Highlights 1

Introduction 5

Chapter 1. Characteristics of Admissions: 2016 7

Chapter 2. Type of Treatment Services: 2016 9

Chapter 3. Trends in Substance Use Treatment Admissions Aged 12 Years and Older: 2006–2016 11

Chapter 4. Discharge Data Overview for All Types of Treatment Services: 2016 15

Chapter 5. Treatment Admissions Aged 12 Years and Older, by State or Jurisdiction, Primary Substance Use, and Selected Characteristics: 2016 19

Chapter 6. Treatment Discharges Aged 12 Years and Older, by Reason for Discharge and by State or Jurisdiction: 2016 21

Tables 23

Appendix A. About the Treatment Episode Data Set (TEDS) 605

- Introduction 605
- History 606
- State Data Collection Systems 606
- Report-Specific Considerations 609

Appendix B. TEDS Data Elements 627

- TEDS Minimum Data Set 627
- TEDS Supplemental Data Set 635
- TEDS Linked Discharge Data Set 640

Appendix C. List of Contributors 643

List of Tables

National Substance Use Treatment Service Admissions

1.1a Admissions aged 12 years and older, by primary substance use: Number, 2006–2016 24

1.1b Admissions aged 12 years and older, by primary substance use: Percent distribution, 2006–2016 25

1.2 Admissions aged 12 years and older, by concomitant use of alcohol and drugs: Number and percent distribution, 2006–2016 26

1.3a Admissions aged 12 years and older, by gender and age at admission: Number and average age at admission, 2006–2016 27

1.3b Admissions aged 12 years and older, by gender and age at admission: Percent distribution, 2006–2016, and 2016 U.S. population aged 12 and older 28

1.4 Admissions aged 12 years and older, by race/ethnicity: Number and percent distribution, 2006–2016, and 2016 U.S. population aged 12 years and older 29

1.5a Admissions aged 18 years and older, by employment status: Number, 2006–2016, and 2016 U.S. population aged 18 years and older 30

1.5b Admissions aged 18 years and older, by employment status: Percent distribution, 2006–2016, and 2016 U.S. population aged 18 years and older 31

2.1a Gender and age at admission among admissions aged 12 years and older, by primary substance use: Number and average age at admission, 2016 32

2.1b Gender and age at admission among admissions aged 12 years and older, by primary substance use: Column percent distribution and average age at admission, 2016 33

2.1c Gender and age at admission among admissions aged 12 years and older, by primary substance use: Row percent distribution, 2016 34

2.2a Race/ethnicity among admissions aged 12 years and older, by primary substance use: Number, 2016 35

2.2b Race/ethnicity among admissions aged 12 years and older, by primary substance use: Percent distribution, 2016 36

2.3a Selected race/ethnicity/gender/age group among admissions aged 12 years and older, by primary substance use: Number, 2016 37

2.3b Selected race/ethnicity/gender/age group among admissions aged 12 years and older, by primary substance use: Column percent distribution, 2016 41

List of Tables (continued)

2.3c Selected race/ethnicity/gender/age group among admissions aged 12 years and older, by primary substance use: Row percent distribution, 2016 45

2.4a Frequency of use and usual route of administration among admissions aged 12 years and older, by primary substance use: Number, 2016.....49

2.4b Frequency of use and usual route of administration among admissions aged 12 years and older, by primary substance use: Percent distribution, 2016 50

2.5a Frequency of use and usual route of administration among admissions aged 12 years and older, by secondary substance use: Number, 2016 51

2.5b Frequency of use and usual route of administration among admissions aged 12 years and older, by secondary substance use: Percent distribution, 2016.....52

2.6a Frequency of use and usual route of administration among admissions aged 12 years and older, by tertiary substance use: Number, 2016.....53

2.6b Frequency of use and usual route of administration among admissions aged 12 years and older, by tertiary substance use: Percent distribution, 2016 54

2.7a Age of first use and number of prior treatment episodes among admissions aged 12 years and older, by primary substance use: Number, 2016 55

2.7b Age of first use and number of prior treatment episodes among admissions aged 12 years and older, by primary substance use: Percent distribution, 2016.....56

2.8a Treatment referral source and detailed criminal justice referral among admissions aged 12 years and older, by primary substance use: Number, 2016 57

2.8b Treatment referral source and detailed criminal justice referral among admissions aged 12 years and older, by primary substance use: Percent distribution, 2016 58

2.9a Type of treatment service at admission and planned medication-assisted opioid therapy among admissions aged 12 years and older, by primary substance use: Number, 2016.....59

2.9b Type of treatment service at admission and planned medication-assisted opioid therapy among admissions aged 12 years and older, by primary substance use: Percent distribution, 2016 60

2.10a Employment status and detailed not in labor force among admissions aged 18 years and older, by primary substance use: Number, 2016.....61

2.10b Employment status and detailed not in labor force among admissions aged 18 years and older, by primary substance use: Percent distribution, 2016 62

List of Tables (continued)

2.11a Education, marital status, living arrangements, and pregnancy status among admissions aged 12 to 17 years, by primary substance use: Number, 2016 63

2.11b Education, marital status, living arrangements, and pregnancy status among admissions aged 12 to 17 years, by primary substance use: Percent distribution, 2016 64

2.12a Education, marital status, living arrangements, pregnancy status, and veteran status among admissions aged 18 years and older, by primary substance use: Number, 2016.....65

2.12b Education, marital status, living arrangements, pregnancy status, and veteran status among admissions aged 18 years and older, by primary substance use: Percent distribution, 2016 67

2.13a Psychiatric problem in addition to substance use problem and DSM criteria diagnosis among admissions aged 12 years and older, by primary substance use: Number, 2016.....69

2.13b Psychiatric problem in addition to substance use problem and DSM criteria diagnosis among admissions aged 12 years and older, by primary substance use: Percent distribution, 2016 70

2.14a Source of income support among admissions aged 18 years and older, by primary substance use: Number, 2016.....71

2.14b Source of income support among admissions aged 18 years and older, by primary substance use: Percent distribution, 2016 72

2.15a Type of health insurance and expected/actual primary source of payment among admissions aged 12 years and older, by primary substance use: Number, 2016.....73

2.15b Type of health insurance and expected/actual primary source of payment among admissions aged 12 years and older, by primary substance use: Percent distribution, 2016 74

2.16a Arrests in 30 days prior to admission and days waiting to enter treatment among admissions aged 12 years and older, by primary substance use: Number, 2016.....75

2.16b Arrests in 30 days prior to admission and days waiting to enter treatment among admissions aged 12 years and older, by primary substance use: Percent distribution, 2016 76

2.17a Frequency of attendance at self–help programs among admissions aged 12 years and older, by primary substance use: Number, 2016.....77

List of Tables (continued)

2.17b Frequency of attendance at self–help programs among admissions aged 12 years and older, by primary substance use: Percent distribution, 2016 78

2.18 Admissions aged 12 years and older, by primary, secondary, and tertiary detailed drug: Number and percent distribution, 2016 79

3.1a Admissions aged 12 to 14 years, by primary substance use: Number, 2006–2016 81

3.1b Admissions aged 12 to 14 years, by primary substance use: Percent distribution, 2006–2016 82

3.2a Admissions aged 15 to 17 years, by primary substance use: Number, 2006–2016 83

3.2b Admissions aged 15 to 17 years, by primary substance use: Percent distribution, 2006–2016 84

3.3a Gender and race/ethnicity among admissions aged 12 to 14 years, by primary substance use: Number, 2016 85

3.3b Gender and race/ethnicity among admissions aged 12 to 14 years, by primary substance use: Percent distribution, 2016 86

3.4a Gender and race/ethnicity among admissions aged 15 to 17 years, by primary substance use: Number, 2016 87

3.4b Gender and race/ethnicity among admissions aged 15 to 17 years, by primary substance use: Percent distribution, 2016 88

3.5a Age at admission and treatment referral source among admissions aged 12 to 17 years, by primary substance use: Number, 2016 89

3.5b Age at admission and treatment referral source among admissions aged 12 to 17 years, by primary substance use: Percent distribution, 2016 90

3.6a Admissions aged 12 to 14 years, by marijuana involvement and treatment referral source: Number, 2006–2016 91

3.6b Admissions aged 12 to 14 years, by marijuana involvement and treatment referral source: Percent distribution, 2006–2016 92

3.7a Admissions aged 15 to 17 years, by marijuana involvement and treatment referral source: Number, 2006–2016 93

3.7b Admissions aged 15 to 17 years, by marijuana involvement and treatment referral source: Percent distribution, 2006–2016 94

3.8a Heroin admissions aged 12 years and older, by age group and race/ethnicity: Number, 2006–2016 95

List of Tables (continued)

3.8b Heroin admissions aged 12 years and older, by age group and race/ethnicity: Percent distribution, 2006–2016 97

3.9a Heroin admissions aged 12 years and older, by usual route of administration, age group, and characteristics of treatment episode: Number, 2006–2016 99

3.9b Heroin admissions aged 12 years and older, by usual route of administration, age group, and characteristics of treatment episode: Percent distribution, 2006–2016 101

3.10a Heroin admissions aged 12 years and older with planned medication-assisted opioid therapy, by usual route of administration and age group: Number, 2006–2016 103

3.10b Heroin admissions aged 12 years and older with planned medication-assisted opioid therapy, by usual route of administration and age group: Percent, 2006–2016 105

3.11 Primary substance use among admissions aged 12 years and older, by additional substance use: Number and percent distribution, 2016 106

3.12 Substance use combinations, by selected primary substance use: Number and percent distribution, 2016 108

4.1a Primary substance use and age at admission among admissions aged 12 years and older, by type of treatment service: Number and average age at admission, 2016 110

4.1b Primary substance use and age at admission among admissions aged 12 years and older, by type of treatment service: Column percent distribution and average age at admission, 2016 112

4.1c Primary substance use and age at admission among admissions aged 12 years and older, by type of treatment service: Row percent distribution, 2016 114

4.2a Gender and race/ethnicity among admissions aged 12 years and older, by type of treatment service: Number, 2016 116

4.2b Gender and race/ethnicity among admissions aged 12 years and older, by type of treatment service: Column percent distribution, 2016 117

4.2c Gender and race/ethnicity among admissions aged 12 years and older, by type of treatment service: Row percent distribution, 2016 118

List of Tables (continued)

4.3a Treatment referral source, frequency of use, and number of prior treatment episodes among admissions aged 12 years and older, by type of treatment service: Number, 2016 119

4.3b Treatment referral source, frequency of use, and number of prior treatment episodes among admissions aged 12 years and older, by type of treatment service: Column percent distribution, 2016 120

4.3c Treatment referral source, frequency of use, and number of prior treatment episodes among admissions aged 12 years and older, by type of treatment service: Row percent distribution, 2016 121

National Substance Use Treatment Service Discharges

5.1a Total and linked discharges aged 12 years and older, by state or jurisdiction: Number, 2016 122

5.1b Total and linked discharges aged 12 years and older, by state or jurisdiction: Percent distribution, 2016 124

5.2a Discharges aged 12 years and older, by type of treatment service and state or jurisdiction: Number, 2016 126

5.2b Discharges aged 12 years and older, by type of treatment service and state or jurisdiction: Percent distribution, 2016 128

5.3a Discharges aged 12 years and older, by reason for discharge and state or jurisdiction: Number, 2016 130

5.3b Discharges aged 12 years and older, by reason for discharge and state or jurisdiction: Percent distribution, 2016 132

5.4 Discharges aged 12 years and older, by reason for discharge and type of treatment service: Number, percent distribution, and median length of stay (LOS), 2016 134

5.5a Discharges aged 12 years and older, by type of treatment service and characteristics at admission: Number, 2016 135

5.5b Discharges aged 12 years and older, by type of treatment service and characteristics at admission: Percent distribution, 2016 139

5.6a Discharges aged 12 years and older, by type of treatment service and characteristics at discharge: Number, 2016 143

5.6b Discharges aged 12 years and older, by type of treatment service and characteristics at discharge: Percent distribution, 2016 144

List of Tables (continued)

5.7a Discharges aged 12 to 17 years, by type of treatment service and characteristics at admission: Number, 2016 145

5.7b Discharges aged 12 to 17 years, by type of treatment service and characteristics at admission: Percent distribution, 2016 147

5.8a Discharges aged 12 to 17 years, by type of treatment service and characteristics at discharge: Number, 2016 149

5.8b Discharges aged 12 to 17 years, by type of treatment service and characteristics at discharge: Percent distribution, 2016 150

5.9a Discharges aged 18 years and older, by type of treatment service and characteristics at admission: Number, 2016 151

5.9b Discharges aged 18 years and older, by type of treatment service and characteristics at admission: Percent distribution, 2016 155

5.10a Discharges aged 18 years and older, by type of treatment service and characteristics at discharge: Number, 2016 159

5.10b Discharges aged 18 years and older, by type of treatment service and characteristics at discharge: Percent distribution, 2016 161

5.11a Discharges aged 12 years and older completing treatment, by type of treatment service and characteristics at admission: Number, 2016 163

5.11b Discharges aged 12 years and older completing treatment, by type of treatment service and characteristics at admission: Percent distribution, 2016 167

5.12a Discharges aged 12 years and older completing treatment, by type of treatment service and characteristics at discharge: Number, 2016 171

5.12b Discharges aged 12 years and older completing treatment, by type of treatment service and characteristics at discharge: Percent distribution, 2016 172

5.13a Discharges aged 12 to 17 years completing treatment, by type of treatment service and characteristics at admission: Number, 2016 173

5.13b Discharges aged 12 to 17 years completing treatment, by type of treatment service and characteristics at admission: Percent distribution, 2016 175

5.14a Discharges aged 12 to 17 years completing treatment, by type of treatment service and characteristics at discharge: Number, 2016 177

5.14b Discharges aged 12 to 17 years completing treatment, by type of treatment service and characteristics at discharge: Percent distribution, 2016 178

List of Tables (continued)

5.15a Discharges aged 18 years and older completing treatment, by type of treatment service and characteristics at admission: Number, 2016 179

5.15b Discharges aged 18 years and older completing treatment, by type of treatment service and characteristics at admission: Percent distribution, 2016.....183

5.16a Discharges aged 18 years and older completing treatment, by type of treatment service and characteristics at discharge: Number, 2016 187

5.16b Discharges aged 18 years and older completing treatment, by type of treatment service and characteristics at discharge: Percent distribution, 2016.....189

5.17a Discharges aged 12 years and older transferring to further treatment, by type of treatment service and characteristics at admission: Number, 2016.....191

5.17b Discharges aged 12 years and older transferring to further treatment, by type of treatment service and characteristics at admission: Percent distribution, 2016 195

5.18a Discharges aged 12 years and older transferring to further treatment, by type of treatment service and characteristics at discharge: Number, 2016.....199

5.18b Discharges aged 12 years and older transferring to further treatment, by type of treatment service and characteristics at discharge: Percent distribution, 2016 200

5.19a Discharges aged 12 to 17 years transferring to further treatment, by type of treatment service and characteristics at admission: Number, 2016 201

5.19b Discharges aged 12 to 17 years transferring to further treatment, by type of treatment service and characteristics at admission: Percent distribution, 2016.....203

5.20a Discharges aged 12 to 17 years transferring to further treatment, by type of treatment service and characteristics at discharge: Number, 2016 205

5.20b Discharges aged 12 to 17 years transferring to further treatment, by type of treatment service and characteristics at discharge: Percent distribution, 2016.....206

5.21a Discharges aged 18 years and older transferring to further treatment, by type of treatment service and characteristics at admission: Number, 2016.....207

5.21b Discharges aged 18 years and older transferring to further treatment, by type of treatment service and characteristics at admission: Percent distribution, 2016 211

5.22a Discharges aged 18 years and older transferring to further treatment, by type of treatment service and characteristics at discharge: Number, 2016.....215

List of Tables (continued)

5.22b Discharges aged 18 years and older transferring to further treatment, by type of treatment service and characteristics at discharge: Percent distribution, 2016 217

6.1 Outpatient treatment discharges aged 12 years and older, by reason for discharge and state or jurisdiction: Number and percent distribution, 2016 219

6.2a Outpatient treatment discharges aged 12 years and older, by reason for discharge, treatment completion/transfer, median length of stay (LOS), and characteristics at admission: Number and row percent distribution, 2016 220

6.2b Outpatient treatment discharges aged 12 years and older, by reason for discharge, median length of stay (LOS), and characteristics at admission: Column percent distribution, 2016 224

6.3a Outpatient treatment discharges aged 12 years and older, by reason for discharge, treatment completion/transfer, median length of stay (LOS), and characteristics at discharge: Number and row percent distribution, 2016 228

6.3b Outpatient treatment discharges aged 12 years and older, by reason for discharge, median length of stay (LOS), and characteristics at discharge: Column percent distribution, 2016 229

6.4a Outpatient treatment discharges aged 12 to 17 years, by reason for discharge, treatment completion/transfer, median length of stay (LOS), and characteristics at admission: Number and row percent distribution, 2016 230

6.4b Outpatient treatment discharges aged 12 to 17 years, by reason for discharge, median length of stay (LOS), and characteristics at admission: Column percent distribution, 2016 232

6.5a Outpatient treatment discharges aged 12 to 17 years, by reason for discharge, treatment completion/transfer, median length of stay (LOS), and characteristics at discharge: Number and row percent distribution, 2016 234

6.5b Outpatient treatment discharges aged 12 to 17 years, by reason for discharge, median length of stay (LOS), and characteristics at discharge: Column percent distribution, 2016 235

6.6a Outpatient treatment discharges aged 18 years and older, by reason for discharge, treatment completion/transfer, median length of stay (LOS), and characteristics at admission: Number and row percent distribution, 2016 236

6.6b Outpatient treatment discharges aged 18 years and older, by reason for discharge, median length of stay (LOS), and characteristics at admission: Column percent distribution, 2016 240

List of Tables (continued)

6.7a Outpatient treatment discharges aged 18 years and older, by reason for discharge, treatment completion/transfer, median length of stay (LOS), and characteristics at discharge: Number and row percent distribution, 2016 244

6.7b Outpatient treatment discharges aged 18 years and older, by reason for discharge, median length of stay (LOS), and characteristics at discharge: Column percent distribution, 2016 246

7.1 Intensive outpatient treatment discharges aged 12 years and older, by reason for discharge and state or jurisdiction: Number and percent distribution, 2016 248

7.2a Intensive outpatient treatment discharges aged 12 years and older, by reason for discharge, treatment completion/transfer, median length of stay (LOS), and characteristics at admission: Number and row percent distribution, 2016 249

7.2b Intensive outpatient treatment discharges aged 12 years and older, by reason for discharge, median length of stay (LOS), and characteristics at admission: Column percent distribution, 2016 253

7.3a Intensive outpatient treatment discharges aged 12 years and older, by reason for discharge, treatment completion/transfer, median length of stay (LOS), and characteristics at discharge: Number and row percent distribution, 2016 257

7.3b Intensive outpatient treatment discharges aged 12 years and older, by reason for discharge, median length of stay (LOS), and characteristics at discharge: Column percent distribution, 2016 258

