Terms of Use

These data are distributed under the following terms of use. By continuing past this page, you signify your agreement to comply with the requirements as stated below:

Privacy of Study Respondents

Unauthorized disclosure of identifiable information violates the pledge given to the providers of the information. Disclosure of identifiable information may also be punishable under federal law.

Therefore, users of data agree:

To use these datasets solely for research or statistical purposes and not for reidentification of specific study respondents.

To make no use of the identity of any study respondents discovered inadvertently and to report any such discovery to SAMHSA (SAMHSA_support@smdi.com).

Public Domain Notice

All material appearing in this report is in the public domain and may be reproduced or copied without permission from SAMHSA. Citation of the source is appreciated. However, this publication may not be reproduced or distributed for a fee without the specific, written authorization of the Office of Communications, SAMHSA, U.S. Department of Health and Human Services.

Data Citation

Data users agree to reference the following citation in any of the publications that use these public use data.

Substance Abuse and Mental Health Services Administration, *National Mental Health Services Survey (N-MHSS): 2014. Data on Mental Health Treatment Facilities*. BHSIS Series S-87, HHS Publication No. (SMA) 16-5000. Rockville, MD: Substance Abuse and Mental Health Services Administration, 2016.

Authors of publications that use these data are required to send citations of their published works to SAMHSA for inclusion in a database of related publications (SAMHSA_support@smdi.com).

Disclaimer

Data users acknowledge that SAMHSA will bear no responsibility for use of the data or for interpretations or inferences based upon such uses.

Violations

If SAMHSA determines that this “Terms of Use” agreement has been violated, then possible sanctions could include:

- Report of the violation to the Research Integrity Officer, Institutional Review Board, or Human Subjects Review Committee of the user's institution.

- If the confidentiality of human subjects has been violated, then report of the violation may be made to the Federal Office for Human Research Protections.
- Report of the violation of federal law to the United States Attorney General for possible prosecution.
- Court awarded payments of damages to any individual(s)/organization(s) harmed by the breach of confidential data.

DESCRIPTION OF THE NATIONAL MENTAL HEALTH SERVICES SURVEY (N-MHSS)

The 2014 National Mental Health Services Survey (N-MHSS) was conducted from April 2014 through January 2015. The N-MHSS collects information from all known facilities¹ in the United States, both public and private, that provide mental health treatment services to people with mental illness. The Center for Behavioral Health Statistics and Quality (CBHSQ) of the Substance Abuse and Mental Health Services Administration (SAMHSA), U.S. Department of Health and Human Services, plans and directs the N-MHSS.

The N-MHSS provides the mechanism for quantifying the dynamic character and composition of the mental health treatment delivery system. It is the only source of national and state-level data on the mental health services delivery system reported by both publicly-operated and privately-operated specialty mental health care facilities. The N-MHSS is designed to collect data on the location, characteristics, and utilization of organized mental health treatment service providers for facilities within the scope of the survey throughout the 50 states, the District of Columbia, and the U.S. territories.² The N-MHSS complements, but does not duplicate, the information collected through SAMHSA's survey of substance abuse treatment facilities, the National Survey of Substance Abuse Treatment Services (N-SSATS).

The N-MHSS provides the mechanism for quantifying the dynamic character and composition of the U.S. mental health treatment delivery system. The objective of the N-MHSS is to collect data that can be used for multiple purposes:

- To assist SAMHSA and state and local governments in assessing the nature and extent of services provided in state-funded, state-operated, and private non-profit and for-profit mental health treatment facilities, and in forecasting mental health treatment resource requirements;
- To update SAMHSA's Inventory of Behavioral Health Services (I-BHS), an inventory of all known mental health and substance abuse treatment facilities in the United States, which can be used as a frame for future surveys of these facilities;
- To describe the nature and scope of mental health treatment services and conduct comparative analyses for the nation and states; and
- To update the information in the mental health component of SAMHSA's online Behavioral Health Treatment Services Locator, which includes a searchable database of some licensed and accredited public and private facilities for the provision of mental health treatment. The Locator is available at <https://findtreatment.samhsa.gov>.

¹ Entities responding to the N-MHSS are referred to as "facilities." Survey coverage provides definitions of the types of mental health treatment facilities included in the N-MHSS.

² In the 2014 N-MHSS, the territories included American Samoa, Guam, Puerto Rico, and the U.S. Virgin Islands.

