Terms of Use

These data are distributed under the following terms of use. By continuing past this page, you signify your agreement to comply with the requirements as stated below:

Privacy of Study Respondents

Any intentional identification of a study respondent (whether an individual or an organization) or unauthorized disclosure of identifiable information violates the pledge given to the providers of the information. Disclosure of identifiable information may also be punishable under federal law. Therefore, users of data agree:

- To use these datasets solely for research or statistical purposes and not for reidentification of specific study respondents.
- To make no use of the identity of any study respondents discovered inadvertently and to report any such discovery to SAMHSA (SAMHSA_support@smdi.com).

Public Domain Notice

All material appearing in this report is in the public domain and may be reproduced or copied without permission from SAMHSA. Citation of the source is appreciated. However, this publication may not be reproduced or distributed for a fee without the specific, written authorization of the Office of Communications, SAMHSA, U.S. Department of Health and Human Services.

Data Citation

Data users agree to reference the recommended bibliographic citation in any of the publications that use these public use SAMHSA data.

Authors of publications that use these data are required to send citations of their published works to SAMHSA for inclusion in a database of related publications (SAMHSA_support@smdi.com)

Disclaimer

Data users acknowledge that SAMHSA and SMDI (Synectics) will bear no responsibility for use of the data or for interpretations or inferences based upon such uses.

Violations

If SAMHSA or SMDI determines that this “Terms of Use” agreement has been violated, then possible sanctions could include:

- Report of the violation to the Research Integrity Officer, Institutional Review Board, or Human Subjects Review Committee of the user's institution.
- If the confidentiality of human subjects has been violated, then report of the violation may be made to the Federal Office for Human Research Protections.
- Report of the violation of federal law to the United States Attorney General for possible prosecution.
- Court awarded payments of damages to any individual(s)/organization(s) harmed by the breach of confidential data.

TREATMENT EPISODE DATA SET – ADMISSIONS CODEBOOK, 2013

Introduction

This codebook is for the Treatment Episode Data Set – Admissions (TEDS-A) for admissions to substance abuse treatment occurring in 2013. TEDS-A provides demographic and substance abuse characteristics of admissions to alcohol or drug treatment in facilities that report to individual state administrative data systems.

The TEDS system is comprised of two major components, the Admissions Data Set and the Discharges Data Set (TEDS-D). The TEDS-Admissions (TEDS-A) file is an established program; data were first reported for TEDS-A in 1992. The TEDS-D began more recently, with the first data reported in 2000. TEDS includes treatment data that are routinely collected by states to monitor their individual substance abuse treatment systems. Selected data items from the individual state data files are converted to a standardized format that is consistent across states. These standardized data constitute TEDS.

The TEDS-A is comprised of a Minimum Data Set collected by all states, and a Supplemental Data Set collected by some states. The Minimum Data Set consists of 19 items that include:

- Demographic information;
- Primary, secondary, and tertiary substances used by the subject, and their route of administration, frequency of use, and age at first use;
- Source of referral to treatment;
- Number of prior treatment episodes; and
- Service type, including planned use of medication-assisted (i.e., with methadone or buprenorphine) opioid therapy.

The 15 Supplemental Data Set items include psychiatric, social, and economic measures.

A full list of the variables can be viewed in the Variable Information and Frequency sections of this codebook.

This codebook provides background and descriptive information for the TEDS-A public-use files, limitations of the data, and frequencies. References are available detailing the data collected in each state with the TEDS data elements, including state-by-state descriptions of exceptions or anomalies in reporting practices. Users may refer to the [TEDS Crosswalks](#) available from SAMHSA. The crosswalks are frequently updated as new information becomes available.

Since 1992, the Office of Applied Studies (OAS) of the Substance Abuse and Mental Health Services Administration (SAMHSA), U.S. Department of Health and Human Services (DHHS) has funded and been responsible for TEDS. It coordinates and manages the collection of TEDS data from the states. In 2010, the OAS was renamed to the Center for Behavioral Health Statistics and Quality (CBHSQ) and then to Behavioral Health Services Information

System (BHSIS). The unit of analysis is treatment admissions to state-licensed or certified substance abuse treatment centers that receive federal public funding.

Descriptive and analytical reports from TEDS are developed by BHSIS to provide national and state-level data on the number and types of clients treated and the characteristics of facilities providing services.