7.4a Intensive outpatient treatment discharges aged 12 to 17 years, by reason for discharge, treatment completion/transfer, median length of stay (LOS), and characteristics at admission: Number and row percent distribution, 2016 259

7.4b Intensive outpatient treatment discharges aged 12 to 17 years, by reason for discharge, median length of stay (LOS), and characteristics at admission: Column percent distribution, 2016 261

7.5a Intensive outpatient treatment discharges aged 12 to 17 years, by reason for discharge, treatment completion/transfer, median length of stay (LOS), and characteristics at discharge: Number and row percent distribution, 2016 263

7.5b Intensive outpatient treatment discharges aged 12 to 17 years, by reason for discharge, median length of stay (LOS), and characteristics at discharge: Column percent distribution, 2016 264

List of Tables (continued)

7.6a Intensive outpatient treatment discharges aged 18 years and older, by reason for discharge, treatment completion/transfer, median length of stay (LOS), and characteristics at admission: Number and row percent distribution, 2016 265

7.6b Intensive outpatient treatment discharges aged 18 years and older, by reason for discharge, median length of stay (LOS), and characteristics at admission: Column percent distribution, 2016 269

7.7a Intensive outpatient treatment discharges aged 18 years and older, by reason for discharge, treatment completion/transfer, median length of stay (LOS), and characteristics at discharge: Number and row percent distribution, 2016 273

7.7b Intensive outpatient treatment discharges aged 18 years and older, by reason for discharge, median length of stay (LOS), and characteristics at discharge: Column percent distribution, 2016 275

8.1 Short-term residential treatment discharges aged 12 years and older, by reason for discharge and state or jurisdiction: Number and percent distribution, 2016 277

8.2a Short-term residential treatment discharges aged 12 years and older, by reason for discharge, treatment completion/transfer, median length of stay (LOS), and characteristics at admission: Number and row percent distribution, 2016 278

8.2b Short-term residential treatment discharges aged 12 years and older, by reason for discharge, median length of stay (LOS), and characteristics at admission: Column percent distribution, 2016 282

8.3a Short-term residential treatment discharges aged 12 years and older, by reason for discharge, treatment completion/transfer, median length of stay (LOS), and characteristics at discharge: Number and row percent distribution, 2016 286

8.3b Short-term residential treatment discharges aged 12 years and older, by reason for discharge, median length of stay (LOS), and characteristics at discharge: Column percent distribution, 2016 287

8.4a Short-term residential treatment discharges aged 12 to 17 years, by reason for discharge, treatment completion/transfer, median length of stay (LOS), and characteristics at admission: Number and row percent distribution, 2016 288

List of Tables (continued)

8.4b Short-term residential treatment discharges aged 12 to 17 years, by reason for discharge, median length of stay (LOS), and characteristics at admission: Column percent distribution, 2016 290

8.5a Short-term residential treatment discharges aged 12 to 17 years, by reason for discharge, treatment completion/transfer, median length of stay (LOS), and characteristics at discharge: Number and row percent distribution, 2016 292

8.5b Short-term residential treatment discharges aged 12 to 17 years, by reason for discharge, median length of stay (LOS), and characteristics at discharge: Column percent distribution, 2016 293

8.6a Short-term residential treatment discharges aged 18 years and older, by reason for discharge, treatment completion/transfer, median length of stay (LOS), and characteristics at admission: Number and row percent distribution, 2016 294

8.6b Short-term residential treatment discharges aged 18 years and older, by reason for discharge, median length of stay (LOS), and characteristics at admission: Column percent distribution, 2016 298

8.7a Short-term residential treatment discharges aged 18 years and older, by reason for discharge, treatment completion/transfer, median length of stay (LOS), and characteristics at discharge: Number and row percent distribution, 2016 302

8.7b Short-term residential treatment discharges aged 18 years and older, by reason for discharge, median length of stay (LOS), and characteristics at discharge: Column percent distribution, 2016 304

9.1 Long-term residential treatment discharges aged 12 years and older, by reason for discharge and state or jurisdiction: Number and percent distribution, 2016 306

9.2a Long-term residential treatment discharges aged 12 years and older, by reason for discharge, treatment completion/transfer, median length of stay (LOS), and characteristics at admission: Number and row percent distribution, 2016 307

9.2b Long-term residential treatment discharges aged 12 years and older, by reason for discharge, median length of stay (LOS), and characteristics at admission: Column percent distribution, 2016 311

List of Tables (continued)

9.3a Long-term residential treatment discharges aged 12 years and older, by reason for discharge, treatment completion/transfer, median length of stay (LOS), and characteristics at discharge: Number and row percent distribution, 2016 315

9.3b Long-term residential treatment discharges aged 12 years and older, by reason for discharge, median length of stay (LOS), and characteristics at discharge: Column percent distribution, 2016 316

9.4a Long-term residential treatment discharges aged 12 to 17 years, by reason for discharge, treatment completion/transfer, median length of stay (LOS), and characteristics at admission: Number and row percent distribution, 2016 317

9.4b Long-term residential treatment discharges aged 12 to 17 years, by reason for discharge, median length of stay (LOS), and characteristics at admission: Column percent distribution, 2016 319

9.5a Long-term residential treatment discharges aged 12 to 17 years, by reason for discharge, treatment completion/transfer, median length of stay (LOS), and characteristics at discharge: Number and row percent distribution, 2016 321

9.5b Long-term residential treatment discharges aged 12 to 17 years, by reason for discharge, median length of stay (LOS), and characteristics at discharge: Column percent distribution, 2016 322

9.6a Long-term residential treatment discharges aged 18 years and older, by reason for discharge, treatment completion/transfer, median length of stay (LOS), and characteristics at admission: Number and row percent distribution, 2016 323

9.6b Long-term residential treatment discharges aged 18 years and older, by reason for discharge, median length of stay (LOS), and characteristics at admission: Column percent distribution, 2016 327

9.7a Long-term residential treatment discharges aged 18 years and older, by reason for discharge, treatment completion/transfer, median length of stay (LOS), and characteristics at discharge: Number and row percent distribution, 2016 331

9.7b Long-term residential treatment discharges aged 18 years and older, by reason for discharge, median length of stay (LOS), and characteristics at discharge: Column percent distribution, 2016 333

10.1 Hospital residential treatment discharges aged 12 years and older, by reason for discharge and state or jurisdiction: Number and percent distribution, 2016 335

List of Tables (continued)

10.2a Hospital residential treatment discharges aged 12 years and older, by reason for discharge, treatment completion/transfer, median length of stay (LOS), and characteristics at admission: Number and row percent distribution, 2016 336

10.2b Hospital residential treatment discharges aged 12 years and older, by reason for discharge, median length of stay (LOS), and characteristics at admission: Column percent distribution, 2016 340

10.3a Hospital residential treatment discharges aged 12 years and older, by reason for discharge, treatment completion/transfer, median length of stay (LOS), and characteristics at discharge: Number and row percent distribution, 2016 344

10.3b Hospital residential treatment discharges aged 12 years and older, by reason for discharge, median length of stay (LOS), and characteristics at discharge: Column percent distribution, 2016 345

10.4a Hospital residential treatment discharges aged 12 to 17 years, by reason for discharge, treatment completion/transfer, median length of stay (LOS), and characteristics at admission: Number and row percent distribution, 2016 346

10.4b Hospital residential treatment discharges aged 12 to 17 years, by reason for discharge, median length of stay (LOS), and characteristics at admission: Column percent distribution, 2016 348

10.5a Hospital residential treatment discharges aged 12 to 17 years, by reason for discharge, treatment completion/transfer, median length of stay (LOS), and characteristics at discharge: Number and row percent distribution, 2016 350

10.5b Hospital residential treatment discharges aged 12 to 17 years, by reason for discharge, median length of stay (LOS), and characteristics at discharge: Column percent distribution, 2016 351

10.6a Hospital residential treatment discharges aged 18 years and older, by reason for discharge, treatment completion/transfer, median length of stay (LOS), and characteristics at admission: Number and row percent distribution, 2016 352

10.6b Hospital residential treatment discharges aged 18 years and older, by reason for discharge, median length of stay (LOS), and characteristics at admission: Column percent distribution, 2016 356

List of Tables (continued)

10.7a Hospital residential treatment discharges aged 18 years and older, by reason for discharge, treatment completion/transfer, median length of stay (LOS), and characteristics at discharge: Number and row percent distribution, 2016 360

10.7b Hospital residential treatment discharges aged 18 years and older, by reason for discharge, median length of stay (LOS), and characteristics at discharge: Column percent distribution, 2016 362

11.1 Detoxification discharges aged 12 years and older, by reason for discharge and state or jurisdiction: Number and percent distribution, 2016....364

11.2a Detoxification discharges aged 12 years and older, by reason for discharge, treatment completion/transfer, median length of stay (LOS), and characteristics at admission: Number and row percent distribution, 2016 365

11.2b Detoxification discharges aged 12 years and older, by reason for discharge, median length of stay (LOS), and characteristics at admission: Column percent distribution, 2016 369

11.3a Detoxification discharges aged 12 years and older, by reason for discharge, treatment completion/transfer, median length of stay (LOS), and characteristics at discharge: Number and row percent distribution, 2016 373

11.3b Detoxification discharges aged 12 years and older, by reason for discharge, median length of stay (LOS), and characteristics at discharge: Column percent distribution, 2016 374

11.4a Detoxification discharges aged 12 to 17 years, by reason for discharge, treatment completion/transfer, median length of stay (LOS), and characteristics at admission: Number and row percent distribution, 2016 375

11.4b Detoxification discharges aged 12 to 17 years, by reason for discharge, median length of stay (LOS), and characteristics at admission: Column percent distribution, 2016 377

11.5a Detoxification discharges aged 12 to 17 years, by reason for discharge, treatment completion/transfer, median length of stay (LOS), and characteristics at discharge: Number and row percent distribution, 2016 379

11.5b Detoxification discharges aged 12 to 17 years, by reason for discharge, median length of stay (LOS), and characteristics at discharge: Column percent distribution, 2016 380

List of Tables (continued)

11.6a Detoxification discharges aged 18 years and older, by reason for discharge, treatment completion/transfer, median length of stay (LOS), and characteristics at admission: Number and row percent distribution, 2016 381

11.6b Detoxification discharges aged 18 years and older, by reason for discharge, median length of stay (LOS), and characteristics at admission: Column percent distribution, 2016 385

11.7a Detoxification discharges aged 18 years and older, by reason for discharge, treatment completion/transfer, median length of stay (LOS), and characteristics at discharge: Number and row percent distribution, 2016 389

11.7b Detoxification discharges aged 18 years and older, by reason for discharge, median length of stay (LOS), and characteristics at discharge: Column percent distribution, 2016 391

12.1 Outpatient medication-assisted opioid therapy discharges aged 12 years and older, by reason for discharge and state or jurisdiction: Number and percent distribution, 2016 393

12.2a Outpatient medication-assisted opioid therapy discharges aged 12 years and older, by reason for discharge, treatment completion/transfer, median length of stay (LOS), and characteristics at admission: Number and row percent distribution, 2016 394

12.2b Outpatient medication-assisted opioid therapy discharges aged 12 years and older, by reason for discharge, median length of stay (LOS), and characteristics at admission: Column percent distribution, 2016 398

12.3a Outpatient medication-assisted opioid therapy discharges aged 12 years and older, by reason for discharge, treatment completion/transfer, median length of stay (LOS), and characteristics at discharge: Number and row percent distribution, 2016 402

12.3b Outpatient medication-assisted opioid therapy discharges aged 12 years and older, by reason for discharge, median length of stay (LOS), and characteristics at discharge: Column percent distribution, 2016 403

12.4a Outpatient medication-assisted opioid therapy discharges aged 12 to 17 years, by reason for discharge, treatment completion/transfer, median length of stay (LOS), and characteristics at admission: Number and row percent distribution, 2016 404

12.4b Outpatient medication-assisted opioid therapy discharges aged 12 to 17 years, by reason for discharge, median length of stay (LOS), and characteristics at admission: Column percent distribution, 2016 406

List of Tables (continued)

12.5a Outpatient medication-assisted opioid therapy discharges aged 12 to 17 years, by reason for discharge, treatment completion/transfer, median length of stay (LOS), and characteristics at discharge: Number and row percent distribution, 2016 408

12.5b Outpatient medication-assisted opioid therapy discharges aged 12 to 17 years, by reason for discharge, median length of stay (LOS), and characteristics at discharge: Column percent distribution, 2016 409

12.6a Outpatient medication-assisted opioid therapy discharges aged 18 years and older, by reason for discharge, treatment completion/transfer, median length of stay (LOS), and characteristics at admission: Number and row percent distribution, 2016 410

12.6b Outpatient medication-assisted opioid therapy discharges aged 18 years and older, by reason for discharge, median length of stay (LOS), and characteristics at admission: Column percent distribution, 2016 414

12.7a Outpatient medication-assisted opioid therapy discharges aged 18 years and older, by reason for discharge, treatment completion/transfer, median length of stay (LOS), and characteristics at discharge: Number and row percent distribution, 2016 418

12.7b Outpatient medication-assisted opioid therapy discharges aged 18 years and older, by reason for discharge, median length of stay (LOS), and characteristics at discharge: Column percent distribution, 2016 420

13.1 Medication-assisted opioid detoxification discharges aged 12 years and older, by reason for discharge and state or jurisdiction: Number and percent distribution, 2016 422

13.2a Medication-assisted opioid detoxification discharges aged 12 years and older, by reason for discharge, treatment completion/transfer, median length of stay (LOS), and characteristics at admission: Number and row percent distribution, 2016 423

13.2b Medication-assisted opioid detoxification discharges aged 12 years and older, by reason for discharge, median length of stay (LOS), and characteristics at admission: Column percent distribution, 2016 427

13.3a Medication-assisted opioid detoxification discharges aged 12 years and older, by reason for discharge, treatment completion/transfer, median length of stay (LOS), and characteristics at discharge: Number and row percent distribution, 2016 431

List of Tables (continued)

13.3b Medication-assisted opioid detoxification discharges aged 12 years and older, by reason for discharge, median length of stay (LOS), and characteristics at discharge: Column percent distribution, 2016 432

13.4a Medication-assisted opioid detoxification discharges aged 12 to 17 years, by reason for discharge, treatment completion/transfer, median length of stay (LOS), and characteristics at admission: Number and row percent distribution, 2016 433

13.4b Medication-assisted opioid detoxification discharges aged 12 to 17 years, by reason for discharge, median length of stay (LOS), and characteristics at admission: Column percent distribution, 2016 435

13.5a Medication-assisted opioid detoxification discharges aged 12 to 17 years, by reason for discharge, treatment completion/transfer, median length of stay (LOS), and characteristics at discharge: Number and row percent distribution, 2016 437

13.5b Medication-assisted opioid detoxification discharges aged 12 to 17 years, by reason for discharge, median length of stay (LOS), and characteristics at discharge: Column percent distribution, 2016 438

13.6a Medication-assisted opioid detoxification discharges aged 18 years and older, by reason for discharge, treatment completion/transfer, median length of stay (LOS), and characteristics at admission: Number and row percent distribution, 2016 439

13.6b Medication-assisted opioid detoxification discharges aged 18 years and older, by reason for discharge, median length of stay (LOS), and characteristics at admission: Column percent distribution, 2016 443

13.7a Medication-assisted opioid detoxification discharges aged 18 years and older, by reason for discharge, treatment completion/transfer, median length of stay (LOS), and characteristics at discharge: Number and row percent distribution, 2016 447

13.7b Medication-assisted opioid detoxification discharges aged 18 years and older, by reason for discharge, median length of stay (LOS), and characteristics at discharge: Column percent distribution, 2016 449

State Substance Use Treatment Service Admissions

14.1a Admissions aged 12 years and older, by Census region, Census division, and state or jurisdiction: Number, 2006–2016.....451

List of Tables (continued)

14.1b Admissions aged 12 years and older per 100,000 population, by Census region, Census division, and state or jurisdiction: 2006–2016 453

14.1c Admissions aged 12 years and older per 100,000 population, by Census region, Census division, and state or jurisdiction: 2006–2016, adjusted for age, gender, and race/ethnicity 455

14.2a Primary alcohol admissions aged 12 years and older, by Census region, Census division, and state or jurisdiction: Number, 2006–2016 457

14.2b Primary alcohol admissions aged 12 years and older per 100,000 population, by Census region, Census division, and state or jurisdiction: 2006–2016 459

14.3a Primary marijuana admissions aged 12 years and older, by Census region, Census division, and state or jurisdiction: Number, 2006–2016 461

14.3b Primary marijuana admissions aged 12 years and older per 100,000 population, by Census region, Census division, and state or jurisdiction: 2006–2016 463

14.4a Primary cocaine admissions aged 12 years and older, by Census region, Census division, and state or jurisdiction: Number, 2006–2016 465

14.4b Primary cocaine admissions aged 12 years and older per 100,000 population, by Census region, Census division, and state or jurisdiction: 2006–2016 467

14.5a Primary methamphetamine/amphetamine admissions aged 12 years and older, by Census region, Census division, and state or jurisdiction: Number, 2006–2016 469

14.5b Primary methamphetamine/amphetamine admissions aged 12 years and older per 100,000 population, by Census region, Census division, and state or jurisdiction: 2006–2016 471

14.6a Primary heroin admissions aged 12 years and older, by Census region, Census division, and state or jurisdiction: Number, 2006–2016 473

14.6b Primary heroin admissions aged 12 years and older per 100,000 population, by Census region, Census division, and state or jurisdiction: 2006–2016 475

14.7a Primary non–heroin opiates/synthetics admissions aged 12 years and older, by Census region, Census division, and state or jurisdiction: Number, 2006–2016 477

List of Tables (continued)

14.7b Primary non-heroin opiates/synthetics admissions aged 12 years and older per 100,000 population, by Census region, Census division, and state or jurisdiction: 2006–2016 479

14.8a Primary opiates (heroin and non-heroin) admissions aged 12 years and older, by Census region, Census division, and state or jurisdiction: Number, 2006–2016....482

14.8b Primary opiates (heroin and non-heroin) admissions aged 12 years and older per 100,000 population, by Census region, Census division, and state or jurisdiction: 2006–2016....484

15.1a Admissions aged 12 years and older, by type of service at admission and Census region, Census division, and state or jurisdiction: Number, 2016....486

15.1b Admissions aged 12 years and older, by type of service at admission and Census region, Census division, and state or jurisdiction: Percent distribution, 2016 489

15.2a Admissions aged 12 years and older, by primary substance use and Census region, Census division, and state or jurisdiction: Number, 2016 492

15.2b Admissions aged 12 years and older per 100,000 population, by primary substance use and Census region, Census division, and state or jurisdiction: 2016....494

15.2c Admissions aged 12 years and older per 100,000 population, by primary substance use and Census region, Census division, and state or jurisdiction: 2016, adjusted for age, gender, and race/ethnicity....497

