URS Table Number	General Notes
3 & 4	Community service data for Table 3 obtained from a combination of MACSIS and MITS. Table 4 used the combined MACSIS/MITs file to match with our OHBH system, which holds employment and living arrangement data. If the client received 100% Medicaid funding, they would only be found in the MITS system. This causes problems when trying to match every client in OHBH. Additionally, since Ohio MHAS uses extracts from multiple databases, there are likely to be small differences between the databases.
4 & 15	The number of mental health clients reported voluntarily in the OH-BH (Ohio TEDS) database is 25% less than last year while the number of mental health clients reported in the Medicaid claims database (who received services) has increased. The Medicaid claims data does not have employment and living situation data. OhioMHAS' evaluation and IT staff had been working to adapt OH-BH to report mental health outcomes to replace the Ohio Mental Health Consumer Outcome System. The coding and database was developed and piloted. In 2014, Ohio MHAS' Office of Information Systems determined that the data system needed to be rebuilt prior to rolling out statewide reporting of mental health data in OH-BH. Due to competing IT priorities created by consolidating two state agencies, statewide mental health reporting of TEDS data is on hold until the OH-BH data system is rebuilt. We are expecting to have the OH-BH system ready by July 2015 to report SFY 2016 data.
5A	Ohio has a 30% increase in the number of consumers with both Medicaid & non-Medicaid funding from 2013 to 2014 due to (1) Medicaid expansion; (2) Medicaid Health Homes for persons with SPMI (Serious & Persistent Mental Illness) which is mostly adults, but includes some children; and (3) people going off Medicaid as the recession ends.
6	Ohio's total number of consumer served in other psychiatric inpatient settings decreased by 33% because previous year's calculations were not restricted to only those community psychiatric facilities licensed by Ohio MHAS; the larger number represented all Medicaid hospitalizations. The 2014 number represents only Ohio MHAS licensed beds.
6	The average LOS of adults in facility less than 1 year who were state hospital residents increased from 29 last year to 79 this year. The number this year includes both "civil and forensic on rolls clients" in state hospital while in FY2013 "civil on rolls clients only" in state hospital were included.
6	The total number of clients served in and the total admissions to residential treatment centers is reported for the first time this year.
8	Planning Council is from CFPT (Consumer & Family Partnership Team (maintained by Barb Johnson)). Other activities are a breakout of all non-direct expenditures with type of indirect program expenditures determined by the Planner. The Planner determines whether the activity is direct, technical assistance and training, or other based on information from the Block Grant Plan and information from program staff.
8 & 10	Ohio's 2014 award total is split between Tables 8 and 10.
9	Percent of adults reporting positively about functioning increased from 50% to 60%. It may be a fluke of the sampling, which was randomized in both years. It may represent an improvement in functional outcomes.
10	All expenditures for Boards are reported as direct except for evaluation of the ECMH program (Cuyahoga) and Forensic Coordinating Center of Excellence (TA) which is backed out. A formula of percent children and percent adults based on fiscal breakout of SFY 2013.
12	Ohio did not report this data last year, but plans to report it next year. Ohio MHAS' data warehouse is not working which makes this very labor intensive this year, since this requires combining databases. It will require less staff time to report next year when the data warehouse is operating.
12	Percent of adults meeting federal definition of SMI and percent of children/adolescents meeting federal definition of SED data are not available.
15A	A change in IT staff resulted in this table not being run.
16	Data for Functional Family Therapy is no longer available from a consultant.
16 & 17	Change in ACT & IDDT Reporting: as a result of the Coordinating Centers of Excellence for ACT & Integrated Dual Diagnosis Treatment (IDDT) Teams merging, many treatment teams are combined ACT/IDDT teams. Data for these combined teams is being reported under IDDT for the first time this year. This reflects some changes in actual practice in Ohio.