Data Collection

The [“Treatment Episode Data Set State Instruction Manual – Admissions Data”](#) is available from the SAMHSA Web site and provides complete instructions on how the TEDS-A data are processed and submitted by the states.

Confidentiality Protection

Several measures were taken to protect the confidentiality of the TEDS-A records. Variables that potentially identify an individual in their raw form underwent routine top- or bottom-coding in order to prevent high and low codes from distinguishing a respondent’s record. For example, AGE as a continuous variable has the potential to identify both the youngest and oldest participants in a public release file. Hence, AGE was recoded into 11 categories for the public-use file to reduce disclosure risk. The lowest category for age combines the ages of *12-14*. Similarly, ages of *55 and older* were top-coded. All the variables recoded are documented in Appendix B.

Disclosure analysis is used to identify records that remained unique after routine recoding measures were taken to protect confidentiality. Disclosure analysis is used to discern combinations of indirect identifiers that potentially link an individual to a record. Particular attention was given to the analytic importance of geographic data and of subgroup populations. Consequently, data swapping was applied to the TEDS in order to satisfy stringent confidentiality standards while preserving the analytic value of the public-use file.

The original location of a record in TEDS-A cannot be known for certain due to the use of data swapping. This method has several benefits over other disclosure protection options: (1) the overall impact to the data is typically small; (2) nearly all of the data are left intact; (3) data for special populations (e.g., minorities, pregnant women) are no more impacted than other data; (4) the procedures typically do not affect any analytic uses of the file; and (5) the procedures allow greater detail to remain on the public use file (e.g., the original ethnicity codes).

Universe

The universe for TEDS-A is admissions in calendar year 2013 that were received and processed through January 23, 2015.

Coverage

The TEDS attempts to include all admissions to providers receiving public funding. Because each state or jurisdiction decides the TEDS eligibility of a provider, there is no independent check on the actual sources of funding. Although SAMHSA requests submission of TEDS data on all admissions to any publicly funded treatment facility, reporting in some state agencies is structured so that only clients treated with public funds are included in the TEDS. The number of clients in these facilities whose treatment is not publicly funded is unknown.¹

Data Limitations

The TEDS, while comprising a significant proportion of all admissions to substance abuse treatment, does not include all such admissions. The TEDS is a compilation of facility data from state administrative systems. The scope of facilities included in the TEDS is affected by differences in state licensure, certification, accreditation, and disbursement of public funds. For example, some state substance abuse agencies regulate private facilities and individual practitioners, while others do not. In some states, hospital-based substance abuse treatment facilities are not licensed through the state substance abuse agency. Some state substance abuse agencies track treatment in correctional facilities (state prisons and local jails), while others do not.

In general, facilities reporting TEDS data receive state alcohol and/or drug agency funds (including Federal Block Grant funds) for the provision of alcohol and/or drug treatment services. Most states are able to report all admissions to all eligible facilities, although some report only admissions financed by public funds. States may report data from facilities that do not receive public funds, but generally do not because of the difficulty in obtaining data from these facilities. The TEDS generally does not include data on facilities operated by federal agencies, including the Bureau of Prisons, the Department of Defense, and the Department of Veterans Affairs. However, some facilities operated by the Indian Health Service are included.

The primary goal of TEDS is to monitor the characteristics of treatment episodes for substance abusers. Implicit in the concept of treatment is a planned, continuing treatment regimen. Thus, the TEDS does not include early intervention programs; these are considered to be prevention programs. Crisis intervention facilities such as sobering-up stations and hospital emergency departments are not included in the TEDS.

The TEDS is a large and powerful data set. Like all data sets, however, care must be taken that interpretation does not extend beyond the limitations of the data. Limitations fall into two broad

categories: those related to the scope of the data collection system, and those related to the difficulties of aggregating data from highly diverse state data collection systems.²

Limitations to be kept in mind while analyzing TEDS data include:

