Pathways	PO Box 790, Ashland, KY 41105	Sub-State Planning Area	\$212,432	\$224,295

Kentucky

URS Table Number	General Notes
14A	<p>SMI Definition: As defined in KRS 210.005, "chronic" (mental illness) means that clinically significant symptoms of mental illness have persisted in the individual for a continuous period of at least two (2) years, or that the individual is presently and significantly impaired in his ability to function socially or occupationally or both; and 2. Have a diagnosis of a major mental disorder (other than substance abuse of mental retardation as the sole diagnosis) as included in the DSMIIIR classification under Schizophrenic Disorder, Psychotic Disorders, Mood Disorder, Organic Mental Disorders or Delusional (paranoid) Disorders. Personality disorders shall be considered only when information and history depict that the individual exhibits persistent disability and significant impairment in major areas of community living.</p>
14A	<p>SED Definition: A child who is under age 18 or under age 21 and was receiving mental health services prior to age 18 and the services must be continued for therapeutic benefit; and 2. Has a clinically significant disorder of thought, mood, perception, orientation, memory, or behavior that is listed in the current edition of the American Psychiatric Association's Diagnostic and Statistical Manual of Mental Disorders; and presents substantial limitations which have persisted for at least one year, or are judged by a mental health professional to be at high risk of continuing for one year without professional intervention in at least two of these five areas: Self Care, Interpersonal Relationships, Family Life, Self-Direction, Education or is a Kentucky resident and is receiving residential treatment for an emotional disability through the interstate compact; or has been removed from the home by the Department for Community Based Services (Kentucky's child welfare agency) and has been unable to maintained in a stable setting due to a behavioral or emotional disability.</p>
14A	<p>Total number of multi-racial consumers with SMI/SED increased 51% since FY13 can be explained: the data for this field is self-report. It is noticeable that in this same year that the # of cl reporting multi-race increased and the number of Client Level reporting white decreased. The racial distribution in the state may be changing or perceived acceptance of multi-race has increased. It is possible that either a) the racial distribution in the state is changing to be less predominantly white and more multi-racial or b) the perceived culture of the intake process is such that Client Level is more comfortable reporting multi-race.</p>
15	<p>The decrease in the total number of consumers in jail may be caused by either a) reduced state general funds allocated to the CMHCs may have decreased CMHC ability to serve the incarcerated number or b) the state-funded jail-diversion programs have increased their efficacy. It is notable that there was also a change in the homeless living arrangement served between 2013 and 2014 (a decrease of 11%). The latter may be similar effect caused by the reduction of state general funds allocated to CMHCs.</p>