Data Collection Procedures for the 2014 N-MHSS

Field period and reference date

The field period for the 2014 N-MHSS, which included mailing and data collection operations, ran from April 4, 2014, through January 26, 2015.

Survey universe

- The 2014 N-MHSS survey universe included 21,681 facilities across the United States and its jurisdictions. Most facilities in the 2014 N-MHSS frame were identified from the updated database produced after fielding the 2010 and 2012 N-MHSS, supplemented by the 2013 mental health augmentation and new facilities that states requested be added to the I-BHS.

Survey coverage

The following types of mental health treatment facilities were included in the 2014 N-MHSS:

- *Psychiatric hospitals*—Facilities licensed and operated as state/public psychiatric hospitals or as state-licensed private psychiatric hospitals that primarily provide 24-hour inpatient care to persons with mental illness. They may also provide 24-hour residential care and/or less than 24-hour care (i.e., outpatient, partial hospitalization), but these additional service settings are not requirements.
- *General hospitals with a separate inpatient psychiatric unit*—Licensed general hospitals (public or private) that provide inpatient mental health services in separate psychiatric units. These units must have specifically allocated staff and space for the treatment of persons with mental illness. The units may be located in the hospital itself or in a separate building that is owned by the hospital. Throughout this report (text, figures, and tables), these facilities will be referred to as general hospitals.
- *Veterans Administration (VA) medical centers*—Facilities operated by the U.S. Department of Veterans Affairs, including general hospitals with separate psychiatric inpatient units, residential treatment programs, and/or psychiatric outpatient clinics.
- *Outpatient or day treatment or partial hospitalization mental health facilities*—Facilities that (1) provide only outpatient mental health services to ambulatory clients, typically for less than three hours at a single visit or (2) provide only partial day mental health services to ambulatory clients, typically in sessions of three or more hours on a regular schedule. A psychiatrist generally assumes the medical responsibility for all clients and/or for the direction of their mental health treatment. Throughout this report (text, figures, and tables), these facilities will be referred to as outpatient mental health facilities.
- *Residential treatment centers (RTCs) for children*—Facilities not licensed as psychiatric hospitals that primarily provide individually-planned programs of mental health treatment in a residential care setting for children under age 18. (Some RTCs for children may also treat young adults.) RTCs for children must have a clinical program that is directed by a psychiatrist, psychologist, social worker, or psychiatric nurse who has a master's or doctoral degree. To qualify as an RTC, the primary reason for admission of more than half of the clients must be mental illness or emotional disturbance that can be classified by DSM-III/DSM-III-R, DSM-IV/DSM-IV-

TR, DSM-V, or ICD-9-CM/ICD-10-CM codes, other than codes for intellectual disability, developmental disorders, and substance use disorders.

- *Residential treatment centers (RTCs) for adults*—Facilities not licensed as psychiatric hospitals that primarily provide individually-planned programs of mental health treatment in a residential care setting for adults.
- *Multi-setting mental health facilities³ (non-hospital residential plus outpatient and/or day treatment/partial hospitalization)*—Facilities that provide mental health services in two or more service settings (residential and outpatient and/or day treatment/partial hospitalization) and are not classified as a psychiatric hospital, general hospital, medical center, or residential treatment center.
- *Community mental health center (CMHC)*—Facilities that either (1) provide outpatient services, including specialized outpatient services for children, the elderly, individuals who are chronically mentally ill, and residents of its mental health service area who have been discharged from inpatient treatment at a mental health facility; (2) provide 24-hour emergency care services; (3) provide day treatment or other partial hospitalization services, or psychosocial rehabilitation services; (4) provide screening for patients being considered for admission to state mental health facilities to determine the appropriateness of the admission; and (5) meet applicable licensing or certification requirements for CMHCs in the state in which it is located.
- *Other type of residential treatment facility*—Facilities not licensed as a psychiatric hospital, whose primary purpose is to provide individually-planned programs of mental health treatment services in a residential care setting and is not specifically for children only or adults only.
- *Other* refers to another type of hospital or mental health facility not defined in the categories above.

Exclusions

The 2014 N-MHSS survey universe excluded: (1) Department of Defense (DoD) military treatment facilities; (2) individual private practitioners or small group practices not licensed as a mental health clinic or center; and (3) jails or prisons.

