This data file was prepared for the Substance Abuse and Mental Health Services Administration (SAMHSA), U.S. Department of Health and Human Services (HHS), by Synectics for Management Decisions, Inc. (Synectics), Arlington, Virginia. Data collection was performed by Mathematica Policy Research (Mathematica), Princeton, New Jersey.

Terms of Use

These data are distributed under the following terms of use. By continuing past this page, you signify your agreement to comply with the requirements as stated below:

Privacy of Study Respondents

Unauthorized disclosure of identifiable information violates the pledge given to the providers of the information. Disclosure of identifiable information may also be punishable under federal law.

Therefore, users of data agree:

- To use these datasets solely for research or statistical purposes and not for reidentification of specific study respondents.
- To make no use of the identity of any study respondents discovered inadvertently and to report any such discovery to SAMHSA (SAMHSA_support@smdi.com).

Public Domain Notice

All material appearing in this report is in the public domain and may be reproduced or copied without permission from SAMHSA. Citation of the source is appreciated. However, this publication may not be reproduced or distributed for a fee without the specific, written authorization of the Office of Communications, SAMHSA, U.S. Department of Health and Human Services.

Data Citation

Data users agree to reference the following citation in any of the publications that use these public use data.

Substance Abuse and Mental Health Services Administration, National Mental Health Services Survey (N-MHSS): 2010. Data on Mental Health Treatment Facilities. Behavioral Health Services Information System, Rockville, MD: Substance Abuse and Mental Health Services Administration, 2014.

Authors of publications that use these data are required to send citations of their published works to SAMHSA for inclusion in a database of related publications (SAMHSA_support@smdi.com).

Disclaimer

Data users acknowledge that SAMHSA and SMDI (Synectics) will bear no responsibility for use of the data or for interpretations or inferences based upon such uses.

Violations

If SAMHSA or SMDI determines that this “Terms of Use” agreement has been violated, then possible sanctions could include:

- Report of the violation to the Research Integrity Officer, Institutional Review Board, or Human Subjects Review Committee of the user's institution.
- If the confidentiality of human subjects has been violated, then report of the violation may be made to the Federal Office for Human Research Protections.
- Report of the violation of federal law to the United States Attorney General for possible prosecution.
- Court awarded payments of damages to any individual(s)/organization(s) harmed by the breach of confidential data

Description of the National Mental Health Services Survey (N-MHSS)

The 2010 National Mental Health Services Survey (N-MHSS) conducted from June 2010 through January 2011 with a reference date of April 30, 2010. The N-MHSS collects information from all known facilities¹ in the United States, both public and private, that provide mental health treatment services to persons with mental illness.

Although both the name and scope of the N-MHSS survey have changed over time, the survey has existed, in one form or another, since 1969. The various surveys were designed to collect data on the location, characteristics, and utilization of organized mental health service providers throughout the 50 States, the District of Columbia, and other U.S. jurisdictions.² Originally called the Inventory of Mental Health Organizations (IMHO), the survey began in 1969 under the direction of the National Institute of Mental Health (NIMH). In 1992, responsibility for the survey was transferred to the Substance Abuse and Mental Health Services Administration (SAMHSA), and in 2008 the survey was re-designed from organization-level to facility-level reporting and named the National Survey of Mental Health Treatment Facilities (NSMHTF). The survey was renamed the National Mental Health Services Survey in 2010—see Appendix A for a copy of the questionnaire.

Since 1969, the goals of the survey have been fairly fixed: to obtain basic data on the number and characteristics of specialty mental health service providers and the persons they serve. The survey is the *only* source of national and State-level data on the mental health services delivery system reported by both publicly-operated and privately-operated specialty mental health care facilities.³

The N-MHSS provides the mechanism for quantifying the dynamic character and composition of the U.S. mental health treatment delivery system. The objective of the N-MHSS is to collect data that can be used for multiple purposes:

- To assist SAMHSA and State and local governments in assessing the nature and extent of services provided in State-funded, State-operated, and other mental health treatment facilities, and in forecasting mental health treatment resource requirements;
- To update SAMHSA's Inventory of Behavioral Health Services (I-BHS), an inventory of all known mental health and substance abuse treatment facilities in the United States, which can be used as a frame for future surveys of these facilities;
- To describe the nature and scope of mental health treatment services and conduct comparative analyses for the nation and States; and

¹ Entities responding to the N-MHSS are referred to as "facilities." *Survey coverage* provides definitions of the types of mental health treatment facilities included in the N-MHSS.