16.1a Alabama admissions aged 12 years and older, by primary substance use and gender, age at admission, and race/ethnicity: Number, 2016....500

16.1b Alabama admissions aged 12 years and older, by primary substance use and gender, age at admission, and race/ethnicity: Percent distribution, 2016 501

16.2a Alaska admissions aged 12 years and older, by primary substance use and gender, age at admission, and race/ethnicity: Number, 2016....502

16.2b Alaska admissions aged 12 years and older, by primary substance use and gender, age at admission, and race/ethnicity: Percent distribution, 2016 503

16.3a Arizona admissions aged 12 years and older, by primary substance use and gender, age at admission, and race/ethnicity: Number, 2016....504

16.3b Arizona admissions aged 12 years and older, by primary substance use and gender, age at admission, and race/ethnicity: Percent distribution, 2016 505

List of Tables (continued)

16.4a Arkansas admissions aged 12 years and older, by primary substance use and gender, age at admission, and race/ethnicity: Number, 2016 506

16.4b Arkansas admissions aged 12 years and older, by primary substance use and gender, age at admission, and race/ethnicity: Percent distribution, 2016 507

16.5a California admissions aged 12 years and older, by primary substance use and gender, age at admission, and race/ethnicity: Number, 2016 508

16.5b California admissions aged 12 years and older, by primary substance use and gender, age at admission, and race/ethnicity: Percent distribution, 2016 509

16.6a Colorado admissions aged 12 years and older, by primary substance use and gender, age at admission, and race/ethnicity: Number, 2016 510

16.6b Colorado admissions aged 12 years and older, by primary substance use and gender, age at admission, and race/ethnicity: Percent distribution, 2016 511

16.7a Connecticut admissions aged 12 years and older, by primary substance use and gender, age at admission, and race/ethnicity: Number, 2016 512

16.7b Connecticut admissions aged 12 years and older, by primary substance use and gender, age at admission, and race/ethnicity: Percent distribution, 2016 513

16.8a Delaware admissions aged 12 years and older, by primary substance use and gender, age at admission, and race/ethnicity: Number, 2016 514

16.8b Delaware admissions aged 12 years and older, by primary substance use and gender, age at admission, and race/ethnicity: Percent distribution, 2016 515

16.9a District of Columbia admissions aged 12 years and older, by primary substance use and gender, age at admission, and race/ethnicity: Number, 2016 516

16.9b District of Columbia admissions aged 12 years and older, by primary substance use and gender, age at admission, and race/ethnicity: Percent distribution, 2016 517

16.10a Florida admissions aged 12 years and older, by primary substance use and gender, age at admission, and race/ethnicity: Number, 2016 518

16.10b Florida admissions aged 12 years and older, by primary substance use and gender, age at admission, and race/ethnicity: Percent distribution, 2016 519

16.11a Hawaii admissions aged 12 years and older, by primary substance use and gender, age at admission, and race/ethnicity: Number, 2016 520

16.11b Hawaii admissions aged 12 years and older, by primary substance use and gender, age at admission, and race/ethnicity: Percent distribution, 2016 521

List of Tables (continued)

16.12a Idaho admissions aged 12 years and older, by primary substance use and gender, age at admission, and race/ethnicity: Number, 2016.....522

16.12b Idaho admissions aged 12 years and older, by primary substance use and gender, age at admission, and race/ethnicity: Percent distribution, 2016.....523

16.13a Illinois admissions aged 12 years and older, by primary substance use and gender, age at admission, and race/ethnicity: Number, 2016.....524

16.13b Illinois admissions aged 12 years and older, by primary substance use and gender, age at admission, and race/ethnicity: Percent distribution, 2016.....525

16.14a Indiana admissions aged 12 years and older, by primary substance use and gender, age at admission, and race/ethnicity: Number, 2016.....526

16.14b Indiana admissions aged 12 years and older, by primary substance use and gender, age at admission, and race/ethnicity: Percent distribution, 2016.....527

16.15a Iowa admissions aged 12 years and older, by primary substance use and gender, age at admission, and race/ethnicity: Number, 2016.....528

16.15b Iowa admissions aged 12 years and older, by primary substance use and gender, age at admission, and race/ethnicity: Percent distribution, 2016.....529

16.16a Kansas admissions aged 12 years and older, by primary substance use and gender, age at admission, and race/ethnicity: Number, 2016.....530

16.16b Kansas admissions aged 12 years and older, by primary substance use and gender, age at admission, and race/ethnicity: Percent distribution, 2016.....531

16.17a Kentucky admissions aged 12 years and older, by primary substance use and gender, age at admission, and race/ethnicity: Number, 2016.....532

16.17b Kentucky admissions aged 12 years and older, by primary substance use and gender, age at admission, and race/ethnicity: Percent distribution, 2016.....533

16.18a Louisiana admissions aged 12 years and older, by primary substance use and gender, age at admission, and race/ethnicity: Number, 2016.....534

16.18b Louisiana admissions aged 12 years and older, by primary substance use and gender, age at admission, and race/ethnicity: Percent distribution, 2016.....535

16.19a Maine admissions aged 12 years and older, by primary substance use and gender, age at admission, and race/ethnicity: Number, 2016.....536

16.19b Maine admissions aged 12 years and older, by primary substance use and gender, age at admission, and race/ethnicity: Percent distribution, 2016.....537

Highlights

This report presents national- and state-level data from the Treatment Episode Data Set (TEDS) for admissions and discharges occurring in 2016, and trend data from 2006 to 2016. It summarizes demographic information and the characteristics and outcomes of treatment for alcohol and/or drug use among clients aged 12 years and older in facilities that report to individual state administrative data systems. Data include treatment admissions and discharges that were received and processed through March 16, 2018.[1]

In 2016, a total of 1,699,261 admissions aged 12 years and older were reported to TEDS by 48 states, the District of Columbia, and Puerto Rico. Georgia and Oregon did not report sufficient admissions for 2016 to be included in this report [Table 1.1]. In prior years, admissions for the following states have also been excluded from the TEDS data: Alaska and the District of Columbia (2006); Alabama (2007); Mississippi (2008); the District of Columbia and Mississippi (2009); Mississippi (2010); South Carolina (2014); and Oregon and South Carolina (2015).

In 2016, a total of 1,458,045 discharges aged 12 years and older were reported to TEDS by 47 states, the District of Columbia, and Puerto Rico. Georgia, Oregon, and West Virginia did not report sufficient discharge data for 2016 to be included in this report [Table 5.1a].

Primary Substance Use at Admission

- Five substance groups accounted for 96 percent of the primary substances reported by the 1,699,261 TEDS admissions aged 12 and older in 2016: alcohol (33 percent), opiates (34 percent), marijuana/hashish (13 percent), stimulants (11 percent), and cocaine (5 percent) [Table 1.1b].

Alcohol

- The proportion of admissions with alcohol use as the primary substance reported increased from 40 percent in 2006 to a high of 42 percent in 2009, before declining to 33 percent in 2016 [Table 1.1b].
- The average age at admission among alcohol-only admissions was 43 years, whereas the average age among admissions for primary use of alcohol with secondary drug use was 39 years [Table 2.1b].
- Almost two thirds (65 percent) of alcohol-only admissions aged 12 years or older were non-Hispanic Whites, 13 percent were of Hispanic origin, and 13 percent were non-Hispanic Blacks. Among admissions for primary alcohol with secondary drug use, 57 percent were non-Hispanic Whites, 21 percent were non-Hispanic Blacks, and 13 percent were of Hispanic origin [Table 2.2b].

[1] For researchers interested in more detailed analysis, TEDS public use files are available for download from the Substance Abuse and Mental Health Data Archive, which can be accessed at https://datafiles.samhsa.gov. Summary data for individual states that have submitted the full year of data are available online through the Quick Statistics website at https://wwwdasis.samhsa.gov/webt/newmapv1.htm.

Heroin

- In 2006, 14 percent of admissions aged 12 years or older were for primary heroin use. In 2016, 26 percent of admissions aged 12 years or older were for primary heroin use [Table 1.1b].
- For primary heroin admissions, the average age at admission was 35 years [Table 2.1b].
- Non-Hispanic Whites accounted for 69 percent of primary heroin admissions aged 12 years and older in 2016; Hispanics accounted for 13 percent and non-Hispanic Blacks accounted for 12 percent [Table 2.2b].

Opiates Other Than Heroin[2]

- The proportion of admissions aged 12 years or older for primary use of opiates other than heroin increased from 4 percent in 2006 to 10 percent in 2011 and 2012, before declining to 8 percent in 2016 [Table 1.1b].
- The average age at admission was 34 years among admissions for primary use of non-heroin opiates [Table 2.1b].
- Non-Hispanic Whites accounted for 81 percent of primary non-heroin opiate admissions aged 12 years or older [Table 2.2b].

Marijuana/Hashish

- The proportion of marijuana/hashish admissions aged 12 years or older increased from 16 percent in 2006 to 19 percent in 2010, before declining to 13 percent in 2016 [Table 1.1b].
- The average age at admission was 27 years among admissions for primary use of marijuana/hashish [Table 2.1b].
- Non-Hispanic Whites represented 44 percent of primary marijuana/hashish admissions aged 12 years or older; 30 percent were non-Hispanic Blacks, and 18 percent were of Hispanic origin [Table 2.2b].

Cocaine/Crack

- The proportion of admissions for primary cocaine declined from 14 percent of admissions aged 12 years or older in 2006 to 5 percent in 2016 [Table 1.1b].
- The average age at admission among primary smoked cocaine admissions was 44 years; among primary non-smoked cocaine admissions, the average age was 37 years [Table 2.1b].
- Non-Hispanic Blacks represented 51 percent of primary smoked cocaine admissions aged 12 years or older; 34 percent were non-Hispanic Whites, and 9 percent were of Hispanic origin. Among primary non-smoked cocaine admissions aged 12 years and older, 45 percent were non-Hispanic Whites, 31 percent were non-Hispanic Blacks, and 18 percent were of Hispanic origin [Table 2.2b].

---

[2] These drugs include methadone, buprenorphine, codeine, hydrocodone, hydromorphone, meperidine, morphine, opium, oxycodone, pentazocine, propoxyphene, tramadol, and any other drug with morphine-like effects.

Methamphetamine/Amphetamines

- The proportion of admissions for primary methamphetamine/amphetamines aged 12 years and older was 8 percent in 2006, 6 percent in 2011, and 11 percent in 2016 [Table 1.1b].
- The average age at admission was 34 years for primary methamphetamine/amphetamine admissions [Table 2.1b].
- Non-Hispanic Whites represented 68 percent of primary methamphetamine/amphetamine admissions aged 12 years and older; 17 percent were of Hispanic origin, and 4 percent were non-Hispanic Blacks [Table 2.2b].

Trends in Substance Use Treatment Admissions

- In each year between 2006 and 2016, the Middle Atlantic division had the largest number of admissions among all Census divisions, with 377,174 admissions in 2016 [Table 14.1a].
- The ratio of admissions per 100,000 population aged 12 years and older in 2016 was highest in the New England and Middle Atlantic divisions—1,466 and 1,057 per 100,000 population aged 12 years and older, respectively [Table 14.1b].

Type of Treatment Service at Discharge

Of the 1,458,045 discharges aged 12 years and older in 2016 for which the type of treatment service is known [Table 5.2b]:

- 39 percent were discharged from outpatient treatment.
- 20 percent were discharged from detoxification.
- 13 percent were discharged from intensive outpatient treatment.

Reason for Discharge

Of the 1,458,045 discharges aged 12 years and older in 2016 for which reason for discharge is known [Table 5.3b]:

- 43 percent of the discharges completed treatment.
- 28 percent of the discharges dropped out of treatment.
- 16 percent of the discharges were transferred to further treatment.

Treatment Completion by Type of Treatment Service

The treatment completion rate was 43 percent among discharges aged 12 years and older from all service types combined. For the individual service types, treatment was completed by [Table 5.4]:

- 68 percent of discharges from detoxification,
- 60 percent of discharges from hospital residential treatment,
- 54 percent of discharges from short-term residential treatment,

- 41 percent of discharges from medication-assisted opioid detoxification, and
- 13 percent of discharges from outpatient medication-assisted opioid therapy.

Median Length of Stay (LOS)

The median LOS in treatment among those aged 12 years and older, by type of treatment service, was [Table 5.4]:

- 113 days for discharges from outpatient medication-assisted opioid therapy,
- 81 days for discharges from outpatient treatment,
- 53 days for discharges from intensive outpatient treatment,
- 46 days for discharges from long-term residential treatment, and
- 5 days for discharges from medication-assisted opioid detoxification.

Treatment Admissions per 100,000 Population, by State or Jurisdiction

- In 2016, the treatment admission ratio was higher for primary alcohol use than for any illicit drug. The admission ratio for primary alcohol use was 209 per 100,000 population aged 12 years and older.
- For drugs, the highest admissions ratios were for heroin (168 per 100,000 population aged 12 years and older) and marijuana (86 per 100,000 population aged 12 years and older) [Table 15.2b]. Heroin and marijuana were the most common primary illicit drugs used among admissions in all Census divisions [Table 15.2b].
- Primary alcohol use accounted for a larger proportion of treatment admissions in 2016 than for any illicit drug in 31 of the 50 reporting states and jurisdictions. States in which the proportion of admissions for primary use of an illicit drug were greater than that for primary alcohol use were: Arkansas, California, Hawaii, Idaho, Kansas, and Oklahoma (methamphetamine/amphetamines); Connecticut, Illinois, Kentucky, Maryland, Massachusetts, New Hampshire, New Jersey, Ohio, Pennsylvania, and Vermont (heroin); Louisiana and Delaware (other/none specified); and Tennessee (opiates other than heroin) [Table 15.2b].

Reason for Discharge and Treatment Completion by State or Jurisdiction

- The treatment dropout rate for all types of treatment services averaged 28 percent across all states and jurisdictions; 29 states reported dropout rates below this average [Table 5.3b].
- Of the 45 states or jurisdictions that offered outpatient medication-assisted opioid therapy, one state (North Carolina) had a higher treatment completion rate in this service setting than for all types of treatment services combined [Table 12.1].
- Of the 38 states or jurisdictions that offered medication-assisted opioid detoxification, 16 states/jurisdictions had a higher treatment completion rate in this service setting than for all types of treatment services combined [Table 13.1].

Introduction

This report presents national- and state-level data from the Treatment Episode Data Set (TEDS) for admissions and discharges occurring in 2016, and trend data from 2006 to 2016. It summarizes demographic information and the characteristics and outcomes of treatment for alcohol and/or drug use among clients aged 12 years and older in facilities that report to individual state administrative data systems. Data include records for treatment admissions and discharges that were received and processed through March 16, 2018.[3]

For 2016, a total of 1,699,261 admissions aged 12 years and older were reported to TEDS by 48 states, the District of Columbia, and Puerto Rico (Georgia and Oregon did not report sufficient admissions for 2016 to be included in this report) [Table 1.1].

Forty-seven states, the District of Columbia, and Puerto Rico submitted 1,600,998 records for clients discharged in 2016. Georgia, Oregon, and West Virginia had submitted no data or incomplete data for 2016 discharges as of March 16, 2018 [Table 5.1a]. Of the 1,600,998 discharges reported, 91 percent (or 1,458,045 records) can be linked to TEDS admissions during 2000 through 2016 [Tables 5.1a–b].

TEDS records do not represent individuals; rather, each record represents a treatment episode. Thus, an individual admitted to treatment twice within a calendar year is counted as two admissions. Similarly, discharges during the year, regardless of when the admission occurred, are counted.

TEDS does not include all substance use treatments. It includes treatment admissions and discharges at facilities that are licensed or certified by a state substance abuse agency to provide care for people with a substance use disorder (or facilities that are administratively tracked for other reasons). In general, facilities reporting TEDS data are those that receive state alcohol and/or drug agency funds (including federal block grant funds) for the provision of alcohol and/or drug treatment services. Additional information on the history and methodology of TEDS and this report, as well as important issues related to state data collection systems, are available in Appendix A.

It is important to note that percentages in charts, narrative lists, and tables may not add to 100 percent due to rounding; figures in the narrative are expressed using the nearest whole number.

[3] For researchers interested in more detailed analysis, TEDS public use files are available for download from the Substance Abuse and Mental Health Data Archive, which can be accessed at https://datafiles.samhsa.gov. Summary data for individual states that have submitted the full year of data are available online through the Quick Statistics website at https://wwwdasis.samhsa.gov/webt/newmapv1.htm.

Chapter 1.
Characteristics of Admissions: 2016

All Admissions Aged 12 Years and Older

The tables associated with this chapter present data on the characteristics of all admissions in 2016 aged 12 years and older, by primary substance used.

- The average age at admission was 36 years; 8 percent of admissions were aged 12 to 20 years [Tables 2.1a–b].
- Non-Hispanic Whites represented 62 percent of all admissions aged 12 years and older in 2016 (of which 39 percent were male and 24 percent were female). Non-Hispanic Blacks represented 17 percent of all admissions (of which 12 percent were male and 5 percent female) [Table 2.3b].
- No prior treatment was reported by 36 percent of all admissions, while 16 percent had been in treatment five or more times previously [Table 2.6b].
- Self- or individual referrals and court/criminal justice system referrals were the top two reasons clients sought treatment, accounting for 41 percent and 30 percent of treatment admissions, respectively [Table 2.7b].
- Most admissions (61 percent) received ambulatory treatment, 21 percent received detoxification treatment, and 17 percent received rehabilitation/residential treatment [Table 2.8b].

Chapter 2.
Type of Treatment Services: 2016

TEDS records the type of service to which clients are admitted for treatment. The major categories are broadly defined as ambulatory, rehabilitation/residential, and detoxification. In this report, admissions for which medication-assisted opioid therapy (i.e., therapy using methadone, buprenorphine, or naltrexone) was planned have been categorized as a separate type of treatment service.

Table 4.1c shows the type of treatment service received by primary substance used.

- Ambulatory treatment services accounted for 50 percent of all admissions (38 percent in outpatient treatment and 12 percent in intensive outpatient treatment). Admissions for marijuana/hashish (85 percent) and methamphetamine/amphetamines (58 percent) received ambulatory services in greater proportion than all admissions combined.
- Detoxification services accounted for 22 percent of all admissions (17 percent in free-standing residential treatment, 4 percent in hospital inpatient treatment, and 1 percent in ambulatory treatment). Among admissions for marijuana, 4 percent received detoxification.
- Rehabilitation/residential treatment accounted for 16 percent of all admissions (9 percent in short-term treatment, 6 percent in long-term treatment, and less than 1 percent in hospital inpatient treatment). A greater proportion of admissions for methamphetamine/amphetamines, cocaine, and tranquilizers (28, 26, and 20 percent, respectively) received rehabilitation/residential treatment services than among all admissions combined (16 percent).
- Medication-assisted opioid therapy accounted for about 12 percent of all admissions (10 percent in outpatient treatment, 1 percent in detoxification treatment, and 1 percent in residential treatment). Medication-assisted opioid therapy was planned for 32 percent of primary opiate admissions.