- The number and client mix of TEDS records depends, to some extent, on external factors - including the availability of public funds. In states with higher funding levels, a larger percentage of the substance abusing population may be admitted to treatment, including the less severely impaired and the less economically disadvantaged.
- The primary, secondary, and tertiary substances of abuse reported to the TEDS are those substances that led to the treatment episode, and not necessarily a complete enumeration of all drugs used at the time of admission.
- The way an admission is defined may vary from state to state such that the absolute number of admissions is not a valid measure for comparing states.
- States continually review the quality of their data processing. As systematic errors are identified, revisions may be enacted in historical TEDS data files. While this system improves the data set over time, reported historical statistics may change slightly from year to year.
- States vary in the extent to which coercion plays a role in referral to treatment. This variation derives from criminal justice practices and differing concentrations of abuser subpopulations.
- Public funding constraints may direct states to selectively target special populations, for example, pregnant women or adolescents.
- TEDS includes treatment admissions and in many states the files may *include multiple admissions for the same client*. Therefore, any statistics derived from the data will represent admissions, not clients. It is possible for clients to have multiple initial admissions within a state and even within providers that have multiple treatment sites within the state. A few states uniquely identify clients at the state-level and several more states are attempting to achieve this level of client identification. The TEDS provides a good national snapshot of what is seen at admission to treatment, but is currently unable to follow individual clients through a sequence of treatment episodes.
- The TEDS distinguishes between "transfer admissions" and "initial admissions." Transfer admissions include clients transferred for distinct services within an episode of treatment. Only initial admissions are included in the public use files.

- Some states have no Opioid Treatment Programs (OTPs) that provide medication-assisted therapy using methadone and/or buprenorphine. See the TEDS state-by-state crosswalk for information regarding data collected by each state.

Created Variables

The TEDS files contain several variables created from the original variables submitted by the states. For example, a variable was created to indicate whether each drug was included as a primary, secondary, or tertiary drug of abuse. These are called *flag* variables and labeled according to the drug, such as *alcflg* for alcohol flag variable, *cokeflg* for cocaine flag, etc.

A variable that facilitates comparison of each state to all other states can be easily created. These created variables are referred to as *geographic state indicator variables* and can be labeled according to state name such as *AKSTATE* for Alaska and *ALSTATE* for Alabama. These variables are useful for examining characteristics of treatment in one state compared to the rest of the nation. The *state indicator variables* are not included in the downloadable data files for TEDS because they approximately double the size of the files, which are large at the outset due to the number of TEDS records. Therefore, sample SPSS programming syntax is provided below in order to create and append the state indicator variable to downloaded files:

```
* Compute TEDS state indicator for Alaska (STFIPS=2).

do if (STFIPS eq 2).
compute AKSTATE=1.
else.
compute AKSTATE=2.
end if.

variable labels AKSTATE "ALASKA STATE INDICATOR".

value labels AKSTATE 1 "ALASKA" 2 "ALL OTHER STATES".

format AKSTATE (f1.0).
```

Contents of Public-Use Files

The TEDS public use file contains Minimum, Supplemental, and Additional data for 49 states plus Puerto Rico and Washington DC. Pennsylvania did not report usable data for the year 2013.

The TEDS Admissions public-use files are provided in SAS System, SPSS System, Stata System, R System and ASCII comma-delimited formats. Supplemental files containing formats are available for the SAS System files. A separate codebook is provided for each year's data file.

The number of observations and variables for 2013 are as follows:

Number of observations: 1,683,451 _____

Number of variables: 63

User Responsibility

Users are reminded that the data are to be used solely for statistical analysis and reporting of aggregated information and not for investigation or identification of specific individuals or organizations.

RACE: RACE

Specifies the client's race:

- ALASKA NATIVE (ALEUT, ESKIMO, INDIAN): Origins in any of the original people of Alaska.
- AMERICAN INDIAN (OTHER THAN ALASKA NATIVE): Origins in any of the original people of North America and South America (including Central America) and who maintain cultural identification through tribal affiliation or community attachment.
- ASIAN OR PACIFIC ISLANDER: Origins in any of the original people of the Far East, the Indian subcontinent, Southeast Asia, or the Pacific Islands.
- BLACK OR AFRICAN AMERICAN: Origins in any of the black racial groups of Africa.
- WHITE: Origins in any of the original people of Europe, North Africa, or the Middle East.
- ASIAN: Origins in any of the original people of the Far East, the Indian subcontinent, or Southeast Asia, including for example, Cambodia, China, India, Japan, Korea, Malaysia, Philippine Islands, Thailand, and Vietnam.
- OTHER SINGLE RACE: Use this category for instances in which the client is not classified in any category above or whose origin group, because of area custom, is regarded as a racial class distinct from the above categories. (Do not use this category for clients indicating multiple races.)
- TWO OR MORE RACES: Use this code when the state data system allows multiple race selection and more than one race is indicated.
- NATIVE HAWAIIAN OR OTHER PACIFIC ISLANDER: Origins in any of the original peoples of Hawaii, Guam, Samoa, or other Pacific Islands.