² The jurisdictions include the territory of Guam, the Federated States of Micronesia, the Republic of Palau, the Commonwealth of Puerto Rico, and the Virgin Islands of the United States.

³ For a detailed description of the history of the survey and how it has changed, see Appendix A of SAMHSA's *Mental Health, United States*, 2004 (DHHS Pub. No. SMA-06-4195).

- To update the information in the mental health component of SAMHSA’s online Behavioral Health Treatment Services Locator, a searchable database of licensed and accredited public and private facilities for the provision of mental health treatment. The Facility Locator is available on the Internet at:

<https://findtreatment.samhsa.gov>.

Data Collection Procedures for the 2010 N-MHSS

Field period and reference date

The field period for the 2010 N-MHSS ran from June 11, 2010, through January 27, 2011. The survey reference date was April 30, 2010.

Survey universe

The initial N-MHSS universe of 15,562 facilities (Appendix B) included all known specialty mental health facilities in the United States and its territories at the beginning of the data collection period. Most facilities in the 2010 N-MHSS frame were identified from the 2008 NSMHTF. To enhance the existing NSMHTF database of eligible facilities, a list of currently-operating mental health treatment facilities was requested from the Centers for Medicare and Medicaid Services (CMS) and national professional organizations. These entities provided information for additional mental health facilities that were added to the initial survey frame. A small number of newly identified facilities was added to the survey frame over the course of the 2010 N-MHSS. The final total N-MHSS facility universe was 16,197 mental health treatment facilities.

Survey coverage

The following types of mental health treatment facilities were included in the 2010 N-MHSS:

- *Psychiatric hospitals*—Facilities licensed and operated as state/public psychiatric hospitals or as state-licensed private psychiatric hospitals that primarily provide 24-hour inpatient care to persons with mental illness. They may also provide 24-hour residential care and/or less than 24-hour care (i.e., outpatient, partial hospitalization), but these additional service settings are not requirements.
- *Non-federal general hospitals with a separate psychiatric unit*—Licensed general hospitals (public or private) that provide inpatient mental health services in separate psychiatric units. These units must have specifically allocated staff and space for the treatment of persons with mental illness. The units may be located in the hospital itself or in a separate building that is owned by the hospital.
- *VA medical centers*—Facilities operated by the U.S. Department of Veterans Affairs, including general hospitals with separate psychiatric inpatient units, and/or residential treatment programs, and/or psychiatric outpatient clinics.
- *Outpatient or day treatment or partial hospitalization mental health facilities*—Facilities that (1) provide only outpatient mental health services to ambulatory clients, typically for less than three hours at a single visit or (2) provide only partial day mental health services to ambulatory clients, typically in sessions of three or more hours on a regular schedule. A psychiatrist generally assumes the medical responsibility for all clients and/or for the

direction of their mentalhealth treatment. Throughout this report (text and tables), these facilities will be referred to as *outpatient clinics*.

- *Residential treatment centers (RTCs) for children*—Facilities not licensed as psychiatric hospitals that primarily provide individually-planned programs of mental health treatment in a residential care setting for children under age 18. (Some RTCs for children may also treat young adults.) RTCs for children must have a clinical program that is directed by a psychiatrist, psychologist, social worker, or psychiatric nurse who has a master’s or doctoral degree. To qualify as an RTC, the primary reason for admission of more than half of the clients must be mental illness or emotional disturbance that can be classified by DSM-III/DSM-III-R, DSM-IV/DSM-IV- TR, or ICD-9-CM/ICD-10-CM codes, other than codes for mental retardation, developmental disorders, and substance use disorders.
- *Residential treatment centers (RTCs) for adults*—Facilities not licensed as psychiatric hospitals that primarily provide individually-planned programs of mental health treatment in a residential care setting for adults.
- *Multi-setting (multi-service, non-hospital) mental health facilities*—Facilities that provide residential and outpatient mental health services and are not classified as psychiatric or general hospitals with a separate psychiatric unit or as RTCs.