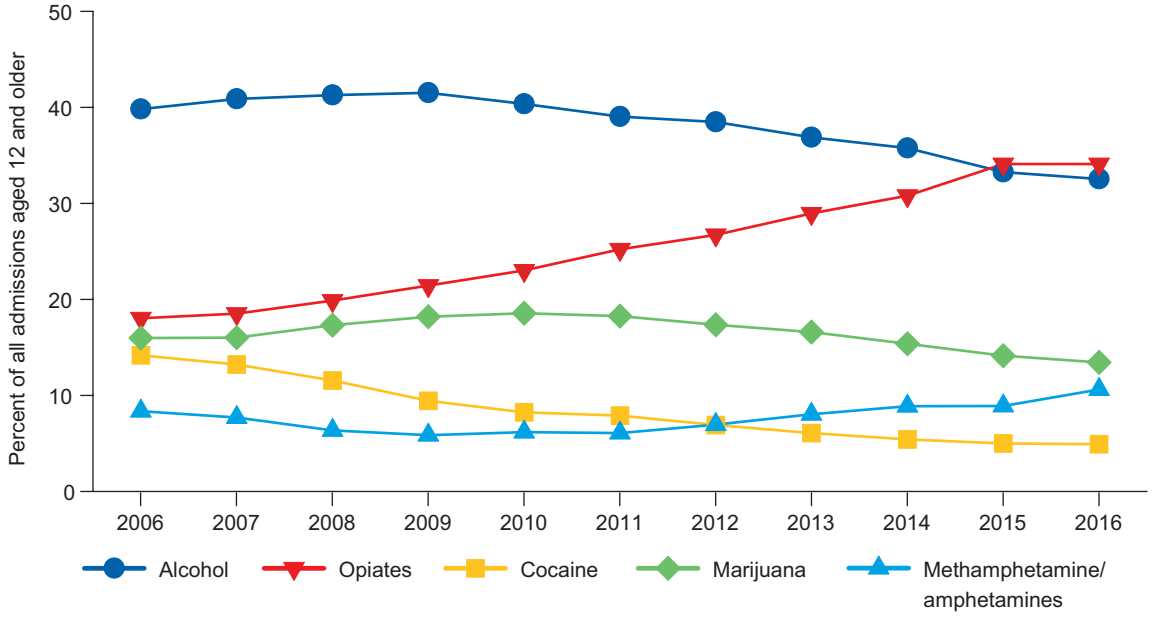
Chapter 3.
Trends in Substance Use Treatment Admissions Aged 12 Years and Older: 2006–2016

This chapter details trends in the annual numbers and rates of admissions aged 12 years and older between 2006 and 2016. Trend data are valuable for monitoring changing patterns in substance use treatment admissions.

Trends in Primary Substance Use: 2006–2016

Tables 1.1a–b and Figure 1. The number of all admissions aged 12 years and older decreased from 1,959,454 in 2006 to 1,699,261 in 2016. Between 2006 and 2016, five substance groups accounted for 96 percent of the primary substances of use reported by TEDS treatment admissions aged 12 years and older: alcohol, opiates, marijuana/hashish, cocaine, and methamphetamine/amphetamines. However, the proportions of admissions by primary substance used changed considerably during the period.

Figure 1. Primary substance use at admission: 2006–2016



SOURCE: Center for Behavioral Health Statistics and Quality, Substance Abuse and Mental Health Services Administration, Treatment Episode Data Set (TEDS). Data received through 03.16.18.

Trends in the Concomitant Use of Alcohol and Drugs

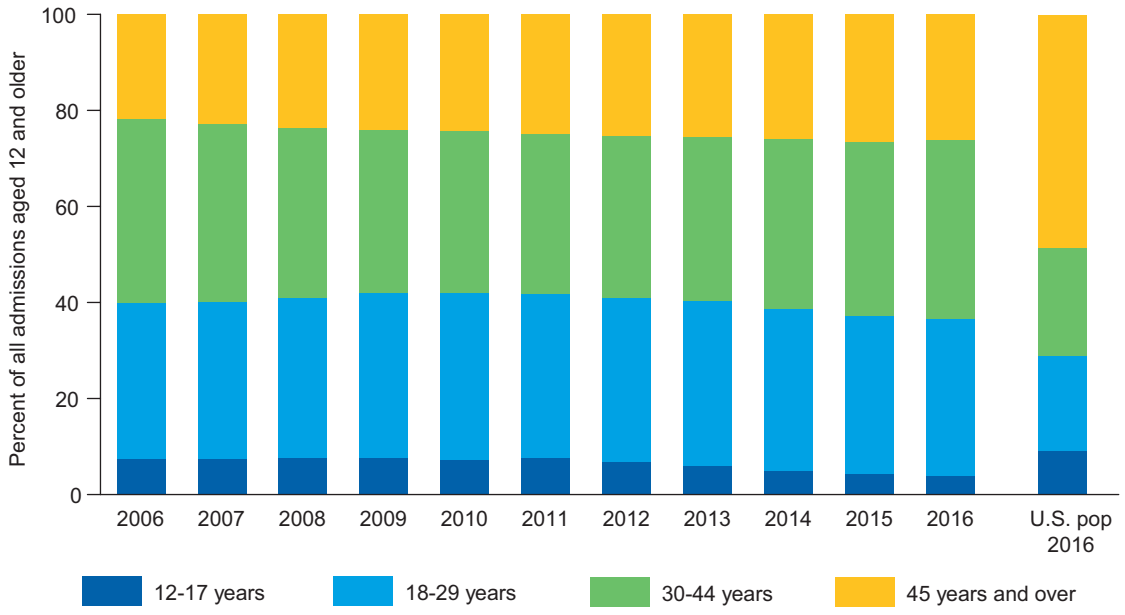
Table 1.2. The concomitant use of alcohol and drugs continues to be a significant problem. Because TEDS collects a maximum of three substances used, rather than all substances used, alcohol use among polydrug users may be underreported.

Trends in Demographic Characteristics

Table 1.3b and Figure 2. Males represented 68 percent of admissions aged 12 years and older in 2006 and 65 percent in 2016. In 2016, 49 percent of the U.S. population aged years 12 and older was male. The following changes in the age distribution of admissions are noteworthy:

- The proportion of admissions aged 12 to 20 years decreased from 14 percent in 2006 to 8 percent in 2016.
- The proportion of admissions aged 25 to 34 years increased from 25 percent in 2006 to 35 percent in 2016.
- The proportion of admissions aged 50 years and older increased from 11 percent in 2006 to 17 percent in 2016.

Figure 2. Age at admission: TEDS 2006–2016 and U.S. population 2016

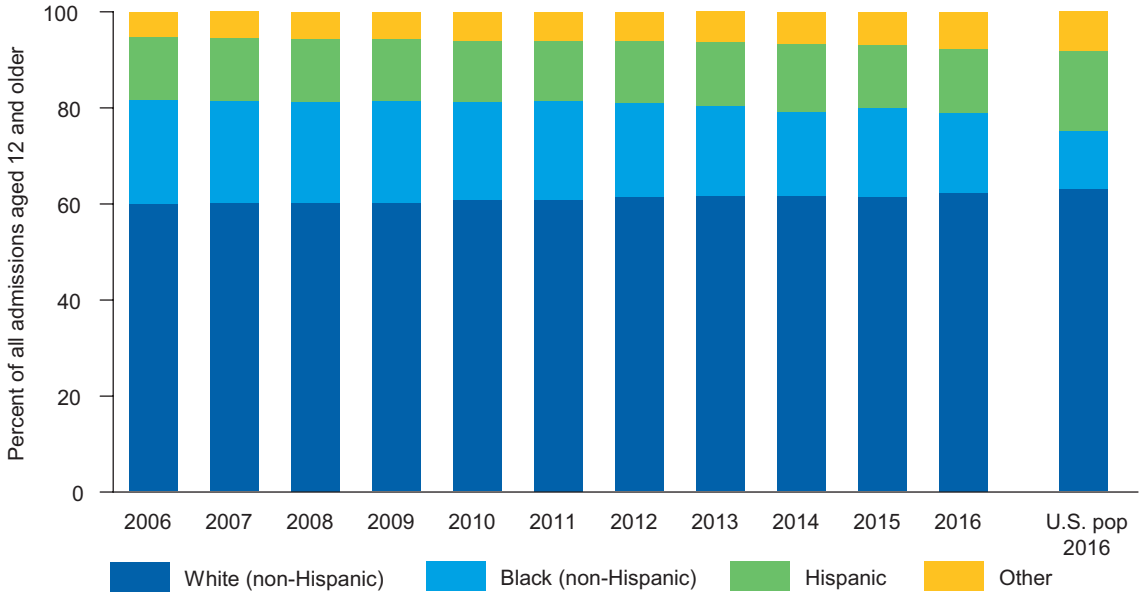


SOURCES: Center for Behavioral Health Statistics and Quality, Substance Abuse and Mental Health Services Administration, Treatment Episode Data Set (TEDS); data received through 03.16.18. U.S. Census Bureau, Population estimates by age, gender, race/ethnicity, 2016. Population Estimates Program, "SC-EST2016-alldata6: Annual State Resident Population Estimates for 6 Race Groups (5 Race Alone Groups and Two or More Races) by Age, Sex, and Hispanic Origin: April 1, 2010 to July 1, 2016"; "SC-EST2009-alldata6: Annual State Resident Population Estimates for 6 Race Groups (5 Race Alone Groups and Two or More Races) by Age, Sex, and Hispanic Origin: April 1, 2000 to July 1, 2009."

Table 1.4 and Figure 3. The racial/ethnic composition of admissions aged 12 years and older between 2006 and 2016 was as follows:

- Non-Hispanic Whites increased from 60 percent of admissions in 2006 to 62 percent of admissions in 2016.
- Non-Hispanic Blacks declined from 22 percent of admissions in 2006 to 17 percent of admissions in 2016.
- Admissions of Hispanic origin comprised, on average, 13 percent during the period.

Figure 3. Race/ethnicity of admissions: TEDS 2006–2016 and U.S. population 2016



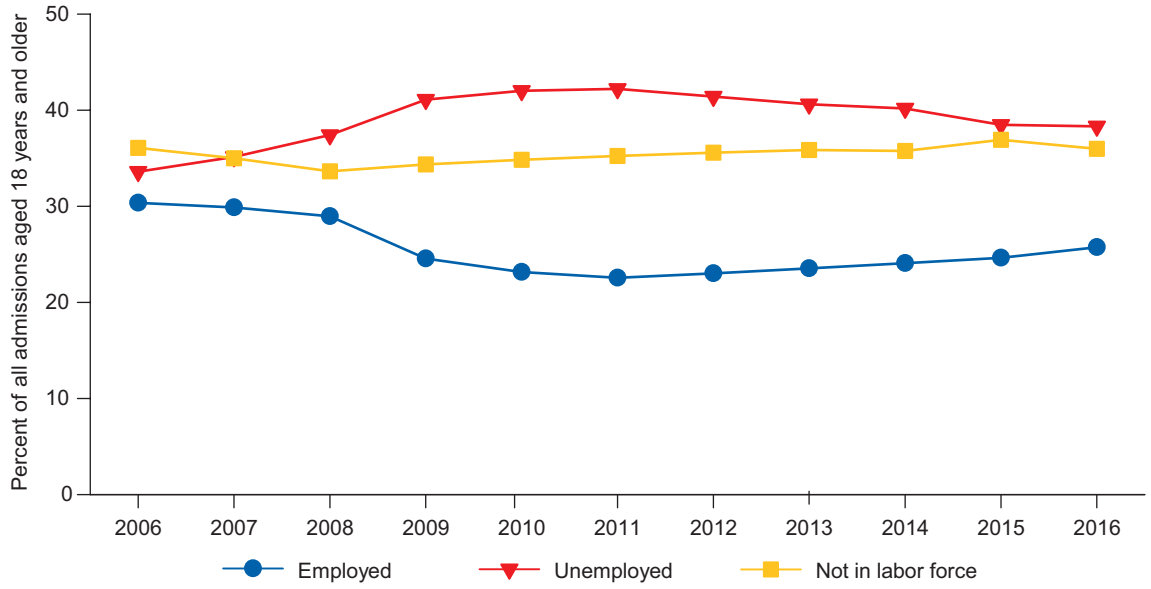
SOURCES: Center for Behavioral Health Statistics and Quality, Substance Abuse and Mental Health Services Administration, Treatment Episode Data Set (TEDS); data received through 03.16.18. U.S. Census Bureau, Population estimates by age, gender, race/ethnicity, 2016. Population Estimates Program, "SC-EST2016-alldata6: Annual State Resident Population Estimates for 6 Race Groups (5 Race Alone Groups and Two or More Races) by Age, Sex, and Hispanic Origin: April 1, 2010 to July 1, 2016"; "SC-EST2009-alldata6: Annual State Resident Population Estimates for 6 Race Groups (5 Race Alone Groups and Two or More Races) by Age, Sex, and Hispanic Origin: April 1, 2000 to July 1, 2009."

Trends in Employment Status

Tables 1.5a–b and Figure 4. Between 2006 and 2016, 23 to 30 percent of admissions aged 18 years and older were employed; by comparison, 61 percent of the U.S. population aged 18 years and older was employed in 2016. The adjusted distribution of admissions by age, race, and sex shown in Tables 1.5a–b indicates an even greater disparity in employment status.

- The proportion of admissions that were unemployed increased from 37 percent in 2008 to 42 percent in 2011; this proportion gradually declined beginning in 2012, reaching 38 percent in 2016.
- Between 2010 and 2011, 77 percent of TEDS admissions aged 18 years and older were either unemployed or not in the labor force, declining to 74 percent in 2016.

Figure 4. Employment status among admissions aged 18 years and older: 2006–2016



SOURCE: Center for Behavioral Health Statistics and Quality, Substance Abuse and Mental Health Services Administration, Treatment Episode Data Set (TEDS). Data received through 03.16.18.

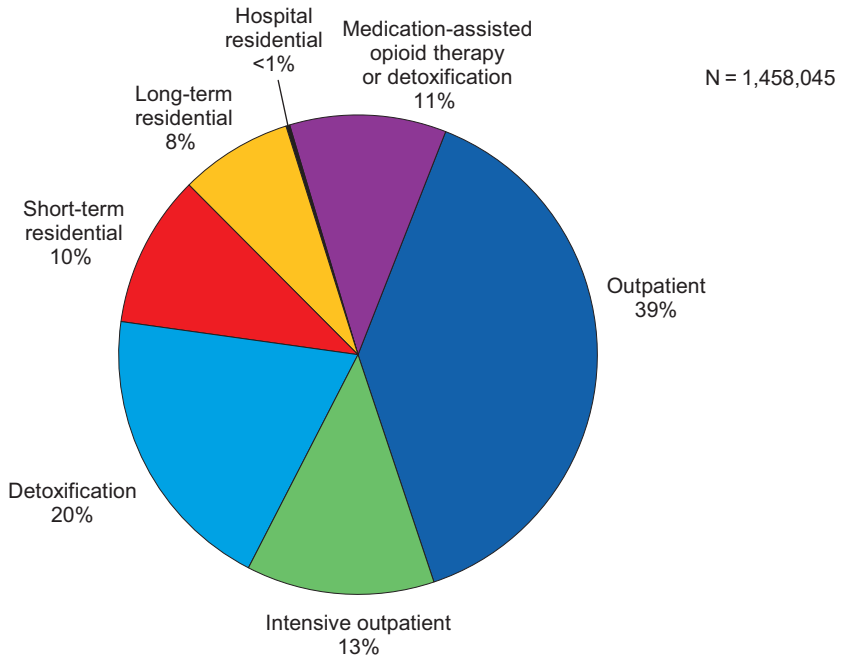
Chapter 4.
Discharge Data Overview for All Types of Treatment Services: 2016

Type of Treatment Service

Tables 5.2a–b. These tables present type of treatment service at discharge, by state, for 2016 discharges. There was considerable state-to-state variability in the combination of types of treatment service available and in the proportions discharged from each.

Figure 5 illustrates the distribution of 2016 discharges among various types of treatment services. The majority were discharged from a type of outpatient treatment service—39 percent from outpatient treatment and 13 percent from intensive outpatient treatment. In addition, 20 percent were discharged from detoxification, 10 percent from short-term residential treatment, 8 percent from long-term residential treatment, 11 percent from medication-assisted opioid therapy or detoxification, and less than 1 percent from hospital residential treatment.

Figure 5. Type of treatment service at discharge: 2016



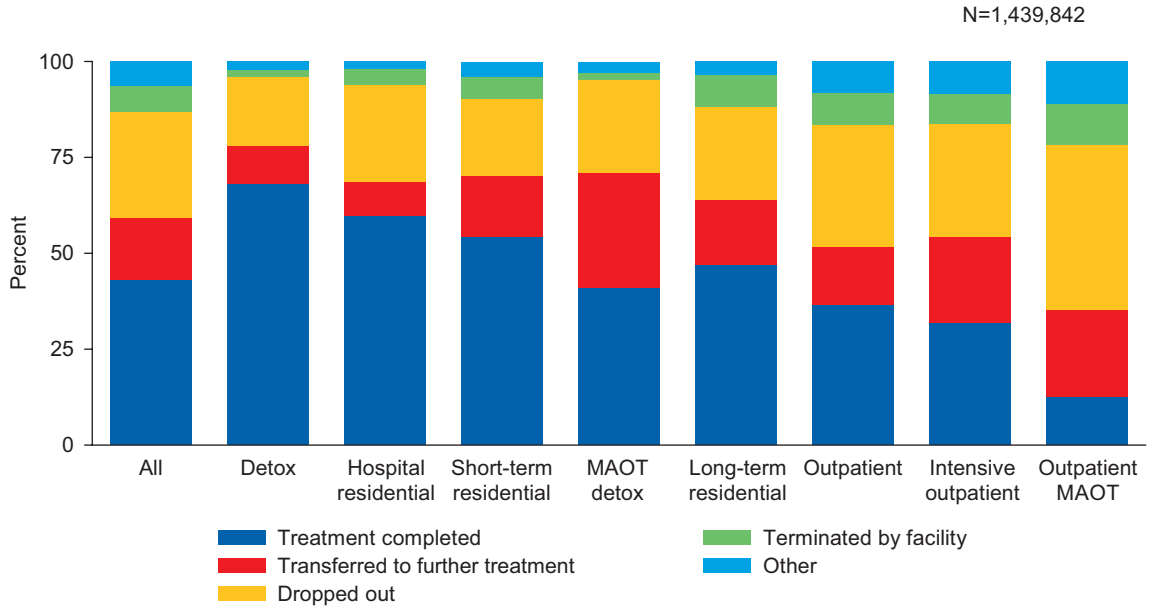
SOURCE: Center for Behavioral Health Statistics and Quality, Substance Abuse and Mental Health Services Administration, Treatment Episode Data Set (TEDS). Data received through 03.16.18.