Facilities are not eligible for inclusion in the survey universe if they only provide one or more of the following services: crisis intervention services, psychosocial rehabilitation, cognitive rehabilitation, intake, referral, mental health evaluation, health promotion, psychoeducational services, transportation services, respite services, consumer-run/peer support services, housing services, and legal advocacy. Residential facilities whose primary function is not to provide specialty mental health treatment services are also not eligible for inclusion in the N-MHSS survey universe.

Content

The 2014 N-MHSS survey instrument was a 15-page document with 38 numbered questions (Appendix A). Topics included:

- Facility type, operation, and primary treatment focus

³ The classification of psychiatric hospital, general hospital, medical center, or residential treatment center—any of which can offer mental health services in two or more service settings—takes precedence over a multi-setting classification.

- Facility treatment characteristics (e.g., settings of care; mental health treatment approaches, supportive services/practices, and special programs offered; crisis intervention team availability; and seclusion and restraint practices)
- Facility operating characteristics (e.g., age groups accepted; services provided in non-English languages; and smoking policy)
- Facility management characteristics (e.g., computerized functionality; licensure, certification, and accreditation; standard operating procedures; and sources of payment and funding)
- Client demographic characteristics

Data collection

Three data collection modes were employed: a secure web-based questionnaire, a paper questionnaire sent by mail, and a computer-assisted telephone interview (CATI). Approximately three weeks before the survey reference date (April 30, 2014), an advance letter from SAMHSA was mailed to the attention of the facility directors of all eligible facilities to alert them to expect the survey and to request their participation in the N-MHSS (Appendix B). The letter also served to update records with new address information received from the U.S. Postal Service. A data collection packet (including the questionnaire, SAMHSA cover letter, definition package, state-specific letter of support, information on completing the survey on the web, fact sheet of Frequently Asked Questions, and postage-paid business-reply envelope) was mailed to each facility in July 2014. The web-based survey also became available in May. Each facility had the option of completing the paper questionnaire and returning it by mail or completing the questionnaire via the secure survey website.

During the data collection phase, contract personnel were available by telephone to answer facilities' questions concerning the survey. Web-based support for facilities completing the questionnaire on the web was also available. Multiple reminder letters were sent to non-respondents over the course of the data collection period via fax, mail, and email. To increase the survey response rate, state mental health agency representatives were contacted during the data collection period to inform them of their state's progress and to request additional help in encouraging responses. Blaise[®]-to-web follow-up of non-respondents began in August 2014 and ended in late January 2015.

Eligibility and unit response rate

Table 1.1 presents a summary of eligibility and response rate information. Of the 21,681 mental health treatment facilities in the survey, 23.0 percent were found to be ineligible for the survey because they did not provide mental health treatment services, had a primary treatment focus of substance abuse services or general health care, provided treatment for incarcerated persons only (i.e., in jails or prisons), or were an individual or small group mental health practice not licensed or certified as a mental health center or clinic.

Eighty-eight percent of the 16,687 eligible facilities completed the survey, including 1,070 facilities that provided administrative services only. Three-quarters of the respondents that were eligible for the report (74.9 percent) completed the survey on the web, 7.4 percent through the mail, and 17.7 percent on the telephone.

Table 1.1. N-MHSS facilities, by status and mode of response: 2014

	Number	Percent
Total facilities in survey	21,681	100.0
Closed/ineligible	4,994	23.0
Eligible	16,687	77.0
Total eligible	16,687	100.0
Non-respondents	1,981	11.9
Respondents	14,706	88.1
Excluded from report	1,530	10.4
Administrative only	1,070	7.3
Uncategorized roll-ups ¹	418	27.3
Out-of-scope facilities	42	2.7
Eligible for report	13,176	89.6
Mode of response	13,176	100
Internet ¹	9,875	74.9
Mail	973	7.4
Telephone	2,328	17.7

¹ Facilities whose client counts were included in or “rolled into” other facilities’ counts and whose facility characteristics were not reported separately.

SOURCE: Center for Behavioral Health Statistics and Quality, Substance Abuse and Mental Health Services Administration, 2014 National Mental Health Services Survey (N-MHSS).

