**Note:**

Admission Rate= number of admissions divided by total served during the year

US Admissions During Year uses data from states reporting data only. States are only included in "US Total Served" if they also reported data on admissions.

US Total Served During Year is calculated using data in URS/DIG Table 3.

This table uses data from URS/DIG Table3 and 6.

**Table 3 State Notes:**

Age See General Notes  
 Overall See General Notes  
 Gender None

**Table 6 State Notes:**

Hospital Data includes inpatient hospital stays in State hospital Adult Mental Health and Secure/Forensic programs. No C&A programs exist in the state hospitals.  
 Other Inpatient Data for Other Psychiatric Inpatient is maintained in multiple databases and cannot be incorporated into total unduplicated consumers served from other tables.  
 Residential Data includes PRTF consumers. Age determined at admission or beginning of report period.  
 Community Data includes authorizations for any community service where PDC = AMH/CAMH or SDC = MH. See General Notes for more information.  
 Overall For purposes of this table, consumers are reported in the age category of the first contact within the particular service grouping. See General Notes for more information.

General Notes FY 2014

Georgia

URS Table Number	General Notes
All	Unless otherwise specified, data in all tables includes consumers served in the following settings: (1) State hospital inpatient stays in Adult Mental Health and Secure (Forensics) programs. Data for hospital outpatients and non-admits (including 23-hour observation) is not included; however, hospital-operated community services are included with other community services; (2) authorizations for residential stays in Psychiatric Residential Treatment Facilities (PRTFs); and (3) authorizations for community services for consumers having at least one authorization with Primary or Secondary Diagnostic Category of mental health.
All	Age: unless otherwise specified the age reported is the consumer's age at the first date active in the state mental health system during the state fiscal year. Race: "More Than One Race Reported" includes Multi-Racial. "Race Not Available" includes "Other Single Race", "Unknown", and "not reported". Hispanic/Latino Origin: "Not available" includes "Unknown" and "not reported".
4	Table 4 reports data for community consumers only. Employment status reported in Table 4 is the latest available for the state fiscal year. Employment status is collected at admission, at discharge, at re-authorization of services, and at addition of new services to an existing authorization. Employed includes Competitive Employment and Community Based Non-Competitive Employment. Unemployed includes Unemployed but Available for Work = Yes. "Not in Labor Force" includes Facility Based Non-Competitive Employment and Unemployed but Available for Work = No. "Not available" includes Not Available and Not Reported.
5A & 5B	Medicaid only includes any consumer in Table 2A for whom a Medicaid MRO/PRTF claim was paid, but no state service encounter was reported. Non-Medicaid Sources only includes any consumer in Table 2A for whom no Medicaid claim was paid, but a state service encounter was reported. People Served by Both Medicaid and Non-Medicaid includes any consumer in Table 2A for whom both a Medicaid claim was paid and a state service encounter was reported. Medicaid Status Not Available includes all the remaining consumers in Table 2A.
6	Community Programs: consumers served at beginning of year includes any "Registration", "New Episode", or "Ongoing" request that was active on first day of fiscal year. Community consumers admitted during the report period were identified by "Registration" and "New Episode" requests which had a start date during the fiscal year.
6	Other Psychiatric Inpatients: the state began contracting with Private Psychiatric Inpatient Facilities and the data is maintained in a different database. It is not possible to incorporate these individuals into the overall consumers served count as there is no mechanism to unduplicated across systems.
6	A state hospital closed in December 2013 reducing the total number of beds/admissions. The reduction in state hospital beds and consumers discharged to community based services has resulted in a decrease in total admissions to state psychiatric hospitals during the year.
6	The implementation of community based alternatives (waivers) has reduced the number of individuals served in PRTF resulting in a decrease in the total admissions to residential treatment centers during the year.
9, 11, 19A & 19B	Survey data includes community consumers only. Child & Adolescent (C&A) Surveys - the contractor hired to administer the C&A survey this fiscal year with family surveyors was not able to conduct the expected surveys. Due to low availability of consumers for face to face responses no surveys from the broader C&A population were included. C&A Surveys using the YSS-F are required as part of the participation in a Targeted Care Management program (CBAY) thus these were the only surveys included this year.
12, 14A, 14B, 16 & 17	Community consumers may receive authorization for a core bundle of services using a simplified authorization request type called "Registration". On these authorization requests, consumers were assigned a diagnostic category of "Mental Health" but they were not assigned specific DSM diagnoses; therefore, consumers whose only request type active during the state fiscal year was Registration cannot be designated as SMI or SED. This yields reported counts and percentages of SMI/SED consumers that are artificially low because no "Registration-only" consumers are included. Such consumers could not be included in: Table 12 (SMI-SED percentages of total served and SMI-SED percentages with co-occurring substance abuse), Tables 14A/14B (total SMI-SED consumers served), Table 15A (total SMI-SED consumers served by treatment setting), Table 16 (SMI-SED consumers receiving specified services) and Table 17 (SMI consumers receiving specified services).

URS Table Number	General Notes
15	Table 15 reports data for community consumers only. Living Situation reported in Table 15 is the latest available for the state fiscal year. It is collected at admission, at discharge, at re-authorization of services, and at addition of new services to an existing authorization. Residential Care includes living situations Residential Care and PRTF where the consumer's age was >= 18. Children's Residential Treatment includes living situations Residential Care and PRTF where the consumer's age was <18. Crisis Residence is not included among the response options for living situation in Georgia's information system. "Not available" includes living situation Not Reported.
16	Total unduplicated number of adults with SMI and total unduplicated number of children with SED includes only community consumers. See also note for tables 12, 14A, 14B, 16, and 17.
16	In February 2014, the Medicaid authority implemented managed care for youth in foster care and began transitioning the majority of youth served by DBHDD resulting in a decrease in the total number of consumers receiving family functional therapy.
20A/20B	This table presents duplicated counts of consumers discharged from a state hospital Adult Mental Health inpatient programs between 1/1/2013 and 12/31/2013, and those consumers' subsequent readmissions within 30/180 days of discharge which occurred during the state fiscal year. Age: data is based on the consumer's age at discharge. Race: "Race Not Available" includes "Other Single Race".