Reason for Discharge by Type of Treatment Service

Table 5.4 and Figure 6 present the reason for discharge by type of treatment service. Note that in Table 5.4 and Figure 6, the *other* category includes data for death and incarceration; in Tables 5.3a–b, death and incarceration are shown separately.

- Among all discharges, 43 percent completed treatment. Another 16 percent were transferred to further substance use treatment.
- By type of treatment service, completion was reported in greatest proportion among discharges from detoxification (68 percent).
- Treatment dropout was reported in greatest proportion among discharges from outpatient medication-assisted opioid therapy (43 percent) and outpatient treatment discharges (32 percent).

Figure 6. Reason for discharge, by type of treatment service: 2016



MAOT = Medication-assisted opioid therapy.
SOURCE: Center for Behavioral Health Statistics and Quality, Substance Abuse and Mental Health Services Administration, Treatment Episode Data Set (TEDS). Data received through 03.16.18.

Median Length of Stay (LOS) by Type of Treatment Service and Reason for Discharge

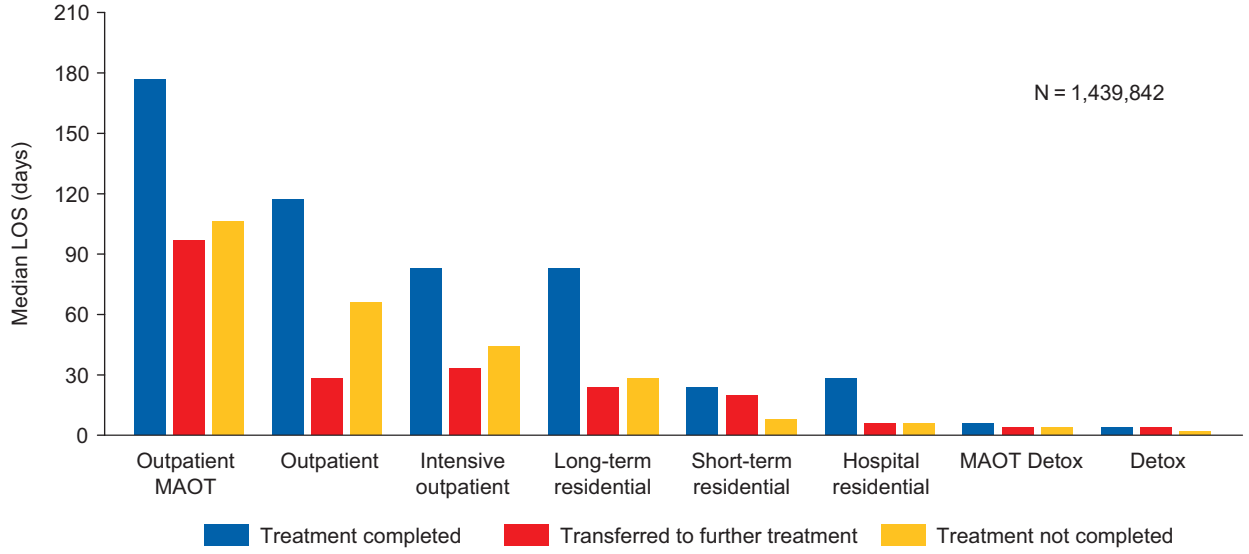
Table 5.4.

- The median length of stay (LOS) was longest for discharges from outpatient medication-assisted opioid therapy (113 days) and outpatient treatment (81 days).
- The median LOS was shortest for discharges from detoxification (4 days) and medication-assisted opioid detoxification (5 days).

Figure 7.

- The median LOS for discharges that completed treatment was longer than or equal to those that transferred to further treatment or that did not complete treatment in all types of treatment service.
- The median LOS among discharges that completed treatment was 177 days for outpatient medication-assisted opioid therapy, 117 days for outpatient treatment, 83 days for intensive outpatient treatment, 83 days for long-term residential treatment, 28 days for hospital residential treatment, 24 days for short-term residential treatment, 6 days for medication-assisted opioid detoxification, and 4 days for detoxification.

Figure 7. Median length of stay (LOS), by reason for discharge and type of treatment service: 2016



MAOT = Medication-assisted opioid therapy.

Socio-Demographic and Substance Use Characteristics at Time of Admission

Tables 5.5a–b to 5.10a–b summarize the number and percent distribution of characteristics at admission, by type of treatment service for all discharges. Summary findings of the admission characteristics of all discharges combined include the following:

- Males accounted for 65 percent of all discharges.
- Of all discharges, 8 percent were 12 to 20 years of age at the time of admission, 18 percent were 25 to 29 years of age, and 17 percent were aged 50 years or older.
- Non-Hispanic Whites accounted for 62 percent of all discharges.
- Prior to the current episode, 64 percent of all discharges had at least one prior treatment episode.
- Self- or individual referrals accounted for 41 percent of all discharges; 30 percent were referred to treatment through a criminal justice/DUI source.
- Of discharges aged 18 years and older, 74 percent reported completing 12 or more years of education or a GED.

Treatment Completion

Tables 5.11a to 5.16b. Some general observations can be made about the completion rate for all treatment discharges combined:

- Of discharges aged 18 years and older, the treatment completion rate was 38 percent among those with between 9 and 11 years of education; among those with 16 years of education or more, or a bachelor's degree, the treatment completion rate was 54 percent.
- For primary substance use at admission among discharges aged 12 to 17 years, treatment completion rates were highest for alcohol (48 percent) and marijuana (39 percent). Among discharges aged 18 years and older, completion rates were highest for alcohol (56 percent) and cocaine (40 percent).
- The treatment completion rate was higher among discharges that reported being employed full-time at admission (49 percent) than among those that reported being unemployed or not in the labor force at admission (40 and 44 percent, respectively).
- The treatment completion rate was 45 percent among Hispanics, 43 percent among non-Hispanic Whites, and 42 percent among non-Hispanic Blacks.

Chapter 5.
Treatment Admissions Aged 12 Years and Older, by State or Jurisdiction, Primary Substance Use, and Selected Characteristics: 2016

The tables associated with this chapter present data on substance use treatment admissions aged 12 years and older in 2016 by state or jurisdiction, primary substance use, and selected demographic characteristics.

As noted previously, comparisons among states and jurisdictions should be made with caution. Many factors affect comparability (e.g., facilities included, clients included, ability to track multi-service episodes, services offered, and completeness and timeliness of reporting). See Appendix A for a full discussion.

Tables 16.1a–16.50a present, for each state or jurisdiction reporting admissions to TEDS for 2016, the number of admissions aged 12 years and older with demographic characteristics (gender, age group, and race/ethnicity) by primary substance.

Tables 16.1b–16.50b present, for each state or jurisdiction reporting admissions to TEDS for 2016, the percentage distribution of demographic characteristics (gender, age group, and race/ethnicity) by primary substance among admissions aged 12 years and older.

Chapter 6.
Treatment Discharges Aged 12 Years and Older, by Reason for Discharge and by State or Jurisdiction: 2016

The tables associated with this chapter present data on substance use treatment discharges in 2016 for admissions aged 12 years and older, by reason for discharge and by state or jurisdiction.

Tables 5.3a–b present the reason for discharge by state or jurisdiction. Note that in Tables 5.3a–b, the *other* category does not include data for death or incarceration.

Tables 6.1–13.1 present, for each state or jurisdiction reporting discharges in 2016, the reason for discharge from outpatient treatment [Table 6.1], intensive outpatient treatment [Table 7.1], short-term residential treatment [Table 8.1], long-term residential treatment [Table 9.1], hospital residential treatment [Table 10.1], detoxi ication [Table 11.1], outpatient medication-assisted opioid therapy [Table 12.1], and medication-assisted opioid detoxi ication [Table 13.1].

- - Quantity is less than zero; * Less than 0.05 percent.

NOTES: Based on linked admission and discharge data reported to TEDS by 49 states and jurisdictions. Comparisons among states should be made with caution; see Appendix A. The discharges reported exclude codependents and discharges whose length of stay (LOS) was 0 days or whose reason for discharge was unknown/missing. Percentages may not add to 100 percent due to rounding.

- - Quantity is zero; * Less than 0.05 percent.

[1] Louisiana is in the process of redesigning their data collection system; this process affects how the state is able to report discharges, thus contributing to the relatively high number of treatment dropouts.

NOTES: Based on linked admission and discharge data reported to TEDS by 49 states and jurisdictions. Comparisons among states should be made with caution; see Appendix A. Percentages may not add to 100 percent due to rounding. Percentages are based on all admissions with known and valid values. Admissions for which values were not collected, unknown, or missing are excluded from the percentage base (denominator).

Med.-asst. opi. detoxification[4]	5	6	4	4	4	3

[1] Excludes 18,203 residential (short-term, long-term, hospital) discharges where medication-assisted opioid therapy was planned.

[2] Includes only free-standing residential detoxification, hospital detoxification, and outpatient detoxification.

[3] Outpatient and intensive outpatient medication-assisted opioid therapy was planned.

[4] Medication-assisted opioid detoxification (free-standing, hospital, and outpatient) was planned.

NOTES: Based on linked admission and discharge data reported to TEDS by 49 states and jurisdictions. Percentages may not add to 100 percent due to rounding. Percentages are based on all admissions with known and valid values. Admissions for which values were not collected, unknown, or missing are excluded from the percentage base (denominator). The reason for discharge 'other' category includes clients who were discharged because they were incarcerated, died, moved, became ill, were hospitalized, or another reason somewhat out of client's control, or if the client status at discharge was not known.

[1] Excludes 18,203 residential (short-term, long-term, hospital) discharges where medication-assisted opioid therapy was planned.

[2] Outpatient and intensive outpatient medication-assisted opioid therapy was planned.

[3] Medication-assisted opioid detoxification (free-standing, hospital, and outpatient) was planned.

[4] Only discharges aged 18 years and older are included for *veteran status, source of income support, employment status* and *detailed not in labor force* in this report.

NOTES: Based on linked admission and discharge data reported to TEDS by 49 states and jurisdictions. Some data items in this table are Supplemental Data Set items, which are reported at each state's option.

SOURCE: Center for Behavioral Health Statistics and Quality, Substance Abuse and Mental Health Services Administration, Treatment Episode Data Set (TEDS). Data received through 03.16.18.

[1] Excludes 18,203 residential (short-term, long-term, hospital) discharges where medication-assisted opioid therapy was planned.

[2] Outpatient and intensive outpatient medication-assisted opioid therapy was planned.

[3] Medication-assisted opioid detoxification (free-standing, hospital, and outpatient) was planned.

[4] Only discharges aged 18 years and older are included for *veteran status, source of income support, employment status* and *detailed not in labor force* in this report.

NOTES: Based on linked admission and discharge data reported to TEDS by 49 states and jurisdictions. Percentages may not add to 100 percent due to rounding. Admissions for which values were not collected, unknown, or missing are excluded from the percentage base (denominator).

- - Quantity is zero.

[1] Excludes 18,203 residential (short-term, long-term, hospital) discharges where medication-assisted opioid therapy was planned.

[2] Outpatient and intensive outpatient medication-assisted opioid therapy was planned.

[3] Medication-assisted opioid detoxification (free-standing, hospital, and outpatient) was planned.

[4] This information is collected at admission and may not correspond to the actual source of payment.

NOTES: Based on linked admission and discharge data reported to TEDS by 49 states and jurisdictions. Some data items in this table are Supplemental Data Set items, which are reported at each state's option.

SOURCE: Center for Behavioral Health Statistics and Quality, Substance Abuse and Mental Health Services Administration, Treatment Episode Data Set (TEDS). Data received through 03.16.18.

- - Quantity is zero.

[1] Excludes 18,203 residential (short-term, long-term, hospital) discharges where medication-assisted opioid therapy was planned.

[2] Outpatient and intensive outpatient medication-assisted opioid therapy was planned.

[3] Medication-assisted opioid detoxification (free-standing, hospital, and outpatient) was planned.

[4] This information is collected at admission and may not correspond to the actual source of payment.

NOTES: Based on linked admission and discharge data reported to TEDS by 49 states and jurisdictions. Admissions for which values were not collected, unknown, or missing are excluded from the percentage base (denominator).

SOURCE: Center for Behavioral Health Statistics and Quality, Substance Abuse and Mental Health Services Administration, Treatment Episode Data Set (TEDS). Data received through 03.16.18.

- - Quantity is zero.

[1] Excludes 18,203 residential (short-term, long-term, hospital) discharges where medication-assisted opioid therapy was planned.

[2] Outpatient and intensive outpatient medication-assisted opioid therapy was planned.

[3] Medication-assisted opioid detoxification (free-standing, hospital, and outpatient) was planned.

[4] Only discharges aged 18 years and older are included for *veteran status, source of income support, employment status,* and *detailed not in labor force* in this report.

NOTES: Based on linked admission and discharge data reported to TEDS by 49 states and jurisdictions. Admissions for which values were not collected, unknown, or missing are excluded from the percentage base (denominator).

SOURCE: Center for Behavioral Health Statistics and Quality, Substance Abuse and Mental Health Services Administration, Treatment Episode Data Set (TEDS). Data received through 03.16.18.

- - Quantity is zero.

[1] Excludes 18,203 residential (short-term, long-term, hospital) discharges where medication-assisted opioid therapy was planned.

[2] Outpatient and intensive outpatient medication-assisted opioid therapy was planned.

[3] Medication-assisted opioid detoxification (free-standing, hospital, and outpatient) was planned.

[4] Only discharges aged 18 years and older are included for *veteran status, source of income support, employment status,* and *detailed not in labor force* in this report.

NOTES: Based on linked admission and discharge data reported to TEDS by 49 states and jurisdictions. Admissions for which values were not collected, unknown, or missing are excluded from the percentage base (denominator).

SOURCE: Center for Behavioral Health Statistics and Quality, Substance Abuse and Mental Health Services Administration, Treatment Episode Data Set (TEDS). Data received through 03.16.18.

- - Quantity is zero.

[1] Excludes 18,203 residential (short-term, long-term, hospital) discharges where medication-assisted opioid therapy was planned.

[2] Outpatient and intensive outpatient medication-assisted opioid therapy was planned.

[3] Medication-assisted opioid detoxification (free-standing, hospital, and outpatient) was planned.

[4] Only discharges aged 18 years and older are included for *veteran status, source of income support, employment status,* and *detailed not in labor force* in this report.

NOTES: Based on linked admission and discharge data reported to TEDS by 49 states and jurisdictions. Some data items in this table are Supplemental Data Set items, which are reported at each state's option.

SOURCE: Center for Behavioral Health Statistics and Quality, Substance Abuse and Mental Health Services Administration, Treatment Episode Data Set (TEDS). Data received through 03.16.18.

NOTES: Based on linked admission and discharge data reported to TEDS by the 49 states and jurisdictions that offered outpatient substance use treatment and reported these data to TEDS. Comparisons among states should be made with caution. Percentages may not add to 100 percent due to rounding. The reason for discharge 'other' category includes clients who were discharged because they were incarcerated, died, moved, became ill, were hospitalized, or another reason somewhat out of client's control, or if the client status at discharge was not known. Admissions for which values were not collected or missing are excluded from the percentage base (denominator).

SOURCE: Center for Behavioral Health Statistics and Quality, Substance Abuse and Mental Health Services Administration, Treatment Episode Data Set (TEDS). Data received through 03.16.18.

[1] This information is collected at admission and may not correspond to the actual source of payment.

NOTES: Based on linked admission and discharge data reported by the 49 states and jurisdictions that offered outpatient substance use treatment and reported these data to TEDS. The reason for discharge 'other' category includes clients who were discharged because they were incarcerated, died, moved, became ill, were hospitalized, or another reason somewhat out of client's control, or if the client status at discharge was not known.

SOURCE: Center for Behavioral Health Statistics and Quality, Substance Abuse and Mental Health Services Administration, Treatment Episode Data Set (TEDS). Data received through 03.16.18.

[1] This information is collected at admission and may not correspond to the actual source of payment.

NOTES: Based on linked admission and discharge data reported by the 49 states and jurisdictions that offered outpatient substance use treatment and reported these data to TEDS. The reason for discharge 'other' category includes clients who were discharged because they were incarcerated, died, moved, became ill, were hospitalized, or another reason somewhat out of client's control, or if the client status at discharge was not known. Percentages may not add to 100 percent due to rounding. In LOS calculations, missing values of the associated variables were excluded. Admissions for which values were not collected, unknown, or missing are excluded from the percentage base (denominator).

[1] Only discharges aged 18 years and older are included for *veteran status, source of income support, employment status,* and *detailed not in labor force* in this report.

NOTES: Based on linked admission and discharge data reported by the 49 states and jurisdictions that offered outpatient substance use treatment and reported these data to TEDS. The reason for discharge 'other' category includes clients who were discharged because they were incarcerated, died, moved, became ill, were hospitalized, or another reason somewhat out of client's control, or if the client status at discharge was not known.

SOURCE: Center for Behavioral Health Statistics and Quality, Substance Abuse and Mental Health Services Administration, Treatment Episode Data Set (TEDS). Data received through 03.16.18.

[1] Only discharges aged 18 years and older are included for *veteran status, source of income support, employment status,* and *detailed not in labor force* in this report.

NOTES: Based on linked admission and discharge data reported by the 49 states and jurisdictions that offered outpatient substance use treatment and reported these data to TEDS. The reason for discharge 'other' category includes clients who were discharged because they were incarcerated, died, moved, became ill, were hospitalized, or another reason somewhat out of client's control, or if the client status at discharge was not known. Percentages may not add to 100 percent due to rounding. In LOS calculations, missing values of the associated variables were excluded. Admissions for which values were not collected, unknown, or missing are excluded from the percentage base (denominator).

[1] Only discharges aged 18 years and older are included for *employment status* and *detailed not in labor force* in this report.

NOTES: Based on linked admission and discharge data reported by the 49 states and jurisdictions that offered outpatient substance use treatment and reported these data to TEDS. The reason for discharge 'other' category includes clients who were discharged because they were incarcerated, died, moved, became ill, were hospitalized, or another reason somewhat out of client's control, or if the client status at discharge was not known.

[1] This information is collected at admission and may not correspond to the actual source of payment.

NOTES: Based on linked admission and discharge data reported by the 47 states and jurisdictions that offered intensive outpatient substance use treatment and reported these data to TEDS. The reason for discharge 'other' category includes clients who were discharged because they were incarcerated, died, moved, became ill, were hospitalized, or another reason somewhat out of client's control, or if the client status at discharge was not known.

SOURCE: Center for Behavioral Health Statistics and Quality, Substance Abuse and Mental Health Services Administration, Treatment Episode Data Set (TEDS). Data received through 03.16.18.

[1] This information is collected at admission and may not correspond to the actual source of payment.

NOTES: Based on linked admission and discharge data reported by the 47 states and jurisdictions that offered intensive outpatient substance use treatment and reported these data to TEDS. The reason for discharge 'other' category includes clients who were discharged because they were incarcerated, died, moved, became ill, were hospitalized, or another reason somewhat out of client's control, or if the client status at discharge was not known. Percentages may not add to 100 percent due to rounding. In LOS calculations, missing values of the associated variables were excluded. Admissions for which values were not collected, unknown, or missing are excluded from the percentage base (denominator).