Guidelines: If the state does not distinguish between American Indian and Alaska Native, code both as 02, American Indian. States that can separate 'Asian' and 'Native Hawaiian or Other Pacific Islander' should use codes 13 and 23 for those categories. States that cannot make the separation should use the combined code 03 until the separation becomes possible. Once a state begins using codes 13 and 23, code 03 should no longer be used by that state. States are asked to convert to the new categories when possible.

ETHNIC: ETHNICITY (HISPANIC ORIGIN)

Specifies client's specific Hispanic origin, if applicable.

- PUERTO RICAN: Of Puerto Rican origin, regardless of race.
- MEXICAN: Of Mexican origin, regardless of race.
- CUBAN: Of Cuban origin, regardless of race.
- OTHER SPECIFIC HISPANIC: Of known Central or South American or any other Spanish cultural origin (including Spain), other than Puerto Rican, Mexican, or Cuban, regardless of race.
- NOT OF HISPANIC ORIGIN:
- HISPANIC, SPECIFIC ORIGIN NOT SPECIFIED: Of Hispanic origin, but specific origin not known or not specified.

MARSTAT: MARITAL STATUS

Describes the client's marital status. The following categories are compatible with the U.S. Census.

- NEVER MARRIED: Includes clients whose only marriage was annulled.
- NOW MARRIED: Includes those living together as married.
- SEPARATED: Includes those separated legally or otherwise absent from spouse because of marital discord.
- DIVORCED, WIDOWED

Value	Label	Unweighted Frequency	%

EDUC: EDUCATION

Specifies the highest school grade (number of school years) completed by the client.

Guidelines: States that use specific categories for designating education level should map their categories to a logical 'number of years of school completed.' The mapping should be recorded in the State Crosswalk. For example, a state category of 'Associate Degree' should be mapped to 14; 'Bachelor Degree' would be mapped to 16, etc.

EMPLOY: EMPLOYMENT STATUS

Designates the client's employment status at the time of admission or transfer:

- FULL TIME: Working 35 hours or more each week; including active duty members of the uniformed services.
- PART TIME: Working fewer than 35 hours each week.
- UNEMPLOYED: Looking for work during the past 30 days or on layoff from a job.
- NOT IN LABOR FORCE: Not looking for work during the past 30 days or a student, homemaker, disabled, retired, or an inmate of an institution. Clients in this category are further defined in the Supplemental Data Set item 'Detailed Not in Labor Force' (DET NFLF).

Guidelines: Seasonal workers are coded in this category based on their employment status at time of admission. For example, if they are employed full time at the time of admission, they are coded as 01. If they are not in labor force at time of admission, they are coded 04.

Value	Label	Unweighted Frequency	%
1	FULL TIME	250,527	14.9%

VET: VETERAN STATUS

Specifies whether the client has served in the uniformed services (Army, Navy, Air Force, Marines, Coast Guard, Public Health Service Commissioned Corps, Coast and Geodetic Survey, etc).

Guidelines: A veteran is a person 16 years or over who has served (even for a short time), but is not now serving, on active duty in the US Army, Navy, Marine Corps, Coast Guard, or Commissioned Corps of the US Public Health Service or National Oceanic and Atmospheric Administration, or who served as a Merchant Marine seaman during World War II. Persons who served in the National Guard or Military Reserves are classified as veterans only if they were ever called or ordered to active duty, not counting the 4-6 months for initial training or yearly summer camps.

LIVARAG: LIVING ARRANGEMENT

Specifies whether the client is homeless, living with parents, living in a supervised setting, or living independently on his or her own.

- HOMELESS: Clients with no fixed address; includes shelters.
- DEPENDENT LIVING: Clients living in a supervised setting such as a residential institution, halfway house or group home, and children (under age 18) living with parents, relatives, or guardians or in foster care.
- INDEPENDENT LIVING: Clients living alone or with others without supervision. Includes adult children (age 18 or over) living with parents.

ARRESTS: NUMBER OF ARRESTS IN 30 DAYS PRIOR TO ADMISSION

The number of arrests in the 30 days preceding the date of admission to treatment services.

Guidelines: This item is intended to capture the number of times the client was arrested for any cause during the 30 days preceding the date of admission to treatment. Any formal arrest is to be counted regardless of whether incarceration or conviction resulted and regardless of the status of the arrest proceedings at the time of admission.

