## National Survey of Substance Abuse Treatment Services (N-SSATS)

The National Survey of Substance Abuse Treatment Services (N-SSATS) is an annual survey of facilities providing substance abuse treatment. It is conducted by the Substance Abuse and Mental Health Services Administration (SAMHSA). N-SSATS is designed to collect data on the location, characteristics, services offered, and number of clients in treatment at alcohol and drug abuse treatment facilities (both public and private) throughout the 50 states, the District of Columbia, U.S. territories, and other jurisdictions.

More information on the methodology used for N-SSATS is available at:

<http://samhsa.gov/data/2k3/NSSATS/NSSATS.pdf>

The 2014 N-SSATS included 14,152 substance abuse treatment facilities. The survey response rate was 93.7 percent overall.

## 2014 State Profile — U.S. Territories and Other Jurisdictions National Survey of Substance Abuse Treatment Services (N-SSATS)

The National Survey of Substance Abuse Treatment Services (N-SSATS) is an annual survey of facilities providing substance abuse treatment. It is conducted by the Substance Abuse and Mental Health Services Administration (SAMHSA). N-SSATS is designed to collect data on the location, characteristics, services offered, and number of clients in treatment at alcohol and drug abuse treatment facilities (both public and private) throughout the 50 states, the District of Columbia, U.S. territories, and other jurisdictions.

More information on the methodology used for N-SSATS is available at:

<http://samhsa.gov/data/2k3/NSSATS/NSSATS.pdf>

In the U.S. territories (excluding Puerto Rico), combined with other jurisdictions, nine substance abuse treatment facilities were included in the 2014 N-SSATS. The survey response rate in the U.S. territories (excluding Puerto Rico), combined with other jurisdictions, was 100 percent.
