for client count values identified as outliers. Outliers were defined as cases where the number of clients reported exceeded the 75th percentile of the distribution of client counts for all cases of one of the main service types. The 2010 value was compared with the previous year's value. If the difference exceeded 1.8 times the 2009 value in either direction, the value was imputed.

When available, client values and admissions values from up to five previous surveys were used to impute the missing counts. If historical data were not available, the average client value, stratified by State and facility operation, was used to impute the missing client counts. If a facility were unique in its State and facility operation category, values were imputed using average values for the State only. Missing client counts were imputed for each type of service (i.e., hospital inpatient detoxification, hospital inpatient treatment, residential [non-hospital] detoxification, etc.) and summed to the larger service type totals (total hospital inpatient clients, total residential [non-hospital] clients, and total outpatient clients), and finally to total clients.