Facility Reporting and Selection for the 2014 N-MHSS Report and Public Use File

Of the 16,687 eligible facilities in the survey, 14,706 (88.1 percent) completed the survey. The facility respondents included 1,070 facilities that provided administrative services only, 418 uncategorized roll-up facilities, and an additional 42 facilities that were later identified as being out-of-scope; these three groups of facilities are excluded from the public use file. The excluded facilities and reasons for exclusion fell into three categories:

- (1) A total of 1,070 administrative-only facilities were excluded. These facilities are included in SAMHSA’s online Behavioral Health Treatment Services Locator; however, given that these facilities did not provide direct mental health treatment services, they were considered out-of- scope for this public use file.
- (2) An additional 418 facilities whose client counts were included in or “rolled into” other facilities’ counts and whose facility characteristics were not reported were excluded from this public use file.
- (3) A review of the facilities that reported their facility type and operation as “Other” found 42 to be out-of-scope, so they were excluded from the analysis in this public use file.

After the exclusion of the 1,530 facilities, data from 13,176 eligible respondent facilities were included in this 2014 N-MHSS public use file.

Quality Assurance

All mail questionnaires underwent a manual review for consistency and missing data. Calls to facilities clarified questionable responses and obtained missing data. After data entry, automated quality assurance reviews were conducted. The reviews incorporated the rules used in manual editing plus consistency checks not readily identified by manual review. The web-based questionnaire was programmed to be self-editing; that is, respondents were prompted to complete missing responses and to confirm or correct inconsistent responses on critical items. The CATI questionnaire was similarly programmed.

Imputation for N-MHSS

See Appendix E of the report for a more comprehensive overview of the imputation process for missing client count data.

Response Rates

The final unit response rate for eligible facilities was 88.1 percent. Extensive follow-up during data collection and careful editing maximized item response; the item response rates averaged approximately 96.9 percent across all 171 separate items (See Appendix D of the report).

Data Considerations and Limitations

As with any data collection effort, certain procedural considerations and data limitations must be taken into account when interpreting data from the 2014 N-MHSS. Some general issues are listed below. Considerations and limitations of specific data items are discussed where the data are presented.

- The N-MHSS is a voluntary survey and while every effort is made to obtain responses from all known mental health treatment facilities within the scope of the survey, some facilities did not respond. There was no adjustment for the 11.9 percent facility non-response.
- The N-MHSS is a point-prevalence survey. It provides information on the mental health treatment system and its clients as of a pre-selected reference date (April 30, 2014). Client counts reported here do not represent annual totals. Rather, the N-MHSS provides a “snapshot” of mental health treatment facilities and clients on an average day or month.
- Multiple responses were allowed for certain questionnaire items (e.g., services provided in non-English languages and type of payment or insurance accepted for mental health treatment services). Tabulations of data for these items include the total number of facilities reporting each response category.

OPLEGALPERNONFOREN: Percent clients/patients with involuntary (non-forensic) legal status at this less than 24-hour facility

B5b. For each category below, please provide a breakdown of the Clients in Less Than 24-Hour Care reported in the B5a TOTAL BOX in the questionnaire. Use either numbers OR percents, whichever is more convenient.

* If numbers are used—each category total should equal the number reported in the B5a TOTAL BOX in the questionnaire.

* If percents are used—each category total should equal 100 percent.

Percent clients/patients with involuntary (non-forensic) legal status at this less than 24-hour facility

TOTADMIS: NUMBER OF MENTAL HEALTH TREATMENT ADMISSIONS IN 12-MONTH PERIOD

B7. In the 12-month period of May 1, 2013 through April 30, 2014, how many mental health treatment admissions, readmissions, and incoming transfers did this facility have? Exclude returns from unauthorized absence, such as escape, AWOL, or elopement.

ALL MENTAL HEALTH CARE SETTINGS - Including 24-Hour Hospital Inpatient, 24-Hour Residential (non-hospital), and Less Than 24-Hour Outpatient and Partial Hospitalization/Day Treatment

IF DATA FOR THIS TIME PERIOD ARE NOT AVAILABLE: Use the most recent 12-month period for which data are available

OUTPATIENT CLIENTS: Consider each initiation to a course of treatment as an admission. Count admissions into treatment, not individual treatment visits.

WHEN A MENTAL HEALTH DISORDER IS A SECONDARY DIAGNOSIS: Count all admissions where clients/patients received mental health treatment.

Number of mental health treatment admissions in 12-month period

Value	Label	Unweighted Frequency	%
0	None	401	3.0%
1	1 to 10	869	6.6%
2	11 to 20	536	4.1%
