Note:

US totals are based on states reporting.

This table uses data from URS/DIG Table 15.

US totals are calculated uniquely for each data element based on only those states who reported numerator (clients served) data.

State Notes:

Counts are based on a client file that includes all CMH clients for FY2014. A small number of individuals may be counted more than once due to movement among community programs or movement between hospitals and community.

Vermont

URS Table Number	General Notes
3	Counts are based on a client file that includes all CMH clients, state hospital clients, and involuntary inpatient clients for FY2014. A small number of individuals may be counted more than once due to movement among community programs or movement between hospitals and community.
6	The Vermont State Hospital (VSH) had an emergency closure in August 2011. Vermont opened a new State Hospital facility in January 2013, with 8 beds, which was a reduction from the 54 beds at the former VSH. Vermont is continuing to use other designated hospitals for patient care which explains increases in consumers in other psychiatric settings. The reduction in beds (54 to 8) for our new facility results in smaller numbers for State Hospital clients.
8	The FY13 data was not accurate resulting in an increase in the total MHBG expenditures for non-direct service activities in FY14. There was a large grant related to implementing a new framework for folks with first-episode psychosis. The correct number for FY2013 was \$105,660.
19A	Data based on PPE of the overlap between mental health services databases and a statewide arrest database provided by the Vermont Department of Children and Family's child custody database. Adult arrest data from the Vermont Department of Public Safety was not available for FY14.
20A, 20B	In FY14, Vermont had an eight bed State Hospital facility operating at 100% capacity. Discharges from the State Hospital that are readmitted would likely go to a designated hospital in our decentralized system of care.
