Iowa

URS Table Number	General Notes
All	Iowa implemented the Iowa Health and Wellness Plan on 1/1/2014. Due to the implementation of this plan, there is a resulting increase in the number of people served statewide and a resulting decrease in the number of people who are served by the County service system.
2B, 5B, 14B & 21	For people served where ethnicity is not collected, these people are reported as ethnicity "Not Available"
4 & 15	Due to the implementation of the Iowa Health and Wellness Plan, there is a decrease in the number of people served by the county system. Information regarding employment status and living arrangement that was previously supplied from county data submissions is now not as robust as in prior years due to the shift in service system for people previously served by the counties.
5A	Due to the implementation of the Iowa Health and Wellness Plan, there is a decrease in the number of people served by the county system, which caused a shift in the number of consumers served by non-Medicaid funding as well as an increase in the total number of people served due to Medicaid expansion.
6	The increase in Average LOS of children (in facility < 1 year) who were state hospital residents at the end of the year and total Number of consumers served in Residential Treatment Centers at the beginning of the year and Total Admissions to Residential Treatment Centers During the Year are due to the small numbers of consumers (17 in each year), we feel this sample is too small to draw trending conclusions. In our analysis of the data, three individuals had significantly lower lengths of stay in 2013, which brought down the overall average in 2013.
11	All individuals funded by the Iowa Medicaid Plan and at community mental health centers are given the option to complete the survey. Regarding the decrease in positive responses, an individuals' decision to respond to the survey is voluntary. The overall response rate has decreased in a similar percentage.
12	Data gathered does not identify co-occurring substance abuse and mental illness
14A	A significant number of data records that were updated in our source data systems to "American Indian/Alaska Native" or "Native Hawaiian/Other Pacific Islander" in the past year. We are interpreting these updates as corrections of past data errors and differences between data collection systems that are merged for this reporting.
21	The MHDS system has been developing more intense services for people with serious mental illness which may contribute to reductions in hospital readmissions.