Exclusions

The 2010 N-MHSS survey universe excluded Department of Defense military treatment facilities, Indian Health Service-administered or tribally-operated facilities, private practitioners or small group practices not licensed as a mental health clinic or center, and jails or prisons.

Content

The 2010 N-MHSS survey instrument was a 10-page document with 36 numbered questions (Appendix A). Topics included:

- Facility type, operation, and primary treatment focus
- Facility treatment characteristics (e.g., settings of care; mental health treatment approaches, supportive services/practices, and special programs offered; crisis intervention team availability; and seclusion and restraint practices)
- Facility operating characteristics (e.g., age groups accepted; services provided in non-English languages; and smoking policy)
- Facility management characteristics (e.g., computerized functionality; licensure, certification, and accreditation; standard operating procedures; and sources of payment and funding)
- Client demographic characteristics

Data collection

Three data collection modes were employed: a secure web-based questionnaire, a paper questionnaire sent by mail, and a computer-assisted telephone interview (CATI). Initially, respondents could select either the web-based or paper mode to complete the survey. Approximately two weeks before the survey reference date (April 30, 2010), an advance letter from SAMHSA was mailed to the attention of the facility directors of all eligible facilities to alert them to expect the survey and to

request their participation in the N-MHSS (Appendix B). The letter also served to update records with new address information received from the U.S. Postal Service. A data collection packet (including the questionnaire, SAMHSA cover letter, definition package, State-specific letter of support, information on completing the survey on the web, fact sheet of Frequently Asked Questions, and postage-paid business-reply envelope) was mailed to each facility in June 2010. The web-based survey also became available in June. Each facility had the option of completing the paper questionnaire and returning it by mail or completing the questionnaire via the secure survey website.

During the data collection phase, contract personnel were available by telephone to answer facilities' questions concerning the survey. Web-based support for facilities completing the questionnaire on the web was also available. Multiple reminder letters were sent to non-respondents over the course of the data collection period via fax, mail, and email. To increase the survey response rate, State mental health agency representatives were contacted during the data collection period to inform them of their State's progress and to request additional help in encouraging responses. CATI follow-up of non-respondents began in late September 2010 and ended in late December.

Eligibility and unit response rate

Table 1.1 presents a summary of eligibility and response rate information. Of the 16,197 mental health treatment facilities in the survey, 24.8 percent were found to be ineligible for the survey because they did not provide mental health treatment services, had a primary treatment focus of substance abuse services or general health care, provided treatment for incarcerated persons only (i.e., in jails or prisons), or were an individual or small group mental health practice not licensed or certified as a mental health center or clinic.

Table 1.1. N-MHSS facilities, by status and mode of response: 2010

	Number	Percent
Total facilities in survey	16,197	100.0
Closed/ineligible	4,011	24.8
Eligible	12,186	75.2
Total eligible	12,186	100.0
Non-respondents	1,068	8.8
Respondents	11,118	91.2
Excluded from report ¹	693	6.2
Uncategorized roll-ups ²	51	0.5
Included in report	10,374	93.3
Mode of response	10,374	100.0
Internet	5,538	53.4
Mail	2,535	24.4
Telephone	2,301	22.2

¹ Facilities excluded from this report include 692 administrative-only facilities and one facility reporting a facility type of "other" in question A5.

² Facilities whose client counts were included in or "rolled into" other facilities' counts and whose facility characteristics were not reported separately.

SOURCE: Center for Behavioral Health Statistics and Quality, Substance Abuse and Mental Health Services Administration, 2010 National Mental Health Services Survey (N-MHSS).