Note: Data began being collected for arrests starting in 2008. Data on arrests is not available prior to that.

CBSA: FIPS 2000 CBSA CODE

The term 'Core Based Statistical Area' (CBSA) is a collective term for both metro and micro areas. Metropolitan and micropolitan statistical areas (metro and micro areas) are geographic entities defined by the U.S. Office of Management and Budget (OMB) for use by Federal statistical agencies in collecting, tabulating, and publishing Federal statistics. A metro area contains a core urban area of 50,000 or more population, and a micro area contains an urban core of at least 10,000 (but less than 50,000) population. Each metro or micro area consists of one or more counties and includes the counties containing the core urban area, as well as any adjacent counties that have a high degree of social and economic integration (as measured by commuting to work) with the urban core.

The term 'Core Based Statistical Area' (CBSA) is a collective term for both metro and micro areas. Metropolitan and micropolitan statistical areas (metro and micro areas) are geographic entities defined by the U.S. Office of Management and Budget (OMB) for use by Federal statistical agencies in collecting, tabulating, and publishing Federal statistics. A metro area contains a core urban area of 50,000 or more population, and a micro area contains an urban core of at least 10,000 (but less than 50,000) population. Each metro or micro area consists of one or more counties and includes the counties containing the core urban area, as well as any adjacent counties that have a high degree of social and economic integration (as measured by commuting to work) with the urban core.

PMSA: FIPS 1990 MSA CODE

According to the U.S. Bureau of the Census, if an area that qualifies as a Metropolitan Area (MA) has more than one million persons, PMSAs may be defined within it. PMSAs consist of a large urbanized county or cluster of counties that demonstrates very strong internal economic and social links, in addition to close ties to other portions of the larger area. When PMSAs are established, the larger area of which they are component parts is designated a consolidated metropolitan statistical area (CMSA). In New England States, metropolitan areas follow the New England County Metropolitan Area (NECMA) definition.

PMSA: FIPS 1990 MSA CODE

According to the U.S. Bureau of the Census, if an area that qualifies as a Metropolitan Area (MA) has more than one million persons, PMSAs may be defined within it. PMSAs consist of a large urbanized county or cluster of counties that demonstrates very strong internal economic and social links, in addition to close ties to other portions of the larger area. When PMSAs are established, the larger area of which they are component parts is designated a consolidated metropolitan statistical area (CMSA). In New England States, metropolitan areas follow the New England County Metropolitan Area (NECMA) definition.

SERVSETA: SERVICE SETTING AT ADMISSION

Describes the type of service and treatment setting in which the client is placed at the time of admission or transfer.

- **DETOXIFICATION, 24-HOUR SERVICE, HOSPITAL INPATIENT:**

24 hour per day medical acute care services in hospital setting for detoxification of persons with severe medical complications associated with withdrawal.

- **DETOXIFICATION, 24-HOUR SERVICE, FREE-STANDING RESIDENTIAL:**

24 hour per day services in non-hospital setting providing for safe withdrawal and transition to ongoing treatment.

- **REHABILITATION/RESIDENTIAL - HOSPITAL (OTHER THAN DETOX):**

24 hour per day medical care in a hospital facility in conjunction with treatment services for alcohol and other drug abuse and dependency.

- **REHABILITATION/RESIDENTIAL - SHORT TERM (30 DAYS OR FEWER):**

Typically, 30 days or less of non-acute care in a setting with treatment services for alcohol and other drug abuse and dependency.

- **REHABILITATION/RESIDENTIAL - LONG TERM (MORE THAN 30 DAYS):**

Typically, more than 30 days of non-acute care in a setting with treatment services for alcohol and other drug abuse and dependency; this may include transitional living arrangements such as halfway houses.

- **AMBULATORY - INTENSIVE OUTPATIENT:**

As a minimum, the client receives treatment lasting two or more hours per day for three or more days per week.

- **AMBULATORY - NON-INTENSIVE OUTPATIENT:**

Ambulatory treatment services including individual, family, and/or group services, and may include pharmacological therapies.

- **AMBULATORY - DETOXIFICATION:**

Outpatient treatment services providing for safe withdrawal in an ambulatory setting (pharmacological or non-pharmacological).