NOTES: Based on linked admission and discharge data reported by the 47 states and jurisdictions that offered intensive outpatient substance use treatment and reported these data to TEDS. The reason for discharge 'other' category includes clients who were discharged because they were incarcerated, died, moved, became ill, were hospitalized, or another reason somewhat out of client's control, or if the client status at discharge was not known. Percentages may not add to 100 percent due to rounding. In LOS calculations, missing values of the associated variables were excluded. Admissions for which values were not collected, unknown, or missing are excluded from the percentage base (denominator).

[1] Only discharges aged 18 years and older are included for *veteran status, source of income support, employment status,* and *detailed not in labor force* in this report.

NOTES: Based on linked admission and discharge data reported by the 47 states and jurisdictions that offered intensive outpatient substance use treatment and reported these data to TEDS. The reason for discharge 'other' category includes clients who were discharged because they were incarcerated, died, moved, became ill, were hospitalized, or another reason somewhat out of client's control, or if the client status at discharge was not known.

Table 7.7b. Intensive outpatient treatment discharges aged 18 years and older, by reason for discharge, median length of stay (LOS), and characteristics at discharge: Column percent distribution, 2016 (continued)

Characteristics at discharge	*Reason for discharge*						*Median LOS (days) among treatment completions*
	Total	*Completed*	*Transferred to further treatment*	*Dropped out*	*Terminated by facility*	*Other*	
Employment status[1]							
Employed	50,792	43.1	25.8	28.0	26.7	26.5	98
Full-time	35,336	32.2	17.0	18.4	16.6	17.2	98
Part-time	15,456	10.9	8.8	9.6	10.1	9.3	96
Unemployed	61,629	32.6	44.0	43.8	42.2	37.9	63
Not in labor force	44,111	24.2	30.2	28.2	31.0	35.6	78
No. of discharges	156,532	100.0	100.0	100.0	100.0	100.0	83
Detailed not in labor force[1]							
Homemaker	2,124	5.0	7.5	3.8	5.4	2.4	92
Student	1,463	4.9	3.0	3.0	2.7	2.6	85
Retired	1,510	6.3	2.3	2.7	3.2	2.0	90
Disabled	10,133	21.5	27.7	25.4	24.2	19.2	93
Inmate of institution	5,885	23.0	6.0	4.6	9.2	33.1	78
Other	21,061	39.4	53.5	60.5	55.3	40.7	57
No. of discharges	42,176	100.0	100.0	100.0	100.0	100.0	76

[1] Only discharges aged 18 years and older are included for *employment status* and *detailed not in labor force* in this report.

NOTES: Based on linked admission and discharge data reported by the 47 states and jurisdictions that offered intensive outpatient substance use treatment and reported these data to TEDS. The reason for discharge 'other' category includes clients who were discharged because they were incarcerated, died, moved, became ill, were hospitalized, or another reason somewhat out of client's control, or if the client status at discharge was not known. Percentages may not add to 100 percent due to rounding. In LOS calculations, missing values of the associated variables were excluded. Admissions for which values were not collected, unknown, or missing are excluded from the percentage base (denominator).

[1] This information is collected at admission and may not correspond to the actual source of payment.

NOTES: Based on linked admission and discharge data reported by the 47 states and jurisdictions that offered short-term residential substance use treatment and reported these data to TEDS. The reason for discharge 'other' category includes clients who were discharged because they were incarcerated, died, moved, became ill, were hospitalized, or another reason somewhat out of client's control, or if the client status at discharge was not known.

SOURCE: Center for Behavioral Health Statistics and Quality, Substance Abuse and Mental Health Services Administration, Treatment Episode Data Set (TEDS). Data received through 03.16.18.

NOTES: Based on linked admission and discharge data reported by the 47 states and jurisdictions that offered short-term residential substance use treatment and reported these data to TEDS. The reason for discharge 'other' category includes clients who were discharged because they were incarcerated, died, moved, became ill, were hospitalized, or another reason somewhat out of client's control, or if the client status at discharge was not known.

NOTES: Based on linked admission and discharge data reported by the 47 states and jurisdictions that offered short-term residential substance use treatment and reported these data to TEDS. The reason for discharge 'other' category includes clients who were discharged because they were incarcerated, died, moved, became ill, were hospitalized, or another reason somewhat out of client's control, or if the client status at discharge was not known.

[1] Only discharges aged 18 years and older are included for *veteran status, source of income support, employment status,* and *detailed not in labor force* in this report.

NOTES: Based on linked admission and discharge data reported by the 47 states and jurisdictions that offered short-term residential substance use treatment and reported these data to TEDS. The reason for discharge 'other' category includes clients who were discharged because they were incarcerated, died, moved, became ill, were hospitalized, or another reason somewhat out of client's control, or if the client status at discharge was not known. Percentages may not add to 100 percent due to rounding. In LOS calculations, missing values of the associated variables were excluded. Admissions for which values were not collected, unknown, or missing are excluded from the percentage base (denominator).

NOTES: Based on linked admission and discharge data reported to TEDS by the 48 states and jurisdictions that offered long-term residential substance use treatment and reported these data to TEDS. Comparisons among states should be made with caution. Percentages may not add to 100 percent due to rounding. The reason for discharge 'other' category includes clients who were discharged because they were incarcerated, died, moved, became ill, were hospitalized, or another reason somewhat out of client's control, or if the client status at discharge was not known. Admissions for which values were not collected or missing are excluded from the percentage base (denominator).

SOURCE: Center for Behavioral Health Statistics and Quality, Substance Abuse and Mental Health Services Administration, Treatment Episode Data Set (TEDS). Data received through 03.16.18.

Table 9.2a. Long-term residential treatment discharges aged 12 years and older, by reason for discharge, treatment completion/transfer, median length of stay (LOS), and characteristics at admission: Number and row percent distribution, 2016

Characteristics at admission	*Reason for discharge*						*Row percent distribution*		*Median LOS (days) among treatment completions*
	Total	*Completed*	*Transferred to further treatment*	*Dropped out*	*Terminated by facility*	*Other*	*Treatment completions*	*Transfers to further treatment*

[1] This information is collected at admission and may not correspond to the actual source of payment.

NOTES: Based on linked admission and discharge data reported by the 48 states and jurisdictions that offered long-term residential substance use treatment and reported these data to TEDS. The reason for discharge 'other' category includes clients who were discharged because they were incarcerated, died, moved, became ill, were hospitalized, or another reason somewhat out of client's control, or if the client status at discharge was not known. Percentages may not add to 100 percent due to rounding. In LOS calculations, missing values of the associated variables were excluded. Admissions for which values were not collected, unknown, or missing are excluded from the percentage base (denominator).

NOTES: Based on linked admission and discharge data reported by the 48 states and jurisdictions that offered long-term residential substance use treatment and reported these data to TEDS. The reason for discharge 'other' category includes clients who were discharged because they were incarcerated, died, moved, became ill, were hospitalized, or another reason somewhat out of client's control, or if the client status at discharge was not known.

[1] Only discharges aged 18 years and older are included for *employment status* and *detailed not in labor force* in this report.

NOTES: Based on linked admission and discharge data reported by the 48 states and jurisdictions that offered long-term residential substance use treatment and reported these data to TEDS. The reason for discharge 'other' category includes clients who were discharged because they were incarcerated, died, moved, became ill, were hospitalized, or another reason somewhat out of client's control, or if the client status at discharge was not known.

[1] This information is collected at admission and may not correspond to the actual source of payment.

NOTES: Based on linked admission and discharge data reported by the 15 states and jurisdictions that offered hospital residential substance use treatment and reported these data to TEDS. The reason for discharge 'other' category includes clients who were discharged because they were incarcerated, died, moved, became ill, were hospitalized, or another reason somewhat out of client's control, or if the client status at discharge was not known.

SOURCE: Center for Behavioral Health Statistics and Quality, Substance Abuse and Mental Health Services Administration, Treatment Episode Data Set (TEDS). Data received through 03.16.18.

NOTES: Based on linked admission and discharge data reported by the 15 states and jurisdictions that offered hospital residential substance use treatment and reported these data to TEDS. The reason for discharge 'other' category includes clients who were discharged because they were incarcerated, died, moved, became ill, were hospitalized, or another reason somewhat out of client's control, or if the client status at discharge was not known. Percentages may not add to 100 percent due to rounding. In LOS calculations, missing values of the associated variables were excluded. Admissions for which values were not collected, unknown, or missing are excluded from the percentage base (denominator).

- - Quantity is zero.

[1] Only discharges aged 18 years and older are included for *veteran status, source of income support, employment status,* and *detailed not in labor force* in this report.

NOTES: Based on linked admission and discharge data reported by the 15 states and jurisdictions that offered hospital residential substance use treatment and reported these data to TEDS. The reason for discharge 'other' category includes clients who were discharged because they were incarcerated, died, moved, became ill, were hospitalized, or another reason somewhat out of client's control, or if the client status at discharge was not known. Percentages may not add to 100 percent due to rounding. In LOS calculations, missing values of the associated variables were excluded. Admissions for which values were not collected, unknown, or missing are excluded from the percentage base (denominator).

[1] This information is collected at admission and may not correspond to the actual source of payment.

NOTES: Based on linked admission and discharge data reported by the 47 states and jurisdictions that offered detoxification and reported these data to TEDS. The reason for discharge 'other' category includes clients who were discharged because they were incarcerated, died, moved, became ill, were hospitalized, or another reason somewhat out of client's control, or if the client status at discharge was not known.

SOURCE: Center for Behavioral Health Statistics and Quality, Substance Abuse and Mental Health Services Administration, Treatment Episode Data Set (TEDS). Data received through 03.16.18.

[1] This information is collected at admission and may not correspond to the actual source of payment.

NOTES: Based on linked admission and discharge data reported by the 47 states and jurisdictions that offered detoxification and reported these data to TEDS. The reason for discharge 'other' category includes clients who were discharged because they were incarcerated, died, moved, became ill, were hospitalized, or another reason somewhat out of client's control, or if the client status at discharge was not known. Percentages may not add to 100 percent due to rounding. In LOS calculations, missing values of the associated variables were excluded. Admissions for which values were not collected, unknown, or missing are excluded from the percentage base (denominator).

NOTES: Based on linked admission and discharge data reported by the 47 states and jurisdictions that offered detoxification and reported these data to TEDS. The reason for discharge 'other' category includes clients who were discharged because they were incarcerated, died, moved, became ill, were hospitalized, or another reason somewhat out of client's control, or if the client status at discharge was not known. Percentages may not add to 100 percent due to rounding. In LOS calculations, missing values of the associated variables were excluded. Admissions for which values were not collected, unknown, or missing are excluded from the percentage base (denominator).

[1] Only discharges aged 18 years and older are included for *veteran status, source of income support, employment status,* and *detailed not in labor force* in this report.

NOTES: Based on linked admission and discharge data reported by the 47 states and jurisdictions that offered detoxification and reported these data to TEDS. The reason for discharge 'other' category includes clients who were discharged because they were incarcerated, died, moved, became ill, were hospitalized, or another reason somewhat out of client's control, or if the client status at discharge was not known.

NOTES: Based on linked admission and discharge data reported to TEDS by the 45 states and jurisdictions that offered outpatient medication-assisted opioid therapy and reported these data to TEDS. Comparisons among states should be made with caution. Percentages may not add to 100 percent due to rounding. The reason for discharge 'other' category includes clients who were discharged because they were incarcerated, died, moved, became ill, were hospitalized, or another reason somewhat out of client's control, or if the client status at discharge was not known. Admissions for which values were not collected or missing are excluded from the percentage base (denominator).

[1] This information is collected at admission and may not correspond to the actual source of payment.

NOTES: Based on linked admission and discharge data reported by the 45 states and jurisdictions that offered outpatient medication-assisted opioid therapy and reported these data to TEDS. The reason for discharge 'other' category includes clients who were discharged because they were incarcerated, died, moved, became ill, were hospitalized, or another reason somewhat out of client's control, or if the client status at discharge was not known. Percentages may not add to 100 percent due to rounding. In LOS calculations, missing values of the associated variables were excluded. Admissions for which values were not collected, unknown, or missing are excluded from the percentage base (denominator).

NOTES: Based on linked admission and discharge data reported by the 45 states and jurisdictions that offered outpatient medication-assisted opioid therapy and reported these data to TEDS. The reason for discharge 'other' category includes clients who were discharged because they were incarcerated, died, moved, became ill, were hospitalized, or another reason somewhat out of client's control, or if the client status at discharge was not known. Percentages may not add to 100 percent due to rounding. In LOS calculations, missing values of the associated variables were excluded. Admissions for which values were not collected, unknown, or missing are excluded from the percentage base (denominator).

[1] Only discharges aged 18 years and older are included for *veteran status, source of income support, employment status,* and *detailed not in labor force* in this report.

NOTES: Based on linked admission and discharge data reported by the 45 states and jurisdictions that offered outpatient medication-assisted opioid therapy and reported these data to TEDS. The reason for discharge 'other' category includes clients who were discharged because they were incarcerated, died, moved, became ill, were hospitalized, or another reason somewhat out of client's control, or if the client status at discharge was not known. Percentages may not add to 100 percent due to rounding. In LOS calculations, missing values of the associated variables were excluded. Admissions for which values were not collected, unknown, or missing are excluded from the percentage base (denominator).

[1] This information is collected at admission and may not correspond to the actual source of payment.

NOTES: Based on linked admission and discharge data reported by the 38 states and jurisdictions that offered medication-assisted opioid detoxification and reported these data to TEDS. The reason for discharge 'other' category includes clients who were discharged because they were incarcerated, died, moved, became ill, were hospitalized, or another reason somewhat out of client's control, or if the client status at discharge was not known.

SOURCE: Center for Behavioral Health Statistics and Quality, Substance Abuse and Mental Health Services Administration, Treatment Episode Data Set (TEDS). Data received through 03.16.18.

[1] This information is collected at admission and may not correspond to the actual source of payment.

NOTES: Based on linked admission and discharge data reported by the 38 states and jurisdictions that offered medication-assisted opioid detoxification and reported these data to TEDS. The reason for discharge 'other' category includes clients who were discharged because they were incarcerated, died, moved, became ill, were hospitalized, or another reason somewhat out of client's control, or if the client status at discharge was not known. Percentages may not add to 100 percent due to rounding. In LOS calculations, missing values of the associated variables were excluded. Admissions for which values were not collected, unknown, or missing are excluded from the percentage base (denominator).

Table 13.3b. Medication-assisted opioid detoxification discharges aged 12 years and older, byreason for discharge, median length of stay (LOS), and characteristics at discharge: Column percent distribution, 2016

Characteristics at discharge	*Reason for discharge*						*Median LOS (days) among treatment completions*
	Total	*Completed*	*Transferred to further treatment*	*Dropped out*	*Terminated by facility*	*Other*	
All medication-assisted opioid detoxification discharges	21,689						6
Arrests in past 30 days							
None	18,765	97.1	98.4	96.6	94.0	95.7	6
Once	442	2.6	1.3	2.7	5.5	3.7	5
2 or more times	68	0.3	0.3	0.6	0.5	0.5	5
No. of discharges	19,275	100.0	100.0	100.0	100.0	100.0	6
Frequency of use							
No use in the past month	6,744	38.8	40.3	45.8	58.5	49.3	7
Some use	3,652	23.5	26.1	14.1	11.3	7.2	6
Daily use	5,977	37.8	33.6	40.1	30.3	43.5	5
No. of discharges	16,373	100.0	100.0	100.0	100.0	100.0	6
Self-help programs attended in past 30 days							
No attendance in the past month	7,541	61.0	45.9	65.0	64.0	71.4	5
At least 1 time in the past month	5,629	39.0	54.1	35.0	36.0	28.6	5
1-3 times in the past month	1,255	13.3	3.1	11.9	11.0	9.1	5
4-7 times in the past month	1,280	8.6	13.3	6.8	7.0	7.0	5
8-30 times in the past month	2,915	15.0	37.4	14.8	15.5	10.4	6
Some attendance, but frequency unknown	179	2.0	0.2	1.5	2.4	2.0	6
No. of discharges	13,170	100.0	100.0	100.0	100.0	100.0	5

NOTES: Based on linked admission and discharge data reported by the 38 states and jurisdictions that offered medication-assisted opioid detoxification and reported these data to TEDS. The reason for discharge 'other' category includes clients who were discharged because they were incarcerated, died, moved, became ill, were hospitalized, or another reason somewhat out of client's control, or if the client status at discharge was not known. Percentages may not add to 100 percent due to rounding. In LOS calculations, missing values of the associated variables were excluded. Admissions for which values were not collected, unknown, or missing are excluded from the percentage base (denominator).

- - Quantity is zero.

[1] Only discharges aged 18 years and older are included for *veteran status, source of income support, employment status,* and *detailed not in labor force* in this report.

NOTES: Based on linked admission and discharge data reported by the 38 states and jurisdictions that offered medication-assisted opioid detoxification and reported these data to TEDS. The reason for discharge 'other' category includes clients who were discharged because they were incarcerated, died, moved, became ill, were hospitalized, or another reason somewhat out of client's control, or if the client status at discharge was not known.

‡ No data, or less than a full calendar year of data, submitted.

[1] Admissions reported for Census regions and divisions will not sum to the total number of admissions because Puerto Rico is not included in any Census region or division.

NOTE: Based on administrative data reported to TEDS by all reporting states and jurisdictions. Comparisons among states should be made with caution.

SOURCE: Center for Behavioral Health Statistics and Quality, Substance Abuse and Mental Health Services Administration, Treatment Episode Data Set (TEDS). Data received through 03.16.18.

- - Quantity is zero; ‡ No data, or less than a full calendar year of data, submitted.

[1] Admissions reported for Census regions and divisions will not sum to the total number of admissions because Puerto Rico is not included in any Census region or division.

[2] Tennessee included heroin admissions in other opiates through June 2009. In this report, Tennessee's 2009 heroin admissions are still included in the other opiates category since there is less than a full year of disaggregated heroin data.

NOTES: Based on administrative data reported to TEDS by all reporting states and jurisdictions. Comparisons among states should be made with caution. Non-heroin opiates/synthetics include codeine, hydrocodone, hydromorphone, meperidine, morphine, opium, oxycodone, pentazocine, propoxyphene, tramadol, and any other drug with morphine-like effects. Non-prescription use of methadone is not included.

SOURCE: Center for Behavioral Health Statistics and Quality, Substance Abuse and Mental Health Services Administration, Treatment Episode Data Set (TEDS). Data received through 03.16.18.

Appendix A.
About the Treatment Episode Data Set (TEDS)

Introduction

This report presents results from the Treatment Episode Data Set (TEDS) on the demographic and substance use characteristics of admissions to substance use treatment, and for discharges from substance use treatment. The Center for Behavioral Health Statistics and Quality (CBHSQ), Substance Abuse and Mental Health Services Administration (SAMHSA), coordinates and manages the collection of TEDS data from the states and jurisdictions.