Ninety-one percent of the 12,186 eligible facilities completed the survey, including 692 facilities that provided administrative services only. Half of the respondents (53.4 percent) completed the survey on the web, 24.4 percent through the mail, and 22.2 percent on the telephone.

Quality Assurance

All mail questionnaires underwent a manual review for consistency and missing data. Calls to facilities clarified questionable responses and obtained missing data. After data entry, automated quality assurance reviews were conducted. The reviews incorporated the rules used in manual editing plus consistency checks not readily identified by manual review. The web-based questionnaire was programmed to be self-editing; that is, respondents were prompted to complete missing responses and to confirm or correct inconsistent responses on critical items. The CATI questionnaire was similarly programmed.

Facility Reporting and Selection for the 2010 N-MHSS Report

Table 1.1. Among the 11,118 eligible respondents, 693 provided information but were deemed out-of-scope, and thus excluded from the analyses in this report. The excluded facilities and reasons for exclusion fell into two categories:

- The number of facilities that provided only administrative services totaled 692. These facilities are included in SAMHSA's online Behavioral Health Treatment Services Locator; however, given that these facilities do not provide mental health treatment services, they are considered out-of-scope for this report.
- One facility reported a facility type as "other" and could not be categorized into one of the remaining six categories. This facility is considered out-of-scope for this report.

An additional 51 facilities whose client counts were included in or "rolled into" other facilities' counts and whose facility characteristics were not reported separately were excluded from facility counts in this report's Chapter 2 and Chapter 4 tables. However, their client counts are included in this report's Chapter 3 tables.

After the exclusion of the 693 out-of-scope facilities and 51 rolled-up facilities, data from 10,374 eligible respondent facilities were included in this 2010 N-MHSS report.

Number of respondents reporting facility and client data

The number of eligible respondents to the 2010 N-MHSS that reported data totaled 10,374. Of the 10,374 facilities in the N-MHSS, basic facility information, service characteristics, and client counts were reported for 9,139 facilities. The remaining 1,235 facilities are excluded from Chapter 2 tables since their service characteristics were not reported. The breakdown of facility data and client counts reported by respondents is summarized below.

9,139 facilities:

- 7,107 facilities reported basic facility information, service characteristics, and client counts for their own facility.
- 645 facilities reported basic facility information and service characteristics for themselves and provided client counts for their own facility and other facilities.
- 1,387 facilities reported basic facility information and service characteristics for their own facility. Their client counts were provided by another facility.

1,235 facilities:

- 366 facilities reported basic facility information and client counts for their own facility.
- 47 facilities reported basic facility information and client counts for their own facility and other facilities.
- 822 facilities reported basic facility information for their own facility. Their client counts were provided by another facility.

Item Non-Response

Extensive follow-up during data collection and careful editing minimized item non-response. Thus, resulting item response rates were generally high, averaging approximately 98 percent across all 149 separate items. The average item response rate for items excluding demographic client counts in questions 3b, 4b, and 5b was approximately 99 percent.⁴ The average item response rate for demographic items was lower, averaging approximately 85 percent.

Data Considerations and Limitations

As with any data collection effort, certain procedural considerations and data limitations must be taken into account when interpreting data from the 2010 N-MHSS. Some general issues are listed below. Considerations and limitations of specific data items are discussed where the data are presented.

- The N-MHSS attempts to obtain responses from all known mental health treatment facilities, but it is a voluntary survey. There was no adjustment for the 8.8 percent facility non-response.
- The N-MHSS is a point-prevalence survey. It provides information on the mental health treatment system and its clients as of a pre-selected reference date (April 30, 2010). Client counts reported here do not represent annual totals. Rather, the N-MHSS provides a “snapshot” of mental health treatment facilities and clients on an average day or month.
- Multiple responses were allowed for certain questionnaire items (for example, mental health treatment approaches offered and functions that are computerized). Tabulations of data for these items include the total number of facilities reporting each response category.
