**STATE Hawaii**

	<b>Expenditures: State</b>	<b>Percent of Total Expenditures: State</b>	<b>Expenditures: U.S.</b>	<b>Percent of Total Expenditures: U.S.</b>
State Hospitals-Inpatient	\$59,800,000	33%	\$8,891,294,399	23%
Other 24-Hour Care	\$47,400,000	27%	\$7,208,595,272	19%
Ambulatory/Community	\$63,700,000	36%	\$21,188,869,172	56%
Total	\$178,800,000	-	\$38,098,637,217	-

**Note:**

Other 24-Hour Care includes state psychiatric hospital and community based other 24-hour as well as community based inpatient expenditures.

Ambulatory/Community includes expenditures for less than 24-hour care services provided at state psychiatric hospitals. It excludes community based other-24 hour and community based inpatient expenditures.

Total also includes additional SMHA Expenditures for research, training, administration, and other central and regional office expenditures.

Data from NRI's Funding Sources and Expenditures of State Mental Health Agencies, FY 2013 reports - Table 18 "SMHA-Controlled Expenditures for Mental Health Services."

U.S. totals are based on 50 states reporting.

More information on the State Mental Health Agency's Revenues & Expenditures as well as State Footnotes can be found on the NRI website:

Hawaii

URS Table Number	General Notes
4	For 2014 reporting, more providers reported employment data resulting in an increase in the total number of consumers employed, unemployed, and not in labor force from 2013. Employment status is self-reported.
5A	During 2013, approximately half of the Adult Mental Health Division population funding stream was moved to Department of Human Services (DHS) and additional consumers served were moved over to DHS during 2014. This has resulted in a decrease in the total number of consumers with Medicaid funding from 2013.
6	The decrease in the total number of consumers served in community programs at the beginning of the year and the total admission to community programs during the year is a result of the transition of consumers billed under DHS/Community Care Services.
6	The decrease in average LOS of adults discharged from state hospitals is due to small number of consumers with long lengths of stay. Therefore the median is a better indicator of central tendency in length of stay.
9 & 11	For 2014 reporting, a different methodology was used resulting in an increase in the percent of children/adolescents reporting positively about functioning and outcomes.
14A	For 2013 reporting, consumers reported a single race although they are actually multiracial. This has resulted in a decrease in the total number of Asian, Native Hawaiian/Other Pacific Islander, and white consumers with SMI/SED, and an increase in the total number of multiracial consumers with SMI/SED. In Hawaii, consumers might identify as one single race although they are of mixed race. The demographic information reported has been cross checked with another dataset.
16	Providers have decreased the number of beds due to the lack of financial viability that supported housing cost structuring provides resulting in a decrease in the total number of clients receiving supported housing services.
17	Hawaii does not provide Family Psychoeducation nor collects the other data points in Table 17. However efforts are under way to track the other data fields.
19A	Data on arrests from the children's mental health MIS have just begun to be captured in the middle of the State fiscal year (January), and has not rolled out to the whole state yet. Therefore, data is limited this year, but will be fully implemented statewide by the end of FY 2015. Also, since this data is not collected prior to beginning services, data will not be available for "T1" for children/youth who began mental health services during the past 12 months.
19B	Data on school attendance from the children's mental health MIS have just begun to be captured in the middle of the State fiscal year (January), and has not rolled out to the whole state yet. Therefore, data is limited this year, but will be fully implemented statewide by the end of FY 2015. Also, since this data is not collected prior to beginning services, data will not be available for "T1" for children/youth who began mental health services during the past 12 months.