TEDS is a compilation of client-level data routinely collected by the individual state administrative data systems to monitor their substance use treatment systems. Generally, facilities that are required to report to the state substance abuse agency (SSA) are those that receive public funds and/or are licensed or certified by the SSA to provide substance use treatment (or are administratively tracked for other reasons).

The TEDS system comprises two major components: the Admissions Data Set and the Linked Discharge Data Set. The TEDS Admission Data Set includes client-level data on substance use treatment admissions from 1992 through the present. The TEDS Linked Discharge Data Set includes discharges that can be linked at a record level to admissions; it includes information from clients discharged in 2000 and later. For both data sets, selected data items from the individual state data files are converted to a standardized format consistent across states. These standardized data constitute TEDS.

The TEDS Admission Data Set consists of a Minimum Data Set of items collected by all states, and a Supplemental Data Set where individual data items are reported at the state's option. The Minimum Data Set consists of 22 items that include:

- demographic information
- primary, secondary, and tertiary substances and their route of administration, frequency of use, and age at first use
- source of referral to treatment
- number of prior treatment episodes
- type of treatment service, including planned use of medication-assisted opioid therapy

The Supplemental Data Set items include psychiatric, social, and economic measures. Some items from the Supplemental Data Set are included in the Linked Discharge Data Set to provide a look at how the status changes between admission and discharge.

The TEDS Linked Discharge Data Set was designed to enable TEDS to collect information on entire treatment episodes. Discharge data, when linked to admission data, represent treatment episodes that enable analyses of questions that cannot be answered with admission data alone. Examples are

the proportion of discharges that completed treatment and the average length of stay of treatment completers.

History

National-level data collection on admissions to substance use treatment was first mandated in 1972 under the Drug Abuse Office and Treatment Act, P.L. 92-255. This act initiated federal funding for drug treatment and rehabilitation and required reporting on clients entering drug (but not alcohol) abuse treatment. The Client-Oriented Data Acquisition Process (CODAP) was developed to collect admission and discharge data directly from federally funded drug treatment programs. (Programs for treatment of alcohol use were not included.) Reporting was mandatory for all such programs and data were collected using a standard form. CODAP included all clients in federally-funded programs regardless of individual funding source. Reports were issued from 1973 to 1981 based on data from 1,800 to 2,000 programs, including some 200,000 annual admissions.

In 1981, the collection of national-level data on admissions to substance use treatment was discontinued because of the introduction of the Alcohol, Drug Abuse, and Mental Health Services (ADMS) Block Grant. The block grant transferred federal funding from individual programs to the states for distribution, and it included no data reporting requirement. Participation in CODAP became voluntary; although several states submitted data through 1984, the data were in no way nationally representative.

In 1988, the Comprehensive Alcohol Abuse, Drug Abuse, and Mental Health Amendments (P.L. 100-690) established a revised Substance Abuse Prevention and Treatment (SAPT) Block Grant and mandated federal data collection on clients receiving treatment for either alcohol or drug use. The Treatment Episode Data Set (TEDS) data collection effort represents the federal response to this mandate. TEDS began in 1989 with the issue of three-year development grants to states.

State Data Collection Systems

TEDS is an exceptionally large and powerful data set that covers a significant proportion of all admissions to substance use treatment. TEDS is a compilation of data collected through the individual data collection systems of the state substance abuse agencies (SSAs) for substance use treatment. States have cooperated with the federal government in the data collection process, and substantial progress has been made toward developing a standardized data set. However, because each state system is unique, and each state has unique powers and mandates, significant differences exist among state data collection systems. These differences are compounded by evolving health care payment systems, and state-to-state comparisons must be made with extreme caution.

The number and client mix of TEDS admissions do not represent the total national demand for substance use treatment or the prevalence of substance use in the general population.

States differ widely in the amount of public funding available for substance use treatment and in the constraints placed on the use of funds. States may be directed to target special populations such as pregnant women or adolescents. Where funds are limited, states may be compelled to exercise triage in admitting persons to treatment, admitting only those with the most “severe” problems. In states with higher funding levels, a larger proportion of the population in need of treatment may be admitted, including the less severely impaired.

States may include or exclude reporting by certain sectors of the treatment population, and these sectors may change over time. For example, treatment programs based in the criminal justice system may or may not be administered through the SSA. Detoxification facilities, which can generate large numbers of admissions, are not uniformly considered treatment facilities and are not uniformly reported by all states.

Table A1 presents key characteristics of state data collection systems for 2016. However, these characteristics can change as state substance use treatment systems change, and thus may be responsible for some year-to-year variation within states.

- *Facilities included*. The scope of facilities included in TEDS is affected by differences in state licensure, certification, and accreditation practices, and disbursement of public funds. Most SSAs require facilities that receive state/public funding (including federal block grant funds) for the provision of alcohol and/or drug treatment services to report data to the SSA. Generally, this funding is distributed by the SSA, but may be distributed by another public agency.

  Some SSAs regulate private facilities, methadone clinics, and/or individual practitioners and require them to report TEDS data. Others do not because of the difficulty in obtaining data from these facilities, although these facilities may report voluntarily. Facilities operated by federal agencies (e.g., the Bureau of Prisons, the Department of Defense, and the Department of Veterans Affairs) generally do not report TEDS data to the SSA, although some facilities operated by the Indian Health Service are included. Hospital-based substance use treatment facilities are frequently not licensed through the SSA and do not report TEDS data. Correctional facilities (state prisons and local jails) are monitored by the SSA and report TEDS data in some states but not in others.

  The primary goal of TEDS is to monitor the characteristics of clients admitted to planned, continuing treatment regimens. Thus, early intervention and crisis intervention programs that do not lead to enrollment in continued treatment are excluded from TEDS.

- *Clients included*. About 54 percent of states reported data on all admissions to all eligible facilities, although some reported only, or largely, admissions financed by public funds. TEDS is an admission-based system; therefore, TEDS admissions do not represent individuals. For example, an individual admitted to treatment twice within a calendar year is counted as two admissions.

- *Ability to track multi-service episodes*. The goal for the TEDS system is to enumerate treatment episodes by distinguishing the initial admission of a client from his/her subsequent transfer to a different type of treatment service (e.g., from residential treatment to outpatient) within a single continuous treatment episode. Thus, TEDS records are ideally coded as admissions if they represent the initial treatment service in a treatment episode and as transfers if they represent a change in the type of treatment service or a change in provider without an interruption in treatment.

  This requires, however, that clients be assigned unique IDs that can be linked across providers; not all states are legally and/or technologically able to do this. Most states can identify as transfers a change in the type of treatment service within the structure of a given provider; however, fewer can also identify a transfer involving a change of provider. Several states do not track

transfers, but instead report as transfers those clients who are discharged and readmitted within a specified time period defined by each state.

Because some admission records, in fact, may represent transfers, the number of admissions reported probably overestimates the number of treatment episodes. Some states reported a limited data set on codependents of substance users entering treatment. On average, from 2006 through 2016, 90 percent of all records submitted were client admissions, 10 percent were client transfers, and 1 percent were codependents of substance users. For the linked discharges dataset, 91 percent of all records submitted were client admissions, 9 percent were client transfers, and less than 1 percent were codependents.

- *Services offered*. A state's mix of types of treatment service (e.g., outpatient, detoxification, residential, opioid therapy) can have a significant effect on its admission rate. There is higher client turnover and therefore more admissions in short-stay services such as detoxification than in long-stay services such as outpatient or long-term residential treatment. Admission rates for individual substances used may be affected as well (e.g., detoxification is more closely associated with alcohol or heroin use than with the use of other substances).

- *Completeness and timeliness of reporting*. SAMHSA, in reporting national-level TEDS data, must balance timeliness of reporting and completeness of the data set. There may be a time lag in the publication of SAMHSA's annual report because preparation cannot begin until states have completed their data submission for that year. States, in turn, rely on individual facilities to report in a timely manner so they can submit TEDS data to SAMHSA at regular intervals.

  Admissions from facilities that report late to the states will appear in a later data submission to SAMHSA, so the number of annual admissions in a report may be higher in subsequent reports. The number of additional admissions is small because of the time lag in issuing the report. Thus the percentage distributions will change very little in subsequent reports, although Census division- and state-level data may change somewhat more for states with reporting delays.

  States continually review and improve their data collection and processing. When systematic errors are identified, states may revise or replace historical TEDS data files. While this process represents an improvement in the data system, the historical statistics in this report will differ slightly from those in earlier reports.

Tables A2 and A3 indicate the proportions of records by state or jurisdiction for which valid data were received for 2016. States are expected to report all variables in the Minimum Data Set (Table A2). Variables in the Supplemental Data Set are collected at each state's option (Table A3).

Tables A4 and A5 indicate the proportions of records for which valid discharge data were received in 2016.

Table A6 indicates the denominators for computing per 100,000 population estimates in 2016.

Report-Specific Considerations

National substance use treatment admissions

- This section of the report focuses on treatment admissions for substance use. Treatment admissions for codependents of substance use clients are excluded. Records for identifiable transfers within a single treatment episode are also excluded.
- Records with partially complete data have been retained. Where records include missing or invalid data for a specific variable other than primary, secondary, or tertiary substance, those records are excluded from tabulations of that variable. For substance use variables, missing or unknown responses were included in the category *other/none specified*. The total number of admissions on which a percentage distribution is based is reported in each table.
- The *primary, secondary, and tertiary substance uses* reported to TEDS are those substances that led to the treatment episode and not necessarily a complete enumeration of all drugs used at the time of admission.
- Primary alcohol admissions are classified as *alcohol only* or *alcohol with secondary drug use*. The latter indicates a primary alcohol admission with a specified secondary and/or tertiary drug. All other primary alcohol admissions are classified as *alcohol only*.
- Cocaine admissions are classified according to route of administration as smoked and other routes. Smoked cocaine primarily represents crack or rock cocaine, but can also include cocaine hydrochloride (powder cocaine) when it is free-based. Non-smoked cocaine includes all cocaine admissions where cocaine is injected, inhaled, or taken orally; it also includes admissions where the route of administration is unknown or not collected. Thus, the TEDS estimate of admissions for smoked cocaine is conservative.
- Methamphetamine/amphetamine admissions include admissions for both substances, but are primarily for methamphetamine. In 2016, methamphetamine constituted about 95 percent of combined methamphetamine/amphetamine admissions. Texas, which has a large number of methamphetamine admissions, reported them as *other amphetamines* until 2006.
- For this section of the report, secondary and tertiary substances (see Appendix B) are grouped and referred to as secondary substances.

National substance use treatment discharges

- This section of the report focuses on treatment for substance use according to the type of treatment service. Thus, treatment admissions for codependents of substance use clients are excluded. Records for identifiable transfers within a single treatment episode are included.
- Records with partially complete data have been retained. Where records include missing or invalid data for a specific variable other than primary, secondary, or tertiary substance, those records are excluded from tabulations of that variable. For substance use variables, missing or unknown responses were included in the category *None/other/unknown*. The total number of discharges on which a percentage distribution is based is reported in each table.
- States that did not collect a specific variable are excluded from tabulations of that variable.

- The total number of records on which a percentage distribution is based is reported in each table.
- The primary, secondary, and tertiary substance use reported to TEDS are those substances that led to the treatment episode and not necessarily a complete enumeration of all drugs used at the time of admission.
- Stimulant admissions include methamphetamine, amphetamines, and other stimulants. However, most of these admissions were for methamphetamine or amphetamine abuse.
- The data presented in this section of the report focus on treatment for substance use within the type of treatment service. They do not represent complete treatment episodes, as a single episode may involve stays in more than one type of treatment service. States are asked to submit a record for each initial admission to a treatment service, for each transfer from one service to another, and for a discharge corresponding to each admission or transfer.
- The number of states reporting for treatment discharges shown in Tables 6.1 through 13.1 varies because not all states reported discharges for every type of treatment service. The first table for each section of the discharge tables details the actual number of states reporting discharges from that type of treatment service.
- Linkage of discharge records from 2016 to admission records from 2000 to 2016 means that the maximum length of stay (LOS) in treatment included in this report is 17 years. However, outpatient medication-assisted opioid therapy can have a much longer duration. Indeed, some admissions may receive this form of treatment indefinitely. Because this section includes data only on discharges, it will underestimate LOS in treatment for those receiving outpatient medication- assisted opioid therapy. Similarly, the number and proportion of treatment completers will reflect only those that have been discharged because treatment is complete and not those that successfully remain in long-term outpatient medication-assisted opioid therapy. In addition, the characteristics at admission of those admitted to and discharged from outpatient medication-assisted opioid therapy within 17 years may differ from those of admissions that remain in outpatient medication-assisted opioid therapy for longer than 17 years.

Table A1. State data system reporting characteristics

State or jurisdiction	*Facilities reporting TEDS data to the state SSA*		*Eligible clients*	*Change of service within episode*	*Change of provider within episode*
	Facilities required to report to the state SSA [1]	*Facilities reporting voluntarily to the state SSA*			
Alabama	Facilities that receive state/public funding	None	All clients in facility	Admission	Admission
Alaska	Facilities that receive state/public funding	None	All clients in facility who receive substance use treatment services	Admission (for most providers) Transfer (for some providers)	Admission
Arizona	Facilities that receive state/public funding	None	State/public-funded clients only	*n/a* [2]	*n/a* [2]
Arkansas	Facilities that are licensed by state SSA	State community correction facilities Some private facilities	All clients in a licensed facility	Transfer	Admission
California	Facilities that receive state/public funding. All licensed narcotic treatment facilities.	None	All clients in facility except DUI	Most CA providers change episodes as they move through treatment, via a transfer in service. However, some providers keep their clients until the treatment plan is completed.	Most CA providers change episodes as they move through treatment, via a transfer in service. However, some providers keep their clients until the treatment plan is completed.
Colorado	State-licensed facilities Methadone facilities Community-based juvenile and adult justice treatment programs, except institutionally based	None	All clients receiving substance use treatment services in facility	Admission	Admission
Connecticut	Facilities that receive state/public funding Facilities serving adults that are licensed by state Dept of Public Health Some facilities treating youth (less than 18 years old) General hospitals funded by SSA	None	State/public-funded clients only	Admission	Admission
Delaware	Facilities that receive state/public funding, excluding: - Child/youth services - Most Medicaid-funded services - Most criminal justice system services	None	State/public-funded clients only	Admission	Admission
Dist. of Columbia	Facilities that receive state/public funding	None	State/public-funded clients only	Transfer	Admission

Washington	Facilities that receive state/public funding Medicare-certified facilities	None	State/public-funded clients only are required	Transfer	Transfer
West Virginia	Facilities that receive state/public funding	None	All clients in facility	Transfer	Transfer
Wisconsin	Facilities that receive state/public funding	None	State/county/public-funded clients are required; data on other county-authorized clients such as clients having private payers are requested and received from some facilities	Admission	Admission
Wyoming	Facilities that receive state/public funding	None	All clients in a facility	Admission	Admission

n/a Not applicable.

[1] State/public funding generally refers to funding by the state substance abuse agency but may also include funding by another public agency.

[2] Neither an admission nor transfer record results from a change in service or provider.

[3] Neither an admission nor transfer record results from a change in service within a provider.

[4] Not reporting as of July 1, 2015.

- - Quantity is zero; ** Less than 1 percent; ‡ No data, or less than a full calendar year of data, submitted.

[1] Percentage of admissions reporting a specified primary substance.

[2] Percentage of admissions reporting a specified secondary substance.

[3] Percentage of admissions reporting a specified tertiary substance.

[4] Percentage of female admissions reporting pregnancy status.

[5] Percentage of admissions reporting employment status as "Not in labor force."

[6] Percentage of admissions reporting referral source as "Court/criminal justice referral."

NOTES: Based on administrative data reported to TEDS by all reporting states and jurisdictions. Comparisons among states should be made with caution.

SOURCE: Center for Behavioral Health Statistics and Quality, Substance Abuse and Mental Health Services Administration, Treatment Episode Data Set (TEDS). Data received through 03.16.18.

Appendix B.
TEDS Data Elements

TEDS Minimum Data Set

Age of first use (primary, secondary, and tertiary substance)

For drugs other than alcohol, these fields identify the age at which the client first used the respective substance. For alcohol, these fields record the age of first intoxication.

- 0—Indicates a newborn with a substance dependency problem
- 1-95—Indicates the age at first use

Client or codependent/collateral

Specifies whether the admission record is for a substance use treatment client, or a person being treated for his/her codependency or collateral relationship with a substance user.

- Client—Must meet all of the following criteria:
  - Has an alcohol or drug related disorder
  - Has completed the screening and intake process
  - Has been formally admitted for treatment or recovery service in an alcohol or drug treatment unit
  - Has his or her own client record

A person is not a client if he or she has completed only a screening or intake process or has been placed on a waiting list.

- Codependent/collateral—Must meet all of the following criteria:
  - Has no alcohol or drug related disorder
  - Is seeking services because of concerns arising from his or her relationship with an alcohol or drug user
  - Has been formally admitted for service to a treatment unit
  - Has his or her own client record or has a record within a primary client record

Guidelines: Reporting of data for *Codependent/collaterals* is optional. If the state opts to report codependent/collateral clients, the mandatory fields are *State code, Provider identifier, Client identifier, Client transaction type, Codependent/collateral*, and *Date of admission*. Reporting of the remaining fields in the TEDS Minimum and Supplemental Data Sets is optional. For all items not reported, the data field should be coded with the appropriate "Not collected" or "Not applicable" code.

If a substance use client with an existing record in TEDS becomes a codependent, a new client record should be submitted indicating that the client has been admitted as a codependent, and vice versa.

If a record does not include a value for this field, it is assumed to be a substance use client record.

Date of admission

The day when the client receives his or her first direct treatment or recovery service. For transfers, this is the date when the client receives his or her first direct treatment after the transfer has occurred.

Demographics

Age

Identifies the client's age at admission. Derived from client's date of birth and date of admission.

- 0—Indicates a newborn with a substance dependency problem
- 1-95—Indicates the age at admission

Education

Specifies the highest school grade (number of school years) completed by the client.

- 0—Less than one grade completed
- 1-25—Years of school (highest grade) completed. For General Equivalency Degree, use 12.

Guidelines: States that use specific categories for designating education level should map their codes to a logical number of years of school completed. For Associate's Degree, use 14. For Bachelor's degree, use 16.

Employment status

Identifies the client's employment status at the time of admission or transfer.

- Full time—Working 35 hours or more each week, including active duty members of the uniformed services
- Part time—Working fewer than 35 hours each week
- Unemployed—Looking for work during the past 30 days, or on layoff from a job
- Not in labor force—Not looking for work during the past 30 days, or a student, homemaker, disabled, retired, or an inmate of an institution. Clients in this category are further defined in the TEDS Supplemental Data Set item Detailed not in labor force.

Guidelines: Seasonal workers are coded in this category based on their employment status at admission.

Ethnicity

Identifies the client's specific Hispanic origin.

