URS Table Number	General Notes
4/4A	Employment status is collected for all KS adult mental health consumers at admission. Monthly updates to employment status are collected for adults with SPMI while they are receiving specialized services. Totals represent the employment status of consumers admitted or updated during FY14.
11	The Kansas Department for Aging and Disability Services (formerly Social and Rehabilitation Services) contracts with the Kansas Foundation for Medical Care, Inc. (KFMC) to conduct the Kansas Mental Health Consumer Perception Surveys for KanCare Managed Care members. Results from the current survey were not available in time to be included in the FY14 URS reporting. Information provided in URS table 9 and 11 represents the FY13 survey results. In conducting the surveys, KFMC used the Centers for Medicare & Medicaid Services (CMS) "Administering Surveys" protocol and worksheet. The Mental Health Statistics Improvement Program (MHSIP) Youth Services Survey (YSS), Youth Services Survey for Families (YSS-F) and Adult Consumer Survey tools were selected for use in the project. Confidence levels: Because the agreement rates tended to be high and many of the denominators were below 100, the "Exact Method" (also known as the Clopper-Pearson method) was used.
15	Living situation is collected for all KS mental health consumers at admission. Monthly updates to living situation are collected only for adults with SPMI and children with SED while they are receiving specialized services.
15	Kansas experienced an increase of 19% in the number of homeless individuals served compared to FY13. Although nearly all CMHCs experienced an increase in the number of homeless individuals served during FY14, the primary cause is due to a series of successful outreach activities by CMHCs in our urban counties that took place during this fiscal year.
16	The data reported for Supported Employment represent those consumers that have received services based on broadly defined federal guidelines. Kansas collects data on a subset of the population receiving Supported Employment Services from CMHC staff trained using the Dartmouth toolkit and monitored for fidelity through a contract between SRS/Mental Health and the University of Kansas. For FY2014, there were 637 adults with SPMI who received Supported Employment Services following this monitoring protocol.
17	The data reported for Integrated Treatment for Co-occurring Disorders (MH/SA) represent those adult consumers that have received services based on broadly defined federal guidelines. Kansas collects data on a subset of the population receiving Integrated Treatment for Co-occurring Disorders from CMHC staff trained using the Dartmouth toolkit and monitored for fidelity through a contract between SRS/Mental Health and the University of Kansas. For FY2014, there were 972 adults with SPMI who received Integrated Treatment for Co-occurring Disorders following this monitoring protocol.