PSOURCE: PRINCIPAL SOURCE OF REFERRAL

Describes the person or agency referring the client to the alcohol or drug abuse treatment program:

- **INDIVIDUAL (INCLUDES SELF-REFERRAL):** Includes the client, a family member, friend, or any other individual who would not be included in any of the following categories. Includes self-referral due to pending DWU/DUI.
- **ALCOHOL/DRUG ABUSE CARE PROVIDER:** Any program, clinic, or other HEALTH CARE PROVIDER whose principal objective is treating clients with substance abuse problems, or a program whose activities are related to alcohol or other drug abuse prevention, education, or treatment.
- **OTHER HEALTH CARE PROVIDER:** A physician, psychiatrist, or other licensed health care professional; or general hospital, psychiatric hospital, mental health program, or nursing home.
- **SCHOOL (EDUCATIONAL):** A school principal, counselor, or teacher; or a student assistance program (SAP), the school system, or an educational agency.
- **EMPLOYER/EAP:** A supervisor or an employee counselor.
- **OTHER COMMUNITY REFERRAL:** Community or religious organization or any Federal, State, or local agency that provides aid in the areas of poverty relief, unemployment, shelter, or social welfare. Self-help groups such as Alcoholics Anonymous (AA), Al-Anon, and Narcotics Anonymous (NA) are also included in this category. Defense attorneys are also included in this category.
- **COURT / CRIMINAL JUSTICE REFERRAL / DUI/DWI:** Any police official, judge, prosecutor, probation officer, or other person affiliated with a Federal, State, or county judicial system. Includes referral by a court for DWI/DUI, clients referred in lieu of or for deferred prosecution, or during pretrial release, or before or after official adjudication. Includes clients on pre-parole, pre-release, work or home furlough, or TASC. Client need not be officially designated as 'on parole'. Includes clients referred through civil commitment. Client referrals in this category are further defined in the Supplemental Data Set item 'Detailed Criminal Justice Referral (DETCRIM)'.

SUB2: SUBSTANCE PROBLEM CODE (SECONDARY)

This field identifies the client's secondary substance problem.

(1) NONE

(2) ALCOHOL

(3) COCAINE/CRACK

(4) MARIJUANA/HASHISH: Includes THC and any other cannabis sativa preparations.

(5) HEROIN

(6) NON-PRESCRIPTION METHADONE

(7) OTHER OPIATES AND SYNTHETICS: Includes buprenorphine, codeine, Hydrocodone, hydromorphone, meperidine, morphine, opium, oxycodone, pentazocine, propoxyphene, tramadol, and any other drug with morphine-like effects.

(8) PCP: Phencyclidine

(9) OTHER HALLUCINOGENS: Includes LSD, DMT, STP, hallucinogens, mescaline, peyote, psilocybin, etc.

(10) METHAMPHETAMINE

(11) OTHER AMPHETAMINES: Includes amphetamines, MDMA, phenmetrazine, and other unspecified amines and related drugs.

(12) OTHER STIMULANTS: Includes methylphenidate and any other stimulants.

(13) BENZODIAZEPINES: Includes alprazolam, chlordiazepoxide, clonazepam, clorazepate, diazepam, flunitrazepam, flurazepam, halazepam, lorazepam, oxazepam, prazepam, temazepam, triazolam, and other unspecified benzodiazepines.

(14) OTHER NON-BENZODIAZEPINE TRANQUILIZERS: Includes meprobamate, tranquilizers, etc.

(15) BARBITURATES: Includes amobarbital, pentobarbital, phenobarbital, secobarbital, etc.

(16) OTHER NON-BARBITURATE SEDATIVES OR HYPNOTICS: Includes chloral hydrate, ethchlorvynol, glutethimide, methaqualone, sedatives/hypnotics, etc.

(17) INHALANTS: Includes chloroform, ether, gasoline, glue, nitrous oxide, paint thinner, etc.

(18) OVER-THE-COUNTER MEDICATIONS: Includes aspirin, cough syrup, diphenhydramine and other anti-histamines, sleep aids, and any other legally obtained non-prescription medication.

(20) OTHER: Includes diphenylhydantoin/phenytoin, GHB/GBL, ketamine, etc.

DSMCRIT: DSM DIAGNOSIS

The diagnosis of the substance abuse problem from the American Psychiatric Association's Diagnostic and Statistical Manual of Mental Disorders. DSM IV is preferred, but use of the third Edition, or ICD codes is permissible. If the DSM IV is not used, the state must specify the coding system in the state crosswalk.

The discrete diagnosis codes have been recoded into categories related to abuse of and dependence on specific substances, mental health conditions, and other conditions.