- Cuban—Of Cuban origin, regardless of race
- Hispanic (specific origin not specified)—Of Hispanic origin, but specific origin not known or not specified
- Mexican—Of Mexican origin, regardless of race
- Not of Hispanic origin
- Other specific Hispanic—Of known Central or South American or any other Spanish cultural origin (including Spain), other than Puerto Rican, Mexican, or Cuban, regardless of race
- Puerto Rican—Of Puerto Rican origin, regardless of race

Guidelines: If a state does not collect specific Hispanic detail, code *Ethnicity* for Hispanics as *Hispanic (specific origin not specified)*.

Race

Specifies the client's race.

- Alaska Native (Aleut, Eskimo, Indian)—Origins in any of the original people of Alaska
- American Indian (other than Alaska Native)—Origins in any of the original people of North America and South America (including Central America) and who maintains cultural identification through tribal affiliation or community attachment
- Asian or Pacific Islander—Origins in any of the original people of the Far East, the Indian subcontinent, Southeast Asia, or the Pacific islands
- Asian—Origins in any of the original people of the Far East, the Indian subcontinent, or Southeast Asia, including, for example, Cambodia, China, India, Japan, Korea, Malaysia, Philippine Islands, Thailand, and Vietnam
- Native Hawaiian or Other Pacific Islander—Origins in any of the original people of Hawaii, Guam, Samoa, or other Pacific islands
- Black or African American—Origins in any of the black racial groups of Africa
- White—Origins in any of the original people of Europe, North Africa, or the Middle East
- Other single race—Client is not classified in any category above or whose origin group, because of area custom, is regarded as a racial class distinct from the above categories
- Two or more races—For use when the state data system allows multiple race selection and more than one race is indicated

Guidelines: If a state does not distinguish between American Indian and Alaska Native, both should be coded as American Indian. If a state does not distinguish between Asian and Native Hawaiian or other Pacific Islander, both should be coded as Asian or Pacific Islander. For states that collect multiple races: a) when a single race is designated, the specific race code should be used; b) if the state collects a primary or preferred race along with additional races, the code for the primary/preferred race should be used; c) if the state uses a system such as an algorithm to select a single

race when multiple races have been designated, the same system may be used to determine the race code for TEDS. When two or more races have been designated and neither (b) nor (c) above apply, the TEDS code for *Two or more races* should be used.

Sex

Identifies the client's gender.

- Male
- Female

Substance Use and Treatment Characteristics

Frequency of use (primary, secondary, and tertiary substances)

Identifies the frequency of use for the client's primary, secondary, and tertiary *substance use*.

- No use in the past month
- 1-3 times in the past month
- 1-2 times in the past week
- 3-6 times in the past week
- Daily

Medication-assisted opioid therapy

Identifies whether the use of methadone, naltrexone or buprenorphine is part of the client's treatment plan.

- Yes
- No

Number of prior treatment episodes

Indicates the number of previous treatment episodes the client has received in any drug or alcohol program. Changes in service for the same episode (transfers) should not be counted as separate prior episodes.

- 0 previous episodes
- 1 previous episode
- 2 previous episodes
- 3 previous episodes
- 4 previous episodes
- 5 or more previous episodes

Guidelines: It is preferred that the number of prior treatments be a self-reporting field collected at the time of client intake. However, this data item may be derived from the state data system if the system has that capability and episodes can be counted for at least several years.

Principal source of referral

Describes the person or agency referring the client to the alcohol or drug use treatment program.

- Alcohol/drug use care provider—Any program, clinic, or other health care provider whose principal objective is treating clients with substance use disorder, or a program whose activities are related to alcohol or other drug use prevention, education, or treatment
- Court/criminal justice referral/DUI/DWI—Any police official, judge, prosecutor, probation officer, or other person affiliated with a federal, state, or county judicial system. Includes referral by a court for DWI/DUI, clients referred in lieu of or for deferred prosecution, or during pretrial release, or before or after official adjudication. Includes clients on pre-parole, pre-release, work or home furlough, or TASC. Client need not be officially designated as "on parole." Includes clients referred through civil commitment. Client referrals on this category are further defined in the TEDS Supplemental Data Set item Detailed criminal justice referral.
- Employer/EAP—A supervisor or an employee counselor
- Individual (includes self-referral)—Includes the client, a family member, friend, or any other individual who would not be included in any of the following categories; includes self-referral due to pending DWI/DUI
- Other community referral—Community or religious organization or any federal, state, or local agency that provides aid in the areas of poverty relief, unemployment, shelter, or social welfare. Self-help groups such as Alcoholics Anonymous (AA), Al-Anon, and Narcotics Anonymous (NA) are also included in this category. Defense attorneys are included in this category.
- Other health care provider—A physician, psychiatrist, or other licensed health care professional; or a general hospital, psychiatric hospital, mental health program, or nursing home
- School (educational)—A school principal, counselor, or teacher; or a student assistance program (SAP), the school system, or an educational agency

Substance use (primary, secondary, or tertiary)

Identifies the client's primary, secondary, and tertiary substance use. Each *Substance use* (primary, secondary, and tertiary) has associated fields for *Route of administration, Frequency of use, Age at first use*, and the TEDS Supplemental Data Set item *Detailed drug code*.

- Alcohol
- Barbiturates—Amobarbital, pentobarbital, phenobarbital, secobarbital, etc.
- Benzodiazepines—Includes alprazolam, chlordiazepoxide, clonazepam, clorazepate, diazepam, flunitrazepam, flurazepam, halazepam, lorazepam, oxazepam, prazepam, temazepam, triazolam, and other unspecified benzodiazepines
- Cocaine/crack

- Heroin
- Inhalants—Includes chloroform, ether, gasoline, glue, nitrous oxide, paint thinner, etc.
- Marijuana/hashish—Includes THC and any other cannabis sativa preparations
- Methamphetamine
- Non-prescription methadone
- Other amphetamines—Includes amphetamines, MDMA, phenmetrazine, and other unspecified amines and related drugs
- Other hallucinogens—Includes LSD, DMT, STP, hallucinogens, mescaline, peyote, psilocybin, etc.
- Other non-barbiturate sedatives or hypnotics—Includes chloral hydrate, ethchlorvynol, glutethimide, methaqualone, and other non-barbiturate sedatives or hypnotics
- Other non-benzodiazepine tranquilizers—Includes meprobamate and other non-benzodiazepine tranquilizers
- Other opiates and synthetics—Includes buprenorphine, codeine, hydrocodone, hydromorphone, meperidine, morphine, opium, oxycodone, pentazocine, propoxyphene, tramadol, and any other drug with morphine-like effects
- Other stimulants—Includes methylphenidate and any other stimulants
- Over-the-counter medications—Includes aspirin, cough syrup, diphenhydramine and other antihistamines, sleep aids, and any other legally obtained nonprescription medication
- PCP—Phencyclidine
- Other—Includes diphenylhydantoin/phenytoin, GHB/GBL, ketamine, etc.
- None

Guidelines: Substance use is further defined in the TEDS Supplemental Data Set item *Detailed drug code*. For guidance on which specific substances to include in the substance categories, please refer to the detailed drug categories listed for Detailed drug code.

Data set considerations for *Substance use* and *Route of administration*:

For states that do collect *Detailed drug code*—Records may have duplicate *Substance use* and identical *Route of administration* if the corresponding *Detailed drug codes* are different or are "multiple" drug codes.

For states that do not collect *Detailed drug code*—A record may not have duplicate *Substance use* with identical *Routes of administration*.

Transaction type

Identifies whether a record is for an initial admission or a transfer/change in service. Note: Some states may use other terminology such as "initial admission" and "transfer admission" in place of "admission" and "transfer."

- A—Admission
- T—Transfer/change in service

Guidelines: For TEDS, a treatment episode is defined as that period of service between the beginning of treatment for drug or alcohol use and the termination of services for the prescribed treatment plan. The episode includes one admission (when services begin) and at least one discharge (when services end). Within a treatment episode, a client may transfer to a different service, facility, provider, program, or location. Each admission and transfer record should have an associated discharge record.

When it is feasible for the state to identify transfers, they should be reported as transfers in admissions data submissions. When admissions and transfers cannot be differentiated in a state data system, such changes in service or facility should be reported to TEDS as admissions.

Data set considerations for transfers:

- All fields from the transfer record should be updated to reflect values at the time of transfer except the following fields, which must have the same values as in the associated (preceding) admission record: *Client ID, Codependent/collateral, Date of birth, Sex, Race,* and *Ethnicity*. If a field cannot be updated, it should be transmitted to TEDS with its value from the associated (preceding) admission record.
- *Date of admission* is defined as the date services begin after the transfer to another service or facility.

Type of treatment service

Describes the type of service and treatment setting in which the client is placed at the time of admission or transfer.

- Ambulatory, detoxification—Outpatient treatment services providing for safe withdrawal in an ambulatory setting (pharmacological or non-pharmacological)
- Ambulatory, intensive outpatient—As a minimum, the client must receive treatment lasting two or more hours per day for three or more days per week
- Ambulatory, non-intensive outpatient—Ambulatory treatment services including individual, family, and/or group services, and may include pharmacological therapies
- Detoxification, 24-hour service, free-standing residential—24-hour per day services in a non-hospital setting providing for safe withdrawal and transition to ongoing treatment
- Detoxification, 24-hour service, hospital inpatient—24-hour per day medical acute care services in a hospital setting for detoxification of persons with severe medical complications associated with withdrawal

- Rehabilitation/residential, hospital (other than detoxification)—24-hour per day medical care in a hospital facility in conjunction with treatment services for alcohol and other drug use and dependency
- Rehabilitation/residential, short-term (30 days or fewer)—Typically, 30 days or less of non-acute care in a setting with treatment services for alcohol and other drug use and dependency
- Rehabilitation/residential, long-term (more than 30 days)—Typically, more than 30 days of non-acute care in a setting with treatment services for alcohol and other drug use and dependency; this may include transitional living arrangements such as halfway houses

Usual route of administration (primary, secondary, and tertiary substances)

Identifies the usual route of administration of the respective *substance use*.

- Inhalation
- Injection (IV or intramuscular)
- Oral
- Smoking
- Other

TEDS Supplemental Data Set

Days waiting to enter treatment

Indicates the number of days from the first contact or request for service until the client was admitted and the first clinical service was provided.

- 0-996—Number of days waiting

Guidelines: This item is intended to capture the number of days the client must wait to begin treatment because of program capacity, treatment availability, admissions requirements, or other program requirements. It should not include time delays caused by client unavailability or client failure to meet any requirement or obligation.

Detailed criminal justice referral

Provides more information about those clients who are coded as "Court/criminal justice referral/ DUI/DWI" in the TEDS Minimum Data Set item *Principal source of referral*.

- Diversionary program (e.g., TASC)
- DUI/DWI
- Other court (not state or federal)
- Other recognized legal entity (e.g., local law enforcement agency, corrections agency, youth services, review board/agency)
- Prison
- Probation/parole
- State/federal court
- Other
- Not applicable

Detailed drug code (primary, secondary, and tertiary substances)

Identifies, in greater detail, the drug use recorded in the TEDS Minimum Data Set item *Substance use*.

- Aerosols
- Alcohol
- Alprazolam (Xanax)
- Amphetamines
- Anesthetics
- Chlordiazepoxide (Librium)
- Clonazepam (Klonopin, Rivotril)

- Clorazepate (Tranxene)
- Codeine
- Crack
- Diazepam (Valium)
- Diphenhydramine
- Diphenylhydantoin/phenytoin (Dilantin)
- Ethchlorvynol (Placidyl)
- Flunitrazepam (Rohypnol)
- Flurazepam (Dalmane)
- GHB/GBL (gamma-hydroxybutyrate, gamma-butyrolactone)
- Glutethimide (Doriden)
- Heroin
- Hydrocodone (Vicodin)
- Hydromorphone (Dilaudid)
- Ketamine (Special K)
- Lorazepam (Ativan)
- LSD
- Marijuana/hashish
- Meperidine (Demerol)
- Meprobamate (Miltown)
- Methadone (non-prescription)
- Methamphetamine/speed
- Methaqualone
- Methylenedioxymethamphetamine (MDMA, Ecstasy)
- Methylphenidate (Ritalin)
- Nitrites

Detailed not in labor force

Provides more information about those clients who are coded as "Not in labor force" in the TEDS Minimum Data Set item *Employment status*.

- Disabled

- Homemaker
- Inmate of institution (prison or institution that keeps a person, otherwise able, from entering the labor force)
- Retired
- Student
- Other
- Not applicable

DSM criteria diagnosis

Specifies the diagnosis of the substance use disorder from the American Psychiatric Association's *Diagnostic and Statistical Manual of Mental Disorders*.

Expected/actual primary source of payment

Identifies the primary source of payment for this treatment episode.

- Blue Cross/Blue Shield
- Medicaid
- Medicare
- Other government payments
- Other health insurance companies
- Self-pay
- Worker's compensation
- No charge (free, charity, special research, or teaching)
- Other

Frequency of attendance at self-help programs

Records the number of times the client has attended a self-help program in the 30 days preceding the date of admission to treatment services.

- No attendance in the past month
- 1-3 times in the past month
- 4-7 times in the past month
- 8-15 times in the past month
- 16-30 times in the past month
- Some attendance in the past month, but frequency unknown

Health insurance

Specifies the client's health insurance (if any). The insurance may or may not cover alcohol or drug treatment.

- Blue Cross/Blue Shield
- Health maintenance organization (HMO)
- Medicaid
- Medicare
- Private insurance (other than Blue Cross/Blue Shield or an HMO)
- Other (e.g., TRICARE)
- None

Living arrangements

Specifies whether the client is homeless, living with parents, in a supervised setting, or living on his or her own.

- Dependent living—Clients living in a supervised setting such as a residential institution, halfway house, or group home, and children (under age 18) living with parents, relatives, or guardians, or in foster care
- Homeless—Clients with no fixed address; includes shelters
- Independent living—Clients living alone or with others without supervision

Marital status

Describes the client's marital status. The following categories are compatible with the U.S. Census.

- Divorced
- Never married—Includes clients whose only marriage was annulled
- Now married—Includes those living together as married
- Separated—Includes those separated legally or otherwise absent from spouse because of marital discord
- Widowed

Number of arrests in the 30 days prior to admission

Records the number of arrests in the 30 days preceding the date of admission to treatment services.

- 00-96—Number of arrests

Pregnant at admission

Specifies whether the client was pregnant at the time of admission.

- Yes
- No
- Not applicable. Use this code for male clients.

Co-occurring mental and substance use disorders

Identifies whether the client has a psychiatric disorder in addition to his or her alcohol or drug use disorder.

- Yes
- No

Source of income support

Identifies the client's principal source of financial support. For children under 18, this field indicates the parents' primary source of income/support.

- Disability
- Public assistance
- Retirement/pension
- Wages/salary
- Other
- None

Veteran status

Identifies whether the client has served in the uniformed services (Army, Navy, Air Force, Marines, Coast Guard, Public Health Service Commissioned Corps, Coast and Geodetic Survey, etc.).

- Yes
- No

TEDS Linked Discharge Data Set

Date of discharge

The date when the client was formally discharged from the treatment facility or service. The date may be the same as the date of last contact. In the event of a change of service or provider within an episode of treatment, it is the date the service terminated or the date the treatment ended at a particular provider.

Date of last contact

The date when the client was last seen for a treatment. The date may be the same as the date of discharge. In the event of a change of service or provider within an episode of treatment, it is the date the client transferred to another service or provider.

Detailed not in labor force at admission/discharge

Records more detailed information about those clients who are coded as *Not in labor force* in the TEDS Minimum Data Set item *Employment status*.

- Disabled
- Homemaker
- Inmate of institution (prison or institution that keeps a person, otherwise able, from entering the labor force)
- Other
- Retired
- Student

Employment status at discharge

See TEDS Minimum Data Set item *Employment status* for definitions.

Frequency of attendance at self-help programs in 30 days prior to admission/discharge

Records the number of times the client has attended a self-help program in the 30 days preceding the date of admission to and discharge from treatment services.

- No attendance in the past month
- 1-3 times in the past month
- 4-7 times in the past month
- 8-15 times in the past month
- 16-30 times in the past month
- Some attendance in the past month, but frequency unknown

Frequency of use at discharge (primary, secondary, and tertiary substances)

See TEDS Minimum Data Set item *Frequency of use* for definitions.

Living arrangements at admission/discharge

Records whether the client is homeless, living with parents, in a supervised setting, or living on his or her own at the time of admission and discharge.

- Dependent living—Clients living in a supervised setting such as a residential institution, halfway house, or group home, and children (under age 18) living with parents, relatives, or guardians or in foster care
- Homeless—Clients with no fixed address; includes shelters
- Independent living—Clients living alone or with others without supervision

Number of arrests in 30 days prior to admission/discharge

Records the number of arrests in the 30 days preceding the date of admission to and discharge from treatment services.

- 00-96—Number of arrests

Reason for discharge, transfer, or discontinuance of treatment

Indicates the outcome of treatment or the reason for transfer or discontinuance of treatment.

- Death
- Incarcerated—Jail, prison, house confinement
- Left against professional advice (dropped out)—Client chose not to complete treatment program, with or without specific advice to continue treatment; includes clients who dropped out for unknown reasons and clients who did not receive a treatment service for some time and were discharged for administrative reasons
- Terminated by facility—Treatment terminated by action of facility, generally because of client non-compliance or violation of rules, laws, or procedures (excludes client drop-out, incarceration, or client-motivated reason for discontinuance)
- Transferred to another substance use program or facility—Client was transferred to another substance use treatment service type, program, provider, or facility; client may or may not have reported to the new program or facility
- Treatment completed—All parts of the treatment plan or program were completed.
- Other—Client moved, became ill, was hospitalized, or other reason somewhat out of client's control
- Unknown—Client status at discharge not known (e.g., record incomplete or lost); not to be used for clients who dropped out of treatment

Substance use at discharge (primary, secondary, or tertiary)
See TEDS Minimum Data Set item *Substance use* for definitions.

Type of treatment service at discharge
See TEDS Minimum Data Set item *Type of treatment service* for definitions.

Appendix C.
List of Contributors

This report was prepared for the Center for Behavioral Health Statistics and Quality (CBHSQ), Substance Abuse and Mental Health Services Administration, U.S. Department of Health and Human Services (HHS), by Eagle Technologies, Inc., under Contract No. HHSS283201600001C.

Contributors and reviewers at Eagle, listed alphabetically, include Ngwatung Akamangwa, Anand Borse, Muluneh Desisa, Philip Dokpesi, Tsegereda Kifle, Carissa Marcelle, Komi Mati, David Peabody, Parth Thakore, Qiujing Tao, Doren Walker (Project Director), and John Zuwasti Curran. Production of the report at SAMHSA was managed by Cathie Alderks (COR). SAMHSA contributors and reviewers, listed alphabetically, include: Cathie Alderks, Herman Alvarado, Elizabeth Hoeffel, Heydy Juarez, Sharon Liu, and Nichele Waller.
